Statement No. 6—Detail of Major Project Allocations for Construction of Highways and Bridges for the 1974-75 Fiscal Year, Compared to Budget Allocations—Continued

COUNTY	ROUTE	DESCRIPTION	APPROX. MILEAGE	ORIGINAL	REVISED AS OF 10-1-74	EXPENDITURES AND CONTRACT OBLIGATIONS 6-30-75	DIFFERENCE
--------	-------	-------------	--------------------	----------	-----------------------------	--	------------

REASONS FOR REVISIONS

- A Savings—Funds in excess of project requirements.
- B Project or portion of project deferred or deleted.
- C Decrease due to change in scope of work.
- D Decrease project or portion of project financed from other funds.
- E Additional funds to cover increases in project costs or to advance construction.
- F Additional funds required because of revision of design standards or scope of work.
- G Additional funds required because of low budget estimate or higher construction costs.
- H Additional project to improve deficient roadway or structure.
- I Additional project to repair, replace or remove a deteriorated roadway or structure.
- J Additional project to modify interchange.
- K Decrease due to refinancing of project from ensuing fiscal year budget.

Statement No. 8—Detail of Major Project Allocations for Construction of Highways and Bridges for the 1975-76 Fiscal Year, Compared to Budget Allocations

COUNTY	ROUTE & POST MI.	DESCRIPTION	APPROX. MILEAGE	ESTIMATED COST		DIFFERENCE
				ORIGINAL	REVISED AS OF 10-1-75	
NORTHERN GROUP OF COUNTIES						
Alameda	13	In Oakland from Redwood Road to Route 24; roadway reconstruction	4.3	\$560,000	\$560,000	-
Alameda	5.4/9.7	In Fremont from Route 262 to 0.6 mile south of the Winton Avenue in Hayward (portions); pavement grinding and grooving	14.7	395,000	395,000	-
Alameda	185	In Oakland from 101st Avenue to 80th Avenue; roadway reconstruction	1.3	210,000	-	-210,000 ^B
Alameda	7.1/8.3	From Route 680 in Fremont to 0.1 mile south of Decoto Road in Union City (portions); widen 2-lane conventional to 4 lanes. Co-op project (Total estimate \$5,731,000)	6.6	-	895,000	895,000 ^I
Alameda	238	Near Castro Valley from 0.3 mile west of Route 680 to 0.4 mile west of Eden Canyon Road; 8-lane freeway (Total estimate \$34,000,000; \$10,000,000 1976-77 F.Y.)	6.6	-	24,000,000	24,000,000 ^L
Alameda	0.0/6.6	Near Dublin at the northwest quadrant of the Dublin Boulevard-San Ramon Road intersection; Bay Rapid Transit fringe parking facility. Co-op project (Total estimate \$1,070,000)	-	990,000	990,000	-
Alameda	580	From Route 88 at Martell to 0.5 mile south of Rancheria Creek (portions); interim reconstruction and widen (Total estimate \$1,888,000, \$600,000 1974-75 F.Y.) ..	2.2	-	1,246,000	1,246,000 ^C
Alameda	21.0/27.6	Near Oroville on Route 149 from Route 70 to Route 99 and on Route 99 from Route 149 to 0.5 mile north of Durham Highway; 2- and 4-lane expressway and 4-lane freeway (Total estimate \$5,400,000, \$1,700,00 1974-76 F.Y.)	7.7	3,700,000	3,208,000	-492,000 ^A
Contra Costa	4	In and near Concord from 0.4 mile east of Route 242 to Willow Pass Road; 6-lane freeway (Total estimate \$24,625,000, \$5,960,000 1974-75 F.Y., \$12,665,000 1976-77 F.Y.)	1.9	6,000,000	7,900,000	1,900,000 ^E
Contra Costa	R15.1/R16.9	In Pittsburg from west of Railroad Avenue to west of A Street in Antioch; pavement grinding	4.7	245,000	-	-245,000 ^B
Contra Costa	4	In and near Brentwood from 0.2 mile north of Lone Tree Way to 0.3 mile south of Balfour Road; roadway reconstruction....	3.1	540,000	-	-540,000 ^B
Contra Costa	4	At Old River Bridge No. 29-45, west of Stockton; replace bridge deck	-	300,000	-	-300,000 ^B
San Joaquin	48.4/0.0	In and near Meridian from 0.5 mile west of Sacramento River to Wood Road; 2-lane conventional and replace bridge (Total estimate \$5,780,000, \$2,010,000 1974-75 F.Y.)	1.7	1,990,000	3,770,000	1,780,000 ^E
Colusa	20	From El Portal Drive in Richmond to 0.7 mile south of Appian Way in Pinole; reconstruct outside lanes and median and construct concrete median barrier..	1.7	-	1,800,000	1,800,000 ^C
Sutter	38.9/39.4	On the Carquinez Bridge; construct bridge earthquake restrainers	0.9	400,000	-	-400,000 ^B
Sutter	0.0/R1.2	In and near Concord, on Route 242 from 0.5 mile south of Olivera Road to Route 4 and on Route 4 from 0.2 mile west of Solano Way to 0.3 mile west of Port Chicago Highway; construct interchange (Total estimate \$16,600,000, \$14,600,000 1976-77 F.Y.)	2.7	2,000,000	2,000,000	-
Contra Costa	80	From 2.2 to 5.6 miles north of Gasquet; 4-lane expressway	3.4	1,910,000	-	-1,910,000 ^D
Contra Costa	5.2/6.9	From Tulare County Line to Route 180; widen, construct dikes and improve drainage	8.4	273,000	-	-273,000 ^B
Contra Costa	80	From Route 33 to Lemoore Naval Air Station; widen and resurface	22.9	960,000	-	-960,000 ^B
Solano	13.5/14.1					
Contra Costa	0.0/0.3					
Contra Costa	242.4

REASONS FOR REVISIONS

- ^A Savings—funds in excess of project requirements.
^B Project or portion of project deferred or deleted.
^C Decrease due to change in scope of work.
^D Decrease project or portion of project financed from other funds.
^E Additional funds to cover increases in project costs or to advance construction.
^F Additional funds required because of low budget estimate or higher construction costs.
^G Additional project to improve deficient roadway or structure.
^H Additional project to improve traffic safety or traffic service.
^I Additional project to relieve traffic congestion.
^J Additional project to install or revise traffic regulatory or safety devices.
^K Additional project to repair, replace or remove a deteriorated roadway or structure.
^L Additional project for freeway or expressway construction.
^M Additional project to construct BARTD parking structure.
^N Additional project; transfer from different fiscal year.
^O Decrease due to refinancing of project from ensuing fiscal year budget.

Statement No. 10—Expenditures for Maintenance by Routes for the
Fiscal Year July 1, 1974 to June 30, 1975

(Includes Maintenance to Toll Bridges under Section 188.3 of Streets and Highways Code)

ROUTE	AMOUNT
1. Route 5 south of San Juan Capistrano to Route 101 near El Rio; Route 101 near Las Cruces to Route 101 near Pismo Beach via the vicinity of Lompoc and Guadalupe; Route 101 near San Luis Obispo to Route 280 south of San Francisco along the coast via Cambria, San Simeon and Santa Cruz; Route 280 near the south boundary of the City and County of San Francisco to Route 480 in San Francisco; Route 101 near the southerly end of Marin Peninsula to Route 101 near Fernbridge via the coast route through Jenner, Westport, and Ferndale	\$4,622,185
2. Route 1 near Santa Monica to Route 101; Route 101 to Route 138 via the vicinity of Avenue 36 in Los Angeles and via Glendale and Wrightwood	889,076
3. Route 36 near Peanut to Route 299 near Douglas City; Route 299 near Weaverville to Route 5 near Yreka; Route 5 near Yreka to Montague	533,032
4. Route 80 near Hercules to Route 99 near Stockton via north of Concord and via Antioch; Route 99 near Stockton to Route 49 near Altaville via the vicinity of Copperopolis; Route 49 near Angeles Camp to Route 89 via Murphys, Calaveras Big Trees, and Dornington	2,498,022
5. The international boundary near Tijuana to the Oregon state line via National City, San Diego, Los Angeles, a point on Route 99 south of Bakersfield, the westerly side of the San Joaquin Valley, and via Yreka; also passing near Santa Ana, Norwalk, Elysian Park in Los Angeles, Glendale, Woodland, and Red Bluff	10,439,090
6. Route 395 near Bishop to the Nevada state line near Montgomery Pass	164,001
7. Route 1 to Route 210 in Pasadena	1,078,350
8. Route 5 in San Diego to Yuma via El Centro	1,504,848
9. Route 17 near Santa Cruz to Route 17 near Los Gatos via Waterman Gap and Saratoga Gap and along the ridge between the San Lorenzo and Pescadero Creeks	378,228
10. Route 1 in Santa Monica to Route 5 near Seventh Street in Los Angeles; Route 101 near Mission Road in Los Angeles to Route 5; Route 5 in Los Angeles to the Arizona state line at the Colorado River via the vicinity of Monterey Park, Pomona, Colton, Indio, and Chiriaco Summit, and via Blythe	4,228,817
11. San Pedro to Route 248 in Pasadena	1,909,806
12. Route 1 near Valley Ford to Route 121 near Sonoma via Santa Rosa; Route 29 in the vicinity of Napa to Route 80 near Cordelia; Route 80 near Fairfield to Route 84 at Rio Vista; Route 84 near Rio Vista to Route 99 near Lodi; Route 99 near Lodi to Route 88 near Lockeford; Route 88 near Clements to Route 49 near San Andreas	1,167,935
13. Route 61 near he Oakland International Airport to Route 61 near Emeryville via the vicinity of Lake Temescal	166,728
14. Route 1 north of the intersection of Sunset Boulevard northwest of Santa Monica to Route 5 near Tunnel Station; Route 5 at Los Angeles near Tunnel Station to Route 58; Route 58 to Route 395 near Little Lake via the vicinity of Antelope Valley	1,108,198
15. Route 5 in San Diego to Route 8; Route 8 to the Nevada state line near Calada via Temacula, San Bernardino, and Barstow and passing near Riverside	1,990,733
16. Route 20 to Route 5 near Woodland via Rumsey and Woodland; Route 5 near Woodland to Sacramento; Route 50 near Perkins to Route 49 near Drytown	253,077
17. Route 1 near Santa Cruz to Route 80 in Oakland; Route 80 near Albany to Route 101 near San Rafael via the Richmond-San Rafael Bridge; Route 101 near San Rafael to Route 1 near Point Reyes Station	2,877,494
18. Route 10 near San Bernardino to Route 138 via San Bernardino, Waterman Canyon, Big Bear Lake, Baldwin Lake and near Victorville	709,945
19. Route 1 near Long Beach to Route 164 near Pico Rivera	90,989
20. Route 1 near Fort Bragg to Route 101 at Willits; Route 101 to Route 80 near Emigrant Gap via Williams and Colusa	1,275,139
21. Route 680 at Benicia to Route 80 near Cordelia	39,048
22. Route 1 near Long Beach to Route 405; Route 405 to Route 55 near Orange	562,397
23. Route 1 near Aliso Canyon to Route 101 near Triunfo; Route 101 near Newbury Park to Route 118; Route 118 to Route 126 near Fillmore	262,237
24. Route 17 near Castro Street in Oakland to Route 580; Route 580 in Oakland to Route 680 in Walnut Creek; Route 680 near Walnut Creek to Route 4 near Pittsburg	2,028,299
25. Route 198 to Route 180 near Paicines	81,628
26. Route 4 to Route 99 near Stockton; Route 99 near Stockton to Route 12; Route 12 to West Point via Mokelumne Hill	218,638
27. Route 1 near Topanga Beach to Route 118 at or near Chatsworth	68,155
28. Route 89 at Tahoe City along the northern boundary of Lake Tahoe to the Nevada state line at Crystal Bay	116,870
29. Route 80 near Vallejo to Route 20 near Upper Lake via the vicinity of Napa, via Calistoga, via Lower Lake, passing south of Kelseyville and via Lakeport	762,500
30. Route 210 near San Dimas via the vicinity of Highland northeasterly to Route 18	429,516
31. Route 91 near Corona to Route 15 near Devore passing near Milliken Avenue at its junction with Route 10	86,594
32. Route 5 near Orland to Chico; Route 99 near Chico to Route 36 near Deer Creek Meadows	331,900
33. Route 101 near Ventura to Route 150; Route 150 to Route 5 near Oilfields via the vicinity of Cuyama Valley and Maricopa, and via Coalinga; Route 5 to Route 152 via the vicinity of Mendota; Route 5 near Santa Nella to Route 140; Route 140 to Route 5 near Vernalis; Route 5 near Vernalis to Route 205 near Tracy	866,268
34. Route 1 between Point Mugu and the City of Oxnard to Route 118 near Somis	55,052
35. Route 17 to Route 92 via Skyline Boulevard; Route 280 via Skyline Boulevard to Route 1 in San Francisco	303,636
36. Route 101 near Alton to Route 5 near Red Bluff passing near Forest Glen and Peanut; Route 5 at Red Bluff to Route 395 via Mineral, via the vicinity of Morgan and via Susanville; Route 139 north of Susanville to Route 395 near Termo	970,304
37. Route 17 near Nicasio to Route 101 near Novato; Route 101 near Novato to Route 80 near Lake Chabot via the vicinity of Sears Point	237,552
38. Route 10 near Redlands to Route 18 near Baldwin Lake via Barton Flats; Route 18 near Baldwin Lake along the north side of Big Bear Lake to Route 18 near the west end of Big Bear Lake	297,953
39. Route 1 near Huntington Beach to Route 2 passing through or near Buena Park and via San Gabriel Canyon	904,071
40. Route 15 at Barstow to the Arizona state line near Topock, Arizona via Needles	443,485
41. Route 1 near Morro Bay to Route 46; Route 46 to Route 99 near Fresno; Route 99 near Fresno to Route 180; Route 180 to Yosemite National Park	803,509
43. Route 119 to Route 99 near Selma via the vicinity of Wasco	373,707
44. Route 5 at Redding to Lassen Volcanic National Park; Lassen Volcanic National Park to Route 36 to west of Susanville	376,553
45. Route 113 near Knights Landing to Route 20 near Sycamore; Route 20 near Colusa to Route 32 near Hamilton City	277,976
46. Route 1 near Cambria to Route 101 near Paso Robles; Route 101 in San Luis Obispo County to Route 99 near Famoso via Cholame Pass	378,290
47. Route 11 in San Pedro to Route 10 via the Vincent Thomas Bridge	1,020,611
48. Route 138 east of Gorman to Route 122 near the San Bernardino county line	64,215

OFFICE OF TRAFFIC SAFETY

The principal objective of this office is to coordinate an effective attack on the problem of traffic safety, and to assist in assuring that the limited resources available are used most efficiently. This is accomplished through an annually updated California Traffic Safety Program which implements a comprehensive statewide plan to assist the activities of the approximately 3,100 public agencies and private organizations, now spending over \$500 million per year on traffic safety.

Participating traffic safety grants to state agencies and local governmental entities approximating \$6.5 million per year are reviewed, approved, and monitored by this office. The administrative costs are fully reimbursed from federal funds.

Authority

Chapter 1492, Statutes of 1967 and Chapter 138, Statutes of 1969.

Authorized positions are those anticipated to be funded by the United States Department of Transportation. Federal funds and expenditures therefrom are not included in budget totals.

STATE HIGHWAY USERS TAX STUDY COMMISSION

The State Highway Users Tax Study Commission was created by Chapter 1557, Statutes of 1971, to study the current methods of allocating highway users tax revenues between government entities and geographical areas of the State. The commission consists of eight members: two appointees by the Governor representing local governments, a designee of the State Transportation Board, the Secretary of the Business and Transportation Agency, or his designee, a designee from each the County Supervisors Association and the League of California Cities, the President pro tempore of the Senate, or his designee, and the Speaker of the Assembly, or his designee.

Program Objectives and Description

The objective of this activity is to accomplish a study and recommend modifications or revisions to the current methods of allocating highway users tax revenues between governmental entities and geographical areas of the state to assure that maximum benefits consistent with statewide transportation needs are realized from existing revenues. The commission is to submit its report to the Legislature by February 1, 1976, at which time the Commission terminates.

a. Accident Control

The California Highway Patrol patrols 14,135 miles of state highway and 83,183 miles of county roads on which personnel are deployed based upon analysis of traffic accident report data. The purchase of 200 radar units estimated to cost \$363,000 is proposed to provide a new enforcement tool to better enforce speed limits.

II. REGULATION AND INSPECTION

Program Objectives and Description

The major objectives of the program are to protect the public by establishing conditions for the safe operation of specified vehicles, securement of loads, sale of automotive equipment, the reduction of motor vehicle noise pollution; to protect schoolchildren by providing supervision for school crossing guards in certain counties of the state; to protect the highways by control of vehicle weight; and to abate abandoned/public nuisance vehicles from public and private property.

Authority

The multiple authority for the program is stated within the elements.

a. School Pupil Transportation Safety

The objectives of this element are to reduce schoolbus accidents by ensuring that schoolbus drivers meet and maintain certification requirements and that all school buses are free of mechanical defects. Legislation has been passed requiring certification of farm labor vehicle drivers by the California Highway Patrol. No funds were allocated for this purpose and man-hours expended are being taken from this element.

Authority

Vehicle Code, Sections 2807, 12522, and 12519.

Education Code, Section 16852.

Administrative Code, Section 14204.

DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL—Continued

Measures of Effectiveness—Program

1. Schoolbus injury accident rate per million schoolbus miles.
2. Pupil pedestrians injured at crossings manned by CHP contract personnel. ..

Effectiveness Levels

b. Regulated Special Purpose Vehicles

The purpose of this element is to protect the public health and safety by adopting and enforcing reasonable regulations regarding the operation, equipment, and certification of drivers of emergency ambulances, by licensing the operation of armored cars and privately owned emergency ambulances, and by issuing permits for certain specified vehicles to be equipped and operated as authorized emergency vehicles.

Authority

Vehicle Code, Sections 2416, 2417, 2501, and 2512.

Measures of Effectiveness—Program

1. Percent of armored cars, ambulances, and other authorized emergency vehicles found in compliance at the time of the periodic inspection

Effectiveness Levels			
Actual		Estimated	
73-74	74-75	75-76	76-77
85%	71%	85%	85%

Program Size Indicators

Expenditures	\$35,881	\$45,211	\$51,412
Personnel	1.4	1.7	1.7
Uniformed1	.1	.1
Nonuniformed	1.3	1.6	1.6

* An increase of hazardous materials items as contained in Part 172.5 of the Dangerous Article Tariff (CFR 49) is anticipated but the amount of increase is unknown.

d. Passenger Vehicle Inspection

Federal regulations require that each state operate a periodic mandatory vehicle inspection program or an acceptable alternate program. California operated a program in which approximately 10 percent of the vehicles were inspected through fiscal year 1974-75. This program has been eliminated in fiscal year 1976-77.

Measure of Effectiveness—Program	Effectiveness Levels			
	Actual 73-74	Actual 74-75	Estimated 75-76	Estimated 76-77
1. Passenger vehicle mechanical defect-caused fatal and injury accident rate per 100 million miles:				
a. Injury accident rate	—	10	—	—
b. Fatality accident rate	—	0.2	—	—
Program Size Indicators				
1. Number of registered passenger vehicles	—	13,971,406	—	—
2. Number of passenger vehicle inspections	—	1,199,765	—	—

DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL—Continued

e. Commercial Vehicle Inspection and Enforcement

The objectives of the commercial vehicle enforcement and inspection program are to protect the public from the potential hazards of trucks and truck-trailer combinations which are unsafe to operate due to hazardous loads or faulty equipment, protect the public investment in highways by ensuring that truck overloads are reduced to a minimum or eliminated, and to ensure that proper registration fees are paid in order to provide funds for highway maintenance and construction.

Authority

Vehicle Code, Sections 2802, 2804, 2805, and 2813.

Measures of Effectiveness—Program

	Effectiveness Levels			
	Actual 73-74	74-75	Estimated 75-76	76-77
1. Commercial vehicle accidents per 100 million miles resulting from mechanical defects:				
a. Injury accident rate	3.3	3.3	3.2	3.2
b. Fatality accident rate	0.14	0.13	0.14	0.14
c. Noninjury accident rate	8.7	8.3	8.5	8.4
2. Annual dollar value of property damage	63,000,000	63,000,000	64,000,000	65,000,000

Program Size Indicators

1. Commercial Vehicle population:				
a. Domestic	1,050,781	1,115,129	1,159,368	1,213,478
b. Foreign	105,700	111,512	124,336	136,238
2. Total commercial vehicle miles driven	7,436,655,300	7,949,477,991	8,038,667,234	8,648,863,576
3. Number of commercial vehicle accidents caused by mechanical defects or failure to comply with vehicle size, weight, loading, commodity transportation or other requirements:				
a. Injury	248	253	259	278

Nonuniformed	2.8	3.3	3.3	—	—	—

a. Vehicle Theft

The objectives of this element are: (1) to protect the public from economic loss as a result of vehicle theft through an increased recovery rate of stolen vehicles and a reduction in the incidence of vehicle theft; and (2) to motivate the public to protect their vehicles from theft which has cost the citizens of California an estimated \$100 million annually. *The Vehicle Theft Control Project has been partially funded by a federal LEAA grant. This grant will terminate June 30, 1976, and it is proposed to continue the program at the current year level by increasing Motor Vehicle Account/State Transportation Fund expenditures by \$888,889.*

Measures of Effectiveness—Program	Effectiveness Levels			
	Actual		Estimated	
	73-74	74-75	75-76	76-77
1. Percentage change in the per capita rate.....	1.8	-5.6	-5	-3
2. Percentage change in the recovery rate of stolen vehicles.....	-1.4	6.3	-3.3	0

Program Size Indicators

1. Population of California.....	20,988,000	21,198,000	21,410,000	21,624,000
2. Number of stolen vehicles	136,583	130,196	124,129	119,861
3. Recovery rate of stolen vehicles	81.9	87.1	90	90
4. Percentage of recovered vehicles with engine and/or transmission missing	1.3	2.4	2.3	4
5. Number of CHP arrests for vehicle theft	3,053	3,181	3,000	3,125
6. Number of investigative assists provided to allied agencies	16,936	19,235	20,000	21,000

Input

	1974-75	1975-76	1976-77
Expenditures	\$2,683,526	\$2,760,832	\$3,382,256
Personnel man-years	100.5	93.0	109.8
Uniformed	81.5	76.1	91.8
Nonuniformed.....	19.0	16.9	18.0

b. Vehicle Identification Numbering Program

The objectives of the Vehicle Identification Numbering Program are the assignment of identification numbers and the attachment of a State of California assigned vehicle identification number plate to those vehicles subject to registration in this state from which the original identification numbers have been removed and to all specially constructed vehicles.

Measures of Effectiveness—Program	Effectiveness Levels			
	Actual		Estimated	
	73-74	74-75	75-76	76-77
1. Number of vehicles brought into compliance through vehicle inspections	9,531	13,665	10,140	12,000
2. Percent of inspections completed requiring verification only	8.7	18.8	27.9	30.0

Program Size Indicators

1. Number of vehicles subject to registration in California	14,856,878	15,000,000	16,792,000	16,697,000
2. Number of vehicles receiving VIN inspection.....	10,456	13,665	14,056	16,000
3. Number of vehicles to which VIN plates have been affixed as a result of CHP inspection	9,531	11,102	10,140	12,000
a. Prenumbered plates used	7,000	8,286	7,394	9,000
b. Unnumbered plates used.....	7,707	9,875	9,104	10,500

Input

	1974-75	1975-76	1976-77

Uniformed	20.9	19.2	19.1
Nonuniformed.....	2.8	3.3	3.3

DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL—Continued

IV. ADMINISTRATIVE SUPPORT

Program Objectives and Description

The objective of this program is to provide services to assure the overall success of the constituent departmental programs.

Authority

Vehicle Code, Division 2, Chapter 2, Article 1.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

Nonuniformed.....	56.6	61.1	61.1	—	—	—

a. Management and Command

This element contains those functions and activities directly concerned with determining the purpose, establishing the methods, and controlling the execution of the department's role in state government. The following organizational units, together with directly related staff services, are included:

1. Office of the Commissioner;
2. Office of the Assistant Commissioner—Field;
3. Office of the Assistant Commissioner—Staff;
4. Offices of Division Commanders;
5. Offices of the Zone Commanders;
6. Offices of the Area Commanders.

The functions performed by this element are policy formulation, direction, and coordination.

Input	1974-75	1975-76	1976-77
Expenditures.....	\$5,986,354	\$6,622,699	\$6,729,944
Personnel man-years.....	249.4	252.6	252.3
Uniformed.....	146.8	143.7	143.3
Nonuniformed.....	102.6	108.9	109.0

b. Budget and Fiscal Management

The various operations involved in fiscal management are divided between two organizational units—the Accounting Section and the Budget Section.

Input	1974-75	1975-76	1976-77
Expenditures.....	\$752,396	\$839,070	\$879,642
Personnel man-years.....	55.2	55.0	55.1
Uniformed.....	—	—	—
Nonuniformed.....	55.2	55.0	55.1

c. Planning and Analysis

This element contains the necessary resources for analysis of the traffic environment and the preparation of plans for the use of uniformed personnel, equipment, and facilities.

Input	1974-75	1975-76	1976-77
Expenditures.....	\$905,968	\$865,740	\$876,505
Personnel man-years.....	55.8	42.0	41.9
Uniformed.....	16.0	15.9	15.8
Nonuniformed.....	39.8	26.1	26.1

DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL—Continued

d. Training

The various types of training given to personnel enable them to provide protection of property and life, traffic enforcement, and services to the motoring public. *It is proposed that no new cadets be accepted to the Academy during the budget year. The elimination of cadets should generate a savings through attrition of 180 positions and \$1,451,520 during the budget year.*

Input	1974-75	1975-76	1976-77
Expenditures	\$2,724,710	\$3,022,070	\$3,284,589
Personnel man-years	133.1	139.3	147.2
Uniformed	60.8	65.0	64.8
Nonuniformed	72.3	74.3	82.4

e. Administrative Services

This element contains auxiliary and specialized services essential to the administration and operation of the Department, including: automotive management; electronic communications; personnel management; facilities management; supply management; information and education; graphic arts and photographic services; central files; and duplicating, mail, and messenger services. *It is proposed that a state traffic inspector be assigned for planning and conducting labor negotiations within the department. There would be no resultant increase in expenditures as this would be a reassignment of an existing position.*

Input	1974-75	1975-76	1976-77
Expenditures	\$10,797,650	\$11,828,583	\$12,883,319
Personnel man-years	436.7	443.2	443.2
Uniformed	125.8	118.4	118.0
Nonuniformed	310.9	324.8	325.2

f. Statewide Integrated Traffic Records System (SWITRS)

This system is the recordkeeping network for departmental operations and is the only source of certain operational data for the California Department of Transportation and the Department of Motor Vehicles.

Input	1974-75	1975-76	1976-77
Expenditures	\$862,829	\$1,056,358	\$1,087,374
Personnel man-years	58.6	63.1	63.1
Uniformed	2.0	2.0	2.0
Nonuniformed	56.6	61.1	61.1

DEPARTMENT OF MOTOR VEHICLES

The Department of Motor Vehicles' objectives are:

- To protect public interest by identifying ownership through the process of vehicle registration.
- To promote safety on highways by licensing and controlling drivers.
- To provide public protection by licensing and regulating occupations and business related to manufacture, transporting, sale, and disposal of vehicles and to the instruction of drivers in safe operation on the highways.
- To provide a source of compensation to those who suffer injury or damage to property in automobile accidents through the Compulsory Financial Responsibility Law.
- To provide services, not directly related to motor vehicles or drivers' licensing, to the public and to other state agencies as required by statute.

SUMMARY OF PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
I. Vehicle licensing and titling	\$50,200,415	\$63,142,687	\$65,705,830

I. VEHICLE LICENSING AND TITLING

Program Objectives and Description

The department, through the Vehicle Licensing and Titling Program, identifies and issues identifying indicia to approximately 16,000,000 vehicles in California, determines and issues evidence of ownership, collects fees and revenue, maintains vehicle records and provides vehicle information, records and statistics. This program is founded on legislative enactments contained mainly in the Vehicle Code and Revenue and Taxation Code.

The proposed budget for the Vehicle Licensing and Titling program includes three major program changes for the 1976-77 fiscal year. They are:

(1) An addition of 13.3 man-years and \$225,009 to implement the provisions of Chapter 1179/75 which requires the Department of Motor Vehicles to refuse renewal of registration on a vehicle if the owner or lessee has failed to comply with a notice of violation for a parking offense.

(2) The budgeting of 13 man years and \$91,904 to provide customer child protection areas in 10 field offices for the safety and protection of the children inside and around the department's field offices. The pro rata share of this program cost is reflected under program II, Driver Licensing and Control and program V, DMV Associated Services.

(3) A proposal to establish a mobile field office on a pilot program to serve shopping centers and other locations not served by existing field offices at a cost of \$143,407 and 6.2 man-years. The pro rata share of this program cost is reflected under program II, Driver Licensing and Control.

Authority

The Vehicle Code, Division 2, Chapter 1, Articles 1, 2 and 3 and Division 3, Chapters 1 through 6;

The Revenue and Taxation Code, Division 2, Part 5.

DEPARTMENT OF MOTOR VEHICLES—Continued

Program Elements	74-75	75-76	76-77	1974-75	1975-76	1976-77
a. Vehicle ownership, registration documentation and certificate issuance	1,638.2	1,851.2	1,979.2	\$23,683,366	\$30,624,600	\$32,442,493
b. Vehicle fee collection and accounting	857.4	1,009.2	1,027.6	15,243,754	18,917,118	19,205,171
c. Vehicle record and file maintenance	359.8	396.9	416.2	4,687,676	5,684,464	6,020,139
d. Vehicle information and sale of records	157.2	175.4	183.2	1,943,934	2,390,659	2,514,160
Administration distribution	268.6	306.6	297	4,641,685	5,525,846	5,523,867

a. Vehicle Ownership, Registration Documentation and Certificate Issuance

Documentation is the act of gathering together a group of forms and legal documents which (1) prove degrees of ownership, determine the rights of ownership, and record their interest in the vehicles; (2) implement collection and evaluation of data to insure that vehicles are lawfully entitled to be registered; (3) provide a basis for fee computation, statistical reports and reconciliation of bank deposits; and (4) provide the basis for assignment and issuance of registration and ownership certificates and license plates and validating devices.

Output

Vehicle Registrations Processed:	1974-75	1975-76	1976-77
New vehicles	1,198,000	1,263,000	1,437,000
Nonresidents	500,000	521,000	535,000
Renewals	14,599,000	14,929,000	14,869,000
Subtotals, Fee Paid Vehicle Registrations	16,297,000	16,713,000	16,841,000
Exempt registrations	249,000	258,000	269,000
Totals, Vehicle Registrations Processed	16,546,000	16,971,000	17,110,000

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	1,638.2	1,851.2	1,979.2	\$23,683,366	\$30,624,600	\$32,442,493

b. Vehicle Fee Collection and Accounting

Revenue is collected to support the Department of Motor Vehicles, California Highway Patrol and vehicle-related programs of other departments as well as producing income for the State Highway Account. Vehicle license fees, which are essentially an in lieu property tax on vehicles, are collected for apportionment to cities and counties. The basic fees collected are registration, weight, service and vehicle license fees. The registration, weight and vehicle license fees are collected yearly when due.

Output

Transportation Tax Fund:	1974-75	1975-76	1976-77
Motor Vehicle Account:			
Registration, weight and related fees and miscellaneous revenue	\$343,720,526	\$376,737,300	\$366,385,300
Motor Vehicle License Fee Account:			
Motor vehicle license fees	\$323,293,600	\$370,000,000	\$415,000,000

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	857.4	1,009.2	1,027.6	\$15,243,754	\$18,917,118	\$19,205,171

c. Vehicle Record and File Maintenance

To help process applications for vehicle registrations and titles and to meet the demands of the public, private companies and law enforcement for vehicle registration and ownership information, records of registrations and title transactions are maintained in the department's Sacramento headquarters.

Output

Files Pulled and Filed:	1974-75	1975-76	1976-77
Correspondence files	597,000	579,000	706,000
Numerical files	16,127,000	16,288,000	17,428,000

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	359.8	396.9	416.2	\$4,687,676	\$5,684,464	\$6,020,139

d. Vehicle Information and Sale of Records

The department supplies information or copies of records of vehicle information concerning vehicles or their owners on two bases: (a) to governmental agencies without charge and (b) to private citizens and companies for a charge equivalent to the cost for producing the information.

Output

Information Requests:	1974-75	1975-76	1976-77
Fee requests—item count	662,000	791,000	822,000
Fee requests (income)	\$334,991	\$590,000	\$605,000
No fee requests—item count	10,254,000	11,535,000	12,975,000
Records produced for private companies (EDP)—item count	16,025,742	14,763,000	14,876,000
Records produced for private companies (EDP) (Income)	\$402,199	\$369,100	\$371,900

DEPARTMENT OF MOTOR VEHICLES—Continued

II. DRIVER LICENSING AND CONTROL

Program Objectives and Description

The objective is to promote highway safety by insuring that all drivers: (1) are identified, (2) demonstrate the ability to drive safely, (3) have adequate knowledge of the driving laws, (4) maintain all capabilities for safe driving, and (5) do not suffer from any disability which would preclude safe driving.

A study is currently underway to determine the feasibility of establishing the administrative adjudication of traffic offenses. Included in this budget is \$300,000 to provide the state's 10% matching funds required to qualify for a Federal Law Enforcement Assistance Act Grant of up to \$2,700,000 to implement this program if the study due April 1, 1976, recommends proceeding. The 1976-77 budget for this program also provides funds for the following new statutes:

(1) Chapter 325/75, which requires the Department of Motor Vehicles to provide an anatomical donor sticker with drivers' licenses and identification cards issued after July 1, 1976. The budget provides 4.2 man-years and \$84,349 for this program.

(2) Chapter 657/75, which expands the potential jury population by requiring DMV, upon request, to furnish a county jury commissioner a list of licensed drivers and identification card holders. The budget provides 1.7 man-years and \$31,168 for this program.

Authority

California Vehicle Code, Divisions 6 and 7, Chapters 2, 3 and 4.

Administration distribution	206.3	213.2	216.2	3,602,492	3,968,059	4,041,232

a. Drivers' License Issuance

Applications for drivers' licenses are processed at local departmental offices or travel service locations. Renewal applications are produced at Sacramento and mailed to the driver prior to expiration. Examination consists of each applicant being required to demonstrate fitness to drive. This is accomplished via a series of law, vision, and, when required, driving tests.

Output	1974-75	1975-76	1976-77
Drivers' licenses issued	4,677,000	4,640,000	4,790,000
Drivers' license fees	\$14,379,723	\$14,299,000	\$14,679,000
Input	74-75	75-76	76-77
Expenditures.....	1,468.2	1,554.7	1,621.1
	\$23,076,844	\$27,007,769	\$28,133,893

b. Postlicensing Control

The department's postlicensing control, together with law enforcement and the courts, constitutes the primary effort of California to insure safety on our highways.

The statutes require withdrawal actions against drivers convicted of driving under the influence of intoxicating liquors and/or drugs, and felonies involving use of a motor vehicle; failure to comply with the implied consent law, and judgment debtors in unsatisfied civil process. Following licensing, physical or mental deterioration may occur which affects a person's ability to drive safely. Through rigid adherence to due process, appropriate control actions are instituted. Negligent operators are treated through a series of warning letters, group educational meetings and face-to-face exchange with a driver improvement analyst. Appropriate control actions are instituted if deemed necessary. The department is continually evaluating its postlicensing control methods to insure optimum cost benefits.

Output	1974-75	1975-76	1976-77
Warning letters sent (negligent operator).....	129,000	134,000	139,000
Persons called to group meetings (GEM)	39,700	42,400	49,200
Hearings, interviews and reexaminations	81,280	82,290	88,990
Licenses suspended, revoked, cancelled or driver placed on probation.....	170,614	176,170	187,720
Reinstatement of driving privilege	174,000	186,000	196,000
Input	74-75	75-76	76-77
Expenditures.....	773.1	806.6	842.2
	\$11,142,102	\$13,048,577	\$14,040,861

c. Certificate Issuance

Operators of schoolbuses, ambulances, farm labor vehicles, and heavy equipment require special testing and proof of acceptable medical standards. Schoolbus and farm labor certificate examinations are conducted by the California Highway Patrol with the processing and issuance accomplished by Department of Motor Vehicles.

Output	1974-75	1975-76	1976-77
Certificates Issued:			
Ambulance certificates.....	2,960	2,730	3,050
Schoolbus certificates.....	11,300	11,300	11,600
Construction equipment certificates.....	1,030	1,030	1,030

Expenditures.....	207.3	234.8	253.5	\$3,049,226	\$3,737,864	\$4,084,390

III. OCCUPATIONAL LICENSING AND REGULATION

Program Objectives and Description

a. Department of Motor Vehicles

This program is designed, structured and administered to provide protection to the consumer-motorist through the licensing and regulation of the automotive industry, including vehicle dealers, manufacturers, distributors, dismantlers, transporters, verifiers, salesmen, representatives, driving schools and driver instructors.

The objectives of the program are to minimize and, where possible, prevent public injury through maximum enforcement, education and preventative efforts; to provide methods of recovery action for victims of financial losses; and, to initiate appropriate actions against persons engaged in fraudulent, deceptive or otherwise unlawful practices.

In the 1976-77 budget, the department proposes the use of the money presently budgeted to pay the Department of Justice for criminal history information of an applicant for an occupational license to establish 4.5 man-years to be utilized in searching for similar information through the California Law Enforcement Telecommunication System (CLETS). The estimated net savings from this proposal is \$36,304.

b. New Motor Vehicle Board

The purpose and objectives of the New Motor Vehicle Board are to prescribe rules and regulate governing matters committed to its jurisdiction; to hear and consider appeals by occupational license applicants and holders; to consider matters concerning the activities or practices of persons applying for or holding an occupational license; to review and arbitrate complaints between licensees and consumers; to hear and consider franchise protests; and to refer appropriate matters to the Department of Motor Vehicles for investigation relating to new motor vehicle dealers, manufacturers, distributors and representatives of distributors and manufacturers.

The Department of Motor Vehicles proposes the abolishment of the New Motor Vehicle Board during the 1976-77 fiscal year. The budget reflects the abolishment of this board effective January 1, 1977 with a projected savings of 7.5 positions and \$133,360. To accomplish this, the department will propose the necessary legislation during the 1976 Legislative Session.

Authority

A. DEPARTMENT OF MOTOR VEHICLES

California Government Code, California Vehicle Code, California Revenue and Taxation Code, California Administrative Code, California Civil Code, California Penal Code, California Business and Professions Code.

B. NEW MOTOR VEHICLE BOARD

California Vehicle Code, Division 2.

a. Occupational Licensing (Licensing of Vehicle Dealers, Manufacturers, Manufacturers' Branches, Distributors, Distributors' Branches, Transporters, Dismantlers, Salesmen and Representatives, Driving Schools and Instructors)

Through the department's licensing and related investigative processes, persons who are declared to be unqualified, financially irresponsible or morally unfit are denied the opportunity of engaging in a business or occupation in which the public would otherwise remain unprotected.

Public needs within this element can only be served by developing and presenting evidence through legal processes to deny licenses to unsatisfactory applicants.

Expenditures	91.7	105.8	106.9	\$1,447,505	\$1,968,460	\$1,853,428

b. Occupational Regulation (Regulation of Vehicle Dealers, Manufacturers, Manufacturers' Branches, Distributors, Distributors' Branches, Transporters, Dismantlers, Salesmen and Representatives, Driving Schools and Instructors)

The department initiates appropriate actions to suppress illegal activity by unlicensed persons; investigates the business practices of licensees for the purpose of preventing monetary loss to the public by determining if the licensee is complying with applicable laws, rules and regulations, and initiates actions against licensees not in compliance; responds to and disposes of valid consumer complaints to either prevent or recover loss of title to or financial investment in vehicles; and provides assistance to state and local consumer fraud units, including active field investigations, developing evidence, providing records and expert witness testimony in legal actions, both civil and criminal.

Output	1974-75	1975-76	1976-77
Complaints against licensees	11,800	13,300	15,000
Dealer and dismantler reviews	1,420	1,590	1,790

Expenditures	160.6	220.6	215.9	\$3,193,561	\$4,798,934	\$4,867,029

IV. COMPULSORY FINANCIAL RESPONSIBILITY LAW

Program Objectives and Description

It is the public policy of this state that those owning or operating motor vehicles on a street or highway shall be financially capable of providing monetary protection to those suffering injury to their person or damage to their property as a result of an automobile accident. Each driver and/or owner of a motor vehicle involved in an accident where property damage is in excess of \$250 or where any personal injury or death arises from the accident is required to file a report to the department. Upon failure to file a report, the driving privilege of the driver and/or owner must be suspended for a period of one year or until such time as the accident report is received. Whenever the accident is reportable under the requirements of the law, the uninsured driver and owner must file and maintain with the department some form of proof of financial responsibility for a period of three years. Any person who drives any motor vehicle or permits the vehicle to be driven upon a highway without having some form of financial responsibility in effect is guilty of an infraction. Proof of financial responsibility may be established if the owner or operator, with respect to all motor vehicles owned or operated by him, is a self-insurer or is insured under a form of liability insurance or bond, is the United States of America, the state, any municipality or subdivision thereof, or has deposited security in the amount of \$35,000 with the department. Drivers and owners subject to the suspension provisions are entitled to a due process hearing on specific grounds within 60 days from demand.

Authority

California Vehicle Code, Division 7, Chapter 1.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

Administration distribution	12	15.1	17.3	203,844	269,245	302,253

a. Driving Privilege Control

The accident reporting form is designed to identify the driver, the owner, and the damage or injury arising from the accident. It requires the identification of other persons or property that were injured or damaged. It also requires the date and location of the accident. Provision is made for the inclusion of sufficient insurance information to enable the department to request confirmation of the coverage listed.

Output	1974-75	1975-76	1976-77
Accident reports processed	484,000	622,000	593,000

V. DEPARTMENT OF MOTOR VEHICLES ASSOCIATED SERVICES

Program Objectives and Description

As directed by the Legislature, the Department of Motor Vehicles provides certain services not directly related to motor vehicles or drivers licensing through its headquarters operation and network of field offices. Those services include: (1) California identification card issuance, (2) undocumented vessel registration, titling and fee collection, (3) environmental license plates registration and fee collection, (4) use tax computation and collection, (5) off-highway vehicle registration, titling and fee collection, and (6) bicycle licensing.

Authority

The Vehicle Code, Sections 13000-13007, 14902 and 14903; Division 3.5; Division 3, Article 8.5; Division 16.5; Section 4750.5; and Division 16.7. Revenue and Taxation Code Sections 6248 and 6249 and Chapter 3.5.

a. California Identification Card Issuance

Applications for identification cards are processed in all the Department of Motor Vehicles' offices and travel service locations. The process is similar to that of a drivers license except for the testing procedure.

The budget provides 7.4 man-years and \$97,000 and 27 man-years and \$359,458 for the 1975-76 and 1976-77 fiscal years respectively to administer Chapter 1198/75 which requires DMV to issue a distinctive identification card to senior citizens and deletes the present 16 year-old minimum age to obtain an identification card.

Output	1974-75	1975-76	1976-77
Identification cards outstanding	473,000	685,000	990,000
Identification cards issued.....	165,200	259,610	407,910
Identification card fees	\$545,376	\$834,000	\$1,302,700

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	27.2	36.3	57.4	\$490,918	\$647,329	\$953,427

b. Undocumented Vessel Registration, Titling and Fee Collection

The department accepts applications for original, renewal, transfer of ownership and duplicate certificates or stickers on undocumented vessels through a headquarters operation, departmental field offices, authorized automobile clubs and authorized undocumented vessel agents.

Output	1974-75	1975-76	1976-77
Registered vessels	486,000	513,000	541,000
Original registrations	47,600	46,100	48,000
Renewal registrations.....	448,000	472,000	498,000
Revenue	\$1,727,564	\$1,680,300	\$1,770,100

DEPARTMENT OF MOTOR VEHICLES—Continued

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	68.9	71.2	74.4	\$973,983	\$1,019,296	\$1,069,663

c. Environmental License Plates Registration and Fee Collection

The 1970 Legislature initiated a program of personalized license plates in response to public demand. Fees collected provide funds for the support of the California Environmental Protection Program.

Output	1974-75	1975-76	1976-77
Original registrations.....	46,400	42,800	47,300
Renewal registrations.....	145,000	172,000	193,000
Interchanges.....	19,900	22,400	25,100
Revenue.....	\$2,859,467	\$3,058,800	\$3,413,700

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	57.8	66.4	69.2	\$519,937	\$615,836	\$712,529

d. Use Tax Computation and Collection

In 1963, the Legislature determined that revenue should be raised by the collection of a use tax on the retail sale of vehicles between individuals. The Department of Motor Vehicles collects the use tax when due on application for registration or transfer of registration. As of April 1, 1974, use tax is collected at the rate of 6 percent of the adjusted vehicle license fee market value or when applicable from the purchase price. An additional one-half percent use tax is collected in certain counties for the Bay Area Rapid Transit system.

Output	1974-75	1975-76	1976-77
Use tax collected for Board of Equalization.....	\$63,997,195	\$66,730,000	\$67,157,000

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	133.4	141.5	145.6	\$1,477,569	\$1,773,013	\$1,845,682

e. Off-Highway Vehicle Registration, Titling and Fee Collection

The Off-Highway Vehicle Law of 1971 requires the registration (identification) of most vehicles used exclusively off the highway for recreational purposes. The primary purpose of the fees collected is to establish and maintain recreational areas for the use of off-highway vehicles by the public.

Output	1974-75	1975-76	1976-77
Off-Highway Vehicle Registration:			
Registered off-highway vehicles.....	175,000	224,000	276,000
Original registrations.....	72,400	113,200	155,700
Renewal registrations.....	77,500	48,600	112,400
Off-Highway Vehicle Revenue:			
Transportation Tax Fund, Motor Vehicle Account, service fees (\$5) and miscellaneous fees (\$3).....	\$915,002	\$937,300	\$1,485,300
Off-Highway Vehicle Fund, recreational fees (\$6).....	\$900,811	\$970,800	\$1,608,600
Off-Highway License Fee Fund, in-lieu tax (\$4).....	\$601,950	\$647,200	\$1,072,400

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	62.4	70.5	91.8	\$965,663	\$1,306,858	\$1,559,917

f. Bicycle Licensing

Bicycle licensing is the responsibility of those cities and counties which have adopted a bicycle licensing ordinance or resolution. The Department of Motor Vehicles is required by law to procure and distribute bicycle licensing indicia and registration forms to the cities and counties. It is also required to collect from those cities and counties a specified fee, not to exceed departmental cost for such indicia issued.

Output	1974-75	1975-76	1976-77
Indicia issued.....	473,000	1,000,000	750,000
Input			
Expenditures.....	\$50,000	\$63,169	\$78,437

VI. ADMINISTRATION

Program Objectives and Description

The California Vehicle Code provides that the Department of Motor Vehicles will be under the control of a civil executive officer known as the Director of Motor Vehicles. The director has the responsibility for administering and enforcing the provisions of the Vehicle Code, Revenue and Taxation Code and other codes relating to the department. He has the authority to adopt and enforce rules and regulations as may be necessary to carry out the provisions of these codes. The director's immediate executive staff includes two deputy directors who coordinate the various line and staff functions through the six division chiefs. The division chiefs have the responsibility of carrying out the department's program policies. The director's staff includes Research and Planning Section, Legislative Liaison Section, Internal Audits, and the Legal Section. The Division of Administration provides the staff support for effecting the director's administrative programs.

The department proposes the addition of \$100,000 for painting murals in the field offices of the department. This program is designed to help meet the state commitment to artistic expression in its daily activities and the involvement of the department in the cultural heritage of the community which it serves.

STEPHEN P. TEALE CONSOLIDATED DATA CENTER

Although the principal objective of the Teale Data Center remains the responsive and cost effective operation of a large-scale computer center, continued and greater emphasis will be placed on:

1. Security and confidentiality of data and facilities.
2. Making EDP managers and nontechnical staff of user departments aware of EDP products available from the Teale Data Center.
3. Improving the average level of the Teale Data Center resource utilization.

I. FACILITIES OPERATION

Program Objectives and Description

The goal of this program is the operation and support of a major large-scale computing facility in a manner which will:

- (1) Economically and effectively process the data and applications currently necessary to provide effective EDP support to user organizations.
- (2) Expand the level of service so that Teale Data Center EDP products are more accessible to the managers and nontechnical staff of user departments.
- (3) Ensure efficient utilization of Teale Data Center resources within the confines of current and proposed user workload characteristics.

Three major elements of the Facilities Operations Program are required to fulfill the objectives of this program:

- (1) Machine Operations: The functions performed by this element are concerned with operating the Teale Data Center central computers and some outlying satellite minicomputers to ensure that work is accomplished in a timely and efficient manner. This equipment is operated to meet the user's schedules. Normal operations are 24 hours a day, five days a week and the day shift on Saturday. If users require it, the computers are operated on holidays and the balance of the weekends by prior arrangements.
- (2) Systems Support: This element is primarily concerned with maintaining the software operating system for the computers, maintaining the telecommunication system, maintaining the on-line inquiry systems, and installing and implementing vendor supplied proprietary software packages. In addition, this element compiles and analyzes workload and resource utilization data as well as providing consultation and advice to both current and new users on the use of the above.
- (3) Customer Services: This element's primary function is to represent the Teale Data Center to the user and represent the user's needs to the Teale Data Center. In addition, this element is responsible for the scheduling of work flow and miscellaneous user support functions including keeping the Teale Data Center management aware of the user's requirements, problems and financial status.

During the 1975-76 fiscal year a billing system for services is being implemented. As in the past, customer departments will transfer funds budgeted to finance inter-agency agreements. In the event charges computed under the billing system are less than funds transferred, departments will receive a credit against billings during 1976-77.

Authority

II. CONVERSION

The objective of this program was to establish an organization of people and procedures to perform the conversion of programs and data on an assembly line basis within the confines to a conversion schedule from users' existing data processing facilities to those of the Teale Data Center.

Authority

Chapter 787, Statutes of 1972.

III. ADMINISTRATION

The objective of this program is to provide administrative support to the programs administered by the Stephen P. Teale Consolidated Data Center such as providing staff support to line functions including personnel, fiscal, billing, budget, planning, contract administration and general administrative services.

RESOURCES

AIR RESOURCES BOARD

The Air Resources Board is responsible for the establishment of motor vehicle emission standards and ambient air quality standards.

In furtherance of its responsibilities, the Board manages the Air Pollution Control Program. The program is administered through the following elements: Data Collection, Research, Standards, Strategy Planning and Testing, Enforcement, Vehicle Inspection, and General Support.

SIGNIFICANT PROGRAM CHANGES

Program	Description	Man-Years	Dollars
Ia.	Improve accuracy and consistency of air quality data collection	4.6	\$141,887
Id.	Evaluation and development of control strategies to minimize increases in air pollution caused by new energy-related activities	5.5	237,204
Id.	Evaluation and development of control strategies for new and existing stationary sources	17.9	479,169
Ie.	Expand enforcement activities to permit inspections of stationary sources and to determine compliance with new and existing vehicle emission standards and procedures	30.2	961,673
If.	Shift in implementation of the Mandatory Vehicle Inspection Program from 1975-76 to 1976-77 to permit extensive evaluation of pilot program prior to making substantial financial commitment to the program	-	(16,008,000)

I. AIR POLLUTION CONTROL

Program Objectives and Description

Due to the existence of peculiar meteorological conditions, large population concentrations and substantial industry in certain parts of the State, California has serious air pollution problems throughout many of its urban areas and to some extent, in rural areas.

Ambient air quality standards established by state and federal agencies for many pollutants are often exceeded. The problem is more severe in the urban areas which have large concentrations of motor vehicles and industrial activity. In rural areas, the problem is largely due to particulate matter from such activities as agricultural operations, lumber production and mineral processing.

The major known emissions which pollute the air in California are organic gases, nitrogen oxides, nitrates, sulfur oxides, sulfates, carbon monoxide, suspended particulate matter, lead and hydrogen sulfide. These emissions enter the air from various sources and create air quality deterioration, which affects California citizens in at least the following areas:

Health effects—Discomfort, mortality, reduced ability, medical and hospital costs.

Agriculture—Lost or reduced production and costs involved in crop shift to more resistant kinds of plants.

Property damage—Materials deterioration, cleaning costs, decreased property value.

Productivity loss—Due to restricted worker effectiveness during severe air pollution conditions.

Aesthetic damage—Reduction in visibility, psychological effects.

The actual amount of damage caused by air pollution is unknown. However, estimates for Los Angeles alone range from \$336 million to \$978 million per year. To reduce or eliminate damage (or the effects of air pollution) is the ultimate goal of the Air Pollution Control Program. Due to the difficulties in quantifying the costs of air pollution, reduction in pollution levels has been chosen as a basis for evaluation of the Board's performance.

Since emissions are the principal contributing factor to air pollution, they must be monitored and controlled if California citizens are to have acceptable levels of air quality. Thus, the primary focus of the Air Pollution Control Program is the control of emissions and monitoring of air quality.

The Air Pollution Control Program objective is to achieve and maintain as expeditiously as practicable established state and federal ambient air quality standards adopted for the protection of health, vegetation, property, and other economic resources.

AIR RESOURCES BOARD—Continued

a. Data Collection

Accurate air quality and meteorological data are required on a continuous basis in order to assess the effectiveness of control programs and to develop improved control strategies, air quality and emission standards. The purpose of the Data Collection element is to provide such data. Specifically, the objective is: to collect, measure, analyze and evaluate the concentration of pollutants in the ambient air throughout California.

Due to the complexity of the monitoring instruments, data obtained from monitors is often inaccurate. Accordingly, appropriate procedures must be developed to improve the reliability of the data. This involves state oversight of equipment calibration and requires the use of monitoring units for making comparisons of equipment readings. In addition, local district personnel will be trained, and district collection procedures will be standardized. For the 1976-77 fiscal year this element has been augmented by 4.6 man-years.

Output	1974-75	1975-76	1976-77

Expenditures.....	39.7	42.4	46.8	\$1,721,461	\$2,739,877	\$2,903,857

b. Research

Research is an essential element of the Air Pollution Control Program because it can provide a significant portion of the information necessary to identify areas of greatest concern and to develop cost-effective control strategies. Data can be developed under research contracts to determine which new or existing sources may be the best targets for emission reductions and the measures which are available to achieve such reductions. Also, studies on health effects need to be conducted to supplement the much more extensive federal efforts and to address specific problems peculiar to California.

The Research Screening Committee, sets the general priorities for research efforts based on consideration of the total air pollution research picture, and in coordination with federal and university programs. Within these priorities the research staff develops specific projects.

Output	1974-75	1975-76	1976-77
Research contracts administered	15	20	25
In-house research reports	13	16	20

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	12.3	14.8	14.8	\$1,988,203	\$3,830,717	\$3,864,213

c. Standards

Air quality standards are established to delineate appropriate air quality levels and, in general, are the goals toward which the air pollution program is directed. The purpose of the Standards element is to review and analyze new research information, to identify real and potential air quality problems and to make appropriate air quality standards recommendations to the Air Resources Board. Thus, the objective of the Standards element is to establish air quality standards considered to be adequate for protection of health, vegetation, property and other economic resources by providing analyses of research data and making recommendations to the Board.

Output	1974-75	1975-76	1976-77
Air quality standards reviewed.....	13	13	13

Expenditures.....	17.1	22.3	22.3	\$396,367	\$643,828	\$648,568

AIR RESOURCES BOARD—Continued

d. Strategy Planning and Testing

As new air pollution research and emission concentration data become available, current air pollution strategies need to be revised and new strategies developed, tested and implemented. The objective of this element is to plan programs, strategies and methods to control known problems in air pollution. Many of the air pollution problems facing the State are related to the exploration for, processing of and transport of energy resources and the unavailability of necessary supplies of natural gas. Alaskan oil, offshore oil drilling, new pipeline storage facilities and tanker terminals and power plants use of fuel oil instead of natural gas will have substantial adverse impacts on air quality.

In addition, a number of other activities have not been controlled to the extent feasible. One of the prime examples is emissions from the use of solvents. Other activities where substantial improvements may be obtained include the chemical and metallurgical industries.

Although emissions from new automobiles have been significantly reduced, substantial benefits can be obtained by now emphasizing control of other mobile sources, including heavy-duty vehicles, and the reduction of emissions of in-use vehicles. In addition, there must be careful evaluation of techniques used by manufacturers to achieve certain levels of emission reductions in order to ensure that no new pollution or fuel economy problems are created.

Rapid changes in the industrial state-of-the-art provide a constant challenge for identifying, evaluating and controlling new or unknown emissions. This challenge will be met by expanding the identification and evaluation of new or unknown emission sources in order to refine current control strategies and develop new ones. A total of 23.4 man-years and \$716,373 is added to this element to carry out these activities.

e. Enforcement

After strategies are developed and adopted, it is necessary for the staff of the Board to determine the level of compliance and to ensure that appropriate enforcement action is instituted. In general, the State has primary jurisdiction for motor vehicle-related enforcement, while local agencies, operating under State oversight, have jurisdiction for stationary source enforcement. To assist local air pollution control efforts, the Board provides support to local agencies through funding and management direction, and, when necessary, engages in direct enforcement of stationary source programs. The objective of the Enforcement element is to enforce compliance with control strategies developed to control air pollution in the State.

To ensure a greater level of compliance, the proposed enforcement element includes expanded efforts to monitor in-stack emissions, to perform stationary source inspections, and to review applications to construct or modify sources of emissions.

The element also includes increased efforts to evaluate the composition and volatility of gasoline, to certify and test gasoline vapor recovery systems in accordance with Chapter 1042, Statutes of 1975, and to evaluate for compliance new light-duty vehicle emission control systems. An additional 30.2 man-years and \$961,673 will be required to carry out these duties.

f. Vehicle Inspection

Emissions from vehicles are a major source of pollutants. The objective of this element is to improve air quality by reducing in-use vehicular emissions through exhaust emission control performance standards.

This element is carried out through vehicle inspection and smog station licensing. The vehicle inspection program is being designed to identify vehicles which are high emitters because of component failure or improper adjustment. Through use of a computer diagnosis, vehicle owners can have failing vehicles repaired quickly and economically to meet emission standards. Smog station licensing is designed to ensure that a vehicle complies with emission standards before it is re-registered when vehicle ownership changes.

While State enforcement of motor vehicle-related pollution control activities is, in general, centralized in the Air Resources Board, smog station licensing and mandatory vehicle inspection are performed by the Bureau of Automotive Repair, Department of Consumer Affairs under interagency agreement.

Mandatory vehicle inspections to be performed under the Vehicle Inspection Program will be done in response to Chapter 1154, Statutes of 1973, as modified by Chapter 170, Statutes of 1975. Chapter 170/75 extended the implementation dates of the program and in accordance with such extension, substantial funds from the Motor Vehicle Account, State Transportation Fund on loan for the establishment of this program have been shifted from 1975-76 to 1976-77. Major program implementation in 1976-77 will consist of adding 23 vehicle inspection test facilities for a total of 25. These facilities will be located in the South Coast Air Basin.

g. General Support

The objective of the General Support element is to provide executive and administrative support to the line functions of the Department.

The executive office provides essential management, policy and program direction including public information, legislative liaison, and legal support. Administrative services, which provides fiscal, personnel and business services support, is performed under contract with the Water Resources Control Board.

SOLID WASTE MANAGEMENT BOARD

The objectives of the Solid Waste Management Board are to protect California against further environmental degradation by upgrading solid waste management operations statewide; to conserve natural resources and energy, and to protect the public health, safety and well-being. These objectives will promote more efficient solid waste management techniques and improvements in the handling, storage and disposal of solid wastes, as well as the recovery of usable materials and energy, at both the state and local levels in accordance with the legislative mandates. The Board is also responsible for the statewide development and implementation of minimum standards and policies for solid waste management and for the review, approval, and technical assistance to local government for implementation of the required county solid waste management plans.

I. b. Implement Bay Area Solid Waste Demonstration Project		-	1,800,000

I. SOLID WASTE MANAGEMENT

Program Objectives and Description

The purpose of this program is to refine and to implement the comprehensive state solid waste management and resource recovery policies and programs. More specifically, the program will focus on protecting the public health, safety and well-being; protecting and enhancing the environment; reducing the drain on natural resources; and providing for the upgrading and maximum utilization of existing landfill sites through the conversion of solid waste materials to useful products, including energy.

The above objectives must be attained through local entities which are delegated primary responsibility; however, the board is mandated to review and approve the county solid waste management plans in accordance with adopted state policy, standards and guidelines for solid waste operations. The program provides technical assistance towards the implementation of the county plans and acceleration of the recovery of material resources and potential conversion of solid wastes to energy. In implementing the program, the board staff will track technical developments, the available markets for materials, and provide information, training and guidelines to the local entities and the private sectors in accordance with the legislative mandates, state policy and minimum standards for solid waste management. This program also enables the board to provide the technical assistance to the local entities and private concerns in the development of adequate county plans towards the implementation of new technology in solid waste operations in order to upgrade solid waste handling and disposal practices statewide. Assistance in the development of adequate litter control programs, as well as resource recovery facilities, is an essential thrust of the program.

The program also deals with the very intricate and complicated subject of overall reduction of waste generation, through development of policies and recommended legislation to control waste at its source.

Another vital aspect of the program, and one which has a direct effect on the safety and well-being of the public, is the development of programs and necessary legislation to upgrade the handling and disposal of chemical and liquid industrial wastes. The solution to this growing problem can have a direct effect on not only public health but the continued economic growth and output of industry as well.

Finally, the development of markets for materials, as well as for energy and fuels, in order to enhance the utilization of solid wastes is essential to the development of resource recovery facilities by local entities and/or the private sector.

Authority

Government Code Section 66700 et seq. and Health and Safety Code Section 4500 as amended by Chapter 342, Statutes of 1972.

SOLID WASTE MANAGEMENT BOARD—Continued

a. Planning and Implementation

There are four major activities associated with this element:

1. Assist the local entities in the updating of the county solid waste management plan as required by law and to review these county plans for recommendation to the board for its approval. Such plan revisions and review approval are based on policies, guidelines and standards established by the board.
 2. Provide technical assistance to local entities to aid in the implementation of the county solid waste management plans. Technical assistance will be rendered concerning improved conventional waste management including storage, collection transportation, transfer and disposal.
 3. Assist and monitor local entities in the administration and enforcement of the adopted state minimum standards for solid waste handling and disposal.
 4. Conduct special studies and investigations of specific problems in solid waste management or of areas needing improvement. The effort will be required to keep solid waste management up to date statewide and to anticipate and propose programs when possible problems arise.
- In addition, this element will carry out the following legislative mandates.
1. Coordinate solid waste management studies or activities by other state agencies.
 2. Prepare and implement a statewide solid waste management information, storage and retrieval system.
 3. Inform local government, private industry and the public on environmental protection techniques related to solid waste disposal.
 4. Provide technical training to state and local agencies and others in the planning and operation of solid waste management programs.
 5. Administer the board's authority for operations approval of the implementation of solid waste management facilities, both before and after approval of the county solid waste management plans.
 6. Respond to public complaints and inquires regarding solid waste management facilities and operations.
 7. Review environmental impact reports to determine if problems related to solid waste disposal have been properly addressed.

Output

	1974-75	1975-76	1976-77
Review environmental impact reports	90	80	130
Review waste discharge requirements	100	100	120
Prepare technical publications	1	2	5

Input

	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	11.7	16.7	14.1	\$346,923	\$507,660	\$443,445

b. Resource Recovery Implementation

Chapter 342, Statutes of 1972 requires that a resource recovery program and a state policy for solid waste management be adopted. This has been accomplished and now requires implementation. The basis for the state program and policy regarding resource recovery is to utilize wastes as a resource (including energy) to the greatest extent possible with the resulting environmental benefits to the State of reducing the use of prime land for disposal of garbage, extending the life of present landfills, reducing the potential of water pollution and reducing the drain on natural resources and virgin materials.

The purpose of this element is to implement the resource recovery program as required by Chapter 342/72. Top priority must be placed on the utility of waste through implementation of systems for recovery of both materials and energy from solid wastes whenever feasible. Technical assistance to cities and counties and to the private sector in all aspects of resource recovery, mandated by the enabling legislation, is necessary to accelerate statewide implementation of the State Resource Recovery Program. A goal of 25 percent reduction of waste to landfills by 1980 through resource recovery is established. Additional specific activities undertaken within this element are:

1. Develop and implement resource recovery demonstration and state pilot projects.
2. Identify and implement needed research and development projects as they pertain to resource recovery. Monitor and track such projects and publish the results.
3. Stimulate state and local government procurement of secondary materials by publishing information on marketing prices, assimilation capacities and secondary materials specifications. Explore methods for improving and stabilizing markets for these recovered materials.
4. Evaluate the feasibility of various resource recovery processes and potential energy conversion methods.
5. Develop a financial assistance plan for research and development, demonstration and full scale resource recovery projects.
6. Review and work towards the elimination of impediments to resource recovery. For example, investigate freight rate structure, tax laws and zoning ordinances which may deter resource recovery projects.
7. Explore methods of financing resource recovery projects and assist local agencies in implementing such projects as they are identified in the county solid waste management plan.
8. Develop and implement an information system and implement a public education program pertaining to resource recovery.
9. Continue to explore source separation and source reduction techniques and encourage implementation where feasible. Implement a source separation demonstration project.
10. Review of county solid waste management plans as they pertain to resource recovery.

A solid waste management demonstration project will be implemented in the San Francisco Bay area reflecting the results of a study to be completed in 1975-76.

Output

	1974-75	1975-76	1976-77

STATE WATER RESOURCES CONTROL BOARD

The objectives and responsibilities of the State Water Resources Control Board and the nine regional water quality control boards are to preserve and enhance the quality of California's water resources and to assure their conservation and effective utilization. These objectives are achieved through two action programs: water quality and water rights.

SUMMARY OF PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
I. Water quality	\$39,953,869	\$80,135,176	\$82,528,054
II. Water rights	1,568,785	1,656,485	2,344,490
III. General support:			
Distributed	(2,000,674)	(1,732,861)	(2,032,379)
Undistributed	-	551,000	703,861

Personnel man-years	513.8	632.9	697.3

SIGNIFICANT PROGRAM CHANGES

Program	Description	Man-years	Dollars
Ia.	Strengthen Water Pollution Control Effort.....	8.9	\$546,000
Ic.	Continued Acceleration of Wastewater Treatment Plant Construction.....	26	876,000
II.	Improve Service to Public by Decreasing Processing Time For Water Rights Applications	20.7	661,400

I. WATER QUALITY

Program Objectives and Description

The broad objective of the water quality program is to achieve and maintain the highest possible quality of the waters of the state consistent with their use. Specific objectives are:

1. To monitor the quality of the waters of the state in order to develop an understanding of the quality, causes and effects of such quality, for the purpose of supporting all state pollution control activities.
2. To formulate and adopt water quality control policies and maintain water quality control plans which will provide guidance for water management decisions.
3. To monitor the quality of the waters of the state in order to determine compliance with control plans, permit terms, conditions and receiving water standards; report such quality, its causes and effects; and assess the effectiveness of the state's water pollution control program.
4. To require of waste dischargers those actions necessary to prevent and abate water pollution, inspect dischargers to determine compliance with requirements, and carry out enforcement actions to obtain full compliance with waste discharge requirements.
5. To ensure that federally licensed projects or facilities requiring federal permits are constructed and operated in a manner which conforms with all applicable water quality standards. To ensure that private treatment facilities granted tax relief incentives are designed, constructed, and operated to achieve compliance with applicable water quality standards.
6. To assist local entities in the construction of wastewater treatment facilities needed to comply with discharge requirements and achieve receiving water standards.
7. To evaluate new problems, specialized techniques and concepts in water quality control; define and develop solutions to unique water quality problems in the State; establish and conduct an intensive operator training program to provide the skills necessary in operating today's complicated waste treatment facilities.

California faces serious challenges in water management, pollution control and water quality enhancement. Growth of population and expansion of industry and agriculture demand abundant clean water; at the same time they threaten its quality and availability. An effective, comprehensive program for managing California's waters is essential to balance these conflicting pressures on the State's most precious resource.

Authority

Porter-Cologne Water Quality Control Act, California Water Code Sections 13000 et seq., provides general legislative authority for the state's water quality control program. This code also authorizes the state board to exercise those powers delegated to the state by the Federal Water Pollution Control Act, P.L. 92-500.

General	72.2	71.4	76.7	1,734,584	1,529,991	1,750,742

a. Regulation

The regional water quality control boards regulate waste discharges with three closely related activities: adoption of waste discharge requirements, surveillance and monitoring, and enforcement.

Waste discharge requirements are the cornerstone of regulation. These requirements specify limits on the quality and quantity of an effluent and conditions that must be maintained in the receiving water. Regional boards formulate discharge requirements for each new discharge and periodically reevaluate and upgrade these to conform to current technology and water quality conditions. For discharges to surface waters, discharge requirements also serve as permits of the National Pollutant Discharge Elimination System established by federal law and delegated to the state by the Environmental Protection Agency.

Waste discharge requirements are ineffective without surveillance and monitoring and enforcement to assure compliance. Surveillance and monitoring activities include collection, interpretation, and storage of water quality and quantity data. Regional boards use these data to measure compliance with discharge requirements and achievement of water quality standards, to identify sources of pollution, and to identify waters requiring special studies. These data are also essential for establishing and reviewing water quality standards, an important activity of the planning element.

Whenever surveillance and monitoring activities uncover a violation of discharge requirements, a regional board attempts to gain compliance through voluntary action by the discharger. If this fails, administrative enforcement, and finally, judicial enforcement remedies are sought.

The state board must consider all appeals by aggrieved persons of any regional board action and may review a regional board action even though an appeal has not been filed. The appeals process provides a final opportunity for administrative review of a regional board action and is particularly important when actions may later be subject to judicial scrutiny.

The state board is also required by law to issue various types of certifications or registrations for other agencies or individuals. These certifications include:

1. Registration of liquid waste haulers
2. Certification of water quality laboratories
3. Licensing of oil spill cleanup agents
4. Certification for federal tax purposes
5. Certification to the California Pollution Control Financing Authority
6. Certification of compliance with water quality standards
7. Certification of wastewater treatment plant operators

To bring compliance with state standards up to an acceptable level, staffing increases in surveillance and monitoring and enforcement activities are being made. These increases will permit the Board to proceed toward compliance with the Porter-Cologne Act and satisfy federal standards.

Output	1974-75	1975-76	1976-77

STATE WATER RESOURCES CONTROL BOARD—*Continued*

b. Planning

To be most effective, the water quality and water rights programs of the State must be carefully coordinated and based on a long-term consideration of their social, economic and environmental impacts. Evaluations by the state and regional boards provide the methods to be used in the future to protect the beneficial uses of water.

To date, water quality management plans have been prepared for the 16 hydrologic basins comprising the State. In these plans, beneficial uses of the waters are identified and water quality objectives necessary to protect those uses are established. Control actions that must be implemented to achieve these objectives, primarily actions affecting point source municipal and industrial waste discharges, are also described in the plans.

In fiscal year 1975-76, additions to the water quality management plans stress identification of solutions for problems of nonpoint sources of pollution, such as irrigation return flows and urban storm water runoff. In 1976-77, priorities for nonpoint source controls will be assessed and a schedule will be set for additional planning to develop these controls and implement other recommendations of the plans.

A total of \$10 million in local, state, and federal funds has been invested in the preparation of the water quality management plans. To continue benefiting from this investment and to comply with state and federal law, the plans will be updated periodically, ensuring that their provisions remain viable in light of changing knowledge, technology, and public expectations.

With completion of the Water Quality Control Plans there is a significant shift from contractual development to in-house followup implementation activities; as a result there is a reduction in the basin planning effort. In order to comply with Section 208 of the Federal Water Pollution Control Act, the Board, in conjunction with local agencies is implementing Areawide Waste Treatment Management Plans for control of point and nonpoint sources of pollution and for establishing regulatory programs. The effort at the state level will be wholly supported by federal funds.

Output

This program of extending and updating the water quality control plans will be implemented directly by state and regional board staff. Additionally, state board staff and the Environmental Protection Agency will guide areawide waste treatment management planning agencies designated under provisions of Section 208, Federal Water Pollution Control Act, P.L. 92-500, in formulating specific management programs to control nonpoint sources of pollution in their areas.

Effective planning results in the implementation of sound policies. Accordingly, the state board will continue to formulate and adopt policy documents addressing issues of statewide significance, such as wastewater reclamation and groundwater recharge.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	37.5	39.5	38.3	\$1,227,976	\$1,352,631	\$1,209,282

c. Facility Development Assistance

Inadequate wastewater treatment facilities and improper operation of facilities are principal causes of water pollution in California. To help solve these problems the state board administers programs for awarding wastewater facilities construction grants to public agencies and for training and certifying facility operators.

The wastewater facilities construction program is the largest public works program currently in effect in the State, with the cost of projects under some phase of grant processing totaling \$1.1 billion for F.Y. 1975-76 and \$1.5 billion for F.Y. 1976-77. The federal government contributes up to 75 percent of the cost of constructing facilities, while the state and local recipients each adds 12.5 percent. The Environmental Protection Agency, however, has delegated almost total responsibility for administering this program to the state board. Administration of the program involves: (1) developing a statewide project needs list and establishing priorities for grant requests; (2) reviewing and evaluating facilities plans, including environmental impact reports, revenue programs and cost effectiveness analyses; (3) reviewing of design plans and specifications, certifying projects to the Environmental Protection Agency and executing contracts with grantees (local wastewater management agencies); (4) monitoring construction and approving progress payments; (5) performing final construction inspection and audits; and (6) performing annual inspections for three years following construction. The board staff works closely with the local agencies and their consultants through all phases of development to ensure compliance with all applicable federal and state regulations.

Projects receiving grants are now larger and more costly and involve more sophisticated facilities. To assure optimum use of public funds expended on these projects, greater attention must now be paid to the following activities:

1. Plans and specifications review
2. Construction inspections
3. Change orders
4. Review of consulting engineers' contracts and fees
5. Accounting, costing, and fiscal control
6. Operation and maintenance inspections.

A more complex grant approval process now required by governing regulations will result in selection of the most cost-effective projects. However, detailed review and approval of plans of studies for each project, earlier involvement of state staff in the development stage of proposed projects, analysis of existing wastewater collection systems, and assessment of storm water separation and treatment also increase the workload.

The most carefully planned and constructed wastewater treatment plants are ineffective unless operated properly by well trained personnel. Recognizing this, the state board has established a program required by Chapter 1315, Statutes of 1972, whereby municipal treatment plants are classified according to their complexity and the level of competency needed by their operators. In addition, operators are tested and certified at these different levels according to their experience, education, and examination results. Approximately 700 plants and 3,000 operators are classified and certified under this program.

Training is available to treatment plant operators through community college courses, for which the state board provides advice on curricula, and through the state board's San Marcos Training Center, a wastewater treatment plant that allows practical, problem-oriented training. A mobile classroom-laboratory is also available through the San Marcos center and has been in great demand throughout the state.

The increased staffing in F.Y. 1975-76 and F.Y. 1976-77 is due to three major factors: (1) acceleration of the grant process; (2) increase in the size and complexity of projects; and (3) additional tasks and requirements mandated by state and federal rules and regulations.

In 1974, the state board took steps to encourage the wastewater facilities grant program for the purposes of producing a substantial construction cost savings and more quickly upgrading the quality of California's waters. This program was made possible by enactment of Chapter 804, Statutes of 1974, allowing the state board to collect a processing fee from grantees.

In January 1975 the Governor supported accelerating the wastewater construction projects, which not only stimulated the general economy but also created additional employment in California. The acceleration will result in construction of some projects three years earlier than originally planned. In F.Y. 1975-76, the augmented staff supported by this processing fee will be able to review facilities plans and approve grants for \$800 million in new wastewater facilities, as opposed to \$520 million without the acceleration. The full impact of the acceleration will be felt in F.Y. 1976-77, at which time \$1 billion in facilities grants will be processed, double the amount that would be processed without an acceleration. Assuming the 1975-76 projects will be accelerated by one year and projects in 1976-77 and 1977-78 by two years, the savings in construction costs will be approximately \$30 million in the current year and nearly \$100 million in each of the next two years, based on an annual inflation factor of 10%.

Increases in staffing will permit a continuation of the accelerated program initiated during 1974-75 to reduce the effects of inflation and thereby realize more construction activity per dollar. Additional staffing is also required to meet workload generated by Environmental Protection Agency of responsibility and administration of the Wastewater Facility Construction Program.

	\$30,563,742	\$68,379,713	\$70,071,802

d. Program Support

This element includes research, technical and legal assistance, electronic data processing management, and administrative management in support of the Water Quality Program.

Policy decisions which will have profound effects on our environment must be made; it is imperative that they be based on a foundation of sound data and reliable information. This requires an effective program of research coordination and stimulation, appropriate data assimilation and analysis, and translation of useful new data into water resources program management. Research studies will be conducted, primarily under contract to other state agencies or private firms. Also, a major responsibility is the review and analysis of environmental impact documents received by the state clearinghouse or by the state and regional boards.

Agriculture is not only the largest industry in the state, but also the largest water user, exerting a pervasive influence on the State's water resource. Recognizing this vital role, the state board will establish one statewide and several regional agricultural advisory committees to assist the board and its agricultural unit in developing policy and programs relating to water quality matters concerning agriculture. In addition to advising the board, the agricultural unit also acts as staff to the advisory committees.

The State Water Resources Control Board has the statutory responsibility to prepare and implement a statewide water quality information, storage, and retrieval program. The program is required to be coordinated and integrated to the maximum extent practicable with data storage and retrieval programs of other state agencies. Based on this policy the board has developed three systems for the Water Quality Program consisting of waste discharge data, water quality data, and planning information.

In F.Y. 1976-77 the state board's data program will consist of the following: (1) In conjunction with the Department of Water Resources, the Department of Health, and the Department of Fish and Game complete feasibility study and implementation plan, and begin preliminary design for the water quality data system; (2) maintain interim water quality data system utilizing the Department of Water Resources' Water Data Information System and federal STORET data program; (3) maintain files developed in F.Y. 1975-76 and preceding years; (4) initiate basic design and complete consolidation of a waste discharge data system.

II. WATER RIGHTS

Program Objectives and Description

The objectives of this program are to obtain the greatest beneficial use of the waters of the State, to prevent its waste or unreasonable use, to give assistance to the courts in determination of water rights, and to maintain a record of water diversions and use throughout the State.

The Water Code declares that all water flowing in any natural channel not already appropriated or reasonably needed for beneficial uses on riparian lands is public water of the State and subject to appropriation. There is an established procedure by which applications are approved and permits are issued under which the appropriation is completed and a license is issued confirming the water right. In addition to this major program effort, the Division of Water Rights gather a history of water extractions and diversions from groundwater basins in some counties in southern California, determines the status of water rights other than those under the permit and license procedure and renders assistance to the courts in the determination of the water rights.

Authority

Division 2 of the California Water Code and Title 23 of California Administrative Code provide authority and regulations for the state's water rights program.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

c. Determination of existing rights	4.2	9.6	10.3	103,026	231,140	268,585
d. Support:						
Program	14.9	5	6.2	383,136	121,305	160,183
General	11.1	9.4	12.3	266,090	202,870	281,637

a. Water Appropriation

In order to obtain the right to take unappropriated water from surface streams, other surface bodies of water, or defined subterranean streams, an application to appropriate such water must be filed with this board. In considering the application, the board must weigh the relative benefit to be derived from all beneficial uses of the water concerned. It may subject such appropriations to terms and conditions as which in the board's judgment will best develop, conserve, and utilize in the public interest the water sought to be appropriated.

Environmental impact assessments are made for all projects. These lead to the preparation or review of exempt declarations, negative declarations, or environmental impact reports. In the event existing water users protest, or there are protests concerning the environmental evaluation, the board must hold hearings and conduct field investigations to determine whether an application should be approved or denied. In many cases, when the application is approved and a permit is issued under controversial conditions, the board retains jurisdiction for continuing study to determine the effects of the project on downstream prior rights.

A backlog of about 700 applications to appropriate water are awaiting issuance of either permit or license. The average time now required for approval or denial of an application by the board is three years. The increased staffing is designed to (1) prevent the current backlogs from increasing, (2) eliminate the existing backlog over a three year period which will reduce average processing time to one year, and (3) provide the necessary personnel upon elimination of the backlog to undertake the surveillance, investigative, and enforcement activities that are essential to adequate and proper administration of the water rights program.

Output	1974-75	1975-76	1976-77
Applications being processed	650	704	750
Inspection for license and compliance	145	373	375
Environmental assessments	350	250	250
Permits issued	44	102	200
Change orders	23	45	50
Extension orders	36	54	70
Licenses issued	136	177	180
Revocations and cancellations	100	115	130
Enforcement investigations	—	—	40
Stockpond certificates	—	—	100

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	35.4	41.6	56.9	\$761,940	\$1,020,475	\$1,524,375

b. Water Diversion

The board is responsible for the administration of laws which require the collection of water diversion data pertaining specifically to water rights. This is building up a valuable record of surface and groundwater data. In southern California, the Counties of Riverside, San Bernardino, Los Angeles, and Ventura have a severe groundwater shortage. The law requires that reports be filed by anyone extracting more than 25 acre-feet of water from the ground and also notices be filed for extractions from sources in lieu of groundwater. Also, any person who diverts water from a surface stream or body of water, with certain exceptions, and does not have a permit or license issued by the board, is required to file a statement of the diversion and use with the board.

Output	1974-75	1975-76	1976-77
Recordation Notices Filed:			
First notices	100	100	100
Annual notices	4,600	4,600	4,600
Cessation of groundwater extraction reports reviewed and processed	55	55	55
Statements of water diversion and use being reviewed and processed	1,000	1,800	1,800

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	2.9	3.4	4	\$54,593	\$80,695	\$109,710

c. Determination of Existing Rights

The board and its predecessor agencies have been assisting the courts in adjudication of water disputes since passage of the Water Commission Act in 1914. The board assists the courts either by: (1) court references under which the board is appointed referee in actions before a court, or (2) statutory adjudications, wherein a determination is initiated through petition to the board by the affected users. Both procedures culminate in a court decree defining the water rights involved.

Output	1974-75	1975-76	1976-77
Adjudication actions	8	8	8

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	4.2	9.6	10.3	\$103,026	\$231,140	\$268,585

d. Program Support

This element includes technical assistance, the research, planning, and administrative management components of the water rights program.

Output	1974-75	1975-76	1976-77
Planning and Research studies	3	2	3

III. GENERAL SUPPORT

Program Objectives and Description

The objective is to provide to the five divisions of the state board and the nine regional water quality control boards essential management and policy direction, legal and administrative services, public affairs activities, and coordination of effort for the most effective accomplishment of program objectives.

The five appointed state board members, each of whom represent specified areas of knowledge required by the Water Code, are responsible for establishing overall policy, providing direction to state board staff and to the regional boards, approving regional boards' water quality control plans, considering appeals concerning other actions or inaction of the regional boards, and coordinating on a statewide level all activities in the complex field of water quality and water rights.

Specialized staff services are provided to the state board and regional boards in the functional areas of: public affairs, legal advice and assistance, program analysis, fiscal management, personnel management, training, business services and management systems analysis.

The board also provides reimbursed administrative services to the Air Resources Board and the Solid Waste Management Board.

I. TAHOE REGIONAL PLANNING COMPACT

Program Objectives and Description

The Tahoe Regional Planning Compact is established as a bi-state agreement between Nevada and California. The compact has been approved by the State of Nevada and the Congress.

The act requires adoption of both interim and comprehensive regional plans by the Tahoe Regional Planning Agency relative to effective environmental controls in the Lake Tahoe Basin. Subsequently, Chapter 988, Statutes of 1968, made certain amendments to the original legislation and appropriated funds to carry out the purposes of the compact. The program was later modified by Chapter 1064, Statutes of 1973.

Authority

Continuing program costs	\$123,334	\$30,000	\$65,000

II. WATERWAYS MANAGEMENT PLANNING

Program Objectives and Description

The program involves development of management plans for the rivers and portions of rivers in the California Wild and Scenic Rivers System and administration of the program as required by the Wild and Scenic Rivers Act. In addition, waterway management plans are prepared for the rivers contained in the Protected Waterways Program (Chapter 761, Statutes of 1971). These plans are prepared in close cooperation with and assisted by local government. Grants are made to local governments on a reimbursable basis for their assistance in plan development. Another aspect of the program involves the classification of rivers or segments of rivers as to wild, scenic or recreational status as required by the Wild and Scenic Rivers Act.

The program is administered by the Resources Agency through the Department of Fish and Game which provides staff for the program. Collection of data and preparation of preliminary management plan information is handled through contracts with private consulting firms who provide the broad range of technical skills required on an interim basis.

Work Program for Current Year (1975-76)

The program for 1975-76 involved establishment of contacts with all local governments involved with the Wild and Scenic Rivers System and working with their representatives to classify all segments of rivers in the system. Contacts were also made with conservation organizations, federal agencies, and other state agencies in the administration of Wild and Scenic Rivers System provisions.

A preliminary classification for the entire Wild and Scenic Rivers System was completed and circulated for public review and comment. Management plans for all rivers will be developed in line with this classification.

Draft management plans for the Van Duzen, Salmon, and Lower American rivers were completed and public meetings and hearings held. Work was begun on management plans for the Upper American, Klamath, and Scott rivers.

An analysis was made of the Waterways Management Program and a report submitted to the Legislative Analyst on program administration and necessary changes in the program. In addition, an analysis was made of work completed by the previous task force on the Smith River and additional work needed was determined.

Work Program for the Budget Year (1976-77)

Waterway management plans for the Upper American which were started the previous year will be completed and work on the Klamath and Scott rivers will be continued with the Scott River being completed. An analysis of previous work on the Smith River has indicated additional work requirements for this river and a draft plan for the Smith will be completed.

Cooperative efforts with local government will continue with reimbursable grants being made to the involved counties. Development of a waterway management plan for the San Lorenzo River will be started with Santa Cruz County being the lead agency and funds provided to the county for plan development on a matching basis. Staff support to the Secretary for Resources for administration of the program will continue to be provided by the Department of Fish and Game.

SPECIAL RESOURCES SERVICES AND STUDIES—*Continued*

III. SEA GRANT PROGRAM

Program Objectives and Description

This program has provided state assistance to California Institutions of higher education in helping to provide the necessary matching funds for selected projects under the Federal Sea Grant Program. *Continuation of state assistance is not proposed for the 1976-77 fiscal year.*

Authority

Chapter 1115, Statutes of 1973.

	1974-75	1975-76	1976-77
Continuing program costs.....	\$426,202	\$500,000	-

IV. FUEL SUPPLY COORDINATION CENTER

Program Objectives and Description

The objectives of the center were to make recommendations to the federal allocation officer for the distribution of up to 10 percent of the future allocation of middle distillate fuels of wholesale purchasers to alleviate temporary exceptional hardship cases of end users within the state; to assess and judge individual problems and make them known to the federal government so they can be rapidly dealt with.

This program was terminated June 30, 1975.

V. MAINTENANCE DREDGING COORDINATION

Program Objectives and Description

Chapter 1274, Statutes of 1974, established the Resources Agency as the state coordinating agency for all applications for permission to conduct maintenance dredging in the area described as included in the area of jurisdiction of the San Francisco Bay Conservation and Development Commission. The activity is a pilot program attempting to streamline and expedite dredging permit application procedure. The program is to be effective until July 1, 1976. The Resources Agency is responsible for a report to the Legislature of its evaluation of permit procedures, identifying problems, and making recommendations concerning ways to expedite the process. The agency is also to advise the Legislature on the feasibility of a statewide application of the new procedures. The report to the Legislature is to be made on or before February 1, 1976.

Authority

	1974-75	1975-76	1976-77
Continuing program costs.....	\$27,000	\$54,000	-

VI. LOCAL ASSISTANCE

California Tahoe Regional Planning Agency

Program Objectives and Description

The California Tahoe Regional Planning Agency is a special body created by the Legislature as a political subdivision of the state. It is neither a city nor a county; rather, it is a regional agency. The interests of the State of California in negotiations with the Tahoe Regional Planning Agency are the primary concern of this body. Chapter 1064, Statutes of 1973, revised the membership of the agency, and provided for state funding of the body deleting provisions of the earlier legislation calling for assessment of counties within the Tahoe region to support the agency. Because planning actions taken by the agency place restrictions on the development of private property, there have been numerous law suits requiring legal services that are not supplied by the Attorney General. For that reason \$75,000 was provided in 1975-76 for legal fees and other litigation expenses. *The budget year proposal represents an increase of \$25,000 for legal services and \$45,000 for a new investigator position, increased funding for expert witnesses, and general increased costs.*

Authority

Chapter 1064, Statutes of 1973.

SPECIAL RESOURCES SERVICES AND STUDIES—*Continued*

VII. LOCAL ASSISTANCE

Inundation Maps

Program Objectives and Description

This program provides for disbursement to specified agencies to reimburse such agencies for one-time costs incurred in the preparation of dam failure inundation maps. This is a reimbursement of costs incurred by the local agencies during a specified four-month period prior to January 1, 1973. The program is not projected for continuation into the Budget Year.

Authority

CALIFORNIA CONSERVATION CORPS

A new youth public service program called the California Conservation Corps has been initiated by the Governor to be effective July 1, 1976. Two existing programs, the Youth Conservation Corps and the Ecology Corps with current expenditures of approximately \$4.9 million are to be terminated. The Governor's new program, California Conservation Corps will redirect those existing funds and be augmented by \$5 million for a new program total of approximately \$10 million.

The primary objectives of the California Conservation Corps are to provide meaningful and productive employment and public service opportunities for young men and women, to train them in the basics of employable skills; and to accomplish work projects that are of significant value to the people of the state.

Programs are to be developed in health services, social services, urban services and in natural resources. The first program to be implemented will be directed toward protecting, conserving, developing and enhancing the many natural resources of the state and providing public use opportunities for these natural resources, while at the same time providing young men and women with an opportunity for personal development in a variety of basic skills.

Projects will be undertaken in both urban and rural areas based upon: 1) environmental and resource benefits; 2) the value toward providing public use opportunities of the state's natural resources; and 3) on-the-job training value. Work project proposals will be accepted from all state agencies and departments, and priorities will be determined and assignments made based upon the three basic criteria noted above.

It is intended that the California Conservation Corps will assume that portion of the current Ecology Corps program that is necessary to the proper functioning of the Division of Forestry's fire fighting program. However, the major program will be greatly expanded and redirected to reflect the goals mentioned above. In addition, other suitable and significant work projects will be undertaken by the California Conservation Corps for other governmental entities (local and federal) on a reimbursable basis.

Young people will be recruited statewide. Selection for employment will be based on their interest, aptitude and ability to learn and work harmoniously with others toward public service objectives. From 1,000 to 1,200 young men and women are expected to be employed under this program during the first year of operation.

The executive leadership and policy direction required for the successful implementation of this program will be provided by the establishment of a special unit in the Resources Agency. New positions will be proposed for this unit which will also contract with other state departments to provide some of the necessary supervision on individual projects and for needed administrative support services. Additional details regarding expenditures as well as the specifics of the program will be submitted separately to the Legislature at a later date.

ENVIRONMENTAL PROTECTION PROGRAM

The Marks-Badham Environmental Protection and Research Act of 1970 established the California Environmental Protection Program Fund into which fees are deposited for carrying out the purposes of this act. The source of revenue for this program is the sale of personalized motor vehicle license plates by the Department of Motor Vehicles. The Secretaries for Resources and Business and Transportation develop environmental protection plans and recommend apportionment of funds.

In addition to the projects listed here funds have been allocated directly to those state agencies given the responsibility to carry out specific-approved programs.

Authority

Chapter 779, Statutes of 1970.

PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
Environmental Protection Program (<i>California Environmental Protection Program Fund</i>)	\$73,646	—	\$400,000

Program Elements

a. Purchase of ecological reserves	\$73,646	—	—
b. Environmental education projects	—	—	\$400,000

a. Purchase of Ecological Reserves

Provides for acquisition in fee of areas in the state having unique ecological value; provides for the acquisition of unique or critical wildlife habitat areas which have been identified as meeting that criteria and are proposed for acquisition; provides for improvements, such as fencing, to the acquired properties for the purpose of protecting the ecological value therein.

Input	1974-75	1975-76	1976-77
Expenditures	\$73,646	—	—

b. Environmental Education Projects

The Resources Agency will contract with the Departments of Parks and Recreation, Conservation, Fish and Game, and Water Resources for the development of environmental education projects and materials. The education materials will be designed to increase the public awareness of the need to protect the environment. The material developed will be made available to all schools for use in their environmental education programs. In addition interpretive displays will be developed for use in state parks and other areas throughout the state.

CALIFORNIA POLLUTION CONTROL FINANCING AUTHORITY

The issuance of pollution control revenue bonds was approved by a vote of the people November 7, 1972. Enabling legislation is contained in the California Pollution Control Financing Authority Act (Division 27, Chapter 1 of the Health and Safety Code, commencing with Section 39600), as amended by Chapter 277, Statutes of 1973, Chapter 1473, Statutes of 1974, and Chapter 1165, Statutes of 1975.

This program provides an opportunity for private industrial firms to utilize tax exempt financing to acquire, construct, or install pollution control facilities to meet the quality standards mandated by federal, state and local governments for the control of environmental pollution. Effective 1976, the Authority's program is available for the financing of projects using resource recovery as a means of disposal of solid waste.

The Authority estimates that over \$2,600,000,000 will be needed by California industries to meet air and water quality standards, and to reduce the volume of solid wastes by 1983. A substantial portion of this capital would be eligible for financing through the Authority.

An initial maximum of \$200,000,000 in bonds or notes was authorized by the Act. As of November 1, 1975, approximately \$181,644,000 has been allocated by initial resolutions. Of this amount, bonds totalling \$71,779,000 have been sold and additional sales are anticipated in the near future. Approximately \$22,511,000 has been allocated to 20 different small firms. Slightly over \$18,355,000 remains for future allocations. It is not anticipated that additional bonds will be authorized prior to March 1976 at the earliest.

Companies which received financing through the program have included food processors, cooperatives, manufacturers, petroleum producers, refiners and marketers, and public utilities. The Authority has consulted with lenders and investors to tailor programs for specific needs. There is no minimum size, and individual projects costing \$200,000 to \$15,000,000 have been funded in this manner. These projects have been financed at annual percentage rates ranging from 2% to 5% less than through conventional sources. Companies using this financing are also eligible for rapid amortization, depreciation and investment tax credit incentives for mitigating negative cash flow impacts of pollution control financing.

Projects costing less than \$2,500,000 are generally financed with banks or other sources that are familiar with the company. Companies with public markets for their securities or with well-known public names have been able to get a public underwriting for their issues.

The law specifically provides that such indebtedness shall not be secured by the taxing power of the State, nor any of its political subdivisions. Under no circumstances shall the authority create any debt, liability, or obligation on the part of the state payable from any source whatsoever other than project revenues or other moneys received by the Authority. This is a trust activity and involves no state revenues or expenditures.

A loan from the Emergency fund was made to the Authority in 1972-73 and 1973-74 for its initial administrative costs. The 1972-73 loan has been repaid from revenues obtained from participating companies and it is anticipated that the 1973-74 loan will be repaid prior to June 30, 1976, together with interest. In addition the Authority works with the staffs of the Water Resources Control Board, the Air Resources Board, the State Solid Waste Management Board, the Attorney General, and the State Treasurer and reimburses them for staff time spent on authority projects.

The Authority is currently creating a program to enhance the credit of smaller companies, with the objective of achieving the greater availability of long term sources of funding. The options include the involvement of U.S. Small Business Administration. This source is now available for certain types of loans which cannot be funded through the Authority's program.

ENERGY RESOURCES CONSERVATION AND DEVELOPMENT COMMISSION

The objective of the Energy Resources Conservation and Development Commission is to insure the continuance of a reliable supply of energy at a level consistent with the state's needs for protection of the public health and safety and for promotion of the general welfare. The program is based on the establishment of measures to reduce waste and inefficient use of energy, and on the research and development of new and/or alternative means of conserving, generating, and supplying energy, while complying with statewide environmental, public safety, and land use goals.

SUMMARY OF PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77

I. ENERGY RESOURCES CONSERVATION AND DEVELOPMENT

Program Objectives and Description

The objectives of the program are: 1) to assess and forecast energy demands and supplies; 2) to promote the conservation of energy resources; 3) to consider permits for the siting of powerplants and facilities; 4) to develop contingency plans for addressing possible shortages of electrical energy or fuel supplies; and, 5) to insure that a reliable supply of electrical energy is maintained at a level sufficient for the protection of the public health and safety, for promotion of general welfare, and for consistency with good environmental practices.

ENERGY RESOURCES CONSERVATION AND DEVELOPMENT COMMISSION—Continued

A. Energy Assessments

The primary objective of the Energy Assessments element is to forecast and analyze effects of the growth and distribution of energy demand in California and the resources to meet these demands. This element incorporates environmental considerations into the Commission's decision-making process on an ongoing basis. During 1976-77, advanced econometric and process models of energy supply and demand and interfuel substitution, along with an Environmental Manual for energy planning and impact analysis, will be developed. An analysis will be made of economic, environmental, social, technological and resource assumptions underlying energy policies and programs, including national, state, and regional factors affecting energy supply and demand. Work will be carried out to analyze the environmental, social, and economic impacts of Commission policies and programs; develop environmental assessment procedures for energy industries submitting applications to the Commission; and analyze energy components of private and public agencies' environmental documentation.

Three clerical positions and EDP funds are being added to develop, implement and monitor the Commission's Data Processing System.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	3.7	88.3	91.3	\$278,371	\$3,263,735	\$3,301,152

B. Energy Facility Siting

The primary objective of this element is to analyze and make recommendations regarding new or expanded energy generating facilities and to assure that any certified facility is constructed and operated in compliance with established standards. During 1976-77, an estimated five Notices of Intent and Applications for Certification of generating facilities will be processed. A site screening and site ranking methodology and data base will be developed as well as a monitoring system for the design, construction and operation of energy generating facilities to insure conformance with established standards. Models will be developed to assess the impact of proposed facilities on public health and safety, and monitoring systems established to insure compliance with air and water quality and radiation standards.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	0.2	44.7	47.7	\$22,680	\$1,002,852	\$1,554,019

C. Conservation

The Conservation element develops regulations and recommendations to conserve energy within the State of California. The primary effort is to promote more efficient use of energy in buildings, appliances, industrial and utility processes, and transportation. An essential part of the Conservation element is the setting of standards through the Commission's rule-making regulatory authority which provide cost effective energy saving performance characteristics in energy consuming products. Equally important is the development of recommendations for economic incentives to conserve energy and the communication of methods by which energy consumers can reduce the waste of energy resources.

During the 1976-77 fiscal year, this element will be involved in developing and assisting local government in enforcing energy conservation standards, and prescribing regulations for lighting, insulation, and climate control for new residential buildings and non-residential buildings. In addition, work will be carried out to develop minimum efficiency standards for all high energy use electrical appliances and for the operation of new facilities. Specifications for certification and periodic inspection of intermittent ignition devices, along with monitoring and conserving devices, will be identified. The use of non-depleting alternate energy systems, resource substitutions, and institutional barriers to conservation will be explored. Recommendations will be made on energy conservation through electricity pricing measures, and through participation in task forces, public hearings, and training programs.

Two professional positions are being added to review EIR's for conservation potential. Four professional and 0.5 clerical positions have been added to assist in the development and implementation of an energy conservation education program.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	2.6	42	45.8	\$295,475	\$1,714,718	\$1,379,693

D. Office of Governmental Affairs

The objective of the Governmental Affairs element is to provide liaison between local, federal and state government entities. The office is responsible for specific priorities which include:

- Identification and contact with persons responsible for energy problems in local government jurisdictions including municipal and private electric utilities;
- Compilation and maintenance of an up-to-date roster of federal and local government officials or employees involved with energy problems. Also assisting local governments in dealing with the activities of the Commission and providing input to the Commission on local government activities;
- Development of a thorough understanding of local rules and regulations that may affect or be affected by actions of the Commission;
- Provide coordination with Department of Finance, Resources Agency, the Governor's Office, and legislative committees on energy-related matters of mutual concern. Analyze and make recommendations to the Commission on proposed or recommended legislation.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	0.9	3.9	3.9	\$25,299	\$104,785	\$122,117

E. Public Information, Education and Library

The goal of the Public Information and Education element is to maintain and disseminate information to the public about mandated functions in all areas of Commission activity. This function is carried out through media, public schools, colleges and universities, community groups and organizations, and local governments. The information and education function also involves the publication of all technical reports and official documents of the Energy Commission. The Energy Commission is responsible for the maintenance of a library which is to be the central repository of all energy-related material and information within state government. The library is also the custodian of all Commission documents that are available for public inspection and use.

One technician and five clerical positions are being added to meet workload increases in the Central Library.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	1.8	7.3	16.3	\$74,618	\$211,319	\$396,869

ENERGY RESOURCES CONSERVATION AND DEVELOPMENT COMMISSION—*Continued*

F. Emergency Planning

The primary function of the Emergency Planning element is to provide technical expertise and leadership in the area of developing contingency plans to deal with possible shortages of energy supplies. In carrying out this function, the element will:

- Prepare contingency plans to be utilized in the event of a sudden energy shortage;
- Prepare reports identifying the legislation necessary to implement the plans;
- Update the plans in order to maintain their effectiveness;
- Participate in a public education and plan familiarization program;
- Test and evaluate emergency plans through use of scenarios and simulated emergency situations;
- Conduct a study of natural gas shortage issues.

One professional position is being deleted to recognize the reduced work load associated with completion of the Energy Shortage Contingency Plan.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	—	5.4	4.7	—	\$86,543	\$121,835

II. RESEARCH AND DEVELOPMENT

Program Objectives and Description

The element will initiate and carry out a program of research, development, and demonstration in energy sources, supply, consumption, and facility siting with the goal of making available to the state new and useful energy systems and technologies. Research and Development will look at the economic, technological, and social aspects of: solar and geothermal energy; advanced nuclear power plant concepts and siting; organic and industrial waste utilization; improved construction design technologies; advancement in methods to reduce wasteful uses of energy; and development of other energy systems which will benefit the state.

This increase is the total of the integrated research and development program as specified in Section 25603 of the Public Resources Code. A detailed project-by-project description will be submitted separately.

Authority

Public Resources Code Sections 25004, 25006, 25600-25604.

III. ADMINISTRATION

Program Objectives and Description

This program provides management direction and administrative support to the line programs. Executive Management includes the Commissioners' Office, General Counsel, Program Assessments Office, and the Administrative Advisor's Office. This function has two primary roles: 1) sets policies and priorities which recognize and meet the changing energy needs and demands of the State of California and their impacts on consumers, producers, and the environment; and, 2) insures the full and adequate participation by all interested groups and the public-at-large in all Commission activities. Administrative Services provides centralized support and management services including fiscal management, personnel management, training, business services, management systems analysis and central office services.

The following positions are proposed to meet workload and program increases: seven professionals and 3.2 clerical positions to meet legal and hearing officer workload associated with the facility siting process, two professionals for ongoing program review and analysis, one man-years of temporary help to facilitate public participation in Commission meetings, and two professional positions to provide central program and policy development and implementation. One clerical is also proposed to meet the workload of the Commission Secretariate

CALIFORNIA ADVISORY COMMITTEE

Program Objectives and Description

To participate in planning for regional developments of water resources and provide advisory services to the Western States Water Council, the Legislature and interstate commission members.

A Western States Water Council was established in 1965. The California Advisory Committee was activated to advise California's representation on the council.

The Advisory Committee consists of one member of the Assembly appointed by the Speaker of the Assembly, one member of the Senate appointed by the Rules Committee of the Senate, one member of the California Water Commission appointed by the Commission, and four members of the public appointed by the Governor. The per diem, travel and compensation expenses of Governor's appointees to the Western States Water Council who are not officers or employees of the State are paid from the Advisory Committee Budget. The committee advises interstate commission members and the Legislature on regional water planning matters. It receives testimony from the public on matters involving its responsibilities and expresses its advice by resolution when appropriate.

Legislation has been introduced to abolish the Advisory Committee (AB 2487) and no appropriation is proposed for 1976-77.

Authority

Sections 190-192 of the Water Code.

CALIFORNIA-NEVADA INTERSTATE COMPACT COMMISSION

The California-Nevada Interstate Compact Commission works with its counterpart Nevada Commission, with federal agencies, and with legislative and congressional groups to obtain final approval of the California-Nevada Interstate Compact. This compact will allocate the use of the interstate streams, the Truckee, Carson and Walker Rivers. When final approval of the compact is obtained, the Commission will be terminated.

The objective of the California-Nevada Interstate Compact Commission is to work with its counterpart Nevada Commission, with federal agencies, and with legislative and congressional groups to obtain final approval of the compact and to report back to the Legislature on any problems which might affect this final approval. When approval is obtained, the Commission will have no further reason for existence and will be terminated. Legislation of 1974 provides that the Commission shall be abolished upon the earlier occurrence of either the effective date of the compact or January 1, 1977.

The California-Nevada Interstate Compact Commission will join with the Nevada Commission in meeting and working with federal agencies and congressional groups in resolving problems arising during consideration of the compact by the Congress. This will involve meetings of the California Commission with members of the Nevada Commission and with the federal interests concerned with passage of the compact.

Progress on obtaining Congressional consent to the compact was delayed during most of fiscal year 1972-73 while the United States Supreme Court determined whether it should hear a suit to define the rights of all water users along the Truckee River. In June 1973 the Supreme Court issued an opinion that it should not accept the suit. This cleared the way for renewed efforts by the Commission to obtain Congressional consent to the compact and bills providing for congressional consent to the compact have been introduced in both houses of the Congress. The California-Nevada Interstate Compact Commission will endeavor to have these bills brought to hearing and acted upon by the Congress prior to the Commission's termination in January 1977.

COLORADO RIVER BOARD OF CALIFORNIA

The principal objective of the Colorado River Board has been to protect California's rights and interests in the water of the Colorado River system. This has been accomplished through investigation, negotiations with the other basin states and federal agencies, seeking of favorable federal legislation and administrative actions, and, when necessary, through litigation.

The Board is composed of six members appointed by the Governor, each from one of the six major public agencies having rights to the use of water or power from the Colorado River. These agencies are: Palo Verde Irrigation District, Imperial Irrigation District, Coachella Valley County Water District, The Metropolitan Water District of Southern California, San Diego County Water Authority, and City of Los Angeles, Department of Water and Power.

Beginning in the 1976-77 budget year, it is proposed to eliminate state funding for this board. It is felt that the State of California's interests in this and other similar areas can better be met through a central coordinated effort of one agency—the Department of Water Resources.

DEPARTMENT OF CONSERVATION

The principal objective of the Department of Conservation is the protection, conservation, and development of the state's natural assets—its forests (both commercial timber and woodland), watersheds and rangelands, its mineral deposits, and its soil resources. Protection of life, property and resource values from fire and geologic hazards is stressed.

The department is organized into three program divisions: forestry, mines and geology, and oil and gas. The State Board of Forestry, the State Mining and Geology Board, the State Resource Conservation Commission, the Geothermal Resources Board, the Strong Motion Instrumentation Program Advisory Board, the Oil and Gas Commission and the Professional Forester Examining Committee are also within the department. These boards and commissions provide varying degrees of input to the Governor, the Legislature, the Department's Director, and the Agency Secretary for management and policy direction in the respective program areas.

SUMMARY OF PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77

SIGNIFICANT PROGRAM CHANGES

Program	Description	Man-years	Dollars
I. a.	Transfer savings from reduction in fire suppression activities to fire prevention efforts.....	-2	-\$235,000
I. a.	Establish special item for Emergency Fire Suppression	-	5,000,000
I. a.	Program adjustment in allocation of seasonal cooks	-25.7	-270,158
I. a.	Eliminate funding for Ecology Corps—transfer funds to California Conservation Corps	-	-4,179,858
I. f.	Add staff and expenses for Resource Conservation Commission	2	64,500
I. g.	Add Mapping Program at San Quentin	2	120,000
III. a.	Add program for abandonment of hazardous oil and gas wells	-	500,000

I. WATERSHED AND FIRE PROTECTION

Program Description and Objectives

The watershed wildlands supply environmental necessities such as water, clean air, habitat for fish and wildlife, areas for recreation, and open-space areas necessary for continued production of forest and food products produced on our timber, brush and rangelands. Damage and destruction to these resources occur through fire, insects, disease, erosion, weather conditions and inadvertent or intentional misuse by man. Protection from natural and man-caused disaster and destruction is essential to our well-being.

The Watershed and Fire Protection Program is managed by the Division of Forestry. The program's objective is to reduce the impact of destruction to private and state-owned watershed lands. The protection of forest, brush and grass wildlands from long-term damage is basic to the continued economic and social utilization of these limited natural resources. In addition, the program assists local governments in the planned use of land and water resources and encourages the preservation of prime agricultural and open-space land necessary for economic and environmental needs.

To meet the need for up-to-date maps with sufficient detail for fire protection, resource management, etc., a permanent mapping facility will be developed at San Quentin to improve mapping efforts while providing vocational training and useful work for prison inmates. Initial costs are \$120,000 with \$50,000 earmarked for one-time equipment and building modification expenses.

Authority

Constitution, Public Resources Code (principally), Health and Safety Code, Penal Code, Welfare and Institutions Code, Military and Veterans Code, Governor's executive orders, administrative orders, Board of Forestry policy, Administrative Code, federal law, contracts and agreements.

DEPARTMENT OF CONSERVATION—Continued

a. Fire Protection, State Responsibility

The Division of Forestry provides a comprehensive system of fire protection services for 37 million acres of state and private lands of statewide importance for its value in timber production, forage, recreational use and watershed. Of the 37 million acres, 28 million are provided direct fire protection. The remaining 9 million acres are protected by the U.S. Forest Service and five county governments under contract. The Division protects an additional 5 million acres of local responsibility land under reimbursable cost contracts (see Fire Protection, Local Responsibility). These contract arrangements are designed to prevent duplication and maximize the efficiency of the available fire fighting forces.

Supplemental fire protection in five northern California counties that was added because of heavy snow damage to trees and brush in 1974 will be discontinued. This will result in a reduction of 31.5 man years and \$435,000 in the 1976-77 fire protection budget.

(Program) Element Components	74-75	75-76	76-77	1974-75	1975-76	1976-77
1. Fire prevention, state responsibility	139.9	153.7	145.4	\$3,657,323	\$4,106,434	\$4,212,726
2. Fire control operations	2,390	1,946.9	1,960.9	58,035,621	57,988,362	55,151,496
3. Conservation camps	194	192.4	192.4	4,853,522	5,311,077	5,354,670
4. Ecology corps	62.4	69.9	—	2,304,860	3,202,353	—

1. Fire Prevention, State Responsibility

The Legislature has defined fire prevention as "the employment of the most effective methods, material, and procedures in the dissemination of information, the preparation of land and vegetation, and the enforcement of pertinent laws for the reduction of fire incidence. The term 'fire prevention' shall connote an action program designed to reduce the occurrence of human caused fires."

This charge is carried out by influencing and reminding people to act in a fire-safe manner and to reduce or eliminate physical hazards or risks. Fire cause investigations show that 75 percent of California's human-caused wildfires are preventable. This component provides fire prevention personnel to educate the public in the safe use of fire and to regulate the use of fire or potential ignition sources in such a way that "uncontrolled fires", as defined in Section 4104 Public Resources Code, are restricted to an acceptable level.

To help curb the problem of increasing numbers of human-caused fires, the Division will increase its fire prevention inspection and investigation efforts. Five fire captain specialists and additional student assistants will be added to achieve a higher level of enforcement of fire hazard laws. Funding will be provided through reductions in ground attack.

Output	1974-75	1975-76	1976-77
Prevention contacts	954,889	1,000,000	1,100,000
Prevention materials	2,565,725	2,500,000	2,500,000

Totals	139.9	153.7	145.4	\$3,657,323	\$4,106,434	\$4,212,726

2. Fire Control Operations

The Division of Forestry provides a statewide system of fire protection that can rapidly detect and attack fires and is capable of quickly expanding through the depth of its organizational strength to cope with fires that escape initial control. The system is designed to meet the objective of holding all fire damages to a level at which the flow of economic and social benefits from the wildlands will not be seriously impaired.

To provide effective fire protection, the division currently operates 229 forest fire stations, 79 lookouts, seven helitack stations, and 13 primary air attack bases. Supplementing these forces are backup crews located at 27 conservation camps and eight ecology centers.

The 1976-77 budget proposes the elimination of five fire suppression crews from two-engine stations. In addition one lookout station, which is no longer required, will be eliminated. Other changes include the reduction of seasonal cooks (-25.7 m.y., \$270,158) to a level which will provide service for only peak fire season and special winter training needs.

Included in Fire Control Operations is a new activity for California Conservation Corps supervision. The Division of Forestry will provide professional fire control employees necessary to supervise employees in the California Conservation Corps. Approximately 500 corps personnel will be contracted for during the summer fire season to maintain a fire suppression force formerly associated with the Ecology Corps Program. (See Fire Control Operations, Ecology Corps and the Resources Agency budget.)

The budget is being increased for critical facility modifications required to meet California Occupational & Safety Hazards Act (CAL-OSHA) standards (\$100,000).

This budget also proposes a \$5 million appropriation to be allocated by the Director of Finance for Emergency Fire Suppression. The expenditure of these funds is reflected in the Fire Control Operations element as unallocated emergency fire suppression.

Output	1974-75	1975-76	1976-77
Wildfires controlled	8,509	7,200	8,000
Acres burned	93,893	75,000	100,000
Number of large fires (300 acres and over)	56	40	50
Extra period fires (not controlled by 10 a.m. of the day following discovery)	38	30	40

3. Conservation Camps

The Division of Forestry operates 18 adult conservation camps in cooperation with the Department of Corrections, six youth conservation camps and one youth conservation camp training center in cooperation with the Department of the Youth Authority, two camps in cooperation with San Diego County and one camp in cooperation with Shasta County. In 1975-76 camp populations are budgeted for 1,160 for adult camps, 450 for youth camps and 200 for county camps.

This element provides a trained labor force for backup firefighting when regular fire control personnel are insufficient to meet emergency fire conditions. When not engaged in firefighting duty, camp inmates work on fire defense improvements for the Division of Forestry and on reimbursed conservation projects for other state agencies.

Output

	1974-75	1975-76	1976-77
Work for other agencies (man-days)	45,128	60,000	60,000

Totals	194	192.4	192.4	\$4,853,522	\$5,311,077	\$5,354,670

4. Ecology Corps

The objective of the California Ecology Corps has been to provide a fully trained and properly equipped force for use on high-priority conservation projects. In addition to performing duties required on reimbursed conservation projects, corps personnel were also available and trained for immediate dispatch to fires, floods, mountain rescue work and other emergencies. Personnel were assigned to eight main ecology centers year-round and worked from several spike camps on a seasonal basis. Peak population was about 500 corpspersons.

In 1976-77, the California Ecology Corps program is being eliminated and the Division of Forestry will contract with the Resources Agency for seasonal labor provided by the California Conservation Corps (See Fire Control Operations and the budget of the Resources Agency).

Output

	1974-75	1975-76	1976-77

b. Fire Protection, Local Government Contract

The Division of Forestry administers 31 contracts in 24 counties for local responsibility fire protection services. In some areas local fire stations and county equipment are used with the state reimbursed for manning the facilities. In other areas, existing division fire stations are supplemented by the counties for the additional costs of fire protection to lands and structures inside and outside the division's state responsibility area. The additional positions shown under workload and administrative adjustments cover a two-year growth in reimbursable fire protection requested by local government.

DEPARTMENT OF CONSERVATION—Continued

c. Resource Management

The purpose of this element is to protect state and private forest, brush, and watershed lands from pests, deterioration and misuse.

Activities include control of forest pest epidemics; producing tree seedlings from three nurseries for reforestation and erosion control; mapping of upland vegetation and soils; revegetation of burned watershed; regulation of controlled burning of brush lands; regulation of private timber operations; advisory assistance to small owners on forest management; management of seven state forests; assistance to counties for declaring young timber mature for tax purposes; and various investigations in reforestation methods, forest practices and brush control.

Full implementation of the provisions of the Forest Practice Act of 1973 has been achieved with the exception of some special studies. District forest practice rules have been adopted by the Board of Forestry and Division of Forestry personnel have been trained and are performing site inspections under the new rules.

This budget proposes that the Forest Practices Act program will be funded primarily by the General Fund, with a \$500,000 reimbursement from the forest products industries (approximately 25% of the program cost), at a total program cost of \$2,119,623. However, in order to fund the anticipated loss of an estimated \$250,000 in reimbursements to the program, the department will be supporting legislation to cover a current year deficiency.

Output	1974-75	1975-76	1976-77
Insect trees treated	3,200	4,950	4,200
Blister rust control (acres)	1,400	1,400	1,400
Trees distributed for planting	5,136,000	5,700,000	6,500,000

d. Civil Defense and Other Emergencies

Because of its statewide depth in manpower and equipment and its communication system, the Division of Forestry has been assigned civil defense responsibilities in the areas of fire, rescue and radiological monitoring. In addition, agreements with the Department of Water Resources provide for assistance to that organization in meeting their responsibilities for the maintenance and patrol of levee systems in the Sacramento, San Joaquin and delta areas during periods of high water. As a fire protection organization, the Division of Forestry is frequently requested to respond to a variety of rescue calls, accidents and other types of local emergencies requiring public assistance.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	8.7	4.7	4.7	\$114,796	\$117,764	\$122,760

e. Open-Space Subvention and Environmental Impact

The open space subvention program encourages local government to preserve open space lands under its jurisdiction by providing for state payments to reimburse local government for loss of revenues resulting from assessing open space lands at other than market value.

To meet statutory requirements, environmental impact reports must be prepared for many of the projects under the jurisdiction of the divisions within the department, and the environmental impact reports prepared by others must be reviewed.

Output				1974-75	1975-76	1976-77
Open-space plans reviewed				37	5	5
Applications for subvention entitlements processed				61	67	72
Total entitlements				\$10,473,344	\$11,500,000	\$12,500,000
Environmental Impact Reports:						
Number prepared				59	75	80
Number processed				6,521	7,800	8,200
Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	7.3	6.5	6.5	\$152,197	\$157,000	\$159,000

f. Resource Conservation Commission

The Resource Conservation Commission provides leadership for soil conservation activities throughout the State. The Commission's objectives are to strengthen local soil districts, provide information on new programs, evaluate existing programs, and coordinate and set priorities that best protect the State's interest in the conservation of soil resources. The budget reflects an increase of \$64,500 to provide two staff and operating expenses to assist the non-paid Commission in meeting its objectives.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77

DEPARTMENT OF CONSERVATION—Continued

II. GEOLOGIC HAZARDS AND MINERAL RESOURCES CONSERVATION

Program Objectives and Description

This program develops information about the geology of California to assist public agencies and the private sector in the wise and safe use of the earth's crust, its terrain, and its mineral resources.

Major needs of the citizens of the state that are addressed are: safety of persons and property from geologic hazards, intelligent land use including protection of the environment, the continuing and orderly development of mineral resources, and the wise development and use of marine geological resources.

The Geologic Hazards and Mineral Resources Conservation Program is managed by the Division of Mines and Geology. The program's objective is to identify and provide timely delineation of geologic hazards and to identify, delineate and assist in the ultimate utilization of deposits of minerals, both onshore and offshore, consistent with wise conservation practices.

Authority

Public Resources Code, Division 1, Chapter 2, Article 3, and Division 2.

b. Geologic data	21.3	22	22	479,942	548,787	565,452
c. Administration	14	14.3	14.3	398,724	458,226	473,254

a. Environmental and Economic Geology

Major needs of the state that are addressed within this element are safety of persons and property from geologic hazards, and the continuing and orderly development of mineral resources, both offshore and onshore.

Potentially hazardous geologic conditions must be identified prior to development in order to protect the public from possible economic loss and injury. These hazards include landsliding, ground rupturing caused by fault movements, ground shaking caused by earthquakes, tsunamis (seismic sea waves), volcanic eruptions, land subsidence, expanding soils, and erosion. Deposits of mineral raw materials must be identified and delineated so action can be taken to prevent their loss to urban encroachment.

Activities necessary for the Division to achieve the above needs are summarized as follows:

- Geologic hazard studies are made in cooperation with local governments;
- Hazard maps are prepared for local and regional use in planning and development;
- Crustal strain and earthquake studies are conducted along active faults;
- Investigations are made on all earthquakes or seismic events with a Richter scale rating greater than 4;
- All hospital sites are reviewed and reported on prior to construction approvals;
- Geologic resource maps are prepared and distributed in cooperation with other agencies;
- Environmental standards to be met during mineral extractions are developed;
- Long-range plans for mineral resource development are studied;
- Environmental impact reports are reviewed for adequacy of geologic considerations;
- Provide advice to other state agencies in evaluation of geologic considerations related to agency needs;
- Strong-motion instruments are installed throughout the state in order to obtain detailed information on the nature of ground shaking so future construction designs can be made more structurally safe.

Output

	1974-75	1975-76	1976-77
Geologic hazards maps, fault zone maps, and accompany reports prepared in cooperation with local governments	13	16	4
Regional environmental geologic maps (1:24,000 to 1:62,500 scale) and accompanying reports (in large-part compilations)	4	4	3

DEPARTMENT OF CONSERVATION—*Continued*

b. Geologic Data

The Division has the responsibility for making survey and other geological information, whether it results from division investigations or from the work of other earth scientists, widely available in printed form. This information must be transmitted in terms meaningful to the general public and useful to those requiring it.

Manuscripts and maps prepared for publication by the division will be processed for publication by the geologic data group. Information and education services will include a library and mineral exhibit, exhibits at appropriate times and places, public information and publication sales desks at all division offices, and the monthly publication of *California Geology*.

III. OIL, GAS, AND GEOTHERMAL PROTECTION

Program Objectives and Description

The Division of Oil and Gas regulates the oil, gas and geothermal resources operations within the state. This program is concerned with administration of state laws for the conservation of oil, gas and geothermal resources, to prevent waste and damage, and ameliorate land subsidence. Activities of the division include supervision of drilling, operation, maintenance, and abandonment of oil, gas, and geothermal wells both onshore and offshore; supervision of oil production stimulation projects; and supervision of operations for the abatement of subsidence of lands overlying oil fields. The state is fully reimbursed for these activities by annual assessments and fees from the respective industries.

In accordance with Chapter 1049, Statutes of 1975 (AB 1392), the industry assessments will no longer be deposited in special funds. These monies will be deposited directly to the General Fund as revenues collected in support of the State's oil, gas, and geothermal activities.

The Oil, Gas and Geothermal Protection Program is managed by the Division of Oil and Gas. The program's objectives are to prevent waste or damage to the hydrocarbon or geothermal reservoirs, to the immediate environment and other natural resources; provide for greater recovery of oil, gas and geothermal resources; and prevent contamination of fresh water supplies penetrated by wells.

Authority

Division 3, Public Resources Code.

^a Neither receipts nor expenditures of federal funds are included in overall budget totals.

a. Regulation of Oil and Gas Operations

The purpose of this element is to prevent damage to the hydrocarbon reservoirs, to the environment, wildlife, and other natural resources as a result of oil and gas operations; to encourage the development of oil and gas resources commensurate with sound conservation practices; to minimize waste and provide for methods that will maximize the ultimate recovery of these resources; to protect the correlative rights of all owners so that landowners, royalty owners, producers, and the general public realize and enjoy the greatest possible benefits from these vital resources, and to publish statistics, maps, geologic studies, and other data relating to oil and gas operations.

The 1972 Session of the Legislature added requirements to the Public Resources Code concerning the abandonment of deserted wells. There are an estimated 20,000 idle wells in the state. Programs are now in effect to catalog and document information on these wells in order to initiate abandonment actions.

An augmentation of \$500,000 is included to provide funding for the proper abandonment of those wells that present an immediate threat to life or property and where liability cannot be determined.

DEPARTMENT OF CONSERVATION—Continued

Output

Products of the oil and gas operations include issuance of publications, such as the Annual Report of the State Oil and Gas Supervisor, oil and gas field maps, a weekly summary and map revision letter, and monthly production report; geologic and engineering studies of oil and gas fields; answers to proposals to drill, rework, and abandon wells; inspections of oil and gas wells to ensure that state regulations are being followed; inspections of environmental problems related to oil and gas operations; and surveillance of well stimulation and disposal projects.

	1974-75	1975-76	1976-77
Well proposals	5,355	5,750	6,038
Well inspections	6,726	7,150	7,508

Expenditures	79.0	80.1	80.1	\$1,729,457	\$1,918,098	\$2,457,030

b. Regulation of Geothermal Operations

The purpose of this element is to provide controls on drilling, maintenance, and abandonment of Geothermal resources wells, including wastewater injection wells, so as to prevent damage to the geothermal reservoirs and other resources, to safeguard property, public welfare, and the environment, and to encourage the maximum economic development of geothermal resources.

The need to develop alternate energy resources is indigenous and has the potential to lessen—when developed—California's dependence on imported fuels. It can be developed within the acceptable environmental standards with due consideration in certain critical areas, such as The Geysers, where development is taking place on unstable terrain. To mitigate the problem at The Geysers, it has been necessary to provide a full-time regulatory engineer.

Output

	1974-75	1975-76	1976-77
Well proposals	94	95	200
Well inspections	26	80	110
Well site inspections	-	40	60

Meetings with federal and county governments	55	60	55
State government and public hearings, meetings, and lectures	40	30	30

Input

	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	5	5	5	\$128,027	\$141,992	\$144,874

c. Subsidence Abatement

The Public Resources Code requires the State Oil and Gas Supervisor to take necessary steps to arrest and ameliorate subsidence of lands overlying or immediately adjacent to producing oil and gas pools when such lands are threatened by inundation by the sea.

The objective of this element is to require and supervise repressuring operations for the abatement of land subsidence in oil fields or other areas to prevent further damage to structures, interference with navigation and fishery, possible inundation, and danger to life, health, safety, public peace, welfare and property.

Output

The output of this element consists of maintaining surveillance of repressuring operations of the subsidence area of Wilmington oil field by: making geologic and engineering studies of individual fault blocks, compiling maps showing subsidence or rebound; answering proposals to drill, rework, or abandon wells and maintaining statistical data.

	1974-75	1975-76	1976-77

IV. ADMINISTRATION

Program Objectives and Description

The objective of this activity is to provide executive leadership, policy direction, and administrative services required for the successful completion of the many program objectives; to provide uniform departmentwide staff services; to assure coordination at the policy level with other state, federal and local government agencies; and to provide specialized staff services to management. A uniform departmentwide application of policy and procedure is essential to maintain effective program operations.

Administrative activities are performed at several organizational levels within the department. Departmental headquarters provides executive leadership from the directorate and central services in accounting, budgeting, management analysis, personnel, office services, training and safety. More specialized management leadership and staff services are provided through three division headquarters which support programs in the fields of forestry, mines and geology and oil and gas. Division subunits provide localized general support services throughout a variety of locations in the state.

Six additional positions are proposed for 1976-77 to meet increasing workload in personnel transactions and analysis and two clerical positions are proposed to meet workload requirements of the Forest Practices Act (timber harvest plans).

STATE LANDS DIVISION

The State Lands Division administers policies established by the Legislature and the State Lands Commission in managing the lands belonging to the state. These consist of school lands, swamp and overflow lands, lands underlying navigable rivers and lakes, and other sovereign lands.

The primary objectives established by the Legislature and implemented by the State Lands Commission are:

a. Comprehensive land use planning which encourages compatible multiuse development of state lands while conserving, preserving and protecting irreplaceable resources.

b. Location of the precise boundaries of tide, submerged and other land areas which are increasingly critical to protection of the state's interests.

c. The effective development of oil, gas, geothermal and other mineral resources through the administration of policies and programs designed to assure protection of the environment and which will also facilitate the generation of vitally needed revenues.

d. Surveillance necessary for effective management and title protection of these lands, and if necessary, litigation in the courts to protect the state's sovereign interests.

e. Maintenance of records on the acquisition and disposition of the lands and on uses of the lands, and preparation of an environmental inventory of the lands.

The State Lands Division land management program is accomplished through the efforts of three basic program elements: extractive development, state leases; extractive development, Long Beach operations; and land operations. The division also has a program element for executive and administrative services.

SUMMARY OF PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
I. Land management	\$4,211,022	\$5,457,209	\$5,586,638

I.c. Tidal datum measurement study		-	210,000

I. LAND MANAGEMENT

Program Objectives and Description

California's growing population continues to make increasing demands upon the state's land resources. The State Lands Commission is responsible for comprehensive land management activities involving more than 4,000,000 acres of state lands. To meet the demonstrable need for land, the State Lands Commission authorizes the use of land subject to reasonable rules and regulations for fair and adequate compensation. Their decisions are reached at public hearings and are based upon environmental and public benefit considerations.

The specific objectives of the Land Management Program of the State Lands Division are:

To plan for and control the use of more than 4,000,000 acres of state lands in a manner which will increase and protect the state's interest. To maintain a program of land use which will meet orderly land use planning requirements and provide for adequate compensation. To maximize the public benefit, environmental protection, and economic use of these lands. To minimize the rapidly escalating number of commercial and recreational trespasses on state lands. To oversee, from an economic standpoint, the development and operations of the Long Beach tidelands. To perfect title to land the state owns. To plan for and implement the extractive development of mineral resources located on state-owned lands.

Authority

Division 6, Public Resources Code; Chapter 29, Statutes of 1956 (1st Ex. Sess.); Chapter 138, Statutes of 1964 (1st Ex. Sess.).

Program Requirements

Program Elements

Extractive Development:						
State leases	52.5	53.9	53.3	\$1,058,817	\$1,438,064	\$1,244,945
Long Beach operations	53	54.1	54.1	1,296,034	1,535,832	1,576,926
Other land operations	94.7	113.3	120.3	1,856,171	2,483,313	2,764,767

a. Extractive Development—State Leases

The management of extractive development operations involves leasing of land for mineral extraction purposes, and royalty and operational surveillance to assure that the lessee adheres to the terms of the lease. Proper management of operations also insures the preservation of environmental and property values. As required by the Public Resources Code, Environmental Impact Reports are made available to all interested federal, state and local governmental agencies, and the public prior to leasing.

Oil and Gas Leasing and Development

During the productive life of a mineral property it is necessary to perform continuing engineering and geological studies. This ensures that the lessee develops the resource to the maximum benefit of the state. In the case of oil and gas properties, the required studies include determining productive limits, reserves, unit equities and secondary recovery. The Commission also has an interest in Federal regulation of the Outer Continental Shelf and has assumed an active part in urging the adoption of regulations containing adequate safety and pollution controls consistent with those of the State.

Geothermal Leasing and Development

Geothermal resources are recognized as an important clean-energy source. These resources are a necessary supplement to California's energy requirements. The State Lands Commission issues permits to prospect for geothermal resources and negotiates geothermal leases on all lands owned by the state. Field inspections during drilling, testing, and subsequent production operations are necessary to ensure that such operations are conducted with regard to public safety and environmental concern.

STATE LANDS DIVISION—*Continued***Mineral Leasing and Development**

Mineral leasing and development covers processing and issuance of mineral extraction leases, mineral prospecting permits, and dredging permits by private interests and public entities. Field investigations covering extractive operations, permits, and trespass indications are an integral feature of the resource management program.

Workload Information

1. Review of lease operations for possible resumption of drilling from existing leases will be a major occupation this year.
 2. The staff will continue to give prompt engineering and geologic review to lessee's new and redrill proposals, to maintenance and repair proposals for existing offshore leases, and to safety and operations inspection.
 3. Emphasis will continue to be placed on changing some oil lease production from primary to secondary recovery status.
 4. Surveillance and inspection on all offshore oil and gas operations will be maintained consistent with environmental protection needs and level of operations.
 5. The engineering review of existing structures and applications to install new pipelines, marine terminals and other structures on state tide and submerged lands will continue.
 6. Emphasis will continue on the preparation and review of environmental impact reports and on the environmental impact of Outer Continental Shelf activities.
 7. Geothermal resources leasing and development activity will continue.
 8. Mineral leasing and development and mineral trespass control will increase as increased mineral prices make their exploitation more attractive.
- Budgetary and revenue data of the extractive development element are shown on Table 1. This element is expected to produce an anticipated revenue of \$24,633,000 during the 1976-77 budget year.

Input	1974-75	1975-76	1976-77
Expenditures	\$1,058,817	\$1,438,064	\$1,244,945

¹ Geothermal royalties held in suspense pending litigation.

² Includes \$2,631,989 ad valorem tax settlement, Tract 2, Long Beach Unit.

b. Extractive Development—Long Beach Operations

The tidelands along the Long Beach shoreline are granted in trust to the City of Long Beach. Chapter 29, Statutes of 1956 (1st E.S.), defined the position of the state relative to the oil and gas development of these tidelands. The passage of Chapter 138, Statutes of 1964 (1st E.S.), gave to the state a more active and prominent role in this tidelands oil and gas development. It also increased substantially the state's economic interests. Under this statute, the state has control over the plan and budget of the field contractor hired to develop and operate the oilfield.

The operations of the tideland portions of the Long Beach Unit and the previously developed productive areas of the Long Beach tidelands are conducted under individual net profits agreements. For the 1975-76 fiscal year the state oil and gas revenue attributable to Long Beach tidelands is estimated to be \$81,500,000.

Of primary importance within the state's objective is the prevention of land subsidence from causes other than natural phenomena and the application of proper measures to protect the environment and ecology.

Workload Information

The Long Beach operations staff has the responsibility to maintain economic control, as charged under Chapter 138, over the Long Beach unit plan of operations and development and budget, which is \$73,333,000 for 1975-1976. Average daily production of the Long Beach unit is 108,000 barrels of oil and 25 million cubic feet of gas. The staff also reviews and evaluates programs for the conduct of production and water injection operations in the prior tidelands development. This oil allocation is currently 27,700 barrels per day.

Output

One major responsibility of Long Beach operations is performing economic analyses of the development and operation activities of the Long Beach tidelands. Output includes economic control of intended expenditures through the plan and budget of the Long Beach Unit. This control is achieved by the itemizing of budget funds and by the implementing of approvals for new wells and redrills, budget-fund transfers and augmentations. The plan and budget is prepared jointly by the City of Long Beach and the staff of the State Lands Division and is subject to the approval of the State Lands Commission.

Another important activity is the determination of equity area assignments for the Long Beach unit. Equity assignments determine the actual allocation of profits from the field among the participants. Other functions are to monitor surface elevations to detect any evidence of subsidence, and to monitor seismic activity.

Budgetary and revenue data for the extractive development Long Beach Operations element are shown on Table II.

Input	1974-75	1975-76	1976-77
Expenditures	\$1,296,034	\$1,535,832	\$1,576,926

1976-77	54.1	1,576,926	66,000,000	Estimated

c. Other Land Operations

The basic nonmineral management program has two fundamental areas; ownership determination (including exchanges, boundary line agreements and litigation) and land management (including appraisals, leasing, indemnity selections, sales, inventory and classification, and title information).

Chapter 706, Statutes of 1975 allocated \$260,000 to the Division to undertake an ungranted tidelands inventory and boundary mapping program. The proposed budget for 1976-77 includes \$325,000 to continue the program. A significant portion of the total program involves obtaining tidal datum measurements along the State's coastline. The proposed budget includes \$210,000 for matching a federal program effort to collect this information.

Ownership Determination

Real property cannot be leased, utilized, protected, etc., unless it can be identified and located. Accordingly, ownership determination is essential for effective management of state-owned tide and submerged lands. Ownership determination usually involves extensive engineering, title and legal research studies. In general, boundary claim lines are identified and located by surveying and mapping, and settled by land exchange, boundary line agreement, or litigation.

1. Exchange. The exchange requires an identification of the title conditions of both the parcel now owned by the state and the parcel to be received in the exchange. An appraisal of both parcels to be exchanged is required to determine that the value to be received is as great or greater than the value relinquished.

2. Boundary Line Agreement. When the location of the common boundary between the state and a private owner cannot be determined, the state, acting by and through the State Lands Commission, is empowered to enter into a negotiated settlement of the boundary.

3. Litigation. Case preparation includes the search for, identification of, and analyses of facts for the consideration of and presentation into evidence by the Attorney General. Court appearances by staff members to give testimony are required in certain cases.

Output

	1974-75	1975-76	1976-77

Staff requests	542	600	600
Other governmental inquiries	365	400	400

Land Management

The land management operations of the section include:

1. Appraisal. Appraisals are essential in settlements of litigation or of title and boundary agreements in which exchanges are involved for establishing that the lands being received are at least of equal value to the interests being given up. Sales and leases also require appraisal to determine the consideration to be received.

2. Leases. Leases for commercial, industrial and recreational purposes and rights-of-way to accommodate public utility and various types of pipelines which involve tide and submerged lands are subject to Commission review. Following an appraisal and an investigation to determine if an existing use of the land to be leased is compatible with the proposed use, the Division derives a rental rate for the property. All leases must be reviewed on each fifth anniversary, and changes in market value may indicate that a new rental should be set.

3. Indemnity Selections. The state is indemnified for loss to the school land grant by selection of desirable federal land. This activity will increase after completion of the inventory and classification of school land, and as the Commission land management program develops.

4. Sales. A land sale requires an identification of the title conditions and an appraisal of the land authorized to be sold. Sales activity depend upon the policies adopted following completion of an environmental inventory and involve only those lands unsuitable for public retention.

5. Inventory, Classification and Management Plan. In April 1970, the Commission directed the Division to inventory, classify and plan prudent management for its 600,000 acres of school land. In that year the Legislature required an inventory of all lands under Commission jurisdiction and an identification of those lands having significant environmental values of statewide interest. More than 3 million acres of this is coastal tide and submerged land. The Commission and Division are participating with the Coastal Conservation Commission in planning uses of this land.

6. Land Title Information. This program provides all information required by law to be kept by the Commission, as well as the working data necessary to properly administer, manage and protect the lands under its jurisdiction. Input consists of:

- Land acquisition and disposition information;
- Land use (encumbrances, leases, permits, etc.) information;
- Official actions of the commission;
- Maps, judgments, agreements, title reports and other land title records;
- Correspondence;
- Historical and engineering research data and documents;
- Cession and retrocession of jurisdiction.

II. ADMINISTRATION

The administrative staff of the State Lands Division operates under the general direction of the Executive Officer of the State Lands Commission. The element is composed of two major sections: executive and administrative and technical services. The executive section includes the executive staff, the Division's legal staff, and an overall planning and environmental unit. The administrative and technical services section is comprised of six program units, four of which, budgeting; personnel and training; accounting and office services; and data processing, systems analysis, and records, provide direct staff support to the line programs, and two of which, auditing and management analysis, emphasize improving the State's fiscal position and ascertaining that the individual Division programs are operating efficiently and economically.

SEISMIC SAFETY COMMISSION

PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
Seismic Safety Commission	-	\$143,037	\$170,000
NET TOTALS, PROGRAM (General Fund)	-	\$143,037	\$170,000
Personnel man-years	-	5.1	6.5

Program Objectives and Description

The purpose of the Seismic Safety Commission is to strengthen earthquake safety in California by improving public policy, especially that related to reducing hazards and mitigating the effects of potentially damaging earthquakes.

The Commission reports annually to the Governor and the Legislature on its findings, progress, and recommendations by advising the Governor on executive actions required, introducing and supporting needed legislative measures, and negotiating directly with the responsible agencies. The Commission also advises various federal agencies on the scope, impacts, and priorities of national earthquake hazard reduction programs.

The Commission is responsible for: setting goals and priorities; requesting State agencies to devise criteria to promote seismic safety; recommending program changes to State agencies, local agencies, and the private sector where such changes would reduce the earthquake hazards; reviewing reconstruction efforts after damaging earthquakes; gathering, analyzing, and disseminating information; encouraging research; sponsoring training; and coordinating the seismic safety activities of government at all levels.

Fiscal Year 1975-76 accomplishments include the appointment and organization of the Commission and staff; a review of the effectiveness of the Seismic Safety Elements in General Plans in land use decisions; recommendations for improving the Hospital Act of 1973 which prescribes earthquake design standards for hospitals; a review for possible modernization of the Field Act-Garrison Act regulating school construction; initial work on a hazardous construction abatement program; preliminary work on long range State goals and policies for seismic safety; an evaluation of the State's role in post-earthquake studies and research; the monitoring of the potential impacts that earthquake prediction might have on the State; furnishing technical advice and assistance to several State agencies on programs related to earthquake hazards; and a review of problems associated with professional liability.

Fiscal Year 1976-77 planned objectives include completion of the goals and policies statement; extensive work on a hazardous construction abatement program; continued work on the policy implications of earthquake predictions; an assessment of earthquake research and high priority needs for California; a review of the functions and organization of existing boards and commissions related to seismic safety; and, a review of the Alquist-Priolo Act's effectiveness on land use decisions in major fault zones. Other activities will be undertaken by the Commission based on adoption of its annual work program.

The Legislation that created the Seismic Safety Commission, SB 1729 (Chapter 1413, Statutes of 1974), provided for the repeal of its provisions after the 61st day after the final adjournment of the 1975-76 legislative session, unless a later enacted statute chaptered before that adjournment deleted or extended such date. Funds have been included in this budget for the period beyond the termination date pending legislative determination of the future of the commission.

Authority

Government Code, Chapter 13, Sections 8890 through 8899.5.

DEPARTMENT OF FISH AND GAME

The program objectives of the Department of Fish and Game are to insure that fish and wildlife are preserved to be used and enjoyed by the people in the state, now and in the future.

More specifically, the objectives of the department are:

1. To maintain all species of fish and wildlife for their natural and ecological values as well as for their direct benefits to man.

The objective, "to maintain," is a basic necessity if any species is to be used in the future, and this includes the principle that fish and wildlife should be preserved as a human environmental necessity. The present generation must assume the obligation to pass on to future generations all of the species that now exist, whether or not they are now used and enjoyed. The present contribution that each species makes to the ecological balance is not always known and may well change in the future. We should not tamper with this balance without understanding fully the eventual result.

2. The restoration of native species that no longer exist in California but still exist in other areas; the introduction of desirable new species compatible with existing species; and the exclusion of undesirable species are part of this objective.

3. To provide for varied recreational use of fish and wildlife.

The objective, "recreational use," embraces all the ways that people may enjoy fish and wildlife. This variety of recreational opportunity will enable each individual to select the type of recreation most rewarding to himself. Single uses will not predominate merely because they might attract the greatest number of users. This objective sees the maintenance of fish and wildlife "game" populations at levels that will provide harvestable surpluses so that hunting and fishing will continue to be enjoyed as two of California's traditional and leading forms of recreation.

4. To provide for an economic contribution of fish and wildlife in the best interests of the people of the state.

The third objective, "economic contribution," covers several distinct interests concerned with the utilization of fish and wildlife resources. These include the commercial harvesters of these resources, and the people who provide goods and services to all. The objective is to provide the maximum economic benefits to the people of the state within the limits of the resources and the other objectives.

5. To provide for scientific and educational use of fish and wildlife. The fourth objective, "scientific and educational use," proposes to insure the availability of fish and wildlife for study and research by both scientists and students.

All of the programs of the department are directed towards the accomplishment of these objectives through the conservation, enhancement, and restoration of fish and wildlife resources and habitats and regulation of resources use.

SUMMARY OF PROGRAM REQUIREMENTS

Personnel man-years	1,384	1,413.9	1,405

SIGNIFICANT PROGRAM CHANGES

The 1975-76 budget appropriated \$1,000,000 from the General Fund to the Fish and Game Preservation Fund to support existing programs devoted to nongame species protection and environmental protection. A total of \$1.5 million is allocated from the General Fund for this purpose in 1976-77 which includes \$500,000 from tidelands oil revenue in lieu of allocating these funds for the Sea Grant Program. Of these funds, \$200,000 (9 man years) will be used to evaluate the adequacy and effectiveness of departmental environmental reviews. In addition, \$1,000,000 is proposed to be appropriated to the Department from the Environmental Protection Program Fund for support of other existing nongame and environmental programs.

I. ENFORCEMENT OF LAWS AND REGULATIONS

Program Objectives and Description

To insure that the provisions of the Fish and Game Code and regulations made pursuant thereto are enforced within an acceptable degree of compliance; to insure that the wildlife resources are managed for optimum, sustained yield, utilization and enjoyment by all people appropriate to the general public welfare.

In order to accomplish the objectives of this program, the following must be accomplished:

1. Insure that everyone making consumptive use of the wildlife resources is properly licensed;
2. Protect game and nongame fish and wildlife resources and their habitat from willful or negligent destruction and otherwise enforce and administer the laws and regulations relating to game and nongame wildlife species;
3. Promote hunting and fishing access for the public;
4. Disseminate knowledge and information about fish and wildlife resources and their regulation and management to increase public understanding and cooperation in the sound utilization and conservation of these resources through our conservation education program;
5. Recognize the interest of those who derive their livelihood, pleasure or recreation from the wildlife resources;
6. Cooperate with and encourage cooperation among agencies, groups and individuals concerned with laws protecting the wildlife resources;
7. Conduct a hunter safety program to provide instructions for safe handling of firearms for all hunting license applicants regardless of age;
8. Regulate the importation, transportation, and possession of exotic nongame animals to insure the welfare of wild animal pets and also to protect native wildlife habitat from the inadvertent introduction of competitive species.
9. Plan for the most efficient and effective use of wildlife protection manpower.
10. Protect nongame fish and wildlife resources and their habitat from willful or negligent destruction through enforcement and administration of laws and regulations.

Authority

Constitution of California, Fish and Game Code, and Fish and Game Commission.

Protection and Use Regulation of Fish and Wildlife

Enforcement is accomplished by a staff of fish and game wardens whose activities include patrolling to prevent infractions of game and nongame wildlife bag limits, seasons, closed areas, and license requirements by individual hunters and fishermen as well as the commercial fishing industry. Protection of habitat includes the enforcement of restrictions on pollution, stream or lake alterations as well as the entry of exotic wild animals which, if they became established in the wild, would compete with and possibly replace more desirable native wildlife species. Violators are apprehended and prosecuted through court processes. Also, administration of the licensed pheasant and other hunting club programs is a warden function accomplished by license application approval and regulation enforcement through club inspections at regular intervals. Additional protection of wildlife and habitat is accomplished by the issuance of permits for special purposes such as scientific collections, research, suction dredges, and the related followup inspection to assure compliance of permit terms. Preventive enforcement is accomplished through personal appearances before civic sportsmen organizations and in field talks to sportsmen and potential sportsmen.

Output	1974-75	1975-76	1976-77
Resource user man-days	38,743,600	39,333,200	39,922,800
Violation arrests	19,242	19,434	19,626
Input			
Expenditures	\$8,133,600	\$8,917,817	\$9,035,189
Personnel man-years	312	316.1	315.4

Licensing

Those who wish to take advantage of the recreational, educational and economical benefits provided by California's fish and wildlife resources are required to contribute to the conservation and management of these resources through the purchase of licenses. The licensing program makes nearly 60 different types of fish and game licenses available to applicants. The license fees provide the major support of California's fish and wildlife conservation programs.

Between seven and eight million licenses, tags, and permits will be sold through approximately 3,600 private firms functioning as fish and game license agents.

This program also provides the mechanics for determining which of the applicants will receive special big game permits and reservations of state-operated waterfowl areas.

Input	1974-75	1975-76	1976-77
Expenditures	\$560,186	\$558,198	\$571,622
Personnel man-years	25.9	25.6	25.5

Hunter Safety

Approximately 3,100 volunteer instructors are used by the department annually in teaching firearms safety to an estimated 70,000 California residents. Since the inception of the program on July 1, 1954, a total of 804,911 California residents have been trained. The estimated total casualties reduced since the program became effective is 1,360. All resident hunting license applicants who cannot document their possession of a hunting license in a previous year are now required to participate in this program.

Output	1974-75	1975-76	1976-77
New instructors certified	700	700	700
Residents trained in firearms safety	72,000	67,000	70,000
Input			
Expenditures	\$251,419	\$281,072	\$287,390
Personnel man-years	7.7	7.9	7.9

Conservation Education

The Conservation Education Program satisfies the need to inform the public about its property—fish and wildlife; the need to assist the public in properly utilizing fish and wildlife; and the need to conserve and enhance fish and wildlife and its habitat for future generations.

The workload is divided into the following activities: news releases, liason work, speeches and statements, photography, formal reports, motion pictures, a news magazine, booklets on laws and regulations and general interest and scientific pamphlets, youth conservation education, intra- and inter-departmental information, exhibits, library, and the servicing of a large volume of individual information requests.

Input	1974-75	1975-76	1976-77
Expenditures	\$801,323	\$969,643	\$989,384
Personnel man-years	20.7	20.5	20.4

II. WILDLIFE

Program Objectives and Description

The program objectives are: (1) to maintain all species of wildlife in the State, and (2) to provide optimum wildlife oriented recreational and educational use.

Population growth with associated commercial, agriculture and industrial activities continue to place inroads on wildlife and their habitats. Wildlife programs are designed to inventory, study, plan, develop and manage wildlife resources. These programs include: studies aimed at management needs including big game, upland game, waterfowl, disease and pesticides; habitat development and management on State-owned wildlife areas and other public lands; coastal wetland preservation and developing public hunting opportunity. The management of nongame, wildlife and the protection of their environment will be continued.

Authority

Constitution, Fish and Game Code and Commission regulations.

d. Nongame	25.4	24.9	24.9	657,797	718,924	722,265

a. Waterfowl

The most intensive management of habitat occurs on our wildlife areas. On these areas both natural and cultivated waterfowl food plants are grown, levees, canals, ponds, water controls, and roads are developed and maintained; noxious vegetation is controlled; and in general the area is made attractive to waterfowl and other wildlife, including nongame species.

To develop the most efficient and economical methods for management both public and private marshlands, investigations are being made that include: using irrigation drain water for creating and maintaining habitat; determining the proper balance of livestock grazing and production of waterfowl feed; cooperative plant testing with the soil conservation service for improved land use and increased waterfowl food production; and determining the limits of salinity or alkalinity that can be tolerated by various food plants.

The managed habitat is not only providing for the well-being of waterfowl, but the adequate supply of food also keeps these birds from depredating agricultural crops.

To encourage private landowners to improve their holdings for waterfowl, the department provides them with the proper management techniques. Service to landowners is also provided through cooperative efforts with local soil conservation districts.

To keep track of waterfowl populations and determine their numbers, migration patterns, mortality rates and population turnover, waterfowl are being banded at four representative sites throughout the state. Nine waterfowl surveys are flown to determine populations during the breeding season, the crop depredation period, the hunting season and in the winter.

To prevent untoward effects of pesticides on waterfowl and their habitat, appropriate controls on the use of pesticides will be implemented. Investigations will be made of waterfowl losses due to disease so as to determine the cause and initiate field control measures that will eliminate or minimize such losses. Research will be conducted to develop improved techniques for controlling avian botulism and cholera.

To provide for public enjoyment of the waterfowl resource, public hunting opportunities and visitor facilities are provided.

To better manage the resource, cooperative efforts are carried on through the Pacific Flyway Council and the technical committee, and with the U.S. Fish and Wildlife Service.

Output	1974-75	1975-76	1976-77
Waterfowl hunters	155,560	156,000	165,000
Waterfowl hunter-days	1,225,500	1,250,000	1,600,000
Number of waterfowl bagged	2,781,400	2,800,000	3,500,000
Population surveys flown	9	9	9
Waterfowl banded	9,058	9,000	9,000
Plant accessions tested	6	6	6
Acreage under marsh management practices	112,000	112,500	115,000

Input

Expenditures	\$3,135,178	\$3,302,969	\$3,548,807
Personnel man-years	123.9	131.9	127

b. Upland Game

Surveys are conducted to determine the population status for all the upland game species that are found in California. Evaluations of field surveys and hunting conditions are made to determine recommendations for changes in hunting regulations.

Wild trapped resident game birds are released in areas where it has been determined these birds may survive and multiply to offer future hunting possibilities. In addition, some 2,000 nonresident game birds are purchased under contract from private bidders and released annually.

Fifteen to twenty thousand month-old ring-necked pheasant chicks are purchased under contract and distributed to sportsmen clubs to rear and release for public hunting. In addition, 19,500 pheasants are also purchased each year under contract for release in southern California for public hunting.

Investigations are made of pesticide and disease factors as they affect upland game populations. Technical assistance in upland game management is provided to private landowners. Research in developing and evaluating habitat improvement practices is conducted.

Prepare and update plans for selected species of upland game. Assist private landowners and individuals in managing their lands for upland game species through technical advice and publications. Mourning dove population surveys are conducted to determine prenesting populations and to determine mortality and distribution of doves through band returns. Wild turkey and bandtailed pigeon investigations to gather information on distribution density, production, population trends, life history information and evaluation of wild turkey stocking areas are being conducted. Experimental ground cover and food plants will be tested. Over 2,000 artificial watering devices will be maintained. Surveillance and research activities will be conducted to assess the impact of pesticides on upland game and to develop needed controls over the use of these chemicals.

Output	1974-75	1975-76	1976-77
Hunter-days	4,800,000	4,800,000	4,900,000
Input			
Expenditures	\$843,332	\$1,047,822	\$1,066,928
Personnel man-years	41.7	43.8	43.7

DEPARTMENT OF FISH AND GAME—Continued

c. Big Game

The state is divided into 42 wildlife management units, each of which has a unit manager. These unit managers work with public and private groups to improve conditions for big game. With assistance from staff specialists, they gather field data on herd composition, hunter kill, disease and pesticide problems, food habits, nonhunter mortality, and range condition. They prepare recommendations for season, special hunts, preservation and enhancement of big game habitat, operate special hunts and public shooting areas, and provide advice to public and private land managers interested in managing big game.

The proposed 1976-77 program will be carried on at the same level as 1975-76 with increased emphasis on deer management. It is anticipated there will be a special antelope and elk hunts as well as special deer hunts. Intensive studies will continue. Plans for selected species of big game will be prepared and updated.

Output	1974-75	1975-76	1976-77
Hunter-days on state-operated areas	7,500	7,500	7,500
Total big game hunter-days	2,752,800	3,000,000	3,000,000
Depredation Take:			
Deer	392	500	500
Bear	7	10	10
Wild pigs	-	2	2
Mountain lion	6	5	5
Input			
Expenditures	\$1,059,321	\$1,501,379	\$1,549,520
Personnel man-years	43.3	43.7	43.6

d. Nongame

This project will conduct surveys and develop management programs for California's endangered and rare wildlife in compliance with the California Species Preservation and Endangered Species Acts of 1970 and the Federal Endangered Species Act of 1973. In addition, it will be responsible for research and development of management programs for nongame wildlife including their habitat.

In 1976-77 the program will continue the 1975-76 investigations with emphasis to determine the current status of selected species. These investigations will include: (1) continued assessment of the problems and needs of nongame wildlife, (2) surveys of California's threatened wildlife declared to be endangered and rare by the Fish and Game Commission and Secretary of the Interior, (3) raptor populations, and (4) preparation and updating of knowledge and management plans for selected species of nongame wildlife, including the coyote, bobcat, and furbearers.

Basic investigation of pesticide contamination, pollution, disease, and food habitats of nongame wildlife will be made. Particular attention will be directed to the food chain effects of environmental contaminants on the reproduction of raptors and water-associated wildlife, particularly marine birds and mammals.

Output	1974-75	1975-76	1976-77
Fur take (number of animals)	60,000	61,000	62,000
Appropriate use (hunter-days)	125,000	125,000	125,000
Nonappropriate use (recreation-user-days)	51,000,000	51,500,000	52,000,000
Input			
Expenditures	\$657,797	\$718,924	\$722,265
Personnel man-years	25.4	24.9	24.9

III. INLAND FISHERIES

Program Objectives and Description

To provide diversified and satisfactory fishing for California anglers while insuring the perpetuation of the state's native fish fauna.

To meet these objectives, the department operates 16 fish hatcheries which will produce 34 million fish in 1976-77, which represents an increase over 1975-76 production of 4 million catchable-sized trout for planting in State Water Project reservoirs. The management of the nongame, rare and endangered, fish, amphibians and reptiles, and the protection of their environment will be continued. Other management activities include fish population and habitat inventories, habitat acquisition improvement, utilization measurement, fish population manipulation to increase yield, fish salvage, disease control, determining adverse impacts and recommending measures to counteract such impacts.

Authority

Constitution, Fish and Game Code, and Fish and Game Commission.

c. Other species	8.5	7	7	299,629	300,905	320,266

a. Trout

Trout angling is highly popular in California. Natural production of trout is large but insufficient to meet demand. Accordingly, the department will propagate and stock 14 million catchable-sized trout, 1.5 million subcatchables, and 14 million fingerlings in suitable lakes and streams. Several species, subspecies and strains are produced to provide diversity and to utilize different habitat niches. Wild trout management consists primarily of resource monitoring activities to protect and improve habitat. Certain native trout species, such as Piute, Kern River golden, and Lahontan cutthroat are threatened by hybridization with more common trout varieties. Special efforts are underway to maintain and expand the range of these unique fishes.

DEPARTMENT OF FISH AND GAME—Continued

Output	1974-75	1975-76	1976-77
Angler-days.....	12,000,000	12,000,000	13,500,000
Input			
Expenditures	\$5,517,419	\$6,394,391	\$6,541,191
Personnel man-years	216.8	218.2	219.4

b. Warmwater Game Fish

Warmwater game species include black bass, crappie, sunfish, catfish, and bullfrogs. The habitat for these fishes has increased greatly due to reservoir construction and angler demand has also grown, especially for black bass. Fortunately, these species usually maintain adequate populations without annual stocking so that management is relatively inexpensive. Common management activities are population and utilization inventories, habitat protection and improvement and angling regulations. Hatchery production is limited to channel catfish for planting in southern California and other suitable waters and experimental work with black bass and striped bass to improve reservoir angling.

Output	1974-75	1975-76	1976-77
Angler-days.....	8,000,000	8,000,000	8,000,000
Input			
Expenditures	\$1,054,604	\$1,259,680	\$1,366,014
Personnel man-years	45.3	46.6	46.5

c. Nongame, Rare and Endangered

Maintaining healthy populations of native fishes, amphibians, reptiles and invertebrates is accomplished by conducting necessary surveys and inventories, protecting or enhancing their habitat and excluding or controlling harmful exotic species. These actions assure native species of food, shelter, and a satisfactory place to reproduce and to rear their young. A number of native fishes, amphibians, reptiles, and invertebrates are in danger of extinction. Efforts to prevent their disappearance include population and habitat surveys, life history studies, land acquisition, recommendations to avoid adverse impacts of land and water development projects on critical habitat, and control of exotic species.

Input	1974-75	1975-76	1976-77
Expenditures	\$299,629	\$300,905	\$320,266
Personnel man-years	8.5	7	7

IV. ANADROMOUS FISHERIES

Program Objectives and Description

It is the objective of the anadromous fisheries program to (1) maintain, restore and improve anadromous fish populations, (2) obtain an optimum harvest of these resources, and (3) provide for their scientific and educational use.

Anadromous fisheries is responsible for programs involving salmon, steelhead, striped bass, shad and sturgeon. These species are under one program because these resources have many of the same environmental requirements and they have many common problems.

Anadromous fisheries resources support an estimated 3 million angler days of recreational fishing annually in marine and inland waters. In addition, the salmon resource provides a commercial catch averaging 8 million pounds annually with a net worth of over \$5 million. The contribution of these resources to the economy of the state and the well-being of its citizens justifies research and management activities to maintain and improve the existing populations.

Authority

Constitution of California, Fish and Game Code, and Fish and Game Commission.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

b. Sturgeon and Striped Bass.....	19.4	25.8	26.1	267,310	465,373	469,034
c. Delta Studies	29.8	28.5	28.4	508,797	506,866	519,500

a. Salmon and Steelhead

Salmon and steelhead activities are directed at artificially maintaining population of these fish whose habitat has been destroyed by water development and augmenting natural production, preservation and improvement of habitat, inventory and utilization, and determining better ways to accomplish these activities. A new task is directed at ascertaining and correcting causes of serious declines of these fish in the Trinity River.

Input	1974-75	1975-76	1976-77
Expenditures	\$3,564,096	\$3,678,082	\$3,836,215
Personnel man-years	117.8	120.1	120.2

DEPARTMENT OF FISH AND GAME—*Continued*

b. Striped Bass, Sturgeon, and Shad

Major activities are directed at inventorying population sizes, determining utilization, and analyzing responses of striped bass and sturgeon to environmental factors. A new activity is directed towards compilation of these data for shad.

Input	1974-75	1975-76	1976-77
Expenditures	\$267,310	\$465,373	\$469,034
Personnel man-years	19.4	25.8	26.1

c. Delta Studies

Activities of this study are directed at determining best ways to protect fish and wildlife of the Sacramento-San Joaquin Estuary from the effects of water development.

Input	1974-75	1975-76	1976-77
Expenditures	\$508,797	\$506,866	\$519,500
Personnel man-years	29.8	28.5	28.4

V. MARINE RESOURCES

Program Objectives and Description

The objectives of the Marine Resources Program are to perpetuate and enhance the marine fish, plant and animal resources and to develop an optimum harvest of these resources by sport and commercial endeavor. To achieve this, it is necessary to gather data on populations and harvest and to develop life histories of the various species.

Authority

Constitution of California, Fish and Game Code, and Fish and Game Commission.

h. Marine Research Committee.....						

a. Big Game Fisheries

Big game species of prime importance include albacore, bluefin tuna, Pacific bonito, the billfishes, California barracuda, white seabass, and California yellowtail. These species support important sport fisheries in addition to contributing significantly to California's commercial landings.

This element provides factual information for scientific management of the big game fishery resources for an optimum sustained yield of benefits year after year. Population identification and dynamics studies of the various species will continue. Efforts to locate migration routes and to trace the seasonal migrations along the coast will continue. Emphasis also will be placed on monitoring the sport and commercial catches of albacore, bluefin tuna, Pacific bonito, billfishes, California barracuda, white seabass, and California yellowtail to determine their abundance and mortality rates.

Input	1974-75	1975-76	1976-77
Expenditures	\$413,347	\$358,271	\$368,536
Personnel man-years	10.4	9.4	9.4

b. Coastal Fisheries

This element combines all activities of the nearshore environment. These include sportfishing, the special studies of the inshore fish, animals, and plants and their relation to each other, their environment, and the activities of man upon these organisms and their environment. Element activities will consist of: (1) increased emphasis on determination of sportfishing intensity, species taken and numbers caught for all sportfishing activities; (2) studies of the behavior and life history of the flora and fauna of the inshore areas; (3) monitoring and special studies of marine mammals; (4) ecological surveys to assess nearshore flora and fauna relative to natural and man-caused impacts on the marine environment; (5) kelp bed development aimed at increasing sportfish populations; (6) studies to provide technical advice on the construction and location of artificial reefs; and (7) activities to increase sportfish opportunities through the introduction of native and non-native species determined to possess characteristics compatible with existing marine environment.

Input	1974-75	1975-76	1976-77
Expenditures	\$827,737	\$1,064,136	\$1,004,226
Personnel man-years	40.1	45.6	43.2

DEPARTMENT OF FISH AND GAME—*Continued*

c. Bottomfisheries

Within this element biological and statistical data regarding fish species living on or near the ocean bottom off the coast of California are gathered and analyzed. These species represent the most important source of fresh market fish in California.

Logbook data from over 7,000 commercial fishing trips will be collected and prepared for processing by the biostatistical element on total catch, fishing effort, and catch localities for all species in trawl landings. Biological data at five major trawl ports will be collected to estimate the age, size, and sex composition of the Dover, English, and petrale sole catches, three species which comprise over half the total trawl landings.

Species composition of the multispecies rockfish fishery will be determined from catch sampling. Studies of important round fish in trawl landings will be conducted with emphasis on rockfish, sablefish and lingcod. Also, studies of the ecology of nearshore bottomfish will continue as will exploratory fishing, gear development, tagging, and catch sampling aboard research and commercial vessels. These studies will provide information on fishery trends and on the conditions of bottomfish stocks from which meaningful management recommendations can be made.

Fishing by foreign distant sea trawlers will be closely watched to determine their effect on coastal stocks.

Input	1974-75	1975-76	1976-77
Expenditures	\$154,415	\$267,995	\$271,943
Personnel man-years	18.1	17.3	17.3

d. Pelagic Fisheries

The pelagic fisheries element plans to sample 20 percent of the commercial landings of jack mackerel and northern anchovy for size and age. These samples include otoliths (fish earbones) which must be read for age. The program will collect, process, and analyze over 3,000 fishing logs and interviews for the anchovy and mackerel fishery. Pacific mackerel will be tagged as well as other fish which may be encountered, and previous tag returns on other pelagic species will be analyzed. The research vessel "Alaska" will be utilized in conducting surveys of the pelagic species in the California current system. Population estimates will be made for Pacific mackerel, northern anchovies, Pacific herring, and Pacific sardines. Acoustical equipment and midwater trawls will be used to count and identify fish schools. Sardine and Pacific mackerel management regulations necessitate monitoring the relative abundance of these species by sea surveys. Work will continue on developing techniques for using sonar in purse seine fishing operations, and to analyze and publish data for all species under investigation by the pelagic fish element.

Input	1974-75	1975-76	1976-77
Expenditures	\$842,329	\$934,005	\$955,062
Personnel man-years	40.1	35.2	35.1

e. Shellfisheries

The shellfish element conducts research on the crab, shrimp, lobster, abalone, oysters, and clam resources and makes management recommendations concerning their utilization.

Cruises will be conducted to determine crab abundance, population structure, and mortality rates off San Francisco and Eureka. During the season, monthly sampling will be done aboard commercial vessels at sea to determine which components of the crab population are captured by the industry at both Eureka and San Francisco. Differential survival of larval and juvenile crabs will be investigated under a variety of environmental conditions.

Research will be conducted at sea to determine abundance, population structure, and mortality rates for the shrimp resources in the Eureka-Crescent City area. Market samples of shrimp will be collected at Eureka-Crescent City to determine composition of the commercial catch. These studies are sometimes made by cooperative arrangements using commercial boats.

Spiny lobster research will entail an assessment of the commercial and sport fisheries, as well as investigations on gear design, biology and status of the lobster resource from Point Conception to the Mexican border. These investigations will entail regular cruises aboard department vessels, as well as market sampling, interviews, logbooks, and sampling at sea.

Catch records including species composition and effort will be collected and maintained for commercial and sport abalone.

Administer oyster leases on state lands and provide technical assistance to oyster growers. Surveys of sport clam beds are made annually to assess recruitment and survival, determine abundance and use. Annual inspections of shellfish shipments destined for planting in California waters will continue.

The mariculture research and development program will conduct research in developing larvae culture techniques that will enable a more detailed study of marine shellfish larvae and in developing rearing techniques that may have commercial application. Spawning habits of native oysters, clams, abalone, scallops, shrimp, crab, and other marine animals will be studied to understand the physiological and culture requirements.

Input	1974-75	1975-76	1976-77
Expenditures	\$748,811	\$808,025	\$800,987
Personnel man-years	29.8	34.2	31.1

f. Marine Fisheries Statistics

The marine fisheries statistics element will compile and publish catch information on commercial fishing effort, and disseminate information to many various public and private agencies, in addition to providing technical assistance and biometrical analysis to other marine elements.

Input	1974-75	1975-76	1976-77
Expenditures	\$618,138	\$647,502	\$663,294
Personnel man-years	28.5	28.2	28.1

g. Pacific Marine Fisheries Commission

The Pacific Marine Fisheries Commission, in accordance with the Pacific Marine Fisheries Compact, promotes the better utilization of marine, shell and anadromous fishes of the Pacific Ocean.

Input	1974-75	1975-76	1976-77
Continuing costs	\$15,100	\$21,600	\$21,600

h. Marine Research Committee

Objectives of the Marine Research Committee are the development of the commercial fisheries of the California current system and of the marine products for the people of this state. Research is financed from a privilege tax of 5 cents per 100 pounds of sardine, Pacific and jack mackerel, squid, herring and anchovies. Programs during the budget year will include: (1) mackerel tagging studies; (2) stock assessment studies; (3) food habits of pelagic species; (4) processing of egg and larvae samples; (5) atlas of biological, physical and chemical observations in the California current; (6) publication of sea survey data; and (7) early life history studies of larval and juvenile fishes.

Input	1974-75	1975-76	1976-77
Continuing costs	\$124,579	\$175,500	\$169,935

DEPARTMENT OF FISH AND GAME—Continued

VI. ENVIRONMENTAL SERVICES

Program Objectives and Description

The purpose of the environmental services program is to prevent adverse impacts on fish and wildlife from projects affecting the land, waters, and water quality of California.

The Federal Fish and Wildlife Coordination Act, Water Projects Recreation Act, and National Environmental Policy Act require review by this department of projects proposed by or permitted by federal agencies. The California Environmental Quality Act requires review by the department of many local and state projects. The review of all these projects and the protection of water quality mandated by the Fish and Game Code is accomplished by the environmental services unit.

Authority

Fish and Game Code, State Water Code, Government Code, and the Environmental Quality Act of 1970.

At the federal level, the Fish and Wildlife Coordination Act, the Water Projects Recreation Act, the Federal Power Act (and associated rules, adopted by the Federal Power Commission), the National Environmental Policy Act of 1969, and the Intergovernmental Cooperative Act of 1968.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

b. Water Quality	38.8	42.4	38.3	1,274,994	1,414,125	1,425,871

a. Land and Water Projects

Plans for federal, state, and local land and water projects, Federal Power Commission projects, state water rights and dam permits and rural subdivision developments are reviewed to provide maximum protection of fish and wildlife. Each project review results in recommendations for measures to protect or enhance fish and wildlife. A total of \$200,000 and 9 man-years of staff has been added to the 1976-77 fiscal year budget in order that the department may evaluate the effectiveness and adequacy of its environmental review procedure.

Input	1974-75	1975-76	1976-77
Expenditures	\$1,123,001	\$1,213,888	\$1,360,103
Personnel man-years	50.5	48.8	55.3

b. Water Quality

To maintain water quality suitable for fish and wildlife and their utilization, the department will investigate pollution problems, enforce pollution control laws which are within the Fish and Game Code, gather basic water quality data including applied research on specific problems, and provide technical assistance to the regional and state water quality control agencies, California Coastal Zone Conservation Commission and State Energy Resources Conservation and Development Commission.

Input	1974-75	1975-76	1976-77
Expenditures	\$1,274,994	\$1,414,125	\$1,425,871
Personnel man-years	38.8	42.4	38.3

VII. ADMINISTRATION

Program Objectives and Description

General policy direction is provided by the Fish and Game Commission, who also regulate the taking of fish and game by promulgation of regulations establishing open and closed seasons, bag and possession limits, and areas for the taking of fish and game. The director, with the assistance of regional managers, provides executive direction to the programs which implement the policies of the Legislature and the Fish and Game Commission.

The administrative services staff provides centralized administrative support necessary to management, program managers, and their staff.

WILDLIFE CONSERVATION BOARD

The Wildlife Conservation Board is involved in conserving, developing, improving, and providing access to our natural resources to accommodate the needs of sportsmen and others who utilize outdoor recreation resources.

PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
Wildlife Conservation Board	\$182,994	\$210,188	\$215,000
Reimbursements	-23,834	-	-
NET TOTALS, PROGRAM (Wildlife Restoration Fund)	\$159,160	\$210,188	\$215,000
Personnel man-years	7	7	7

WILDLIFE CONSERVATION PROGRAM**Program Objectives and Description**

The board is composed of the Director of Finance, the Director of the Department of Fish and Game, and the President of the Fish and Game Commission. The board is advised by a joint interim investigating committee consisting of three Members of the Senate and three Members of the Assembly. Annually \$750,000 is transferred to the Wildlife Restoration Fund from license fees collected for conducting horseraces. The board is charged with the administration of this fund.

Through its staff, the board conducts necessary investigations and studies to determine the areas within the state most essential and suitable for wildlife production and preservation and which will provide recreational advantages.

As a result of such studies, the board determines which lands or rights in lands or waters should be acquired by the state to effectuate the wildlife conservation and recreation program. In urban areas the Wildlife Conservation Board constructs fishing piers on the ocean, and develops fishing access sites at lakes and along the state's waterways and aqueducts. Development includes, as necessary, features such as boat ramps, parking areas, water supply, and sanitary facilities.

Through purchase of key land parcels and development of roads, the board is trying to meet the demand for hunting access to public lands. Protection and improvement of the resource is accomplished by saving marsh areas, building fish screens, fish ladders, fish hatcheries, and preservation of wildlife or ecological areas.

In November of 1970, the voters passed the Recreation and Fish and Wildlife Enhancement Bond Act, providing \$6,000,000 to the Department of Fish and Game and the Wildlife Conservation Board for design and construction of fish and wildlife enhancement and fishing access sites in connection with state water projects.

In June of 1974 the voters approved Proposition 1, the State Beach, Park, Recreational and Historical Facilities Bond Act of 1974 providing \$10,000,000 to the Wildlife Conservation Board for expenditures in accordance with the Wildlife Conservation Law.

For the 1976-77 fiscal year a total of \$1,771,000 in acquisition and improvement projects are proposed. The specific projects and their funding source are shown in the capital outlay section which follows.

It is estimated that 10 percent of Wildlife Conservation Board support expenditures are related to the preparation and review of environmental impact studies.

^a Federal funds and expenditures therefrom are not included in budget totals.^b Selected bond fund expenditures are included in overall expenditure totals.

WILDLIFE CONSERVATION PROGRAM

Continuation of the acquisition and improvement of wildlife conservation projects is planned. The revenue of \$750,000 each fiscal year as provided by legislation—Chapter 1313, Statutes of 1955, and Chapter 1828, Statutes of 1959—has been or will be allocated to projects by the Wildlife Conservation Board. The schedule reflects the estimated expenditures, based on anticipated allocations by the Wildlife Conservation Board.

In addition to the Wildlife Conservation Board's regular funding, it is expected that federal funds will become available on a reimbursable basis for qualifying projects, and such funds will be reported annually as received. In fiscal year 1974-75 \$476,454 was received as project reimbursement.

MAJOR PROJECTS

Fish hatchery and stocking projects	\$82,051	\$45,000	\$45,000
For construction and equipping of facilities for hatching and stocking.			
Fish habitat development and improvement projects	359,658	195,000	195,000
For acquisition and development of warmwater lakes; for reservoir construction and improvement; for stream improvement; for fish screen construction; for marine habitat improvement.			
Fishing access projects.....	427,420	232,500	232,500
For the acquisition and development of coastal access; river, stream and bay access; lake and reservoir access; pier construction.			
Wildlife habitat and development projects	480,399	262,500	262,500
For the acquisition and development of wildlife areas.			
Special projects	3,655	7,500	7,500
For project evaluation, preliminary land acquisition costs, and engineering studies of potential projects.			
Miscellaneous projects	5,998	7,500	7,500
TOTALS, EXPENDITURES (Wildlife Conservation Program)	\$1,359,181	\$750,000	\$750,000
Wildlife Restoration Fund.....	882,727	750,000	750,000
Federal funds—Anadromous Fish Act	13,980	—	—
Federal funds—Land and Water Conservation Fund	462,474	—	—

RECREATION AND FISH AND WILDLIFE ENHANCEMENT BOND ACT PROGRAM

This bond act, passed by the voters at the November 1970 election provided \$6,000,000 to the Department of Fish and Game and the Wildlife Conservation Board for fish and wildlife enhancement and fishing access sites in connection with state water projects.

Hatchery Expansion Projects:

KLAMATH RIVER COMPACT COMMISSION

The Klamath River Compact Commission carries out the terms of the Klamath River Compact between the States of California and Oregon. This is accomplished by carrying out programs designed to determine the demand for compact waters and their ability to meet this demand. This requires studies, continuing contact with public and private entities, and frequent meetings of the commission. The commission is supported by equal appropriations from California and Oregon.

SUMMARY OF PROGRAM REQUIREMENTS	1974-75	1975-76	1976-77
Klamath River Compact Commission (<i>General Fund</i>)	\$11,800	-	-

It is the objective of the Klamath River Compact Commission to see that the terms of the Klamath River Compact are being complied with. This is accomplished by initiating and carrying out programs designed to determine the demand for compact waters and their ability to meet this demand. This requires studies, continuing contact with public and private entities, and frequent meetings of this commission.

In carrying out the objectives of the compact, the Klamath River Compact Commission is required to evaluate: (1) the effects of development, both existing and proposed, on water use in the basin, and, conversely, (2) effects of water use in the basin and the availability for furthering the development of the basin. This requires information on a variety of factors including quantity and quality of water available, basin requirements for water from both the standpoint of quality and quantity, and the effect of these proposed plans for development and use of these waters on the water needs of the basin. The commission has no staff of its own, but relies upon contracts with public agencies and private entities for the services it requires. This includes such items as administrative, engineering, water rights, and water quality services and research.

For the 1975-76 and the 1976-77 years the commission has need of no additional funds from either of the States of Oregon or California. Its program for 1975-76 and 1976-77 is funded from money which the commission has available in its accounts.

DEPARTMENT OF NAVIGATION AND OCEAN DEVELOPMENT

The Department of Navigation and Ocean Development was created by the Governor's Reorganization Plan No. 2 of 1969. In addition to assuming the responsibilities of the Department of Harbors and Watercraft, it made this Department responsible for the development of boating facilities in state recreation areas. The state's shoreline protection program was also made a function of the Department.

The Department makes loans for recreational harbor development and grants for boat launching facilities, plans and provides funding for Capital Outlay projects, licenses yacht and ship brokers and for-hire vessel operators, and conducts a program of boating safety and regulation. It participates with the Corps of Engineers and local agencies in the construction of beach erosion control projects, assists local jurisdictions in obtaining the greatest benefits available from federal beach erosion programs.

The Department has a seven-man commission appointed by the Governor.

The program objectives and responsibilities of the Department are: to develop and improve boating facilities throughout the state, to promote safety of persons and property connected with the operation of vessels on state waters and promote uniformity of law relating thereto, and to conduct a beach erosion program in cooperation with the federal government and local governmental agencies.

SUMMARY OF PROGRAM REQUIREMENTS

I. BOATING FACILITIES

Program Objectives and Description

According to statewide studies, boating facility deficiencies exist throughout the state and are expected to continue in the future. The objective of this program is to continue to plan, develop, and construct boating facilities in areas of demonstrated need so that California's boating and navigational needs might be satisfied.

To accomplish the objective, the department functions as a central source of boating information by conducting special studies, assembling and compiling existing data, and disseminating the information to both public and private groups; contacts and meets with local governmental planning agencies to plan local boating facilities development; provides technical assistance for new boating facilities projects; and provides financial assistance to local governments in the form of loans for small craft harbors and grants for boat launching facilities. In addition, as marina-related concessions contribute to the financial feasibility of department-financed projects, the Department of Navigation and Ocean Development reviews and approves concession proposals to ensure compatibility with departmental policies and objectives.

Finally, coordination with federal, state, and local governmental agencies and private concerns is maintained on all matters affecting boating and navigation in the state.

Two boating facilities manager positions are proposed in the boating facilities program, one in the grant element and one in the loan element. These two positions are needed to meet the increase workload and to monitor completed projects to ensure their proper operation and maintenance. Also, \$35,000 is proposed for a contract to develop a fluidization pipe system which would assist in clearing and maintaining launching ramps that are subject to siltation.

d. Concession Review	1	1	1	28,524	34,738	35,800

a. Grant Program Element

This element provides grants to local governments and funds for joint state/federal projects in an effort to alleviate the shortage of safe and convenient boat launching facilities. The "Boating Resources Development Planning Study" conducted in 1973 shows that by 1980 there will be a need for 246 additional launching lanes in California.

In addition to funding the construction of launching lanes, grant expenditures are also used to fund various ancillary boating facilities. These facilities typically include restrooms, lighting, parking, ramp extensions, drinking fountains, boarding floats, safety signs, shore protection, and landscaping.

The effectiveness of this program element can be measured by a number of factors, specifically: expenditures on completed projects, the number of completed projects, and the number of boat launching lanes constructed.

The Grant Program expenditures element indicates the level of funding to local governmental jurisdictions. The number of projects includes the construction of boat launching lanes and ancillary boating facilities. The number of boat launching lanes constructed is the clearest indication of grant output. As new launching lanes became available to the boating public, there was a corresponding reduction in waiting time for launching and retrieving of boats, plus the dispersment of boaters from overcrowded waters.

^a Nongovernmental cost revenues and expenditures are excluded from budget totals.

^b Selected bond fund expenditures are included in overall expenditure totals.

DEPARTMENT OF NAVIGATION AND OCEAN DEVELOPMENT—Continued

Output	1974-75	1975-76	1976-77
Expenditures for completed projects	\$780,000	\$4,391,000	\$2,528,000
Number of completed projects	5	21	13
Number of launching lanes constructed	6	43	22
Input			
Expenditures	\$2,950,846	\$2,078,326	\$2,232,914
Personnel man-years	7.6	8	9

b. Loan Program Element

This element provides loans to local governments in an effort to alleviate the shortage of safe and convenient small craft harbor facilities. California continues to experience increases in the boating population with its attendant demand for berthing spaces in small craft harbors throughout the State, especially in the south coastal area. The "Boating Resources Development Planning Study" conservatively estimates that a minimum of 4,200 berths are required to meet the present demand. By 1980, this deficiency will increase to nearly 12,000 berths.

In addition to developing new small craft harbors, the Department gives a high priority to the expansion of existing berthing facilities. The expansion of existing small craft harbors assures both the optimal use of boating resources and the environmental protection of the coast. Alternatives, such as mechanized dry storage facilities, are also being considered as a means of increasing berthing capacities.

The effectiveness of this program element can be measured by a number of factors, specifically: expenditures on completed projects, the number of completed projects, and the number of berths constructed.

The loan program expenditures element indicates the level of funding to local governmental jurisdictions. A harbor development project can include dredging, excavation, landscaping and irrigation, plus the construction of breakwaters, restrooms, boarding floats, fuel docks, sewage pumpout stations, berths and utilities.

Output	1974-75	1975-76	1976-77
Expenditures for completed projects	\$3,400,000	\$1,650,000	\$5,840,000
Number of completed projects	3	4	4
Number of berths constructed	725	292	1,171
Input			
Expenditures	\$2,648,512	\$8,295,988	\$9,903,860
Personnel man-years	8.6	9	10

c. Capital Outlay Administration

The capital outlay program element consists of boating facilities development in the state park system, on State Water Project reservoirs, and on other state lands. The department is responsible for the project location, scope, planning, and design of boating facilities within units of the state park system and at State Water Project reservoirs.

Surveys of boating facility needs throughout the state park system and the State Water Project reservoirs are conducted and priorities established by the department in cooperation with the Departments of Parks and Recreation and Water Resources. Based upon the demonstrated needs of the boating population in the various areas of the state, the department schedules construction of boating facilities to meet the needs.

The effectiveness of this program element can be measured by a number of factors, specifically: expenditures on completed projects, the number of completed projects, the number of boat launching lanes constructed, and moorings, berths, and boat-in sites constructed. The capital outlay expenditures indicate the level of spending on state projects. The number of projects includes the construction or improvement of boat launching lanes, moorings, berths, boat-in sites, and ancillary facilities.

The number of boat launching lanes, moorings, berths, and boat-in sites budgeted for construction is the clearest indication of capital outlay output. As these new boating facilities became available to the boating public, there was a corresponding reduction in waiting time for launching and retrieving of boats, plus the dispersment of boaters from overcrowded waters.

The following table indicates the department's output over the last few years:

Output	1974-75	1975-76	1976-77
Expenditures for completed projects	\$1,524,300	\$2,480,940	\$1,329,000
Numbers of completed projects	6	25	9
Number of launching lanes constructed	6	7	6
Number of completed mooring, berths, boat-in sites	35	183	75
Input			
Expenditures	\$475,063	\$662,575	\$442,899
Personnel man-years	4	4	4

d. Concession Review

The repayment of state loans made to local governments under Section 71.4 of the Harbors and Navigation Code depends, to a large extent, on the proper development of concessions within the project area and the payment of a reasonable annual rent to the lessor, which, in turn, is used to repay the state. Therefore, there is a continuing need to review the terms and conditions of new lease proposals. Concession revenues are the major collateral for loans and a high degree of expertise in this area of activity is vital to the state's interest. Sections 72 and 72.2 of the Harbors and Navigation Code require that the Department of Navigation and Ocean Development approve the terms and conditions of all leases. By virtue of the fact that the department has been and is involved in concessions work throughout the state, it has the expertise which is invaluable to local government in the negotiation and execution of lease contracts.

Input	1974-75	1975-76	1976-77
Expenditures	\$28,524	\$34,738	\$35,800
Personnel man-years	1	1	1

II. BOATING OPERATIONS

Program Objectives and Description

The primary objective of the Boating Operations Program is to reduce the incidence of loss of life, personal injury and property damage resulting from boating accidents.

Activity in this program involves correlative efforts in uniform boating law enforcement, boater education and boating safety. It requires the continual alignment of safety programs to meet new problems, e.g., whitewater fatalities, and to meet the wide variety of needs of an increasing number of boats

DEPARTMENT OF NAVIGATION AND OCEAN DEVELOPMENT—Continued

and boaters. Aspects of the program involve gathering of statistical information concerning boating accidents to enable the department to monitor accident trends, problem areas and research causal factors in such mishaps. Additionally, the department develops and implements programs for the eliminating of boating hazards. Boating safety literature is published and distributed to prevent problems before they occur. Coordination of educational programs in boating is of major importance in reducing accidents. Continuous coordination with over 700 municipal and justice courts and over 100 enforcing agencies insures an acceptable level of uniformity in boating law enforcement. Although it is not known how many boaters were saved or accidents prevented, improving the boaters's knowledge of safety practices and regulations through education and uniform enforcement will help to achieve the desired objective.

Authority

Division 1, Chapter 4 of the Harbors and Navigation Code.

Program Elements

a. Boating safety	6.3	7	10	\$222,324	\$315,180	\$367,112
b. Boating regulation:						
Subvention	—	—	—	523,052	800,000	1,200,000
Administration	7	7.5	9.5	238,592	338,242	373,044
c. Boating education	2.8	2.5	2.5	81,338	115,310	117,230
d. Yacht and ship brokers licensing	4	4	4.5	92,179	113,894	122,807

a. Boating Safety

Work in the boating safety element includes analysis and investigation of boating accidents, recommending changes in law and regulations, marking or removing boating hazards, helping local agencies warn boaters of hazardous conditions, and recommending improvement in boating equipment. Additionally, U.S. Army Corps of Engineers construction permits relating to boating activities are reviewed and appropriate recommendations made. Presentations on boating safety are given to boating clubs, public service organizations and others interested in boating. Surveys of existing pump-out facilities to accommodate waste discharge from vessels are conducted, in addition to a study of the requirements for installation of pump-out facilities at new state-sponsored projects. Boat shows are attended to answer questions regarding boating safety, operation and equipment. Safety literature is disseminated statewide. New products are inspected for compliance with state laws and local entities are assisted in proper zoning and marking of waterways.

Due to the vast increase in the number of nonpowered vessels using the state waterways and the high fatality rate from this type vessel, two boating administrators, one clerical position and associated costs are proposed. These proposed positions will be used to develop a specific program aimed at reducing the accident and fatality rate in the small boat and inflatable class. This program will include the development of safety and educational material, working with organized groups to promote safety education and physically going to launching areas and working with the general public.

Although recent changes in national accident reporting procedures have caused an overall increase in raw accident statistics, California's total fatalities have increased only half of the national rate. If whitewater fatalities are removed from total boating fatalities, California has experienced an overall decrease of 1 percent over the previous reporting year.

Output

	1974-75	1975-76*	1976-77
1. Total number of boating accidents	780	740	740
2. Fatalities †	121	110	110
3. Injuries	216	175	175
4. Property damage	\$1,503,133	\$1,250,000	\$1,250,000
5. 1 accident per number of boat-use days ‡	19,230	21,000	22,000
6. 1 fatality per number of boat-use days ‡	123,966	125,000	125,000
7. 1 injury per number of boat-use days ‡	69,444	72,000	72,000

* The figures in 1975-76 and 1976-77 represent goals to be achieved.

† Includes all boats, registered, nonregistered, powered and nonpowered.

‡ Boat-use days are based on figures compiled by Arthur Young and Company in their 1972 Boat Gasoline Tax Study. These figures only include registered boats.

Input

	1974-75	1975-76	1976-77
Expenditures	\$222,324	\$315,180	\$367,112
Personnel man-years	6.3	7	10

b. Regulation

This element administers the state and federal aid programs which provide funds to qualifying local agencies involved in boating safety and enforcement. Additionally, it monitors local programs for effectiveness. To insure uniform law enforcement statewide, annual training is provided. Local boating ordinances are reviewed to ensure conformity with state law. The element maintains liaison with appropriate federal agencies as it relates to regulation and enforcement of boating statutes.

The department proposes two positions, a boating administrator and a clerical. The positions will be used to monitor and evaluate the use of federal funds provided by the Federal Safe Boat Act, to review and process the increased number of boating accident reports, to provide assistance in the training of local boating law enforcement officers and in the subvention to the counties program.

Output

	1974-75	1975-76	1976-77
Increase number of patrol boats (estimated)	185	200	215
Number of citations	1,850	2,000	2,200
Number of boats per citation	255	200	175
Total number of peace officers trained and in service.....	326	350	400

DEPARTMENT OF NAVIGATION AND OCEAN DEVELOPMENT—Continued

Input	1974-75	1975-76	1976-77
Expenditures	\$761,644	\$1,138,242	\$1,573,044
Personnel man-years	7	7.5	9.5

c. Boating Education

Work in the boating education element includes developing boating safety leaflets, posters and various other boating educational material for distribution to the general public. The boating education element also produces and issues press releases, radio and television spot announcements, and also coordinates with the State Department of Education, United States Coast Guard Auxiliary, United States Power Squadrons, and other boating organizations to promote better boating safety education through publicity of free boating instruction.

Output	1974-75	1975-76	1976-77
Press releases.....	50	60	78
Radio spots	20	25	50

Films loaned to boating organizations.....	225	300	700

Input	1974-75	1975-76	1976-77
Expenditures	\$81,338	\$115,310	\$117,230
Personnel man-years	2.8	2.5	2.5

d. Yacht and Ship Brokers

The objectives of this program are to protect the public from fraudulent acts by persons engaged in the sale or resale of used vessels, and to provide a minimum level of competence among such brokers and their salesmen. These objectives were set forth as a continuing program reflective of the intent of the Legislature by passage of the Yacht and Ship Brokers Act. Activity in the examination level includes licensing of yacht brokers and salesmen to assure uniform competency throughout the state. The activity at the investigative level handles complaints through arbitration or legal action.

A half-time clerical position is proposed to meet the increased clerical workload resulting from program activities.

III. BEACH EROSION

Program Objectives and Description

Eighty-six percent of California's marine shoreline is undergoing erosion. Twenty-one miles are so critical that erosion is likely to endanger life or public safety within the next five years and corrective measures are estimated to cost \$50 million. Another 60 miles may require corrective action within the next 25 years.

A great deal of the erosion is from natural causes but flood control projects and shoreline developments have added to the problem by upsetting the natural physical processes and depleting the sources of beach sand or redirecting the wave forces so that the effects of erosion are multiplied.

Local governments are unable to cope with the problem. In nearly all cases the beaches are used largely by people outside the local area but within a few hours' drive. It is in the state interest and also more within the State's capability than the local government's to prevent and correct beach erosion problems.

The federal government has established programs to assist the states and local governments in solving the shoreline problems and to protect the national interest in the beaches. Those states with strong effective programs of their own will be more likely to obtain federal assistance than individual local governments with local problems.

The objective of the beach erosion program is to protect and preserve the state beaches and existing shoreline developments.

IV. GENERAL MANAGEMENT

Program Objectives and Descriptions

The general management activity consists of executive direction and administrative services essential to the operation of the line programs.

The executive direction provides policy formulation, administrative direction and guidance in policy implementation, overall planning and program management, coordination of line programs and evaluation of program results.

The administrative services provides accounting, budgeting, personnel, business management services to the line programs, and financial audits of expenditures for small craft harbor planning and construction loans, launching facility grants, and boating law enforcement subventions.

CALIFORNIA COASTAL ZONE CONSERVATION COMMISSION

The objectives of the California Coastal Zone Conservation Commission are: to study the coastal zone to determine the ecological planning principles and assumptions needed to ensure conservation of coastal zone resources; to prepare, based upon such study and in full consultation with all affected governmental agencies, private interests and the general public, a comprehensive, coordinated, enforceable plan for the orderly, long-range conservation and management of the natural resources of the coastal zone; and to ensure that any development which occurs in the permit area during the study and planning period will be consistent with the needs of the coastal zone in permanently protecting its remaining natural and scenic resources; promoting the public safety, health and welfare of its inhabitants; protecting public and private property, wildlife, marine fisheries, other ocean resources and its natural environment; preserving its ecological balance and preventing its further deterioration and destruction; and preserving, protecting and where possible, restoring its resources for the enjoyment of the current and succeeding generations.

I. CALIFORNIA COASTAL ZONE CONSERVATION PLAN

Program Objectives and Description

The California Coastal Zone Conservation Act of 1972 was added to the Public Resources Code by vote of the people on November 7, 1972. This act created a State Coastal Zone Conservation Commission and six regional commissions.

An appropriation of \$5 million was made from the Bagley Conservation Fund to the California Coastal Zone Conservation Commission for the support of the commission and the regional commissions during the fiscal years of 1973 to 1977. Subsequently Chapter 28, Statutes of 1973 provided that all permit application fees and reimbursements for expenses shall be credited and appropriated to the commission for expenditure to support the operations of the commission.

Under the initiative measure the Commission was required to adopt the coastal zone plan and submit it to the Legislature on or before December 1, 1975. The present act will terminate on January 1, 1977.

a. Coastal Zone Planning

In December, 1975, the California Coastal Zone Conservation Plan required by the California Coastal Zone Conservation Act of 1972 (Proposition 20) was submitted to the Governor and the Legislature. Thus, the initial and basic planning program of the Coastal Commissions has been completed on schedule. The major emphasis of the follow-up planning program, beginning in January 1, 1976, will be: (1) work with local governments on bringing local plans into conformity with Coastal Plan principles; (2) pilot projects demonstrating methods of doing this; (3) developing supplementary materials as necessary to illustrate and explain Plan proposals to the Administration, the Legislature and the public; and (4) preparation of supplementary material as necessary to ensure that an adopted California Coastal Plan meets the requirements of the U.S. Coastal Zone Management Act of 1972 so Federal actions in California will, under the terms of that Act, comply with California's Coastal Plan and so California will qualify for Federal funding assistance.

Thus, the planning program beginning in 1976, will undertake further planning and studies necessary to help local governments bring their local plans and ordinances into conformity with Coastal Plan objectives. As part of this work, pilot projects are proposed to insure the workability of major Plan policies to demonstrate ways in which this can be done.

Finally, some further planning work will be needed to insure that California's adopted Coastal Plan qualifies for approval by the Secretary of Commerce (whose department includes the Federal Office of Coastal Zone Management). Once this approval is given, California will qualify for Federal funds to help carry out the Plan, and all Federal agencies in California will be bound by the Federal law to carry out their activities in a manner consistent with the Plan.

This budget reports the administrative establishment of 42 positions early in the calendar year 1976. The major funding for this augmented staff is from a Federal grant. Included in this total are 20 professional positions to provide planning assistance to local agencies and to conduct subregional planning studies as required. These positions are proposed on a continuing basis and would become part of the staff cadre to be transferred to the successor body. Continuing Federal funding for this group is anticipated. The other positions include 16 professional and 6 clerical to develop a study of the impact of the outer continental shelf development especially as it relates to the Santa Barbara Channel and other southern California coastal areas. This project is funded in part by a Federal grant and will be completed in October of 1976.

b. Permit Issuance and Control

1. With certain exceptions, permits are required from the regional commissions for all development within the permit areas under their respective jurisdictions.

2. Developers file applications for permits with the regional commissions that have jurisdiction for their respective development sites.

3. Regional commission staff members review the applications together with related documentation and prepare summary reports for the commissions with recommendations for either the approval or denial of the permits.

4. After written notice to public, public hearings are held on a given permit application no sooner than 21 days nor later than 90 days from its date of acceptance by a regional commission.

5. The regional commission must decide on an application within 60 days after the conclusion of public hearings.

6. If no appeal is filed with the state commission within 10 working days of the date of decision, then the decision of the regional commission becomes final.

Periodic field inspections of development sites are made by regional commission staff members to determine if developers are complying with the terms of their permits.

Appeals from the decisions of the regional commissions to the state commission follow the same general procedures outlined above under regional

^a Federal funds and expenditures therefrom are not included in budget totals.

CALIFORNIA COASTAL ZONE CONSERVATION COMMISSION—Continued

interim permit control. Appellants file applications, staff summary reports are prepared with recommendations, public hearings are held and final decisions are rendered affirming, denying, or modifying the decisions of the regional commissions.

Any party may file for judicial review of a decision rendered by either the regional commissions or the state commission. These civil actions are defended by the Attorney General on behalf of the state and regional commissions.

In the current year services of the Attorney General were funded by a separate appropriation from the General Fund. This budget continues that policy.

This budget proposes 1.5 man-years of technical staff to assume direct responsibility for certain accounting and personnel functions. Funding is proposed from a reduction in contractual services.

Authority

Initiative Proposition 20, General Election, November 7, 1972.

II. COASTAL ZONE MANAGEMENT PROGRAM

The Coastal Plan developed by the Coastal Zone Conservation Commission recommends that the following implementation program be established:

1. Local Government Responsibilities for the Coast

The Commission recommends that legislation be prepared placing primary responsibilities for carrying out the Coastal Plan with local governments. Within three years of the effective date of State legislation to carry out the Plan, local governments along the coast should be required to bring their General Plans into conformity with the Coastal Plan. Local governments would submit their plans to the Regional and State Coastal Commissions for certification as to conformity with the Coastal Plan. After all the local plans in a region had been certified, the Regional Commission would go out of existence. Local governments would then control coastal conservation and development, subject to a system of limited appeals to the State Commission to insure that approved local plans and thus the Coastal Plan were being followed in day-to-day decisions.

2. Coastal Resource Management Area

Local plans would be required to conform to the Coastal Plan in an area designated as the coastal resource management area. This area is an area of varying width along the coast containing the coastal waters, wetlands, beaches, bluffs, agricultural lands, and coastal communities and neighborhoods that are the subject of Plan policies.

3. Permit and Appeals System

To insure that unwise development decisions do not occur while local plans are being brought into conformity with the Coastal Plan, the permit and appeals system specified in the 1972 Coastal Act would remain in effect with modification.

4. Permits and Appeals After Certification

After a local plan has been certified by the Coastal Commissions as being in conformity with the Coastal Plan, local governments would have primary implementation responsibility, subject to a system of limited appeals to the State Coastal Commission to insure that the approved local plan and the Coastal Plan were being followed in day-to-day conservation and development decisions.

5. State Coastal Agency

After the Regional Commissions have gone out of existence, the proposed State Plan suggests a State Coastal Commission with 12 members—one-third appointed by the Governor, one-third by the Speaker of the Assembly, and one-third by the Senate Rules Committee. This successor body would have the following responsibilities: (1) carry out the planning and research necessary to keep the Coastal Plan up to date in light of changing conditions; (2) assist local governments in Plan implementation; and (3) through the appeals process, monitor the decisions on proposed coastal conservation and development.

6. State and Federal Agency Responsibilities

The Plan provides that all State agencies, and all Federal agencies to the extent applicable under Federal law, be required to conduct their activities in full compliance with Coastal Plan policies. The Coastal Commission would seek to insure that California maintains a Coastal Plan complying with the standards of the Federal Coastal Zone Management Act of 1972, thus qualifying the State for Federal funds to help carry out the Plan, and also insuring that Federal agencies would be required to follow the Plan unless an overriding national interest compelled other actions.

In summary, the Coastal Commissions' basic recommendation for Plan implementation is that local governments have primary responsibility for carrying out the Plan, with a continuing coastal agency to help local governments in this effort, to make further studies necessary to keep the Plan up-to-date as conditions change, and through appeals process, to insure that the Plan—and approved local plans—are followed in day-to-day conservation and development decisions. *To this end, this budget proposes the funding of such a successor agency for the period from January 1, 1977 to June 30, 1977. For the initial six-month period reported in this budget, it is assumed that the structure of the successor agency would be similar to that of the Commission whose statutory existence terminates December 31, 1976.*

DEPARTMENT OF PARKS AND RECREATION

The Department of Parks and Recreation acquires, designs, develops, operates and maintains units of the State Park System. The Department also has the responsibility to administer both federal and state local assistance programs. These activities are directed toward the accomplishment of seven principal objectives:

1. To secure and preserve elements of the state's outstanding landscape, cultural, and historical features.
2. To provide the facilities and resources which are required to fulfill the recreational demands of the people of California.
3. To provide a meaningful environment in which the people of California are given the opportunity to understand and appreciate the state's cultural, historical, and natural heritage.
4. To maintain and improve the quality of California's environment.
5. To prepare and maintain a statewide recreational plan that includes an analysis of the continuing need for recreational areas and facilities, and a determination of the levels of public and private responsibility required to meet those needs.
6. To encourage all levels of government and private enterprise throughout the state to participate in the planning, development and operation of recreational facilities.
7. To meet the recreational demands of a highly accelerated, urban-centered population growth, through the acquisition, development, and operation of urban parks.

An ever-increasing population in California has resulted in accelerated urbanization which necessitates the establishment of park units and recreation areas accessible to the major population centers of the state. Technological advances have created a more affluent society with additional leisure time spent increasingly in pursuit of various forms of recreation. It is necessary to provide for the wise and constructive use of the state's natural resources for recreational uses and to preserve the state's cultural, historical, and natural heritage for future generations to enjoy.

I. MANAGEMENT OF THE STATE PARK SYSTEM

Program Objectives and Description

Management of the state park system is the joint responsibility of the Operations, Resource Management and Protection and Information Divisions. The prime goal of this program is to manage the state park system for the enjoyment and benefit of the anticipated 50,600,000 visitors in fiscal year 1976-77.

The State of California has invested more than \$330,000,000 over the years to acquire and develop the state park system, and this system must be effectively managed to insure both a significant recreational experience and a continued existence for future generations.

Authority

Division 5, Chapter 1, Article 1 of the Public Resources Code.

Program Elements

a. Operation	1,600.2	1,768.7	1,876.3	\$32,448,404	\$40,160,421	\$42,709,644
b. Resource protection	17.6	27	23	372,312	536,653	534,527
c. Public information	12	14	14.8	474,420	535,144	562,356

a. Operation

The state park system includes more than 926,000 acres, 250 parks and reserves, 6,800 picnic units and 13,400 campsites. The purpose of the operations element is to maintain these facilities for public use through the administration of concession agreements and permits; the analysis, correction, enhancement and assistance associated with visitor safety and enforcement; the performance of necessary facilities housekeeping; and the regular maintenance of facilities and equipment. As a direct result of the acquisition of extensive acreage and ocean frontage, development of new areas, and expansion of existing areas, the 1976-77 fiscal year budget for the operations element proposes the addition of 173.1 man-years and related operational expenses at a cost of \$2,736,500. In addition \$256,000 is allocated from the Collier Park Preservation Fund for water replenishment at Lake Elsinore State Recreation Area. Minor Capital Outlay of \$1,296,850 is being funded from the Collier Park Preservation Fund. Beginning in 1976, campsite and day-use fees will be increased by approximately 50 percent to help offset increased operating costs in the State Park System. It is expected that this fee increase will result in an additional \$3.5 million in General Fund Revenue.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	1,600.2	1,768.7	1,876.3	\$32,448,404	\$40,160,421	\$42,709,644

b. Resource Protection

This element provides protection for the natural and historic resources of the state park system by performing field reconnaissance, detailed studies and consultations related to the identification and evaluation of archeological resources; analyzing and formulating management and protection programs for vegetative, wildlife and scenic resources; and maintaining a natural hazard reduction program. Substantial acquisitions which require environmental protection and the rapid deterioration of existing cultural resources necessitate the addition of 12.0 man-years at a cost of \$194,004.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	17.6	27	23	\$372,312	\$536,653	\$534,527

DEPARTMENT OF PARKS AND RECREATION—Continued

c. Public Information

This element includes all efforts necessary to direct the interpretation and conservation education program of the department to enhance visitor understanding, appreciation and enjoyment of the values within the state park system.

The program also encompasses the production of park publications, brochures and folders as well as maintenance of contacts with the various news media. The addition of 0.8 man-years at a cost of \$9,012 will relieve the backlog of graphic services created by the report demand associated with the 1974 State Beach, Park, Recreational and Historical Facilities Fund.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	12	14	14.8	\$474,420	\$535,144	\$562,356

II. DEVELOPMENT OF THE STATE PARK SYSTEM

Program Objectives and Description

Development of the state park system is the joint responsibility of the Design and Construction Division, Concessions Division, Statewide Studies Section of Grants and Statewide Studies Division, and the Exhibit Preparation Section of Operations Division.

The Department of Parks and Recreation, among all the agencies of state government, plays a predominant role in providing leisure satisfaction for the populace. This service is one of seven categories of services provided by the State as identified by the California Council on Intergovernmental Relations.

The substantial increases in per capita income, mobility, urbanization and free time have contributed to a growth in the demand for recreational facilities. It is the state's responsibility to meet this demand through an orderly, balanced program of acquisition and development which is fully coordinated with private and other governmental agencies.

Authority

Division 5, Chapter 1, Article 1 of the Public Resources Code.

a. Acquisition

This element involves the preparation of budget requests, negotiation, condemnation and liaison necessary to acquire lands for the state park system. It consists of the administration of the department's acquisition program including funded acquisition projects, gifts, exchanges, transfers and leases.

Continuous liaison is maintained with the Property Acquisition Division of the Department of General Services as well as various state and federal agencies to insure a well coordinated acquisition program. Increasing numbers of Environmental Impact Reports associated with the 1974 bond acquisition program have necessitated the budgeting of 1.0 man-year at a cost of \$18,642 and a need for developmental inputs into the acquisition program require the addition of 2.0 man-years costing \$40,331.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	5.3	6	9	\$169,729	\$182,572	\$244,294

b. Design and Construction

This element includes all efforts culminating in completed recreational facilities. Such efforts include refining plans as required to support reliable cost estimating for budget purposes, budget preparation for approved projects, production of area development plans for control of design in working drawing development, production of working drawings and specifications, coordinating project bid and contracting program, construction inspection and necessary liaison with state, federal and private agencies.

This element also provides the necessary expertise and technical assistance required for effective operation and maintenance of the state park system. A net increase of 8.0 man-years at a cost of \$269,309 has been budgeted for this element to provide essential planning, review and project evaluation associated with expansions in the Park and Recreation Revolving Account, Collier Park Preservation Fund, 1974 Bond Fund and Trails and Hostels development programs.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	105.5	112.5	117	\$2,518,856	\$3,053,542	\$3,292,283

DEPARTMENT OF PARKS AND RECREATION—Continued

c. Interpretive Development

This element includes all effort to conduct research necessary for the effective interpretation of the natural, historical and recreational resources; design and develop exhibits, museums, programs, tours, audiovisual presentations and publications; administer the department's audiovisual and photographic activities, artifact accessioning and cataloging system and the Historical Landmarks Program; and maintain liaison with various private and public agencies.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	24.1	27.5	22	\$509,591	\$534,620	\$536,734

d. Concessions Development

This element includes all efforts necessary to the completion of concessions development. This includes a preliminary study involving an evaluation of concessions proposals, need and site review; a feasibility study including determination of design and operation concepts and potential costs; a prospectus involving preparation of specifications, advertising and bidding; a contract after bid evaluation, negotiation and award; and facility construction including preparation of working drawings and construction liaison.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	4	6.5	6	\$161,436	\$168,242	\$165,534

III. ASSISTANCE TO PUBLIC AND PRIVATE RECREATIONAL AGENCIES

Program Objectives and Description

Assistance to public and private recreational agencies is the sole responsibility of the Grants and Statewide Studies Division with technical assistance from the Design and Construction Division. The main objectives of this program are meeting statewide recreational deficiencies by qualifying the State of California as a recipient of grants from the National Historical Preservation Act and the Federal Land and Water Conservation Fund, and administering grants to local governmental agencies from these two funds as well as the 1964 and 1974 State Beach, Park, Recreational and Historical Facilities Bond Funds.

The cost of providing additional recreational facilities often exceeds the financial capability of local governmental agencies, and the federally sponsored Land and Water Conservation Fund and National Historical Preservation Act along with the 1974 State Beach, Park, Recreational and Historical Facilities Bond Fund help alleviate this deficit. *This budget proposes the establishment of an additional program of urban open space and recreation local grants as discussed below.*

Authority

State Beach, Park, Recreational and Historical Facilities Bond Act of 1974.

Land and Water Conservation Fund Act of 1965 (Public Law 88-578).

National Historical Preservation Act of 1966 (Public Law 89-665).

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

b. Grants to local agencies.....	—	—	—	16,937,383	51,805,163	13,695,668
c. California urban open space and recreation local grants program	—	—	—	—	—	25,000,000

a. Grants Administration

This element includes those efforts needed in administering the requirements of federal and state grant programs which provide financial assistance to local agencies for recreational development, developing and coordinating the means by which individuals, organizations and federal agencies can contribute money and gifts to enhance the state park system, and providing planning and technical-informational services to local governmental agencies, non-governmental entities and individuals as needed to maximize their involvement in helping to meet public recreational needs.

This element also assists the State Park and Recreation Commission in carrying out the Public Resources Code functions relating to local government parks and recreation. *The rapid expansion of the 1974 Bond Local Assistance Program necessitates the addition of 3.0 man-years at a cost of \$50,194 to provide essential grant application, plans and specification review and associated administration.*

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	13.3	12.1	15.1	\$370,445	\$364,370	\$406,738

b. Grants to Local Agencies

This element consists of the estimated grant allocations to be administered by the Department of Parks and Recreation to local recreational agencies throughout California.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	—	—	—	\$16,937,383	\$51,805,163	\$13,695,668

DEPARTMENT OF PARKS AND RECREATION—Continued

c. California Urban Open Space and Recreation Local Grants Program

This budget proposes the establishment of a new program to assist cities, counties, and other local jurisdictions in the acquisition and development of parks and other public recreation areas in or near the urban areas of California. This new program is designed to meet the demand for more outdoor recreation opportunities in the more populated areas of our state where over 90 percent of the people reside and where a 30 percent deficiency in open space and recreation areas exist.

Funds to be allocated under this program will be in addition to those funds apportioned to counties under the State Beach, Park, Recreational and Historical Facilities Fund of 1974. A total allocation of up to \$75,000,000 is proposed to be funded over the next three or more years. For the 1976-77 fiscal year a \$25,000,000 appropriation from the General Fund is proposed. Included in the annual program cost is funding for grant program administration of approximately \$175,000. In addition, some amount may have to be allocated for statewide planning.

Legislation is to be introduced to define the specific criteria and guidelines to be used by the Department of Parks and Recreation in granting these funds. It is planned that legislation will require that local government provide minimum matching amounts for all acquisition and development projects, and require them to assume operational responsibility for the projects. The state grants are intended to supplement and not supplant local expenditures for park and recreation needs.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	-	-	-	-	-	\$25,000,000

IV. ADMINISTRATION

Program Objectives and Description

Administration is the joint responsibility of the Director, his staff, and the Administrative Services Division and provides the necessary leadership, regulation and policy determination to insure meeting the department's objectives.

The program also provides the necessary administrative services for the proper functioning of all departmental programs.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
a. Executive	18.3	16.5	17	\$399,990	\$483,051	\$563,670
b. Audit	3.8	5	5	85,810	107,762	109,214
c. Budget and program control	15	15	15	318,412	337,178	354,037
d. Management analysis	5	5	5	118,379	126,614	126,672

Federal funds				31,431	14,629	14,629
Reimbursements				718,317	690,093	635,867

a. Executive

The Director and the executive staff with recommendations and guidance from the State Park and Recreation Commission, the California Recreational Trails Committee, the California Historical Landmarks Advisory Committee and the Advisory Board on Underwater Parks and Reserves are responsible for adopting departmental policy, establishing departmental organization, directing the operating divisions, reviewing and drafting legislation and representing the department in all operational functions.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	18.3	16.5	17	\$399,990	\$483,051	\$563,670

b. Audit

This element performs fiscal, management and operational audits including reports and recommendations on all units of the state park system, concessioners operating in those units and all grant monies provided under the State Beach, Park, Recreational and Historical Facilities Bond Act and the Federal Land and Water Conservation Fund.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	3.8	5	5	\$85,810	\$107,762	\$109,214

c. Budget and Program Control

This element assists departmental management in planning and controlling the department's budget, evaluates budget requests and budget adjustment proposals, and develops budgeting standards and program procedures.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	15	15	15	\$318,412	\$337,178	\$354,037

d. Management Analysis

Assisting the department in identifying major management problems and in developing organizational policies and procedures are the major functions of this element. In addition, it is responsible for maintaining the department's instruction system.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	5	5	5	\$118,379	\$126,614	126,672

DEPARTMENT OF PARKS AND RECREATION—Continued

e. Accounting and Business Management

This element provides centralized accounting, data processing, purchasing, general business services, central files, mail and stockroom services for the department in addition to maintaining a reservation office for Hearst San Simeon State Historical Monument tours and a business management unit in each district headquarters.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	88.4	101.4	92.1	\$2,577,972	\$3,344,009	\$3,137,568

f. Personnel

This element is responsible for developing, installing and evaluating personal management programs designed to assure proper classification, recruiting, development and retention of well-qualified employees. In addition, it maintains employee position and payroll records and administers the transaction processing system.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	17.5	17	17	\$241,502	\$347,644	\$365,026

g. Training

Major functions provided by this element include assisting departmental management in identifying training needs; developing, maintaining and evaluating training programs to meet those needs and operating a centralized training facility for the department's field personnel encompassing the areas of administration, interpretation, law enforcement and public and employee safety.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	5	5	5	\$270,914	\$332,633	\$349,265

h. Special Services

This element is responsible for coordinating all requests for data processing services and the design and installation of new processing systems. In addition, it performs the real property management of lands within the state park system.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	16.3	17	17	\$395,100	\$408,936	\$448,025

i. Affirmative Action

This element administers the affirmative action program within the Department. Specific areas to be monitored include recruitment, retention and promotion of ethnic minorities, and the development of upward mobility programs for women.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	4.2	4	4	\$102,793	\$110,732	\$122,808

Department of Parks and Recreation DIVISION OF EXPOSITION AND STATE FAIR

The objective of the Division of Exposition and State Fair, Department of Parks and Recreation, is to provide a medium for the education, commercial interaction, personal interaction, and recreation of the citizens of California by providing a forum for the competitive and noncompetitive exhibition of the State's industrial and agricultural accomplishments.

PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
Division of Exposition and State Fair	\$4,812,976	\$5,506,169	\$5,513,873

CALIFORNIA EXPOSITION AND STATE FAIR

Program Objectives and Description

Fairs traditionally provide an arena for the presentation of new ideas and information for the education of the visitor, as well as providing a market place for the demonstration, advertisement, and sale of goods and services. Sponsors from the governmental and commercial sectors can present promotional information to the public. Fairs stimulate achievement through awards and prizes for excellence in the fields of agriculture and industry, and create a festive atmosphere with events and attractions for the amusement and recreation of its participants.

The Division, through the operation of the California Exposition and State Fair, provides a showcase for the agricultural, recreational and industrial resources of California for both its residents and non-residents. It provides a forum for State Government to present its achievements to its constituency, and establishes programs of public participation to encourage the interchange of information regarding agriculture, industry and government. The State Fair also provides conventional youth programs for Scouting, 4-H and FFA, and provides a recreational outlet for the citizens of California.

An additional \$200,000 has been provided to upgrade the Special Events program, and \$50,000 has been provided to correct several health and safety deficiencies on the Exposition grounds. Both increases are funded from appropriated revenues to be derived from increased admission fees.

Authority

Food and Agricultural Code, Part 2 of Division 3.

RECLAMATION BOARD

The Reclamation Board, since 1911, has participated with the Corps of Engineers in the construction of major flood control project works in the central valley. The board's primary activity is the acquisition of right of way for federally constructed levee and channel projects. The board also offers the corps any other federally acquired assurances (maintenance and operation, freedom from liability) which are subsequently passed on to a local entity.

In addition to participation in the federal program, the board is also responsible for the control of encroachments on completed projects or in the area of an adopted plan, for the supervision of local maintenance and operation of completed project works, and for the management of acquired property.

Program Objectives and Description

The objective of the Reclamation Board's program is to secure and maintain, through cooperation with federal, state and local agencies, an adequate level of flood protection for the population and lands within the Sacramento and San Joaquin River Basins, at a minimum overall cost to the State.

At present, the flood control program functions through two agencies. Policy and overall program control is established by the Reclamation Board. Actual program work is accomplished under program guidance from the Reclamation Board by the Department of Water Resources, utilizing funds budgeted directly to them. Narrative description of the work involved is contained within the budget of the Department of Water Resources.

For the 1976-77 budget year, it is proposed to transfer the Reclamation Board support staff and functions to the Department of Water Resources. This will provide for the management of the entire program within one department at an estimated savings of \$126,966 during the 1976-77 fiscal year.

SAN FRANCISCO BAY CONSERVATION AND DEVELOPMENT COMMISSION

Program Objectives

The San Francisco Bay Conservation and Development Commission, headquartered at San Francisco, was created by the Legislature in 1965 with objectives to provide a regional approach to protecting the public interest in San Francisco Bay; to insure its beneficial use as the most valuable single natural resource of the entire region; and to provide a democratic and politically responsive process by which the bay and its shoreline can be analyzed, planned, and regulated as a single unit.

I. BAY CONSERVATION AND DEVELOPMENT

The San Francisco Bay Conservation and Development Commission is charged with: maintaining the bay plan in an up-to-date manner based on current information and projections in order to serve as a guide for the conservation of San Francisco Bay and the development of its shoreline; carrying out provisions of law by issuing or denying permits for all filling or dredging in the bay; for change in use of salt ponds or other "managed wetlands" adjacent to the bay; and for substantial change in use of property within 100 feet of the bay.

Comprehensive regional planning studies are conducted by staff and consultants to provide the basic information and planning data for granting or denying permits and to strengthen or revise specific parts of the San Francisco Bay Plan. This requires continuing and extensive cooperation and coordination with federal, state, regional, local, and private agencies.

The McAteer-Petris Act directs the commission to continually review and revise the San Francisco Bay Plan to keep it current in light of new knowledge, new development or changes in policy. In fiscal year 1973-74, the commission conducted a bay plan evaluation program assisted by a grant from the U.S. Department of Housing and Urban Development. The evaluation determined that there was a need for significant revision of the bay plan requiring extensive technical planning studies. In fiscal year 1974-75, the commission was to begin this revision program with completion scheduled for the end of 1975-76 using federal funding from the National Oceanographic and Atmospheric Administration (NOAA). Because funds were not forthcoming it has been necessary to extend the review schedule and proceed using available resources. It is anticipated that NOAA funds will be available in 1976-77 and the following augmentations will be required:

1. Continue two assistant planner positions (\$44,489) and reprint the San Francisco Bay Plan (\$10,880). The planners will also update special area plans as necessary.

2. In addition, \$29,191 is proposed to fund an enforcement investigation effort for the commission. Specifically, an enforcement investigator which was funded in the 1975-76 fiscal year with federal funds, will be funded in the budget year from the General Fund as well as additional clerical help to give the commission an enforcement capability.

3. Finally, Chapter 1204, Statutes of 1975, authorized per diem of \$50 per meeting for all commissioners other than state and federal employees.

II. ADMINISTRATION

Commission activities require managerial, fiscal, and supervisory functions to provide general administrative services to the commission and staff and to carry out commission policies and directives. Specific activities include interpretation, dissemination, and implementation of commission policies and directives, budgeting, procurement and expenditures control, business services, administrative support of commission meetings, clerical support and public information activities.

DEPARTMENT OF WATER RESOURCES

The Department of Water Resources has three primary objectives: these are to (1) provide the necessary framework for the effective management of the state's water resources, (2) assure public safety and prevent property damage from water related causes, and (3) furnish technical services as the need arises.

The basic goal is to ensure that California's needs for water supplies, water-related recreation, fish and wildlife enhancement, prevention of damage and loss of life from floods and dam failures, and water-related environmental enhancement, are effectively and economically fulfilled, and to ensure that the manner in which these needs are fulfilled is consistent with public desires and attitudes concerning environmental and social considerations.

California's water resources management framework is provided through two major programs: (a) continuing formulation of the California Water Plan, and (b) implementation of the State Water Resources Development Systems.

Public safety and protection from property damages by floods or dam failures are achieved through programs of (a) flood control operations and subventions, and (b) supervision of safety of dams.

Specialized professional services are performed under contract to local, state and federal agencies, and as appropriate to other state's who have come to look to California as a leader in the water resources field.

Detailed program descriptions of all activities discussed in this budget are contained in the Program, Element and Component Statements. These statements are published in a separate volume and are available upon request from the Department of Water Resources.

I. CONTINUING FORMULATION OF THE CALIFORNIA WATER PLAN

Program Objectives and Description

The basic objective of this program is to prepare and maintain on a current basis a coordinated statewide framework for the economic and environmentally sound management of California's water resources by local, state and federal agencies.

Demands on California's water resources to satisfy peoples needs for goods and services, security and protection, and enhancement of the quality of life continue to enlarge. Water requirements necessary to sustain the State's rich agricultural production and meet its domestic and industrial needs are increasing. Augmentation of instream flows is needed to some locations especially during the dry summer months, to meet growing demands for recreation, aesthetic, fisheries, water quality, salinity repulsion, and navigation. The traditional surface and ground water supplies are adequate for the foreseeable needs of the State. However, public responsibility for the protection of the environment requires that alternatives to these sources be evaluated and used where possible. Therefore more effective use of existing water supplies involving conservation and revised water management practices, new sources such as waste water reclamation and other nonstructural measures such as pricing policies, require study and development as a means of supplementing basic water supplies.

In the last few years the Department has redirected its activities in this program for the studying of alternative sources of supplemental water supply, enhancement of natural environmental resources through water management, development of criteria for assessing the impact of water projects on the environment, and the improvement of the quality of water of the state. These new emphasis are continuing in the 1975-76 and 1976-77 program with an additional major change and redirection in the development over the next two years of a revision of the Water Management element of the California Water Plan which is envisioned to be a specific design or road map for the future.

a. Water Management Planning

The California Water Plan serves as a general guide for all water management activities throughout the state. With completion of the initial water quality basin plans by the SWRCB the water quality objectives can be more fully incorporated into the water management concepts of the California Water Plan. Plans for water development or management proposed by other government agencies are reviewed and the state's position on interstate and federal-state water resources planning are developed within the context of the California Water Plan.

Beginning in 1975-76 a fresh look will be taken at significant water issues facing California and suggesting specific ways of resolving them in line with today's social and environmental goals. Traditional methods of examining water demands will be critically reexamined to determine realistic needs, achievable through both reduced water use and more effective use, including the influence of water pricing policies on demands. Studies also will give major attention to instream water requirements for fish, wildlife, recreation esthetics and preservation of the riparian habitat. Other major subjects studied or reviewed will be a redefinition of existing water supplies through assessment of dry year criteria; service area allocations and water supplies; improved water management and conservation; water exchanges among systems; reuse of waste water; effects of water quality regulations; energy impacts; surface water development; drainage; and conjunctive use of surface and ground water supplies.

In addition studies, primarily of local concern but which contribute to the California Water Plan, are conducted, further development of standards for and the review of environmental impact studies and reports are conducted, studies and activities, including public education, related to the conservation and efficiency use of water are being expanded, and studies of specific water quality problems are coordinated with the State Water Resources Control Board. The feasibility of utilizing waste water for cooling power plants is also to be evaluated in cooperation with the Electrical Power Research Institute and several electrical utilities.

Output

The primary scheduled output is Bulletin No. 4, a water action plan for the next 25 years to meet changing water needs.

Secondary outputs are reports which will detail recommended plans and alternatives for managing California's water resources.

b. New Sources of Water

About 37 million acre-feet of water are provided annually to meet the state's overall need. Although this is only about one-third of the average annual runoff, additional development of surface water resources to meet future demands will be difficult because of environmental responsibilities. Therefore, new or supplemental supplies of fresh water from nontraditional sources will be explored. Technical information, cost data for, and the environmental impact of these supply sources are needed to plan for the day they may be required.

Under this program element the magnitude, developmental process, and attendant costs of nontraditional sources of water are investigated and reported. These studies include a broad range of activities concerned with saline water conversion, waste water reclamation, and weather modification.

Beginning in 1975-76 the Waste Water Reclamation Activities will undergo a substantial redirection by reducing the waste water inventory and the area overview studies of waste water reclamation projects and increasing work efforts with local districts to develop specific waste water reclamation projects to the point where the local districts can apply to the State Water Resources Control Board for Step 1 Grant dollars. The activity will be somewhat reduced in 1976-77 as the local studies are brought to the point of application for Clean Water Grants.

Output

Reports are to be prepared for the studies to be conducted on saline water conversion, weather modification, and waste water reclamation.

DEPARTMENT OF WATER RESOURCES—Continued

c. Data Collection, Evaluation, and Use

The source of all water supplies, and precipitation, varies over a considerable range both in time and location. Therefore, projections and estimates of future water supplies from streams and ground must be statistically developed. The reliability of these projections is dependent upon the number of data sources, the distribution of their locations, and the length of their record.

Under this program element time-related data on the quantity and quality of surface and ground water resources are collected, analyzed, and distributed. A limited activity for the collection and dissemination of climatological data is also maintained. A machine computer retrieval file of historic data has been developed, and is being refined for access to more detailed information covering the full period of record at specific locations. The State Water Resources Control Board, the Department of Health, the Department of Transportation, and Department of Fish and Game are cooperating with the Department of Water Resources for data input, storage, and the computer retrieval system.

Cooperative snow surveys are conducted which provide timely and reliable forecasts of spring snowmelt runoff and general water conditions for project operators and water users throughout the state.

Output

A one-year summary of basic data on streamflow, ground water levels, precipitation, and water quality parameters, is published annually in the Bulletin No. 130 series. Data on snowpack conditions are published from February through May each year in the Bulletin No. 120 series. A summary edition of Bulletin No. 120 is published annually to present the status and trends of the water resources inventory of the state.

II. IMPLEMENTATION OF THE STATE WATER RESOURCES DEVELOPMENT SYSTEM

Program Objectives and Description

This program has three objectives. The first is to provide physical facilities to furnish water supplies for people as needed and not otherwise provided.

The second objective is to carry out the operation, maintenance and management of these facilities in an efficient, economic and timely manner to meet the annual and long-term commitments of the state to all its water and power contractors.

The third objective is to further the development of essential and economically justified local projects to help fulfill the above needs through financial assistance to local public agencies for construction of water projects in which there is statewide interest.

Planning for conservation and development of water resources is a responsibility of many levels of government. Where local agencies cannot provide for the water development demands, they should be met by a complementary program of state and federal facilities. The state facilities would be a part of the state water resources development system.

The State Water Project is made up of physical facilities to meet a portion of the increasing water needs in state service areas from Plumas County in the north to the Metropolitan Water District of Southern California, which extends to the Mexican border, in the south. By 1973, this program provided most features of the State Water Project in operational readiness. Other features already approved will be planned, designed and constructed, as needed, during the ensuing years.

DEPARTMENT OF WATER RESOURCES—Continued

a. Planning and Investigations for the State Water Resources Development System

Although the construction of the initial stage of the State Water Project is complete, much planning and management work remains to be done to provide for the protection of: (1) The physical, legal, and fiscal integrity of the project; (2) The environment of regions adjacent to or served by project facilities, or of regions which may in the future be a source of additional water supply; (3) The quality of the water to be supplied to the Project, and to be supplied from the Delta to non-Project users in and adjacent to the Delta; and (4) Land resources in agricultural areas served by the project from salt build-up, and in areas adjacent to project canals from possible seepage damage.

The growing public concern for protection of fish and wildlife and for recreation emphasizes the necessity for the planning and development of project lands and waterways for these purposes where possible.

Under this Program Element comprehensive evaluation of all phases of project development is conducted including geologic studies, cost estimates, economic analyses, flood control studies, fish and wildlife and recreation resources development studies, water quality studies, environmental studies, and determination of land acquisition requirements.

Detailed planning studies are conducted to select and size the remaining project features to satisfy both local and export water requirements while protecting and enhancing the environment to the greatest extent possible. These studies include consideration of fish and wildlife habitat, reservoir sedimentation and turbidity, landslide hazards, and water quality.

A new program activity is initiated in 1975-76 to study possible alternatives to the Peripheral Canal and to recommend an action plan, including timing and staging of such project facilities as may be recommended.

Water rights considerations in connection with the State Water Project are investigated, and project effects on present physical and environmental conditions are monitored and evaluated.

Specific plans for recreation development at State Water Project facilities are prepared to ensure that water project recreation resources including fish and wildlife and water project public facilities are adequately developed.

A cooperative study involving the California Departments of Water Resources and Fish and Game, U.S. Bureau of Reclamation, and the U.S. Bureau of Sports Fishery and Wildlife is underway to develop proper design and joint operating criteria for the State Water Project and Central Valley Project for the protection and enhancement of the Bay-Delta fish and wildlife resources. This activity includes striped bass ecological studies, general water quality studies, and studies concerned with evaluation and development of fish screening facilities.

A power planning study is being conducted to, first, identify the generating resources currently available on which to develop plans for meeting all of the State Water Project's long-range electrical energy needs and, secondly, to evaluate alternative future types of generation and the associated cooling water requirements and sources.

A program to provide guidance to local agencies in the San Joaquin Valley leading to the development of an overall drainage system for the Valley is being initiated. The best combination of physical solutions will be determined and solutions to associated legal and financial problems will be recommended. The quality of waste discharges is monitored as a basis for predicting the quality of water to be disposed of by future facilities. Both of these activities are part of the Cooperative Interagency Drainage Water Management program being conducted by the Department of Water Resources, State Water Resources Control Board and the U.S. Bureau of Reclamation.

Output

Output from this element consists of reports on proposed features of the State Water Facilities.

DEPARTMENT OF WATER RESOURCES—Continued

b. Design, Right-of-Way, and Construction of the State Water Resources Development System

Design, right-of-way, and construction activities will continue until the construction of the State Water Facilities have been completed. The magnitude of the activities, however, has decreased since the peak workload occurred in 1967.

Minimum preconstruction engineering of the Delta Facilities is proceeding while alternatives are being evaluated.

Design is underway on the additional units at Delta Pumping Plant and on the Delta Fish Protective Facility, Phase II. Delta Pumping Plant Units Nos. 8, 9, 10, and 11 are scheduled for operation in 1981, to complete the North San Joaquin Division.

Phase II construction on the Mojave Division, which includes additional units at Pearblossom Pumping Plant, is underway and scheduled for completion in 1976. This will bring the Mojave Division up to capacity. Design of Cottonwood Powerplant will start in 1975-76 and construction will be completed in 1981.

Phase II construction on the Devil Canyon Powerplant, which will bring the Santa Ana Division up to capacity, is underway and scheduled for completion in 1976. Work on the Pyramid Power Facilities, which will replace the temporary Gorman Creek Improvement, brings the West Branch up to capacity, and provides additional power, is underway and scheduled for completion in 1981.

Output

Initial water deliveries were made in the Feather River area in 1968, in the North Bay area in 1968, in the South Bay area in 1962, and in the San Joaquin area in 1968. Water deliveries in Southern California began in 1972. The flood control benefits of Oroville Dam have been substantial since the first flood operation action in December 1964. The recreation facilities provided throughout the project have received use measured in the millions of visitor-days. Electrical energy is now being generated at all project power plants, except Pyramid, Cottonwood, and San Luis Obispo.

c. Operation and Maintenance of the State Water Resources Development System

Operations and Maintenance of completed facilities of the State Water Project is provided through two activity groupings: operations development and facilities operations and maintenance.

Operations development activities are concerned with the continued development of an operations plan, integrated with federal and other agencies which will meet the future contractual water commitments and power needs of the State Water Project.

Facilities operations and maintenance activities are the actual operations of the State Water Project facilities and maintenance of these facilities in accordance with prescribed standards. Water and power is scheduled and dispatched to meet all project commitments. Recreation, flood control, and fish and wildlife mitigation facilities are operated. Routine and extraordinary maintenance is performed to insure capability to deliver water and produce power. Also included in facilities operations and maintenance are activities such as specialized testing and maintenance; specialized technical inspection; surveillance of dams and structures through system instrumentation; coordination of maintenance and repair work; electrical relay testing; corrosion control; water and power operating techniques; training, safety, and management of project real property.

d. State Financial Assistance for Local Projects

This program element provides loans for feasibility studies, reservoir site acquisition, and the construction costs of local projects. Grants are provided for certain recreation, fish and wildlife enhancement, and initial water supply and sanitary facilities cost. The state may also participate with an applicant as a partner under certain circumstances.

Projects approved for assistance must be found by the department to be in substantial conformance with the California Water Plan, be engineeringly feasible, economically justified, and, if a loan is proposed, there must be reasonable assurance that the public agency can repay it. Loans may be made only for that portion of the project cost which is beyond the reasonable ability of the public agency to obtain from other sources. The department must impose such terms and conditions as are necessary to protect the state's investment and carry out the objectives of the program. Also included in this element is the program component for loans to local agencies for water distribution systems as authorized by Chapter 1610, Statutes of 1967.

Output

A report of findings is made to the Legislature on each local agency's formal application, making findings on engineering, economic, and financial analyses and recommendations on approval of loans or grants for proposed projects. Following contractual arrangements with eligible applicants, funds are disbursed and projects are inspected for conformance with contract terms.

California Water Resources Development Bond Fund				4,834,911	9,338,900	7,654,400

e. Financial and Contract Management of the State Water Resources Development System

The State Water Resources Development System is financed from a variety of sources: general obligation bonds authorized by the Burns-Porter Act, revenue bonds backed by the production and sale of power, federal funds appropriated for flood control, state appropriated funds for recreation and fish and wildlife enhancement, and miscellaneous funds earned from investments and sale of property. The public agencies contracting for project water are required to repay with interest the bonds used to construct the project and to pay the cost of operating and maintaining the water supply features. The utilities contracting for project power make payments to retire the Oroville revenue bonds sold, and pay the costs of operation and maintenance of the project power facilities. The public agencies that contracted for the power made available from the Devil Canyon Facilities and the Castaic Facilities make payments to retire the Devil Canyon-Castaic revenue bonds and to pay the cost of operation and maintenance of the facilities. The people, through governmental appropriations, repay the costs of constructing, operating and maintaining recreation and fish and wildlife enhancement facilities.

DEPARTMENT OF WATER RESOURCES—Continued

Projections must be made of future financial conditions. The water contractors must be notified of future costs for them to adjust taxing and water toll rates. Power contracts for both the generation and consumption of power must be negotiated, reviewed and updated as necessary to provide for the most economical sources of power consumed, and to provide for the optimum use of the Project's power resources. Water contractors and utilities must be billed for water delivered and power generated. Bond counsel, financial institutions and other governmental agencies must be retained to market and administer bonds in the department's behalf. Finally, the principal and interest of the bonds outstanding must be repaid. The above activities devoted to maintaining the financial integrity of the State Water Resources Development System are contained within the program element.

Output

The output of this program component is the maintenance of the financial integrity of the State Water Resources Development System. Specific qualitative outputs are accurate billing records, repayment of bond principal and interest on time, and power and water contractual agreements negotiated to best meet the mutual needs of the department, water contractors, utilities and the people of California.

III. PUBLIC SAFETY AND PREVENTION OF DAMAGE

Program Objectives and Description

The objective of this program is to protect life and property from damage or destruction by floods or dam failures. Experience demonstrates that the people of California, their property, and their resources, are vulnerable to the destructive effects of floods. To prevent or minimize such damage, protection is provided by a comprehensive approach. In cooperation with the National Weather Service, weather and river forecasts are issued. From these, the department's Flood Control Center issues flood warnings to alert the public when flooding is probable, and flood control facilities are operated to minimize damage. Levees and flood channels are maintained and supervision and coordination for flood fighting is provided. Technical information is provided to local agencies to assist them in the regulation of development on floodplains. Such regulations, if adopted, serve to meet one of the requirements for the national flood insurance program. Lands easements, and rights-of-way are provided for federal flood control projects. The safety of the public is protected by the review of proposed plans for the construction of new dams and inspection of all nonfederal dams for proper construction and maintenance.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

a. Flood Control

Within the activities of this program element local agencies are assisted in developing regulations for management of floodplain areas and in conducting flood hazard investigations; storm and high water conditions are continuously monitored during the flood season; a Flood Center is activated during potentially dangerous periods to provide a focal point for coordination of flood emergency operations, collection and dissemination of flood data; the Sacramento River Flood Control Project and flood control facilities are operated and maintained, and flood control works in the Central Valley are inspected periodically; services are provided to the Reclamation Board to assist in their function of cooperating with the Corps of Engineers and local agencies in constructing and maintaining flood protection projects in the Central Valley; assistance is provided to local agencies in estimating flood damages and repairs required; and the accomplishments of past flood control measures are evaluated and alternative future policies and programs for flood damage prevention are identified. In 1976-77 a study of the need for expanding flood forecasting activities into parts of the state, such as Southern California where it does not now exist, will be made.

Beginning in the 1976-77 budget year, the support functions of the Reclamation Board have been transferred to this budget and are reflected under Reclamation Board Activities at a savings to the General Fund of \$126,966.

DEPARTMENT OF WATER RESOURCES—Continued

Output

Plans and recommendations are produced for solution of flood problems and safe development of floodplains; information regarding floodflows is collected and disseminated; flood forecasts are prepared and furnished to interested agencies; technical direction and assistance is provided during flood emergencies; and the Central Valley is afforded a high degree of flood protection by the maintenance and operation of the Sacramento River Flood Control Project.

Direct payments				409,894	—	—

b. Flood Control Subventions

The primary purpose of this element is to reimburse local agencies for the costs of rights-of-way and relocations. This is accomplished through the review and processing of claims submitted by the local agencies. These claims are tested against the provisions of the authorizing legislation and guidelines published by the department and the amounts eligible from the state are determined. Approximately 100 claims in connection with about 45 active projects will be processed and paid each fiscal year.

Secondary activities include the review of proposed federal flood control projects to determine potential state costs, analysis of local agency requests for inclusion of project funds in the state budget, continuous review and revision (if necessary) of program policies and procedures, and preparation of final reports on completed projects.

This program element will also provide partial reimbursement for the additional cost of maintaining controlled vegetation on levees.

Output

1. Engineering reports and reallocation orders for flood control claims, and reports on reimbursement for rights-of-way and relocation costs.
2. Determination of future state costs in connection with proposed projects and determination of adequacy of flood plain regulations.

Program Requirement

^g Shown under Flood Control element in 1974-75.

c. Supervision of Safety of Dams

The supervision of safety of dams provides for independent analysis and evaluation of proposed designs, plans, and specifications, investigation of dam sites both structurally and geologically, supervision during construction of new dams, and of the enlargement, repair, and alteration of operational dams and reservoirs, surveillance, inspection and evaluation of operational dams and reservoirs, determination of need for the installation of instrumentation, and the investigation and analysis of dams constructed illegally, together with the activity necessary to terminate these violations by removal, alteration or repair.

Activities include independent analysis and evaluation of about 60 applications for new construction, enlargement, alteration, and repair of dams, and supervision during the resulting construction. About 1,050 systematic examinations and evaluations of nearly 1,100 operational dams will be made; about 400 surveillance and instrumentation reports will be analyzed; and dams allegedly constructed in violation of the code will be investigated and the violations terminated. The structural reevaluation program will be continued; it will conclude reevaluation of hydraulic fill dams initiated because of the near failure of upper and lower San Fernando dams (both hydraulic fills) during the San Fernando earthquake of February 9, 1971, and continue reevaluation of other dams with potential earthquake-resistance problems.

DEPARTMENT OF WATER RESOURCES—Continued

Output

This program element provides important benefits to the people of California through the protection of life and property. These benefits result from the prevention of failures similar to those which occurred at St. Francis Dam and Baldwin Hills reservoir. A catastrophe similar to the St. Francis Dam disaster today would cause \$100 million in damage to property and immeasurable loss.

IV. SERVICES

Program Objectives and Description

The objectives of this program are to provide technical support to the department's activities and to make this expertise, as well as the specialized engineering experience of the department available to other agencies.

The department has developed a significant capability for providing specialized skills and experience in the field of water resources planning, development and management. Support activities involving laboratories, electronic data processing, mapping and surveying have also been developed over the years. Occasionally, this expertise is found helpful by certain other agencies in assisting them in their missions. The department's own operations must be supported by certain technical functions that can best be furnished on a centralized as-needed basis.

This program also provides the capital improvements, other than those associated with the State Water Project, necessary to allow the department to carry out its assigned functions.

a. Services to Other Agencies

1. The U.S. Geological Survey compiles topographic maps under a cooperative agreement, wherein the state and federal government each contributes half the cost. Areas to be mapped, scales of mapping, and priorities are mutually decided upon, with the department coordinating the needs of state agencies.

2. The department, as watermaster, measures streamflow and distributes it in accordance with decreed rights; checks and records ground water extractions in accordance with stipulated agreements; and conducts hydrologic studies of watermaster service areas. These are studies of water supply drainage, flood hazards, sewage disposal, water quality, water rights, engineering feasibility, and project cost estimates.

4. The department services as the Electronic Data Processing Center for the Resources Agency and provides these services to other departments and agencies as well as laboratory and graphic services on a reimbursable basis.

Output

1. About 50 topographic maps, covering 6,000 square miles and showing updated topographical and cultural features, are completed and published annually by the U.S. Geological Survey in cooperation with the department.

2. Water allocation is provided on about 50 streams in 22 service areas, of which four are ground water basins. This service involves a total of about 1,800 parties. These activities are reported in Bulletin Nos. 177, 178, and 179, which are published annually.

3. Reports are prepared on investigations and services conducted for other agencies as requested.

b. Technical Services

Technical services are provided by specialty units to all divisions, branches, and offices, for the programs of the department. These services are totally reimbursed by charges to the program, except for additional equipment related to data processing, mobile equipment and graphic services which is initially financed from reserve funds.

Output

The accomplishment of their program purposes by user programs within and outside the department in the most efficient and economical manner available.

c. State Building Program

Major capital outlay projects are formulated as required to support the department's general activities. Such projects may include new construction or substantial alterations, purchase of equipment related to the projects, and associated land costs.

Projects for 1975-76 and 1976-77 are a maintenance shop at the Sutter yard, a bridge across the Sutter Bypass and improvements to the flood control warning system.

V. MANAGEMENT AND ADMINISTRATION

Program Objectives and Description

The objective of this program is to provide sufficient managerial and administrative services to insure that the overall missions and goals of the department are accomplished.

Without the proper level of executive leadership and its staff support, the Department of Water Resources would not be able to function in an efficient and effective manner. The benefits to be derived from all of the various other programs carried out by the department as described elsewhere in this budget, would not be realized. Therefore, a program of management and administration has been developed as, and continues to be, an integral feature of the total program activity.

DEPARTMENT OF WATER RESOURCES—Continued

a. General Management

Most of the functions included in the department's executive and administrative headquarters organization comprise this program element. Included are the Director and his immediate staff, the legal staff, public information, program analysis, internal audits, budgeting and accounting, business and office services, personnel, training management analysis, and safety. This element's graphic services costs reflect only the anticipated expenses to be incurred by the other components in this element for graphic services rendered. The costs of general management are distributed to all of the department's directly funded programs through an indirect cost structure on the basis of direct labor costs.

Output

The accomplishment of the programs of the department are indicative of the effectiveness of the managerial supervision and administrative services that were provided.

Summary

The capital outlay schedule summarizes expenditures and projections for the implementation of the State Water Resources Development System Program, the Public Safety Program and the State Building Program. A general explanation of the state projects under the California Water Resources Development Program is presented in the support budget with a description of the significant units of each project as well as detailed expenditure information.

IMPLEMENTATION OF THE STATE WATER RESOURCES DEVELOPMENT SYSTEM PROGRAM

State Operations (For Detail, See Program Expenditure Section):

Water management planning	\$108,991	\$587,000	\$662,000
New sources of water	146,422	139,000	157,300
Planning and investigations	3,522,406	5,904,049	5,251,200
Design	4,414,924	5,204,600	5,870,600
Right-of-way acquisition and relocations	1,332,846	1,063,800	1,099,400
Construction supervision	6,100,727	3,438,500	2,626,900
Operation during construction	1,293,461	1,034,700	481,500
Operations and maintenance	23,806,656	25,474,000	26,321,400
State financial assistance for local projects (administration)	496,208	468,500	405,400
Financial and contract administration	2,273,072	2,410,900	2,683,600
Services to other agencies	-763,002	—	—
Technical services	41,885	—	—
Totals, State Operations	\$42,774,596	\$45,725,049	\$45,559,300
Direct Payments:			
Right-of-way acquisition and relocations	\$958,783	\$2,776,000	\$1,610,000
Construction	19,196,382	10,990,000	9,337,000
Operation during construction	397,684	300,500	300,000
Financial and contract administration	91,575,519	97,566,000	99,522,000
Power purchases	11,923,452	12,500,000	14,600,000
State financial assistance for local projects	4,338,703	8,870,400	7,249,000
Totals, Direct Payments	\$128,390,523	\$133,002,900	\$132,618,000
Totals, Implementation of the State Water Resources Development System	\$171,165,119	\$178,727,949	\$178,177,300

PUBLIC SAFETY AND PREVENTION OF DAMAGE

Flood Control:

Sacramento River and tributaries flood control project	\$84,667	\$189,504	\$72,000
Fairfield flood control project	500,000	1,900,000	1,360,000
Chester, North Fork Feather River flood control project	433,886	50,000	50,000
San Joaquin River and tributaries flood control project	200	57,282	18,000
Fresno River flood control project	-33,234	335,397	50,000
Chowchilla River flood control project	129,070	115,000	50,000
Sacramento River bank protection project	1,191,772	1,476,011	1,400,000
Mormon Slough flood control project	697	178,339	—
Cache Creek settling basin project	—	247	—
Totals, Public Safety and Prevention of Damage	\$2,307,058	\$4,301,780	\$3,000,000

STATE BUILDING PROGRAM

Cherokee canal restoration	\$272,312	\$4,722	—
Sutter Bypass bridges	17,149	104,851	—
Sutter maintenance building and improvements	21,557	88,443	\$105,700
Flood warning telemetry system	—	225,000	230,000
Totals, State Building Program	\$311,018	\$423,016	\$335,700

HEALTH AND WELFARE

OFFICE OF EDUCATIONAL LIAISON

The Office of Educational Liaison, within the Health and Welfare Agency, was established by the Child Development Act of 1972 (Chapter 670, Statutes of 1972), and was responsible for planning, development, and coordination with departments of state government concerned with child development services. This responsibility of the office was expanded through the 1973 Family Practice Act to include health manpower education.

Legislative authority for the office expires December 31, 1975. Training Family Practitioners Program functions were transferred to the Department of Health by the Budget Act of 1975.

In fulfilling its dual responsibilities for child care coordination and health manpower development, the Office of Educational Liaison has:

1. Coordinated completion and execution of necessary interagency agreements with the Department of Education, the Department of Health, the Department of Employment Development, and the Department of Benefit Payments, for the delivery of effective child development services.
2. Provided policy development and program support for child development services, including service coordination, consultation, technical assistance, legislative analysis, information dissemination, and procedure formulation. In particular, the contributions of the Legislative Analyst's Child Care Study and Preschool Study, the Department of Finance's Preschool Audit, the Department of Education's Pilot Child Care Study, and OEL's Task Force on Child Care Licensing.
3. Provided staff support to the Health Manpower Policy Commission and the Health and Welfare Agency in the review, development, implementation, supervision and evaluation of family physician and physician's assistant training programs. These programs are designed to prepare manpower to help meet the primary care health needs of California.

OFFICE ON AGING

The Office on Aging administers funds allocated to the federal Older Americans Act of 1965, as amended. It serves the aging population as a clearinghouse and center for information on aging; conducting public hearings on all matters relating to the well-being of the elderly; cooperating with federal, state and local bodies to promulgate effective programs for the elderly; administering the more than \$21 million in federal moneys allocated to California under the Older Americans Act; providing consultative services for development and implementation of Community Planning and Nutrition Programs; advocating for appropriate shares of new resources; stimulating effective use of existing resources and supporting all available services offered to the elderly at state and community levels.

Specific functions of the Office on Aging include coordinating, planning and developing a comprehensive delivery system of services to the elderly—utilizing existing resources to the maximum possible extent; providing technical assistance in efficient and effective program management to funded projects; providing staff consultation to community and volunteer groups in fields such as nutrition, education, employment, health services, housing and living arrangements, income maintenance, pre-retirement planning, recreational and social services; providing demographic and other data essential to implementation of Title III and VII of the Older Americans Act of 1965, as amended; providing consultation services and informational materials for local committees or councils on aging, universities and colleges, church organizations, industry, labor and federal, state and local government agencies.

I. PROGRAM DIVISION

Program Objectives and Description

California's elderly, defined as those 60 years of age or older, are expected to number nearly 2.9 million by 1976. Of those, nearly 20 percent are in special need of one or more of a variety of services related to physical and mental well-being. The primary concerns are for low-cost, nutritionally sound meals; reduction in isolation; increase in mobility and accessibility to a broad spectrum of services, such as adequate low-cost housing, health care and insurance, income maintenance and protection, consumer education and recreation.

Federal funds for both nutrition projects and comprehensive service coordination projects are administered by the Office on Aging through application from, and local review of, community based public and private nonprofit groups. Moneys are earned on a matched-resource basis. Technical assistance and consultation to applying and funded groups are provided by division staff in areas such as resource development, proposal development, application preparation, program development and community planning and coordination.

The objectives are, (1) to provide nutritionally sound, low-cost meals in attractive surroundings on a regular basis, with supportive social services, to elderly individuals, with emphasis on low-income individuals, and (2) to encourage development of systems of comprehensive, coordinated social services to the elderly, utilizing resources from all levels of the economy and avoiding duplication in some services at the expense of other necessary ones.

II. ADMINISTRATION DIVISION

Program Objectives and Description

The administration of over \$21 million in federal moneys during 1976-77 fiscal year must include fiscal and program safeguards against misuse or misappropriation to ensure the most effective possible use of those funds. Staff must be hired and trained. Federal and state rules and regulations must be observed. Projects must be evaluated. Special projects must be controlled, coordinated and reported. The objectives are (1) to insure that Office on Aging procedures and activities conform to the meaning and intent of existing legislation and the statutory and fiscal limits of federal and state rules, regulations and administrative policies, and (2) to insure that Office on Aging and grantee agency staff is properly trained and that all special projects are handled to meet federal and state guidelines.

The Administration Division will provide support services in personnel, budgeting, planning, training, accounting, management analysis, and business services. Centralization of the above functions provides the Office on Aging Regional Offices with expertise in these areas with a minimum of staff.

III. DIRECTORS OFFICE

Program Objectives and Description

The administration of programs for the elderly require the management and direction necessary to assure that the programs are administered according to sound management principles, methods and techniques with an optimum of efficiency and economy. The objectives are (1) to provide planning, leadership and basic policy direction for the state's programs for the elderly, and (2) to maintain a close watch over all legislation pertaining to the elderly and identify indirect impact of legislation on the elderly.

The Director's Office will provide leadership, direction and control to all functions of the programs being carried out by the Office on Aging. The director with assistance from the deputy director works with the Commission on Aging in setting goals, represents the office and state at regional national meetings, chairs public hearings, meets and confers with representatives of aging organizations throughout the state, and sets objectives for new programs.

The Deputy Director's Office is also responsible for the Communication Unit and the Liaison & Special Project Unit.

IV. COMMISSION ON AGING

Program Objectives and Description

The Commission on Aging is charged with the responsibility of being the principal advocate on behalf of the elderly of California. The objective are to insure that older persons in California are represented in all areas affecting such persons, and to advise the Director of the Office on Aging concerning basic policies priorities with respect to the development, operation, and implementation of programs.

The Commission on Aging provides the elderly of California with an advocate agency in order that they are represented in all governmental matters stimulates the most effective use of resources and available services for the elderly, and insures that the needs and wants of older consumers of service are duly considered by the Office on Aging, the Governor, and the Legislature prior to the taking of action to solve these problems.

DEPARTMENT OF ALCOHOLIC BEVERAGE CONTROL *

A Governor's Reorganization Plan to be submitted to the Legislature will provide for the reorganization of the state government's alcoholism activities. The plan calls for the consolidation of the Department of Alcoholic Beverage Control and the newly established Office of Alcoholism into a single Department of Alcoholic Beverage Control within the Health and Welfare Agency.

The reorganization plan will effectuate a coordinated effort to combine the state's alcohol temperance policies and rehabilitation and treatment programs.

The Alcoholic Beverage Control Act specifies that "It is the declared policy of the State that it is necessary to regulate and control the manufacture, sale, and distribution of alcoholic beverages within this State for the purpose of fostering and promoting temperance in their consumption and respect for and obedience to the law. . . ." The principal objective of the Alcoholic Beverage Control program is to administer the provisions of the Alcoholic Beverage Control Act, which gives the department exclusive right and power to license and regulate the manufacture, sale, purchase, possession and transportation of alcoholic beverages into and from the State. Under the plan, however, emphasis will shift from regulation of the industry to the protection of the people.

SB 744 (Chapter 1128, 1975) provided for the consolidation of the alcoholism program from the Office of Alcohol Program Management and the Department of Health into the California Office of Alcoholism. The California Office of Alcoholism has determined the goals of the State Alcoholism Program to be: (1) to assist Californians and their families impaired by alcoholism to attain adequate physical, social, psychological and economic functions, and (2) minimize the effects of alcoholism and alcohol abuse on the community and society. In fiscal year 1976-77, the department will conduct a counter-advertising and prevention program in California with the objective of reducing the incidence of alcohol abuse and excessive consumption of alcohol. The functions of the Office of Alcoholism will be an integral part of the Department of Alcoholic Beverage Control.

I. COMMUNITY SERVICES

Program Objectives and Description

Alcohol-related traffic accidents, and alcohol-related occupational problems are at an all time high. Approximately 800,000 employees are experiencing alcohol-related problems on the job. Approximately 2,000 of California traffic fatalities are due or related to excessive drinking. Last year there were 277,000 arrests in California for drunk driving. The objectives of this program are to develop more community awareness about alcoholism; to improve alcohol education programs in the schools; to develop occupational alcoholism programs in local government and in private industry; and to identify drunk drivers who may benefit from alcoholism treatment services. Under Chapter 1133, 1975 (SB 330), a new drunk driving treatment program is being piloted in four counties. This program provides that the court may allow a person to enter a one-year treatment program in lieu of losing his/her drivers license. This pilot program is under the direction of the California Office of Alcoholism. Community service activities are supported as part of the complete county alcoholism program. *In fiscal year 1976-77, the department will conduct a million dollar counter-advertising project and prevention program in one or two regions of the state. Redirection of existing resources through the consolidation of current state hospital alcoholism programs allows the redirection of \$865,000. An additional \$865,000 in the General Fund is proposed to fund this program. A public service and volunteer program component will be initiated and is equivalent in value to more than \$1 million effort.*

Program Requirements

	1974-75	1975-76	1976-77
Totals, Community Services	-	-	\$6,789,878

II. TREATMENT AND REHABILITATION

Program Objectives and Description

The economic and personal losses resulting from alcoholism are staggering. The U.S. Department of Health, Education, and Welfare estimates that alcoholism costs over 25 billion dollars in employment losses, accidents, medical care, etc. Additionally, alcoholism contributes to a higher rate of suicides, family dissolutions, job losses, and early deaths. The objective of this element is to provide comprehensive care for the alcoholic or alcohol abuser. This care shall include recovery home services, outpatient services, state hospitals and other inpatient care, detoxification services, and vocational rehabilitation. These services are provided through county or state operated programs or through subcontracts with private treatment and rehabilitation facilities.

1. Alcoholic Recovery Home Services

Alcoholic recovery homes provide primary supportive and sustained recovery services to recovering alcoholics. There are currently 175 recovery homes in California with a total residency capacity of approximately 4,500. Recovery homes are operated primarily by private nonprofit corporations and have only recently begun to receive funding or program support from public agencies.

2. Nonresidential Facilities

Most alcoholics are employed and are attempting to function within society. Frequently, for these alcoholics, nonresidential services provide enough support and assistance for them to lead a sober and productive life. Nonresidential services provide diagnosis; individual counseling/therapy; group counseling/therapy; family counseling; social, occupational, and recreational therapy; and medical maintenance. Currently 99 alcoholism nonresidential facilities exist in California.

3. State Hospitals and Other Inpatient Care

Alcohol programs are currently operated at Camarillo and Metropolitan State Hospitals. With the development of improved recovery home programs and the availability of social center detoxification programs, it is expected that the need for inpatient services in hospitals will continue to be reduced in 1976-77.

In fiscal year 1976-77, the Metropolitan State Hospital alcoholism program will be consolidated with the Camarillo alcoholism program. Alternative community facilities are available to provide necessary services at a lower cost.

DEPARTMENT OF ALCOHOLIC BEVERAGE CONTROL—Continued

4. Alcohol Detoxification Services

Alcohol detoxification facilities provide services for the intoxicated individual. These services include observation, nourishment, psychological support, and medical care as appropriate. Detoxification services are provided in general and psychiatric hospital settings, nonhospital facilities which provide an element of medical supervision, and social setting facilities which include medical backup capability. At the present time, detoxification services are provided through public, proprietary, and nonprofit facilities.

Sufficient alcohol detoxification programs do not exist. Jail drunk tanks are still in operation. In response, the Office of Alcoholism and the county alcoholism programs are placing a high priority on the development of alcohol detoxification programs with strong emphasis on the less expensive social setting programs. Currently there are 22 social detoxification programs in existence. In fiscal year 1976-77 the department will implement maximum rates for alcohol detoxification services. Generally, the office will not approve detoxification over \$35 per day.

5. Vocational Rehabilitation

Increased vocational rehabilitation services for alcoholics are provided through the assigning of specialized alcohol rehabilitation counselors to the State Department of Rehabilitation field offices. A greater emphasis is being placed on providing rehabilitation services to the unemployed alcoholic. In FY 1976-77 this program will be transferred to the Department of Rehabilitation.

Output	1974-75	1975-76	1976-77
Alcoholic admissions to state hospitals	3,259	3,000	1,500
Alcoholic inpatient days in local hospitals	451	500	500

Number of alcoholics vocationally rehabilitated	805	1,100	1,200
Program Requirements			
Totals, Treatment and Rehabilitation			\$16,193,214
General Fund	-	-	12,432,836
Federal fund	-	-	3,760,378

III. COUNTY ADMINISTRATION

Program Objectives and Description

SB 744 calls for the counties to administer and manage all county alcoholism programs funded by the California Office of Alcoholism. The county is accountable to the state for the effective implementation of these programs. Within standards and regulations established by the state, counties are to develop program priorities and reflect these priorities in the county alcoholism program budget. This program budget must be reviewed and evaluated by a county alcoholism advisory board prior to approval by the county board of supervisors and the state. In addition, counties are responsible to conduct evaluation studies on the effectiveness of programs and furnish an annual report to the board of supervisors. The costs of these county administrative services are based on limited data and can be considered only as estimates. During the remainder of FY 1975-76 and during the budget year, the California Office of Alcoholism will work closely with the 57 county programs to firm-up these administrative cost estimates. In keeping with SB 744 these costs will be limited by state regulation.

Program Requirements	1974-75	1975-76	1976-77
Totals, County Administration	-	-	\$2,271,192

IV. LICENSING

There are two basic objectives of the licensing element. One is to license only qualified persons who apply to engage in the sales, production or distribution of alcoholic beverages. The qualifications are set forth in the Constitution and statutes and are interpreted by regulations and policy statements. The second objective is to issue licenses at locations where they will not cause problems to the community.

Annual fees vary with the type of license and range from \$24 a year for an off-sale beer and wine license to \$580 a year for an on-sale general license. These fees are deposited in the Alcoholic Beverage Control Fund, 90% of the amount collected in the various cities and counties being returned to the respective jurisdictions. There are also original fees for new licenses; transfer fees for moving from one location to another or for transferring from one entity to another. In addition there are fees for the original issuance of a license. The latter named fees are placed in the State General Fund. Both types of general license are limited in number, one on-sale for each 2,000 inhabitants of a county and one off-sale for each 2,500 inhabitants.

Since the existing license issuance and renewal system is almost entirely manual, it is proposed that \$31,876 be added to initiate analysis of licensing work methods and revision of outmoded systems on a cost-efficient basis.

V. COMPLIANCE

The objective of the compliance element is to insure adherence to the laws and regulations by persons licensed to sell, manufacture or otherwise deal in alcoholic beverages. Major attention is given to premises operated in a disorderly manner where vice conditions are permitted or encouraged. Other investigations are necessary following original issuance or transfer of a license to make certain that unqualified persons do not obtain control of the business through unreported changes in the ownership of licensed businesses.

Another type of investigation concerns the violation of business practices statutes which provide for fair trade contracts, price posting, tied-house restrictions, advertising limitations, and prohibitions against the giving of free goods in connection with sales of alcoholic beverages. Additional fees are assessed off-sale general, wholesale and manufacturing licenses for support of these investigations by the department.

VI. STATE ADMINISTRATION

Program Objectives and Description

The objective of the state administration is to provide executive leadership, policy direction, and administrative services necessary for the completion of departmental objectives: to provide guidance, review and approval of community alcoholism program budgets; to provide up-to-date technical assistance to local alcoholism programs; to assume interagency coordination among state, federal, and local entities; to provide information and other services to management; to provide public information and awareness about alcoholism in California; and to support the regulatory functions of the ABC program.

Under SB 744, and the proposed reorganization plan, the Office of Alcoholism is required to develop an independent budgeting, payment and cost reporting system to insure that state and federal funds, which flow through the department, do so with minimum delays yet with adequate fiscal and program control. The development of the system began in fiscal year 1975-76 and will go into effect on July 1, 1976.

Other new efforts which have administratively begun in FY 1975-76 and are now budgeted for in 1976-77 include federally funded projects on alcoholism prevention and on referral and monitoring of Supplemental Security Income recipients who are alcoholic. Also, because of the increasing demand for evaluation of the Alcoholism Program, federal funds are being redirected in FY 1976-77 to increase the staffing of the Management Information Unit.

The department is required to develop alcoholism program rules and regulations, under SB 744. A new staff emphasis will be given to accomplish this during the budget year.

Consolidation will result in administrative reorganization and is expected to achieve savings in supportive services.

^a Pursuant to the Budget Act of 1975, the Office of Developmental Disabilities has been transferred to the support appropriation, Department of Health. Expenditures for the office are reflected in the Department of Health Developmental Disabilities Program.

STATE OFFICE OF NARCOTICS AND DRUG ABUSE

As a result of the passage of SB 714, Chapter 1255, Statutes of 1972, the Office of Narcotics and Drug Abuse has a more prominent leadership role in the statewide narcotics and drug abuse prevention effort. SB 714 contains mandates for the office to undertake the following responsibilities in order to achieve the program's basic objectives:

1. To coordinate state and local narcotics and drug abuse prevention, care, treatment and rehabilitation programs.
2. To develop and implement a comprehensive and uniform plan for the prevention, care, treatment, and rehabilitation of narcotics and drug abuse throughout the state.
3. To provide technical assistance, guidance and information to local governments and state agencies with respect to the creation and implementation of programs and procedures for dealing effectively with narcotics and drug abuse prevention, care, treatment, and rehabilitation.
4. Establish goals and priorities for all state agencies providing narcotic and drug abuse service.
5. To publish yearly, an informational program budget which shows the status of expenditures by all state agencies which administer narcotic and drug abuse programs.
6. To function as single state agency for the receipt, allocation, and distribution of federal drug abuse treatment funds to other state and local programs.

SB 714 also established the court diversion program, in which certain first-time drug law violators may be diverted from prosecution and trial to supervised community treatment and education programs. New Penal Code provisions (Sections 1000 et seq.) have enabled over 70,000 persons to be diverted since statewide implementation of the program began in mid-1973. Monthly accessions to the program now exceed 2,500. Since the treatment programs supervised by the Department of Health and the local criminal justice agencies are equally involved in the diversion program, SONDA has undertaken an effort to coordinate and evaluate the implementation of Penal Code 1000 throughout the state. Legislation passed in 1975-76 will reduce the number of persons apprehended for possession of marijuana and enable the reduction of \$1,500,000 currently budgeted for marijuana diversion programs.

SONDA was designated the single state agency for accepting, allocating, distributing and monitoring federal drug abuse treatment and prevention funds in Governor's Executive Order R 41-73. In 1974 the amount of federal drug abuse funds made available to the single state agency for current and budget years has more than doubled over previous estimates. With this increase in resources came the responsibility to meet new requirements as the single state agency for federal fund accountability and cost effectiveness. SONDA has taken positive steps to implement programs and activities to meet these needs. More importantly, however, SONDA is presently reviewing priorities and closely scrutinizing past assumptions about the part the state should play in attempting to solve the drug problem. Anticipated results of this reevaluation of the drug program—planned for completion in the spring of 1976—include redirection of scarce public resources from less effective and efficient approaches to efforts which can affirmatively demonstrate positive results. The Health and Welfare Agency is currently considering alternative actions to consolidate at the agency level the operations of the Department of Health, Substance Abuse Branch and the State Office of Narcotics and Drug Abuse.

RURAL AND MIGRANT AFFAIRS

In the State of California today, there are two million Californians living in rural areas. Several agencies and departments operate programs and provide services which impact on rural and migrant populations. Presently these programs have no central focal point for coordination of efforts. This has resulted in duplication, overlap, and in some instances gaps in services to rural areas. In order to overcome these coordination problems, and to focus new energy in programs impacting on rural and migrant populations, the Health and Welfare Agency has been directed by the Governor to take the lead in the coordination of state activities and services related to rural and migrant affairs.

Although leadership will come from the Agency, each department will continue to exercise its respective duties in administering programs. Where duplication or gaps in services appear to exist, the Health and Welfare Agency, through the Coordinator of Rural and Migrant Affairs, will assist the agencies in assuring more effective use of resources. The display of the major services affecting the rural and migrant communities is a step in the direction of identifying existing resources and assessing their impact on rural and migrant Californians.

The display of rural and migrant affairs does not include the State Department of Education, or its subventions, public post-secondary education, nor the Department of Benefit Payments, and the Medi-Cal, Mental Health, and Public Health programs in the Department of Health. Although these agencies deal with rural and migrant communities, the comprehensive nature of their budgets, at present, preclude identification of specific services and dollars directed to rural and migrant areas. This is also the case for medical services provided by teaching institutions in rural areas.

In addition, a new and major state agency impacting on rural population is the Agriculture Labor Relations Board. Although primarily concerned with insuring that all parties associated with agricultural labor are guaranteed full rights, the work of the ALRB will certainly be felt by rural and migratory populations associated with the agricultural industry. Therefore, the funding figures for the mentioned programs are not shown in the display and can be found in their respective budgets.

Program Objectives and Description

The objectives of this program are: to coordinate the planning, legislative and administrative policy development affecting rural and migrant areas; to monitor rural and migrant programs; and to assure that consistency exists between departments which operate rural and migrant programs. In addition, the Rural and Migrant Affairs Coordinator will facilitate the negotiation, execution and monitoring of any rural and migrant interagency agreements including those with the Department of Education for the delivery of rural and migrant services. In carrying out these responsibilities, the RMAC will do the following:

1. Develop a plan of coordination and management between each agency and cooperation with the State Department of Education.
2. Implement the plan by periodically meeting with the individual personnel specifically concerned with rural and migrant programs.
3. Assure that programs are acted in an integrated manner, that assure maximum utilization of all state resources.
4. Act as an exchange point of information for rural and migrant programs in the various departments.
5. Assure that policy established by the Governor is being carried out within particular departments.
6. Act as an arbiter where disputes arise between departments concerning the implementation of rural and migrant policies.
7. Assure that rural and migrant programs are considered when the functions of the departmentwide planning are taken into account.

SPECIAL ASSISTANCE FOR CHILDREN'S PROGRAMS

Publicly subsidized children's services are an area of growing concern. Costs have risen 150 percent since 1969-70 and now average \$2,625 per child for a standard day-care year. The \$102 million currently budgeted for child care provides services to only 72,000 children. According to recent studies, publicly subsidized day care costs twice as much as nonsubsidized day care in California, yet program quality does not appear to vary significantly.

Two major objectives of child care should be (1) to aid economically dependent families attain self-sufficiency and (2) to enhance the development of economically disadvantaged children. Present programs appear to have only minor impact in these areas, which signals a need to assess the merits of a new course. For 1976-77, \$10 million has been added to the \$4,448,000 in the Health and Welfare Agency budget for Special Assistance for Children's Programs. This expanded amount of funding will be administered by the Secretary of the Health and Welfare Agency.

DEPARTMENT OF HEALTH

The objective of the Department of Health is to improve and sustain in a uniform manner the quality and quantity of services that affect the health of the people of California. Services currently include health protection and care through the following: prevention and control of disease and disability; control of environmental health hazards; assurance of high quality health services through inspection and licensing; comprehensive planning for optimum use of health resources; coordination of direct treatment programs for the developmentally disabled, the mentally ill, drug and alcohol abusers; provision of social services to economically and socially deprived citizens; administration of the Medical Assistance Program (Medi-Cal) so as to maximize the use of public funds to provide medical services to the economically deprived.

Particular emphasis is placed on providing needed services to particular groups of the state's citizenry who have been traditionally underserved, such as farmworkers, American Indians, children from low-income families, senior citizens, and persons affected by unique genetic diseases.

SUMMARY OF PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
I. Preventive Medical Services Program	\$58,050,853	\$63,096,011	\$66,454,351
II. Environmental Health Services Program	15,204,723	16,269,434	16,557,046
III. Crippled Children Services Program	23,866,988	28,282,585	28,343,699

SIGNIFICANT PROGRAM CHANGES

Program	Description	1975-76 Dollars	1976-77 Dollars
I. Preventive Medical Services Program		\$2,283,314	\$3,358,340
II. Environmental Health Services Program		77,786	155,573
VII. Substance Abuse Program		—	-29,016,646
VIII. Social Services Program		10,000,000	10,193,520
IX. Medical Assistance Program		—	137,773,529
XI. Licensing and Certification Program		—	251,215
XIII. Administration		—	395,883
XVI. Price and Provider Rate Increase		—	70,490,217

The department is continuing to place greater emphasis on preventive medical services. Positions have been added to the Preventive Medical Services Program to implement a hepatitis registry, to control hospital infection (nosocomial) problems and to administer the hemophilia program. An area of particular concern is infant and child health. A three year pilot program will be initiated during the current year for perinatal care (Chapter 1217, Statutes of 1975) and an infant medical dispatch center program (Chapter 1173, Statutes of 1975) will be implemented. Chapter 1217 appropriates \$6 million for perinatal care to pregnant women at high-risk of having a child with a birth defect. The infant dispatch centers will offer a centralized dispatch system linking all hospitals providing obstetrical services with intensive care nurseries to protect the health of critically ill newborns.

Chapter 1168, Statutes of 1975 authorized the department to expand preventive health care services for senior citizens by providing funds to county health agencies for public health nursing services to the aged. Recognizing a critical need for a health program for California's American Indians, Chapter 606, Statutes of 1975 was implemented January 1, 1976. Two and half million dollars was appropriated to provide financial, training and technical assistance to upgrade existing urban and rural Indian health programs. Five positions have been added to the rural health unit for the purpose of implementing a Migrant Housing Surveillance Program. This staff will be making direct on-site inspections of migrant housing facilities to take remedial action to bring deficient units up to standard.

Pesticide related health hazards constitute a significant public health problem. Legislation will be supported to increase the mill tax on pesticides to provide funding for pesticide research and control. Five positions will be added to the Epidemiological Studies Laboratory to investigate pesticide related illnesses, two positions will be used to establish a pesticide use supervision unit and six will be added to the Clinical Chemistry Laboratory to standardize cholinesterase testing which is being used to monitor the level of pesticide present or absent in the blood of farmworkers.

Over 1.7 million tons of hazardous wastes are disposed of annually in the state. Six positions have been added to the Environmental Health Services Program to increase surveillance, monitoring and enforcement of all hazardous waste management activities to assure that this waste is disposed of in a safe, responsible manner.

DEPARTMENT OF HEALTH—Continued

As a result of increased state staffing, local mental health revenues are expected to be increased by \$2 million annually. One million dollars of this increase will be made available for increased local mental health services.

An augmentation of \$498,000 in state funds is included in this budget to expand the Foster Grandparent Program in State Hospitals. This will add 213 new foster grandparents to the 406 already provided through Federal Funds.

A reduction of \$300,000 in the State Hospital Psychiatric Residency Program is reflected in this proposed budget. This recognizes changing priorities and a reduced level of training requirements for hospital programs.

Establishment of two additional positions in the Developmental Disabilities Program will allow expansion of program development. In addition, seven positions were established to augment the Regional Center Program to provide increased coordination, consultation and review of Regional Centers' operations.

Decreased state expenditures relating to placements has enabled the reduction of approximately \$3,000,000 in MR-PI funds in the continuing care services section.

Effective July 1, 1976, the counties' alcoholism programs under the Short-Doyle Act and responsibilities of other entities related to alcoholism programs within the Department of Health will be transferred to the Office of Alcoholism as authorized by Chapter 1128, Statutes of 1975. A further reorganization of the state's alcoholism program will be proposed to the legislature.

The Substance Abuse Program has been augmented by five positions to provide expanded evaluation of local drug abuse treatment programs. The implementation of Chapter 248, Statutes of 1975 is expected to result in fewer referrals for drug diversion for marijuana offenders. Therefore, the program has been reduced by \$1,500,000 to reflect this change.

The Homemaker-Chore program reflects a proposed augmentation of \$10,000,000 for both current and budget year to meet a continuing increase in demand for services. Legislation will be supported to more clearly define program priorities and state-county funding responsibilities. An additional 30 positions will be added to the Social Services Branch to increase supervision and consultation to the counties; to develop and enforce program controls; and to increase monitoring efforts.

The Medical Assistance Program has been expanded to monitor drug utilization on a statewide basis. A position has been added to meet increased workload in processing drug treatment authorization requests. A new unit is to be organized to implement and monitor a pilot project on volume purchasing of various health care commodities from manufacturers on a competitive bid basis. This pilot project will serve as a feasibility study for implementation of volume purchasing on a statewide basis. In addition, two positions are to be established to develop and enforce controls for county administration of the Medi-Cal Program.

Current estimates provide for an increase \$137,773,529 in Medi-Cal expenditures in 1976-77 above the 1975-76 projected levels due to increased users and utilization as well as full year cost of current year program changes.

Changes in Medi-Cal eligibility will be proposed for implementation through legislation. These changes will eliminate inequities between the Medically Needy and Medically Indigent categories and reduce the administrative costs of the eligibility determination process. This budget contains a \$4,820,000 General Fund increase to implement these changes.

The budget reflects implementation of the Institutes of Medical Services Program effective March 1, 1975 with major emphasis on preventative care and consumer involvement.

The Licensing and Certification Program is increased by thirteen positions to provide more extensive review of licensed residential facilities.

Staff has been redirected to the Administration Division to provide an evaluation of the effectiveness of departmental policies and programs. This Division will also be increased to expand Local Mental Health and Developmental Disabilities revenue collection efforts. One position has been provided to develop a Medi-Cal simulation model to insure production of better quality and more timely fiscal and programmatic estimates related to the Medi-Cal program. In addition, the legal staff has been augmented by eight positions due to increased workload in the areas of social services, licensing, and patient rights.

A total of \$70,490,217 has been included in this budget to provide price and provider rate increases for local assistance programs. \$45,645,864 of this amount is from the General Fund.

I. PREVENTIVE MEDICAL SERVICES PROGRAM

Program Objectives and Description

While a major portion of our health care resources are necessarily directed towards curative care, preventive health care is surfacing as an important component in today's health care delivery system. As the public becomes better educated in how to care for its health through preventive measures and to recognize problems at an early stage of development, medical costs can be reduced. A health problem that has reached the crisis stage must be treated by highly paid specialists with expensive equipment and costly facilities. Often preventive measures and early detection of disease can prevent the illness from reaching this crisis stage.

Greater attention is being focused on prevention of disease and promotion of health. This is a more desirable method of providing health services and an avenue to relieve the present overburdened health care delivery system. In contrast to the immediacy and costliness of curative care programs, preventive programs are planned and structured to provide ongoing health care in an effort to avoid major illnesses.

The program provides direct services in the contract counties health services program and in some areas of the infectious disease program. Other elements in the infectious disease program are provided through contracts with local health agencies or contract providers. Hemophilia services are provided by direct contracts with medical facilities.

Special groups of the population and selected disease entities have been singled out for intensive preventive activities. Population groups at special risk include mothers, infants, children, the aged, certain minorities and inhabitants of sparsely populated areas who have low incomes. Selected disease entities include heart disease, stroke, cancer, kidney disease, arthritis and other afflictions that cause disability and death. Individuals with these diseases require expensive medical care and are frequently unemployable.

The objectives of this program are to:

1. Search for, assemble and disseminate new and existing knowledge, technology, and skills to prevent, control and minimize the incidence, causes and effects of disease, reduce the extent and duration of illness and the number of deaths, and to improve the quality of life through the promotion of positive health.

2. Assist local agencies in developing and maintaining health programs.

3. Measure the effects of various conditions in the population so that successful disease control activities can be applied with maximum efficiency.

a. Contract Counties

Fifteen California counties, with a population less than 40,000, contract with the state to provide basic public health services. These small counties have many inherent geographic, demographic and economic barriers, as well as a scarcity of health resources, which hinder the maintenance and operation of a local health department.

Basic preventive health and disease control services are provided by public health nurses and sanitarians who reside in the contracting counties. Professional supervision and coordination are provided by department staff. A local health officer (part-time), responsible for the day-to-day activities of the local staff and the legal health authority in each county, is appointed by the county board of supervisors. Local health services are provided in close cooperation with county boards of supervisors. Program emphasis varies among counties in accordance with local needs, facilities and interests. This element also implements the Child Health Disability Prevention Program in these counties.

Output

	1974-75	1975-76	1976-77
Personal Health Services:			
Direct services to patients (visits, case conferences, etc.)	27,100	27,400	27,840
Patients served (excluding clinics)	8,770	8,860	10,580
Clinics held (T.B., chest, immunization, etc.)	1,650	1,660	2,010
Clinic patients served	32,000	32,600	44,010
Child Health and Disability Prevention Program:			
Children screened	—	5,000	6,000

b. Infectious Disease

The objective of the Infectious Disease element is to identify and define the occurrence of infectious diseases in California and to direct and coordinate efforts to prevent or minimize their harmful effects.

This element is responsible for surveillance, investigation and control of over seventy-five communicable diseases. Reporting procedures or control measures are stipulated by law for fifty of these diseases. Disease control depends greatly on laboratory support provided by the State's Microbial Disease and Viral and Rickettsial Diseases Laboratories and by local health department laboratories.

Infectious disease reports throughout the state are compiled, analyzed and disseminated to physicians and local health departments. Reports describe epidemiologic trends and aid in developing and directing communicable disease control programs. Special surveillance systems are maintained for disease such as influenza, malaria and mosquito-borne viral encephalitis. State epidemiologists are on call to assist local health departments in the investigation and control of infectious disease outbreaks.

Surveillance is maintained to identify illnesses preventable by immunization. A program to assess immunization status among California school entrants was started in September 1974. Local health departments are provided information on immunization levels by school district so that programs to raise immunization levels can be directed.

Efforts of this element are also directed toward prevention and reduction of venereal diseases. Programs are provided by direct assistance (state staff) and financial assistance to local health agencies. Currently, activities are mainly directed toward prevention and reduction of syphilis and gonorrhea. In addition to detection and treatment of existing cases, training and education programs are conducted. Training programs are provided to professionals to assist in technical skills and provide ongoing assistance when needed. Also, educational activities are offered to increase general public knowledge about transmission, symptoms, and treatment of venereal diseases. Programs for schools, community, and professional groups educate the public about cases, treatment, and prevention of venereal diseases.

This element assists local health departments in developing and improving their tuberculosis control efforts through consultation and periodic program review. It administers projects designed to insure the early diagnosis, uninterrupted treatment, and appropriate follow-up of persons with tuberculosis.

This element is also responsible for surveillance, investigation, and control efforts related to human illness acquired from animals (e.g., brucellosis, leptospirosis, psittacosis, rabies, and salmonellosis). Activities include administration of animal rabies, wild animal importation, pet bird banding and pet turtle importation control programs.

c. Special Medical Care

Many adults with special medical conditions are unable to obtain insurance coverage and cannot financially meet the cost of required life sustaining services. This element provides high quality comprehensive medical and related services to individuals with hemophilia, cystic fibrosis or kidney diseases requiring chronic hemodialyses.

The hemophilia program, started in January 1975, has an estimated continuing caseload of 1600.

Services to individuals with cystic fibrosis is a new program started in January 1976.

Seven dialysis renal failure centers have been established in the State: (1) four Adult Dialysis Renal Failure Centers and (2) three Pediatric Dialysis Renal Failure Centers. The dialysis regional centers are required to perform services of research and development, training of medical and nursing staff in other dialysis facilities, and consultant services to other dialysis facilities. The treatment methodology of the pediatric centers emphasizes pre-dialysis and post-transplant rehabilitation. The adult center generally provides maintenance care through dialysis.

Output

	1974-75	1975-76	1976-77
Referrals	470	1,130	1,500

d. Family Planning

The goal of Family Planning, as established by Chapter 1213, Statutes of 1973, is "To make available to citizens of the state of childbearing age, comprehensive medical knowledge, assistance and services relating to the planning of families," and "... to establish in each county, a viable family planning program for the dispensation of family planning, infertility and birth control information and techniques," and to establish goals and priorities for state agencies involved in family planning services.

DEPARTMENT OF HEALTH—*Continued*

California's family planning programs are designed to provide individuals with the knowledge and means whereby they can freely choose the number and spacing of their children, so as to improve the health of California's women and children.

Publicly supported family planning services are provided to individuals who need and want them but cannot afford to pay for them. The services include public information, patient education and counseling, assistance with problems of infertility, as well as assistance in prevention of unwanted pregnancy and births.

When these services are available, they are used voluntarily by eligible persons. Patients also must be given full information about all types of family planning services and any possible complications or side effects, and allowed to make a free and voluntary choice.

Persons who meet federal and state eligibility requirements receive family planning services in special clinics operated by local public or nonprofit agencies which contract with the Department of Health. There will be more than 150 such contracts managed by the Office of Family Planning in fiscal year 1976-77. Each contract agency must meet standards developed by the Office of Family Planning. These standards specify the types of services to be provided, the quality of services that is expected as well as the content, and the requirements in terms of staff and facility. These standards are revised as family planning techniques, practices, and needs change. Review of clinic practices to assure compliance with standards is done by a field staff. Agencies which contract to provide these services are reimbursed according to a fee schedule.

e. Child Health Disability Prevention

The Child Health and Disability Prevention (CHDP) Program was established to provide a preventive health program of early and periodic health screening and referral for diagnosis and treatment of potentially handicapping conditions for the children and youth of California. Any child between birth and enrollment in the first grade residing in California and all persons under 21 years of age who are certified eligible for the California Medical Assistance program are eligible for services from the program. Thus, the program incorporates Early and Periodic Screening, Diagnosis and Treatment (EPSDT) services formerly mandated by Title XIX. The eligible population totals approximately 3 million statewide. In fiscal year 1975-76 the program mandates that all children entering first grade present evidence of having had a health screening examination.

Screening services provided under this program include a health and development history, assessment of physical growth, developmental assessment, physical examination, tests for vision, hearing, anemia, tuberculosis, diabetes, and urinary tract conditions, an assessment of nutritional and immunization status, and, where appropriate, testing for sickle cell trait and lead poisoning.

The program is state financed. Standards and regulations are established at the state level and the program is administered by local health departments. The program in the fifteen counties that contract with the state for services is administered through Contract Counties Health Services Section of the Department of Health.

Under this program children are screened either through a private physician or a county clinic. In addition to paying for screening services of children from low-income families, the department provides funds to counties for child health plan development, outreach, referral and follow-up services.

f. Dental Health

The dental health staff evaluates the state's dental health needs; promotes the development of prevention programs in schools and industry and evaluates their cost effectiveness; provides public and professional education directed toward prevention of dental disease and the proper utilization of existing resources; provides direction and guidance for prevention programs in the other state departments and agencies; develops and promotes the establishment of new or improved programs of prevention aimed at reducing the cost of care; administers the state's topical fluoride programs for school children; provides consultation and workshops for personnel in local programs; and provides consultation to other programs and agencies on dental subjects.

g. Maternal and Child Health

The maternal and child health staff assists mothers and their children in achieving good health, developmental potential and avoidance of disabilities that can occur during critical life periods, which could also produce disabilities in later years. Assistance is provided to the economically, geographically and culturally deprived to obtain adequate health care services. Public and private agencies are encouraged to provide direct health services to mothers and children and receive funds for their programs through the department. This element provides technical assistance to local agencies in program development and maintenance. In the provisions of funds to local agencies, contract agreements specify standards to be maintained and the contractors are monitored and evaluated for performance. Such efforts have a great effect in improving and maintaining the quality of services rendered.

This element has been authorized to conduct one or more pilot programs of not more than three years duration to provide personal health care services in the perinatal period to high-risk pregnant women. Chapter 1217, Statutes of 1975, appropriates \$6,000,000 to fund this over the next three years.

h. Nutrition

The primary objective of the nutrition element is to incorporate nutritional services into all health programs serving women in childbearing years and children in California. As such, nutrition is being integrated into Maternal Health, Family Planning, Infant and Child Health, and Genetic Diseases. In addition, "The Special Supplemental Feeding program for Women, Infants, and Children" (WIC), a federally funded nutrition program is administered with a strong linkage with health services for women and children. The major activities of the nutrition element are: (1) consultation to providers and administrators; (2) resource allocation; and (3) development of technical materials, such as care guidelines and professional and consumer information.

i. Adult Health and Chronic Disease Control

This element provides technical assistance in planning, developing, and operating local adult health programs; participates in departmental evaluation of local proposals for the use of subvention funds and project monies; processes the development of new or improved and less costly methods of delivering health care; ensures that the quality of care provided by health services meets departmental standards and monitors subvention funds and contracts; and promotes the better utilization of medical, paramedical and allied manpower through training, demonstration and experimentation. In addition, the work of the element includes specific programs in cancer control, cardiovascular disease and kidney diseases control areas.

j. Cancer Epidemiology

Cancer Epidemiology carries out studies directed at determining the relationship between the various types of cancer and environmental and cultural influences on the prevalence of that disease. It offers the opportunity for the collection of collateral data from laboratory studies of a viral, genetic or psychologic nature in the search for clues to the causes of cancer and for relating these clues to the population groups involved.

The objective of cancer epidemiology is to identify points at which cancer control measures may be effectively applied. It includes the California Tumor Registry which, over a span of 28 years, has collected information concerning over 500,000 cases of cancer in California. It maintains a cancer incidence reporting system based on the five bay area counties and measures whether or not the incidence of cancer is increasing or decreasing.

k. Genetic Disease Prevention

This element administers the PKU, RH Factor, Sickle Cell, Tay-Sachs screening programs and the rhesus (RH) isoimmunization hemolytic disease reporting program. The tasks of the element include: evaluation of screening tests; preparation of regulations; development of criteria and guidelines for screening programs; identification of diseases for which screening is effective; preparation of educational materials; development of professional education; maintenance of a directory of patient services; establishment of standards for screening programs; and development of screening demonstration projects.

DEPARTMENT OF HEALTH—Continued
COMMUNICABLE DISEASES IN CALIFORNIA

DEPARTMENT OF HEALTH—Continued

I. Rural Health Services

Activities are directed toward the nine percent of the population residing in rural areas. This population has problems in obtaining health services. These problems are different from those of urban populations and are frequently more difficult to surmount. The rural population has a greater proportion of individuals living at incomes below poverty level than is true for the state as a whole. Three particular groups of the rural population are considered to be at special risk and in need of organized services. These are the migrant farmworkers, the older population, and the individuals at the lower income levels. These groups have special needs because of the distance that must be traveled for health care services due to a lack of adequate services in many of the rural areas of California. In addition to these Health related services, the Health and Welfare Agency is undertaking a comprehensive review of all services provided to the rural and migrant population.

m. Indian Health Services

There are about 200,000 Native American Indians in California, 30,000 of whom live in rural areas, 5,000 on reservations and the remaining 165,000 in urban areas. While services are provided to this group through Medi-Cal and other health systems, a need still exists for Native American Indians to receive health services in a setting where the providers understand their cultural needs.

Chapter 606, Statutes of 1975, appropriated \$2,500,000 for additional Indian Health services. This law authorizes the department to contract with existing urban or rural Indian health programs. The funds are to be used to assist these programs in planning, implementing, and upgrading existing programs to attain a comprehensive health services delivery system for Native American Indians in urban and rural areas.

II. ENVIRONMENTAL HEALTH SERVICES PROGRAM

Program Objectives and Description

The program's objectives are (1) to promote and maintain a physical environment which contributes positively to health, and (2) to assure protection of the consumer public against unsafe, unwholesome, and ineffective or misrepresented foods, drugs, domestic water supplies and other products.

The health of California's citizens is critically dependent on many factors over which the individual has little control, but over which this program has a major regulatory, supportive, or advisory influence. The factors relate to the quality and safety of work, home, and recreational environments, and to the food, water, and other products consumed or contracted.

a. Food and Drug

The food and drug element's objective is to provide assurance of the safety, wholesomeness, effectiveness and truthful labeling and advertising of the state's food, drug, medical device, cosmetic and hazardous household product supply. The element enforces provisions of the California Health and Safety Code pertaining to the manufacture, storage, distribution and sale of these consumer commodities. The role of the element is to determine compliance. To accomplish its objective, the element has set up a planned and balanced program of inspection, investigation, sampling and laboratory analysis. The element has legal authority to embargo adulterated, misbranded or falsely advertised products; annually license certain critical food industries including low-acid canneries, and drug and medical device manufacturers; require premarket clearance for new drugs and devices; and to initiate criminal and/or civil actions. To augment the enforcement program the element provides education to consumers and industry by conducting workshops and media releases; complaints from consumers and practitioners are investigated.

b. Water Sanitation

This element provides essential safeguards for domestic water supplies, waste disposal operations, recreational water sanitation, and shellfish production and harvesting operations by a continuing program of standard setting, surveillance, evaluation, education, and enforcement.

Domestic water utilities and bottled water companies are required to have a permit from the State Department of Health issued after requirements designed to provide a safe product have been met.

Sewage treatment and disposal and sewage reclamation and reuse projects are evaluated to assess health conditions and to take preventive, corrective and enforcement actions, if necessary.

Surveillance, sampling, testing and enforcement in shellfish growing areas is conducted to assure protection against shellfish toxin.

Output	1974-75	1975-76	1976-77
Population served by water supply systems	18,600,000	19,500,000	19,500,000
a. Consistently meet standards.....	2,200,000	3,000,000	3,000,000

b. Second order deficiencies	117	125	148
c. First order deficiencies	10	8	6
Shellfish Areas:			
a. Number of areas meeting standards	11	11	11

c. Radiologic Health

The objectives of the radiologic health element are to protect the people of California from the dangers of ionizing radiation and to reduce unnecessary radiation exposure to workers and the public from either the use of radioactive material, including contamination of the environment, or the use of radiation machines.

To accomplish these objectives, the element comprised of a radioactive materials unit and an X-radiation unit, performs the following activities:

1. Radioactive Materials Unit

This unit establishes and enforces standards for the use of radioactive materials for any purpose and issues licenses to persons/organizations whose training, facilities, and operating procedures are safe and effective; conducts inspections and surveys of licensees to assure that appropriate protection standards are followed; investigates accidents and incidents involving the use of radioactive materials; identifies, evaluates, and monitors levels of environmental radiation throughout the state from sources such as nuclear power plants; and evaluates and approves contamination surveillance programs of nuclear power plants and other major installations. The unit is assisted in its work by the Sanitation and Radiation Laboratory, over 100 volunteers from governmental agencies, the Department of Industrial Relations, and local contract agencies.

2. X-Radiation Unit

This unit conducts inspections to maintain and enforce standards that assure radiation-producing machines are safely used and maintained in good operating condition; examines workers using radiation machines for medical purposes to assure that standards of competence are met; and establishes and enforces standards for schools and hospitals providing medical X-ray training. The unit is assisted in its work by the Department of Industrial Relations and local contract agencies.

Output	1974-75	1975-76	1976-77
Number of radioactive materials licenses evaluated.....	1,510	1,500	1,500
Number of radioactive materials facilities inspected and brought up to standard.....	500	500	500
Number of radiation machines inspected and brought up to standard.....	4,000	4,000	4,000
Number of persons authorized to operate X-ray equipment under surveillance.....	31,500	32,150	33,000

d. Occupational Health

The occupational health element identifies environmental factors which constitute sources of disease in places of employment; develops and applies medical and engineering techniques for the prevention of occupational illnesses; develops, uses, and disseminates information concerning methods for the control of hazards contributing to occupational diseases; and provides technical assistance to the State Department of Industrial Relation in the enforcement of state occupational safety and health laws and standards.

The element's activities are required under and supported through an interagency agreement with the Department of Industrial Relations, in conformance with the State Plan for Occupational Safety and Health, the California Occupational Safety and Health Act. The occupational health element is supported in this activity by the Air and Industrial Hygiene Laboratory and the Southern California Laboratory of the Bioenvironmental Laboratory. This element has the following responsibilities:

1. Standards Development

Occupational health standards and requests for variances are developed and evaluated for presentation to the Occupational Safety and Health Standards Board for approval and adoption. The section maintains surveillance and determines the necessity for standards on occupational health issues not already adequately covered.

2. Field Studies

The element investigates the occupational health status of workplaces throughout the state and provides the Division of Industrial Safety and other parties with its finding for environment, compliance and/or consultative purposes.

DEPARTMENT OF HEALTH—Continued

3. Training and Evaluation

The element provides the Division of Industrial Safety personnel with training in the recognition of common health hazards, and develops and provides information to employers and employees to aid them in preventing occupational disease.

Output	1974-75	1975-76	1976-77
Health inspections	850	1,100	1,200
Special Studies and consultations	90	200	400
Health standards adopted	10	10	20
Employer/employee training sessions	50	50	50
Number of persons trained	5,000	5,000	7,000

e. Vector Control

The vector control element with support from laboratory services, provides protection surveillance and conducts a statewide program to prevent or suppress those vectors, hosts and disease-reservoir animals of greatest public concern and performs surveillance and enforcement of the safe disposal of solid and hazardous waste to protect the public health. Epidemiological, engineering, biological and chemical methods, materials, techniques, and equipment are under constant development and evaluation to facilitate public and private participation in disease and vector prevention and control and to solve problems of hazardous and solid waste management.

This element will be increased by six positions January 1976 to provide the necessary surveillance, monitoring, and enforcement of the minimum standards for safe management of all hazardous wastes produced in California.

Output	1974-75	1975-76	1976-77
Vector-borne disease investigations performed	166	220	200
Emergency control operations involving vector-borne diseases or chemical spills, fires, or explosions	41	47	35
Regulatory actions including appeals, hearings and investigations	72	100	120
Hazardous waste disposal permits issued	71	120	130
Chemical and biological sample submitted for laboratory analysis	2,780	6,000	6,200

f. Sanitarian Services

The objective of the sanitarian services element is to assure that local health departments and state institutions achieve and maintain a level of environment which is free of disease and hazards, and is conducive to optimum health and well-being.

The element reviews and evaluates local environmental health programs to determine federal and state subvention eligibility; assists 48 local health departments; delegates responsibility and monitors effectiveness of local environmental health agencies in enforcing retail food laws and regulations and provides training for environmental health professionals.

It also administers a registration program to assure, through an examination process, that individuals are qualified to practice environmental health. It establishes and enforces minimum standards for schools providing approved curricula in environmental health.

Through environmental health surveillance the element works to assure that a safe and healthy environment is maintained for inmates, wards, patients, and employees in state institutions.

g. Laboratory Services

Departmental programs, as well as other state and local agencies, depend upon department laboratory support and services for: surveillance, epidemiological investigations, prevention and control of infectious diseases; testing in the area of alcohol, drug abuse, and air pollution; occupational health protection; radiological health protection; community noise control; pesticide worker safety; assuring the safety and quality of foods, drugs, cosmetics, and household chemicals; and controlling water and waste water quality.

Also important are the regulatory and supportive efforts to assure the quality of health-related laboratory services provided by both governmental and private agencies throughout the state.

The bioenvironmental laboratories provide analytical, developmental and related support to the department's occupational health, food and drug, water sanitation, radiological health, vector control elements the Air Resources Board, department of industrial relations and local health departments.

The clinical chemistry, microbial disease, and viral and rickettsial disease laboratories enforce laboratory regulations related to private and public laboratories, and provide supportive services to other departmental sections and local health departments.

III. CRIPPLED CHILDREN SERVICES PROGRAM

Program Objectives and Description

This program provides high quality comprehensive medical and related services to children with physically handicapping conditions, in order to correct, ameliorate, or eliminate their handicap.

Nineteen thousand infants are born each year in California with congenital deformities serious enough to endanger life or result in lifelong disability. Several hundred children each year are severely burned, paralyzed or suffer other severe injuries. Infections, diseases, and poisoning further contribute to the picture of childhood disability. Many children whose handicaps prevent regular school attendance can receive education in special schools if physical and occupational therapy is a part of the school day activities. Modern medical science can correct or modify most of these handicaps but the cost of treating such cases is greater than some families can afford from their own resources.

Authority

California Health and Safety Code, Division 1, Part 1, Chapter 2, Sections 248-270, inclusive, and California Administrative Code, Title 17, Chapter 4, Subchapter 3, Group 1, Section 2890 to 2906, inclusive.

DEPARTMENT OF HEALTH—Continued

a. Diagnosis

Activities such as birth certificate surveillance and child health conferences are designed to promote and provide early casefinding. Referral services assure comprehensive medical evaluation by appropriate physician specialists and uniformity in the payment for these services.

b. Treatment

The program provides, or assists in arranging for specialized medical care and allied services for eligible handicapped children.

c. Therapy

Therapy services in medical therapy units of special schools and classrooms are provided in conjunction with the State Department of Education. Standards for space, equipment, number of therapists in special schools and administrative procedures are established and revised as necessary.

Output	1974-75	1975-76	1976-77
New referrals	27,708	28,207	30,000
Number of CCS children served	46,508	47,000	48,700

IV. HEALTH PLANNING PROGRAM

Program Objectives and Description

The objectives of this program are: (1) to develop a state level planning program for health facilities and services and (2) to improve emergency medical services throughout the state. There are two elements: (1) Health Planning and (2) Emergency Medical Services.

Authority

Part 1.5 of the Health and Safety Code and the designation of the State Department of Health as the State Agency for Health Planning and Resources Development under Public Law 93-641.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Totals, Health Planning Program	41.8	58.6	56.5	\$746,706	\$1,364,805	\$1,317,841

Federal funds				746,706	688,800	716,352
Reimbursements				-	100,891	101,351

Program Elements

a. Health Planning	41.8	43.8	43.7	746,706	688,800	716,352
b. Emergency medical services	-	14.8	12.8	-	676,005	601,489
c. Administration	(11.5)	(13.5)	(13.4)	(225,644)	(330,507)	(333,190)

a. Health Planning

The health planning element develops the statewide medical facilities and services plan used as the criteria for the allocation of federal and state construction funds and loan guarantee programs. It administers the state Certificate of Need program related to expansion of health facilities and services and to capital expenditure programs in health facilities.

This element also provides staff assistance to the State Health Coordinating Council and develops a state health plan composed of the health systems plans from each of the 14 Health Systems Agencies in the state. It reviews all institutional health services in the state and makes findings as to appropriateness of such services.

b. Emergency Medical Services

Emergency medical services are those services required in the event of an unforeseen illness or accident occurring to persons outside of a hospital and for whom it is necessary to provide prompt evaluation, transportation and care. The goal of this element is to improve emergency medical services throughout the state.

This element develops training standards for ambulance personnel, public safety personnel, nurses, physicians, and emergency medical technicians, and it evaluates emergency medical training programs. In cooperation with local jurisdictions, it provides consultation, coordination, and evaluation of statewide emergency medical services. It develops data whereby community medical emergency services can be augmented by assistance from other resources. It is responsible for developing standards for classifying emergency medical capabilities in hospitals and for developing a central communications system to coordinate and integrate emergency ambulance services, public safety organizations and hospital emergency services.

This element is also responsible for the medical and health aspects of the State Emergency Plan prepared in conjunction with the State Office of Emergency Services for use in the event of widespread disasters such as earthquakes, nuclear power plant incidents, air pollution emergencies, etc. It also monitors some 21 federal grants to local agencies in California for emergency medical services projects totalling approximately \$6 million.

DEPARTMENT OF HEALTH—Continued

V. MENTAL DISABILITIES PROGRAM

Program Objectives and Description

The Mental Disabilities Program is responsible for the management of state and federal resources provided to city and county mental health programs through the Short-Doyle Act. It is also charged with administration and enforcement of the human rights guaranteed by the Lanterman-Petris-Short Act. It is a unified service delivery system that focuses mainly on the mentally disordered and the mentally ill offender, but also provides services to the developmentally disabled, drug and alcohol abusers. Services are delivered through three basic components: community mental health, continuing care services, and state hospitals.

The objectives of the program are to: prevent mental and emotional crises by making the community more aware of problem-causing situations; provide early diagnosis and treatment through services that do not require disruption of daily routines; provide treatment to enable the client to quickly return to normal life; and provide continuing care for those individuals requiring long-term treatment.

Authority

Welfare and Institutions Code Division 4-8.

a. Community Mental Health

Community mental health services have been established in every county, with the goal of tailoring the program to the requirements of the local citizens. The counties determine what services shall be provided within broad guidelines set out by state and federal laws and regulations. Program planning is done by mental health advisory boards in each county and then sent to the county board of supervisors for approval. The plan is then sent to the Department of Health for approval and funding.

Community mental health takes many forms. For example, crisis teams work with emergency medical facilities, clinics, and law enforcement agencies to get quick and mobile services to people in distress in odd places and at odd hours. Neighborhood clinics provide individual and group services on either a walk-in or scheduled basis, and in more severe cases, 24-hour treatment is provided.

Several different types of long-term living environments are provided for persons unable to care for themselves due to their disability. The two most common are the 'L' facility (Long-term psychiatric facility) and the family-care home. 'L' facilities provide basic living and treatment services similar to nursing homes. In 1974-75 supplemental services for rehabilitation and subacute treatment were added. Family-care homes serve six or fewer persons in a family setting and provide personalized service by the caretakers.

It has long been recognized by both the executive and legislative branches that a more adequate and uniform statewide system of continuing care is needed. Heavy emphasis has been placed on the development and maintenance of systems in each county that will ensure continuing care planning, monitor progress, evaluate individual patient needs, provide linkage to rehabilitation, education, and employment resources, and keep track of patients during the entire term of their mental disability. The county mental health program is responsible for management of individual patient treatment under this system. During 1975-76 efforts in program evaluation have been intensified. These efforts took three forms: (1) Peer citizen reviews of all county programs on a scheduled basis to produce reports and recommendations to Boards of Supervisors and Advisory Boards; (2) client self-assessment and satisfaction studies on a sampling basis, with results compiled by an independent contractor and supplied to the Department of Health and to the counties; (3) clinical services assessment to indicate the types of disorders treated, their intensity, and the rate of improvement. These efforts augment the continuing subjective evaluation provided by program staff on a daily basis.

Effective July 1, 1976, the counties' alcoholism programs under the Short-Doyle Act and responsibilities of other entities related to alcoholism programs within the Department of Health will be transferred to the Office of Alcoholism as authorized by Chapter 1128, Statutes of 1975. A further reorganization of the state's alcoholism program will be proposed to the Legislature.

b. State Hospital Programs

Programs for the mentally disordered are provided at six state hospitals with a full range of services available at Napa, Camarillo, and Metropolitan State Hospitals. Stockton State Hospital maintains a 100-bed program by contract with San Joaquin County. Atascadero and Patton are secure hospitals for the control and treatment of mentally ill offenders. Patton also provides a 150-bed program for both acute and chronic patients from several of Southern California counties. Persons with secondary diagnosis of alcoholism are seen and treated in any state hospital for the mentally disordered, and specific programs for alcoholics exist at Camarillo and Metropolitan State Hospitals. A few special treatment programs for patients with drug-abuse problems exist in state hospitals. Such services are increasingly being provided locally, and community demand for state hospital services are declining. Only Camarillo and Metropolitan will have programs for drug abuse in 1976-77 fiscal year.

The state hospital patient population dropped rapidly with the development of community-based mental health program. The population reached a peak of 37,000 in 1957 and decreased to a low of 6,303 on June 30, 1975.

Within the total workload, a change in the mix of patients is anticipated. Recent court rulings have restricted the methods by which the courts can commit persons to state hospitals. As many as 700 mentally disordered offenders currently in state hospitals may be affected by these rulings. Juveniles can no longer be committed by the courts and are subject to all of the rights granted an adult. On the other hand, it is expected that a greater number of chronic patients will enter the hospitals and that limited community placement services may mean longer hospital stays.

Estimates of population and staffing adjustments utilizing the 1968 SCOPE Standards are under review by the Department. Necessary budget adjustments to reflect the results will be submitted to the Legislature prior to committee budget hearings.

A reduction of the alcohol program at Metropolitan State Hospital is included as part of a major alcohol prevention program proposed in the budget for the alcoholism programs. This proposal will result in reduced state hospital services but expanded community services.

c. Continuing Care Services

This function is the direct service arm of the department for the provision of follow-up and continuing care services for persons leaving state hospitals and local treatment. With 450 staff situated in 47 field offices, this section services 13,000 persons in the community, as follows: 90 children live in residential treatment facilities; 425 clients in small family homes; 8,000 persons in other out-of-home care; and 6,500 clients reside in their own homes.

VI. DEVELOPMENTAL DISABILITIES PROGRAM

Program Objectives and Description

In California there are approximately 290,000 developmentally disabled individuals requiring care, treatment, development and maintenance. About 204,000 are mentally retarded, 25,000 have cerebral palsy, 61,000 are epileptic, and 2,000 are autistic.

Developmental disabilities cause continuing lifetime problems to individuals and their families.

The quality of life for each of these individuals depends upon the conception, planning, and provision of needed services by many state and community agencies aimed toward the ultimate goal of development to maximum potential, normalization and social integration.

The objectives of the program are: to prevent developmental disabilities by intensive concentration of efforts in early screening and genetic counseling, to develop each individual to their maximum potential and reduce the degree of dependency of persons with developmental disabilities; to increase the capacity of adaptive behavior into normal life community living; to maintain the health and welfare of each individual; and to increase the individual's social and cultural capacity to create, maintain and develop a quality life for themselves.

Authority

Welfare and Institutions Code, Divisions 4, 6, and 7; Health and Safety Code, Division 25.

e. Administration.....	(98.7)	(86.1)	(89.9)	(1,940,542)	(2,101,765)	(2,135,358)

a. Regional Centers

The primary objective of the regional center is the normalization of the life situation of persons with developmental disabilities and of their families. Regional centers are fixed points of referral in the community for the developmentally disabled and their families, so that they may have a place of entry for needed services. Regional centers provide a link between the community and large institutions to provide a normalizing and socially integrated program for the developmentally disabled.

The regional centers act as advocates and brokers of services for the developmentally disabled individual to obtain the most appropriate services available.

The regional centers are operated by separate, private nonprofit corporations, who are under contract to the state. There are 21 regional centers in the statewide system which provide or arrange, for the purchase of diagnostic, genetic and family counseling, referral, guardianship, workshop, community living placements, special schooling and medical and dental care services.

b. Continuing Care Services

The continuing care services element provides protective social services to 7,800 developmentally disabled persons so that these individuals may remain in their own homes, or in acceptable alternative living arrangements. Services are provided, at the request of the regional centers, through 37 offices throughout the state. Most individuals served are linked to social welfare programs, and matching funds are used to serve them.

This element offers a full range of case management services which include assessment of client needs, development of plans for meeting these needs, and periodic evaluation of accomplishments. Attention is given to basic living and care arrangements, and to the health, educational, recreational, and vocational needs of the developmentally disabled individuals served. A variety of individual, family, and group-based direct services are also available. When indicated, referral is made to appropriate community resources.

A major focus is on community placement. 6,275 clients are now in supervised out-of-home-care settings where the focus is on improving quality of care, including the recruitment and evaluation of family type homes.

Output	1974-75	1975-76	1976-77
Number of developmentally disabled clients served.....	7,897	8,100	8,500
Number in placement program	6,397	7,600	7,800
Number served with prevention services.....	1,383	1,500	1,550

c. State Hospitals

The state hospital element provides care, treatment, development, and maintenance services to clients. It also attempts to increase program effectiveness and develop innovative treatment modalities. The state hospitals provide service for the most demanding of the state's developmentally disabled population. These persons require special assistance in their physical, social, intellectual, and vocational development. They include blind, deaf, and disturbed persons; destructive, hyperactive adolescents; chronically physically ill people, as well as individuals with cerebral palsy, uncontrolled epilepsy, autism and other neurologically handicapping conditions. Admissions are based on determination by a regional center that the service provided by the state hospital is preferable to all alternatives. *Estimates of population and staffing adjustments utilizing 1968 SCOPE Standards are under review by the Department. Necessary budget adjustments to reflect the results will be submitted to the Legislature prior to committee budget hearings.*

d. Program Development

This element succeeds to the duties of the Office of Developmental Disabilities and Program Evaluation Unit. This section is responsible for statewide interdepartmental establishment of policy and program planning, development, and coordination in areas relating to developmental disabilities.

Activities include monitoring and measuring effectiveness, evaluating program and client outcomes, as well as providing assistance to the State Developmental Disabilities Council and the area boards. The section carries out the department's responsibilities as the single state agency for developmental disabilities under Public Law 91-517 and provides grants to public and private nonprofit agencies.

DEPARTMENT OF HEALTH—Continued

VII. SUBSTANCE ABUSE PROGRAM

Program Objectives and Description

The substance abuse program was established in 1973 to implement those provisions of the Campbell-Moretti-Deukmejian Drug Abuse Act of 1972, assigned to the Department of Health. The goal of the program is to insure the provision of a coordinated and comprehensive community-based program for the prevention, treatment and rehabilitation of narcotic addicts and drug abusers. The objectives of the program are to increase the personal and social functioning of narcotic addicts and drug abusers by assisting the counties in the development, implementation, funding and evaluation of drug treatment and rehabilitation programs; to protect the client and the public by reviewing, approving, monitoring, and evaluating the use of methadone in the treatment of narcotic addiction; and to reduce the incidence of illicit drug usage through drug education, prevention programs.

d. Alcoholism	165.5	110.6	—	29,197,003	28,188,736	—
e. Administration	(36.7)	(23)	(23.9)	(722,062)	(564,281)	(694,272)

a. General Drug Treatment Programs

The substance abuse program does not provide direct treatment services, but assists counties and local programs in the development, implementation, coordination and funding of community-based drug prevention, treatment, and rehabilitation programs. The program administers state funds through the county Short-Doyle program and federal funds through contracts with the counties or individual programs.

Legislation passed in 1975-76 will reduce the number of individuals apprehended for possession of marijuana being diverted from the criminal justice systems to local treatment programs. Because of this decreased demand for treatment services there is a reduction in the amount requested for 1976-77 of \$1,500,000. In addition, to insure that the available treatment dollars are being used effectively, the 1976-77 Budget includes \$118,530 for increased program evaluation staff.

b. Methadone Treatment Services

The substance abuse program supervises all organized use of methadone for the treatment of narcotic addiction. This involves the review and approval of methadone maintenance or detoxification program applications; monitoring, regulating, assisting and evaluating local methadone programs; approval of hospital pharmacies to dispense methadone; and approval of drug wholesaler to distribute methadone.

Methadone is a potentially dangerous narcotic and these activities are designed to protect the health of the client, reduce the unauthorized distribution of methadone to the general public and to simultaneously upgrade the quality of the treatment services associated with the dispensing of methadone.

c. Information and Evaluation Services

The substance abuse program administers the federally funded integrated drug abuse reporting process (IDARP) which will provide needed statistical and management information. This data collection system will serve as the basis for a "short-term" outcome evaluation methodology to be developed and implemented during 1976-77. An on-site 'process' evaluation methodology has already been developed and will be implemented beginning in January 1976.

The substance abuse program is also responsible for the development and implementation of a mass media drug education, information program which will increase public awareness and reduce the incidence of illicit drug use.

VIII. SOCIAL SERVICES PROGRAM

Program Objectives and Description

For many years California has provided social services to its elderly, blind, and disabled citizens and to children and families who need help. Since the passage of the Revenue Sharing Act of 1972, Federal social service funding has been closed end. California's ceiling for Federal social service funds is \$245 million. California has consistently used its full allotment of Federal funds and supplemented monies from State-local revenues for social service programs above the required 25 percent State-local participation level. For example, General Fund expenditures in fiscal year 1974-75 were 34 percent. Child care and family planning are other programs which are overmatched. The adoption program is exclusively supported by General Fund dollars. Thus, any savings or additional expenditures are 100 percent General Fund.

The Social Security Act which provides the authority for social service programs was extensively amended in 1975 by the passage of Title XX. The intent of Title XX, effective October 1, 1975, was to allow states greater flexibility to determine the social service needs of their citizens. However, no additional Federal funding was made available nor any provision to reallocate unused funds from other states. The required matching State-local participation remains 25 percent for all services except family planning which is 10 percent.

California has adopted the Federal Title XX goals. Programs are aimed at these five goals:

- to help people become or remain economically self-supporting;
- to help people become or remain self-sufficient (able to take care of themselves);
- to protect children and adults who cannot protect themselves from abuse, neglect, and exploitation, and to help families stay together;
- to prevent and reduce inappropriate institutional care as much as possible by making home and community services available; and to arrange for appropriate placement and services in an institution when this is in an individual's best interest.

Title XX allows states to provide services to individuals based on their income rather than limiting social services to those who are receiving cash assistance. This extends social services to many low-income persons not eligible prior to October 1, 1975. However, fifty percent of Federal funds must be spent for people eligible for Aid to Families with Dependent Children (AFDC), Supplemental Security Income (SSI), and/or Medicaid. States may elect to charge fees for specific services or to individuals whose incomes exceed a certain amount up to 80 percent of the state's median annual income. Persons served with incomes between 80 and 115 percent of the state's median annual income must be charged a fee.

a. Title XX Services

Title XX requires the State to include in an annual plan at least three services for recipients of Supplemental Security Income, family planning services for recipients of Aid to Families with Dependent Children and at least one service directed at each of the five national goals. The majority of services provided in California are mandated by State law; however, in addition each county is free to develop other services determined as needed in their own geographic area. Private citizens, community groups and service organizations, and public agency employees are continually identifying and assessing service needs within their local area and on a statewide basis.

The following describes the eleven services mandated by state law or regulation; included in the description are the estimated resources allocated and the number of persons served in 1975-76. (Persons receiving more than one service are counted in each service provided.)

1. Information and Referral

To provide to individuals information about social services available in the community and to help them to use the services appropriate to their needs. \$14.9 million and 2.6 million served.

2. Protective Services for Children

To enable children and their parents to receive prompt intervention in hazardous circumstances; to prevent or correct abuse or neglect of children and to prevent inappropriate institutional care. \$33.7 million and 220,000 served.

3. Protective Services for Adults

To enable adults to lead safe and reasonably comfortable lives in the community without fear or abuse, neglect, or exploitation. \$9 million and 57,000 served.

4. Out-of-Home Services for Children

To protect a child and his best interest when a substitute living arrangement is required because his parents are unable to care for him. This service includes temporary placement in a foster home, rehabilitation of a child's own home, or adoption or other permanent family care for children who cannot return to their own home. \$36.6 million and 89,000 served.

5. Out-of-Home Services for Adults

To enable adults to live in appropriate out-of-home care thereby reducing exploitation, neglect or debilitation, to reduce inappropriate institutional care and provide such care where appropriate. \$4.6 million and 38,000 served.

6. Child Day Care Services

To inform families about and arrange for provision of safe, quality substitute care for children of parents when such care is necessary to enable parents to obtain education or training for employment and/or secure employment, or to assure self-sufficiency, prevent or remedy neglect, and prevent or reduce institutionalization. \$81.5 million and 127,000 served.

7. Health Related Services for Adults, Families, and Children

To assist families and individuals to secure health services, to prevent illness and disease, correct disabilities, rehabilitate and reduce need for in-home and out-of-home care by the use of all available public and private resources under Medi-Cal, Medicare, and other programs providing health services. \$9.6 million and 198,000 served.

8. Family Planning Services

Give information about and offer family planning services to persons of childbearing age so that informed decisions can be made on limiting family size, spacing children, and preventing unwanted pregnancies, so to encourage economic self-support, self-sufficiency, and child protection. \$4.4 million and 123,000 served.

9. Homemaker—Adults

To enable persons to receive the services of a trained and supervised homemaker. Because of their inability to adequately care for themselves, these persons need such care and may be helped to improve their self-sufficiency and thus remain out of institutions. \$21.4 million and 32,000 served.

10. Chore Services—Adults

To enable persons with limited physical ability to be as self-sufficient as possible and to avoid institutionalization by receiving the services of a chore person in their own home. \$68 million and 104,000 served.

11. Employment Services—AFDC

The plan of self-support for AFDC recipients shall include services necessary to develop and follow through on an employment plan which enables the individual to accept employment, manpower services, or training designed to develop employable skills. \$15.4 million and 240,000 served.

In addition to the eleven mandated statewide services described above, many counties have designed a variety of carefully tailored special services that are unique to the needs of their local citizenry. As summarized, they contain both aspects in common and significant variations consistent with local concerns. For example:

A. Special care and service related to home, family, and personal capacities. Through placement of specially trained adults in homes of families served or through specialized professional guidance—(1) help parents learn homemaking and parenting skills which may prevent disruption of the family, (2) help parents to better manage family budgeting, nutrition, physical maintenance of the home, understand and practice better health habits and care of self and children, and (3) help children cope with school-related personal and social problems. \$18.1 million and 215,000 served.

B. Enable families and disabled or elderly adults to assess their circumstances related to serious housing deficiencies, special legal needs; counsel such persons relative to personal behavior which isolates them or makes them vulnerable to exploitation; act as facilitators to identify special financial, guidance or treatment resources which can help correct such problems and assist persons to use these resources to stabilize and enhance their personal, social and physical life situations. \$3.5 million and 45,000 served.

DEPARTMENT OF HEALTH—*Continued*

C. Provide special counsel and guidance to individuals incarcerated in jail; help inmates maintain family ties, stabilize families in the absence of the husband or wife; assist the inmates to prepare for release, employment and full citizen responsibility. \$100,000 and 1,200 served.

D. Enable blind persons to receive help essential to the unique circumstances of blindness. This includes strengthening their capacity to accept the fact of blindness, use fully their abilities by exploitation of training in mobility, personal care, home management, and securing of special aids such as talking books and other special appliances. \$100,000 and 1,000 served.

On a statewide basis, the Department of Health directly or through local purchase of services provides the variety of Title XX services as well as several specialized programs to assure mentally and developmentally disabled children and adults as well as alcohol and drug abusers can participate in activities and use special resources in the community. These include psychological, psychiatric and social work assessments; counseling; sheltered employment; specialized day care; training in self-care; home management, personal self-care and grooming, and community skills, which make possible early release from institutions, living in the community, and prevents reinstitutionalization, and when needed, provision of caretakers in own home or placement in an alternate family setting. \$35.6 million and 56,000 served.

This budget reflects a ten million dollar General Fund increase in the current and budget year to meet the increased demand for homemaker and chore services. Legislation will be supported to define program priorities and funding responsibilities.

b. Services Management

Social workers and technical staff of the services management element develop a program and financial plan for (1) allocation of federal funds to counties, (2) social services delivery methods, (3) purchase of services via contract, and (4) a goal-oriented reporting system for accountability of program and cost effectiveness.

Monitoring efforts have been intensified to assure better management of limited social services funds, particularly homemaker/chore funds, and to avoid further expensive federal audit exceptions. Monitoring effort in one county has demonstrated that several million dollars in homemaker/chore funds can be better utilized by that county.

This fiscal year signals implementation and statewide supervision of federally mandated social services reporting requirements (SSRR). A 3 percent penalty will be levied against any state which fails to comply with the federal reporting requirements. Continued noncompliance would jeopardize the entire \$245 million of federal funds.

c. Services Operations

The services operations element (1) formulates, interprets, and enforces social services policies, regulations, procedures, and administrative directives required by federal and state laws; (2) conducts on-site visits for program reviews and consultations; (3) coordinates with other state agencies relevant to social services delivery; and (4) assesses program components of services plans and contracts.

d. Adoption Services

The adoption services element (1) establishes adoption program standards and regulations, (2) reimburses public adoptions agencies' costs, (3) directly and indirectly provides relinquishment and intercountry adoption services, and through district offices and nine delegated county adoption agencies studies all independent adoption placements to present recommendations to the court, (4) operates an interagency adoption information exchange system, (5) assures the legality of infant releases from hospitals and of all relinquishment for adoptions, (6) maintains basic records on all California adoptions, and (7) administers and regulates placement of children across state lines.

Output	1974-75	1975-76		1976-77	
Relinquishment adoptions (Agency):		Public	Private	Public	Private
Children placed for adoption.....	2,553	2,100	600	2,200	600
Independent adoptions:					
Petitions	2,080	2,100	—	2,100	—
Intercountry Adoptions:					
Home studies completed.....	413	350	200	350	200
Children placed	364	310	175	310	175
Children under supervision	360	310	175	310	175

e. Special Services for the Blind

The special services component for the blind (1) develops special services standards unique to the needs of blind persons, (2) arranges medical determinations of degrees of blindness, and (3) consults with county welfare directors and staff to assure structures and procedures to emphasize self-support, home management, and mobility for the blind.

^a Includes \$10 million deficiency funding.

^b Expenditure data not available from the Department of Education, includes \$10 million deficiency funding.

DEPARTMENT OF HEALTH—Continued

IX. MEDICAL ASSISTANCE PROGRAM

Program Objectives and Description

The Medical Assistance Program has primary responsibility for the administration of California's medical assistance program (Medi-Cal), serving over 2.4 million Californians. The program's objectives include assuring that quality health care is provided to those California residents unable, either wholly or in part, to pay for their medical services, and to assure that services are delivered at a reasonable cost, under proper controls, to insure maximum utilization of public funds.

Organizationally the Medi-Cal Eligibility element is responsible for the coordination, clarification, and implementation of procedures to assure that Medi-Cal eligibility is determined accurately and on a timely basis by the fifty-eight county welfare departments. The section reviews and evaluates program eligibility requirements, and assures compliance with federal Medicaid regulations. The section proposes new legislation, new regulations, and identifies policy issues for executive staff consideration. The element prepares and implements corrective action plans to meet the objectives of the federally-mandated Medicaid Eligibility Quality Control Program. The element also reviews fair hearing decisions concerning eligibility matters and recommends action to the director.

The Medi-Cal Benefits element is responsible for functions relating to the scope and duration of benefits, provision of services, and payment for health care services; recommending and developing laws, regulations, and policy for administration of these functions; and maintaining liaison between the department, providers, and professional organizations.

This element is being augmented by four positions to establish a unit to implement and monitor a pilot project on volume purchasing of various health care commodities directly from manufacturers on a competitive bid basis. The pilot project will serve as a feasibility study for implementation of volume purchasing on a statewide basis. Statewide implementation of volume purchasing has a potential savings of up to \$1,250,000 per month.

The Field Services element authorizes the provision of those health services which require prior approval; administers utilization control procedures and determines the appropriateness of placement of patients in hospitals, skilled nursing, and intermediate care facilities. These functions are performed by field offices located throughout the state by licensed professional consultants representing various medical disciplines. In addition, medical review teams determine the necessity for and quality of care given to consumers by institutional providers.

This element is to be expanded to monitor drug utilization on a statewide basis. Existing preservice and peer review controls with onsite audits will be supplemented by a post audit of prescriptions to create a total drug program cost control system.

The Fiscal Intermediary element implements Medi-Cal program policy and directs the processing of fee-for-service claims through private insurance carriers acting as intermediaries; coordinates program policy changes; issues directives to providers creating new policy or modifying existing policy; and insures departmental policies, regulations, and procedures are implemented by the intermediaries in a prompt and efficient manner.

The Medi-Cal Division administers the California Dental Service Contract and other pilot projects dealing with variations of the fee-for-service program. These projects are monitored and evaluated for statewide implementation potential.

A major thrust of the Medi-Cal Division is to eliminate as much unnecessary paperwork and as many procedures as possible to make the program more efficient as well as responsive to consumers and providers of services, while maintaining fiscal integrity.

Budget Assumptions for Medi-Cal Program

The assumptions underlying the estimated 1976-77 fiscal year expenditures for the medical assistance program (Medi-Cal) are:

1. The Institute for Medical Services Program will be implemented effective March 1, 1975 with an anticipated enrollment of 244,000 for fiscal year 1976-77.
2. County Administration Cost Containment plan in accordance with the Budget Act of 1975 will be implemented during January 1976.
3. Costs of hospital inpatient services will be controlled in accordance with an approved plan for payment on a reasonable cost basis. No change in rates over allowable costs in 1975-76 have been reflected in the 1976-77 estimate. Adjustments will be in accordance with the funding for price and provider rate increase reflected elsewhere in the Department's budget.
4. County participation in the cost of the program, as prescribed in Section 14150 of the Welfare and Institutions Code, will increase by 9 percent over the 1975-76 level due to estimated increases in the counties modified assessed value.
5. User and utilization increases of medical services will average 3.7 percent over the 1975-76 program level.
6. The Department of Health will meet federal requirements for obtaining 75 percent federal participation of electronic data processing costs of fiscal intermediary services and that other federal participation ratios will remain unchanged during 1976-77.
7. Medi-Cal eligibility simplification is assumed to be approved through legislation effective July 1, 1976 at an increased general fund cost of \$4,820,000.
8. The medical component of the Homemaker Chore Program will be shifted to Medi-Cal Program to maximize federal financial participation. The Medi-Cal cost component of this shift will be \$4,500,000 general fund in 1976-77.
9. The estimate reflects no change in provider rates for 1976-77. Adjustments to rates will be in accordance with the funding for price and provider rate increases reflected elsewhere in the Department's budget.

Authority

b. County administration	-	-	-	85,467,686	94,641,400	98,791,800
c. Fiscal intermediary	-	-	-	33,791,665	38,532,100	42,892,000
d. Administration	(153.9)	(215.0)	(177.7)	(3,021,003)	(4,534,770)	(4,418,504)

a. Title XIX Services

Medi-Cal allows a resident to choose his or her own doctor, hospital, or other health service, or a resident may obtain these services through a prepaid health plan under contract with the Department. The entire program is supported by taxes at the federal, state and county level and no person who qualifies for Medi-Cal is denied medically needed program benefits.

There are four major categories of residents who may obtain Medi-Cal benefits. They are (1) Public Assistance Recipients who receive a welfare check through Old Age Security (OAS), Aid to the Blind (AB), Aid to the Disabled (ATD), Aid to Families with Dependent Children (AFDC), and children in AFDC families who do not receive welfare aid because they are not in school or enrolled in a training program and persons or families who could receive a welfare check, but do not want it (2) medically needy persons and families; (3) indigent persons under age 18; and (4) other indigent persons through 64 years of age, and indigent married persons under 18 years of age.

Health services available to Medi-Cal eligibles include the following: physician's office or home visits, hospital outpatient services, physical, occupational and speech therapy, foot care, eye care, chiropractic services, psychological services, prescribed drugs, laboratory, X-ray and radioisotope services, blood and plasma, hemodialysis services, nursing home services, dental services, home health agency services, medical transportation, artificial

DEPARTMENT OF HEALTH—*Continued*

limbs and braces, hearing aids, assistive devices and durable medical equipment, eyeglasses, artificial eyes, eye appliances, inpatient hospital services and health screening for persons under age 21. Some of the above services must be approved by Medi-Cal before they may be given.

The following scope and limitations are applicable to the program:

Professional Providers

Included in the professional provider category are physicians, optometrists, chiropractors, podiatrists, psychologists, opticians, occupational and physical therapists.

Outpatient services rendered by these providers are a covered benefit subject to utilization controls.

When provided in connection with a covered hospital stay, surgical and other inpatient procedures are a fully covered benefit.

Prescribed Drugs

Prescribed drugs are a covered benefit subject to utilization controls. Medi-Cal Formulary drugs with few exceptions may be provided without prior authorization. Most nonformulary drugs may be covered subject to prior approval by state Medi-Cal consultants.

Dental Services

Dental services benefits are provided through a pilot project contract with the California Dental Service (CDS). The state pays CDS a flat fee per beneficiary. CDS then approves and provides payment for covered services.

Hospital Services

Inpatient hospital care, whether provided in a county or community facility, is a covered benefit subject to utilization controls. Emergency admissions do not require prior authorization but the emergency must fall within specified criteria as defined in regulations. All hospital stays are subject to 'length of stay' guidelines established for a particular diagnosis.

Skilled Nursing Facility Care and Intermediate Care

Skilled nursing facility care and intermediate care services are covered benefits subject to utilization controls. Admissions must be on order of a physician and must be prior authorized. State medical review teams periodically review the level of care needed by each patient. Reauthorization of continued stays is required every 60 days except for those patients identified as needing "prolonged care." In these cases reauthorization may be required only twice a year. About 60 percent of all Medi-Cal patients fall into the category of needing "prolonged care."

State Hospitals

Medi-Cal pays for medical services for eligible mentally ill persons under 21 and over 64 in accredited state hospitals and for all eligible developmentally disabled individuals in state hospitals for the mentally retarded.

Other Services and Supplies

- Home health agencies
- Short-Doyle Provider Services
- Independent laboratories
- Medical transportation
- Prosthetic and orthotics
- Hearing services
- Blood bank
- Durable Equipment such as Wheelchairs and Byrd-Bennet Breathing Apparatus
- Oxygen
- Medical Supplies

The above services, except for Short-Doyle provider services are subject to limitations on the number of services and/or prior authorization. Any emergency service however, may be provided without the prior approval of the department.

Title XVIII Buy-In

Medi-Cal pays Title XVIII Part B medical insurance premiums for Medi-Cal eligible individuals 65 and over and those persons that have been disabled and are on Social Security for two or more years. Coverage includes physicians' services, outpatient hospital services and other necessary services and supplies. Subject to a yearly deductible, Medicare Part B pays 80 percent of reasonable charges (or costs where applicable) for covered services.

Implementation of Dialysis Medi-Cal Program

Chapter 1531 of the Statutes of 1974, effective September 27, 1975, added Article 4.4 (commencing with Section 14140) to Chapter 7 of Part 3 of Division 9 of the Welfare and Institutions Code. This law provided for special Medi-Cal eligibility for persons in need of dialysis and related services. Dialysis and related services are covered under the Dialysis Medi-Cal program for persons who are not otherwise eligible for Medi-Cal and, if under 65 years of age, not otherwise eligible for Medicare. The law provides that each Dialysis Medi-Cal beneficiary must pay 1 percent of the cost of his dialysis and related services for each \$5,000 of the beneficiary's annual net worth.

Dialysis and Related Services

Covered under this program are renal dialysis, renal homotransplantation, and all related services which include dialysis center services, hospital services, physician services, medical transportation, laboratory tests, medical supplies and drugs related to renal dialysis renal homotransplantation, the treatment of renal failure, and complications related thereto.

b. County Administration

The overall Medi-Cal responsibility of the 58 county welfare departments is to make accurate and timely determinations of eligibility for Medi-Cal's Medically Needy and Medically Indigent programs and to evaluate the effects of changing circumstances on eligibility. In addition, county welfare departments determine eligibility for cash grants under Aid to Families with Dependent Children (AFDC). This group is automatically eligible for Medi-Cal.

County welfare departments assist the Department of Health in achieving program objectives by identifying and recommending changes in procedures and policy matters. Counties are reimbursed by the state for their administrative expenses incurred in determining eligibility through a time reporting system.

c. Fiscal Intermediary Operation

Since the inception of the Medi-Cal program in 1966, the department has contracted with California Physicians' Service (Blue Shield), Hospital Service of California (Blue Cross North), and Hospital Service of Southern California (Blue Cross South) to serve as the program's fiscal intermediaries for claims processing and payment activities. Effective November 1, 1972 these three organizations consolidated their Medi-Cal claims processing

DEPARTMENT OF HEALTH—Continued

activities into a single administrative structure to improve their claims payment system. The new structure is called Medi-Cal Intermediary Operation (MIO).

The MIO system features a consolidated data base which provides for the processing of Medi-Cal claims for both institutional and professional providers utilizing prepayment utilization control, utilization review and program information reporting, screening based on a review of beneficiary treatment profiles, post payment utilization review, and appropriate provider relations activities.

The department reimburses MIO on a cost basis for expenditures made in the processing and payment of claims.

MEDI-CAL EXPENDITURES

	1974-75	1975-76	1976-77

X. ALTERNATIVE HEALTH SYSTEMS PROGRAM

Program Objectives and Description

Alternative Health Systems Program has the responsibility for developing, monitoring, and evaluating alternatives to the established fee-for-service health care delivery system. The emphasis of this program is directed to consumer involvement, quality of care, preventive medicine, and fiscal and management integrity with medical providers providing health care services on a prepaid basis to Medi-Cal beneficiaries. Prepaid health plans provide or arrange for health care services for voluntarily enrolled public assistance recipients within a geographically defined area. The prepaid health plan is paid a fixed monthly premium per capita for providing health care services to enrollees and is required to provide, as a minimum, the basic scope of Medi-Cal benefits to enrollees.

After complete reevaluation of the Prepaid Health Plan Program, the Department of Health concluded that significant changes were needed in group prepayment practices under the Medi-Cal program. As a result, the Institute for Medical Service concept, instituted during the 1975-76 fiscal year, replaced the former Prepaid Health Plan Program. The major changes were:

1. Consumer involvement on the boards of directors of each institute.
2. Preventive care as a mandatory component of each IMS operation.
3. Guaranteed 24-hour emergency care available at each IMS.
4. A limit of administrative costs paid to established and new health care service plans.
5. Systematic scrutinizing of IMS medical and financial operations by Department of Health medical professionals and auditors.
6. Department of Health employees involved in administration of the IMS program and IMS contractors and subcontractors are required to disclose financial and family interests in every contract and subcontract.
7. Only stable, multi-specialty group practices or community-wide foundations for medical care are participating.
8. Incentives for continuity of care are explored.
9. Open enrollment for the general public is encouraged.

These changes have called for substantial shifts in emphasis and staffing within the program. The department provides the needed technical assistance to the plans while, at the same time, increasing effectiveness of monitoring efforts to insure that health care services are available and of high quality, that Institutes are in sound financial condition and are allocating capitation dollars appropriately, and that enrollees benefit from the practice of preventive medicine and health maintenance.

With the enactment of Chapter 941/1975 (AB 138), the potential for overlap in regulatory responsibility over health care service plans has increased between the Department of Health and the Department of Corporations. The nature of this duplication is currently under review. Interagency arrangements to reduce overlap and to clarify responsibilities may impact on staffing and responsibilities in Alternative Health Systems Division.

Authority

Welfare and Institutions Code, Section 14000; Social Security Act, Title XIX as amended.

XI. LICENSING AND CERTIFICATION PROGRAM

Program Objectives and Description

This program regulates over 40,000 hospitals, nursing homes, clinics, group homes, nurseries and preschools, foster homes, half-way houses, day care centers and homes, and other similar public and private, medical and nonmedical, out-of-home care facilities. Licensing works to assure the public that all such facilities in California meet established care standards. It also works to prevent misuse of public funds in this and other department-administered programs.

To apply the standards, the Licensing and Certification Program maintains a physical inventory of health facilities; approves construction plans; manages a variety of construction grants and loans; evaluates and reports on services and condition of facilities; cites deficiencies; helps develop plans for correction; issues, denies or revokes licenses; certifies facilities for eligibility in the Medicare and Medi-Cal programs; investigates complaints, levies fines; controls performance of other public agencies and agents under contract for these activities; and investigates and assists in the prosecution of fraud among the 8.6 million beneficiaries and 80,000 providers of care in department-administered programs.

The Licensing and Certification Program has five elements: licensing, provider participation, services approval, investigation, and construction. Sixteen offices are located throughout the state, with headquarters in Sacramento. Contracts for delivery of services are negotiated with the Office of Architecture and Construction, the State Fire Marshal, Los Angeles County health services, and with most county welfare departments.

a. Facilities Licensing

Licensing of health and community care facilities is designed to insure that people receive the appropriate kind, quality and level of care for which each facility is licensed.

Facilities licensing personnel evaluate community resources and services for compliance with state and federal regulations. All facilities are visited unannounced at varied times during the week. The licensing evaluators tour facilities, talking with patients, residents, nurses, cooks, activity directors, etc., checking records to assure medications and services are being given according to directions. Any deficiencies are noted and the facility operator must make specific commitments for correction within specified deadlines. Facilities with serious patient care deficiencies may be subject to a fine of \$50 to \$5,000. Follow-up visits are made to assure correction. Additional unannounced and unscheduled visits are made to investigate complaints about conditions or treatment of patients or residents.

Chapter 102/1975, exempted child day care facilities from licensing fees. The Department is now operating a self certification program for the licensing of day care facilities. This new procedure will allow staff to spend more time responding to complaints and counseling problem facilities. The Department will support legislation which will make this program change permanent.

DEPARTMENT OF HEALTH—Continued

b. Provider Participation

The provider participation element of the Licensing and Certification Program controls participation in the Medi-Cal program of all eligible public and private hospitals; skilled nursing facilities; intermediate care facilities; clinics; home health agencies; rehabilitation centers; clinical laboratories; portable X-ray units; and physical therapists. State statutes require that services provided to Medi-Cal patients be rendered from facilities which have been certified to participate in the Medi-Cal program after meeting specific regulatory standards.

Time-limited contracts are entered into with health facilities based upon field reports and recommendations from licensing and accrediting agencies. This element monitors violations of the standards of participation and noncompliances with contracts which could endanger the health and safety of Medi-Cal patients. When action is taken to suspend or terminate Medi-Cal payments to those facilities which do not provide medical care that meets state and federal standards, notice is given to relatives, placement agencies, and others concerned to assure that ample time is given for relocation of patients prior to the termination of Medi-Cal payments.

Output	1974-75	1975-76	1976-77
Long Term Care Facilities:			
Number of facilities certified as	1,228	1,216	1,204

Closed facilities	27	29	33
Decertified	—	1	2
Voluntarily withdrew from program	4	5	7

c. Services Approval

This element provides intensive specialty training to skilled nursing facilities staff to improve the quality of patient care. It provides direct consultation to the facilities, conducts workshops for groups of health workers, and prepares manuals and pamphlets to educate and train nursing facility staffs in better methods of patient care. Physicians, specialized nursing consultants, pharmacists, nutritionists, physical and occupational therapists, medical record consultants, and medical social workers are employed for this effort.

This element also reviews specialized services in general acute care hospitals and outpatient settings. Surveys in skilled nursing facilities and other health facilities are conducted when appropriate.

Output	1974-75	1975-76	1976-77
Deficiency investigation and correction visits	2,617	4,212	5,100
Testimony in support of enforcement hearings	72	113	153
Specialized services visits	246	1,675	2,027
Training sessions for facility personnel	575	864	1,054

d. Investigation

The state plan for the administration of the Medi-Cal program provides that the Department of Health will implement methods and criteria for identifying situations in which a question of fraud may exist and for referring violators to law enforcement officials for prosecution.

The investigation element provides field investigators and special auditors who evaluate complaints received by the department alleging abuse of the Medi-Cal program. A full investigation is made of those complaints that concern the possible commission of a crime, or a violation of a statute or regulation particularly those violations that have potential for serious harm to a beneficiary, involve a significant amount of Medi-Cal funds, or show a repetitive pattern suggesting systematic abuse of the program. Investigations are conducted in full cooperation with law enforcement agencies, and investigators provide support during court trials to prosecute violators and supply documentation of overpayments for use in recovery of public funds.

Output	1974-75	1975-76	1976-77
Complaints received (total)	6,088	6,000	6,000
Providers	2,614	2,700	2,700

Investigations closed, with action	1,629	1,650	1,650
Overpayments identified	\$1,072,824	\$1,260,000	\$1,260,000
Investigations completed	3,916	4,000	4,000

e. Facilities Construction

Many California communities have serious financial problems when expanding, modernizing, or replacing aging health facilities to meet growing public demand and strict earthquake and life safety requirements. High costs have prompted federal and state programs for funding grants and loan guarantees. The Department of Health's approval of building plans is required for funding to the communities. Construction plans and specifications for all major facilities are reviewed for compliance with state building codes as prerequisite for licensing. Plans of hospitals and other facilities designated in the law are checked for compliance with state seismic safety requirements.

Output	1974-75	1975-76	1976-77
Construction value	\$253,585,200	\$354,351,682	\$420,000,000

XII. DISABILITY EVALUATION PROGRAM

Program Objectives and Description

California residents with physical and/or mental disabilities may qualify for benefits under Title II (Disability Insurance), Title XVI (Supplemental Security Income), Title XIX (Medical Assistance) of the Social Security Act, or related state public assistance programs. Entitlement to these benefits requires social security coverage or qualification for public financial assistance and that the disabling condition preclude gainful employment for at least one year.

The responsibilities of the Disability Evaluation Program are (1) to measure the disability with the claimant's capacity to work, and (2) to refer for vocational rehabilitation services those claimants having rehabilitation potential. These activities are detailed in agreements, under which the program is fully reimbursed from federal or state contract funds.

Activity begins with a claim filed at a Social Security Administration district office, or a county welfare department. Analysts trained in the evaluation of disabilities and attuned to the job market, consult with program medical consultants and gather and evaluate medical and other evidence of disability. Current medical evidence, when needed, is purchased from local physicians, medical evaluation clinics, or similar sources. During the process, activities involving potentially rehabilitatable claimants are coordinated with the State Department of Rehabilitation. Program responsibility ends with notice to the Social Security Administration or county welfare department of the decision made on the claim.

Authority

Federal laws: Social Security Act (Titles II, XVI, XIX).

XIII. ADMINISTRATION

The Administration Division functions as the 'administrative arm' of the Department providing support and control services of the utmost importance for efficient management of the Department's programs. The broad areas of responsibility assumed by this Division include financial management, management analysis and consultation, systems analysis, equipment and space management, personnel services, evaluation and statistical procedures, and general administrative information. The Administration Division includes four Branches for staff support:

Financial Management Branch

This Branch (comprised of the Rates and Fees, Budget, Accounting, Fiscal Systems, Patient Benefits and Accounts, and Contracts, Grants and Project Management Sections) is responsible for administration and reporting of the fiscal resources and related activities of the Department including maintenance of accounting records (both internal and patient assets), analytical determination of provider reimbursement rates, management of contracts and grants, and preparation of the Governor's Budget.

Management Systems and Computer Services Branch

This Branch (comprised of Management Consultation, Systems Analysis, Data Processing Services, Center for Health Statistics and Evaluation Procedures, and Vital Statistics Sections) is responsible for providing effective and efficient consultation to management, data services, system support and other technical expertise to solve problems normally present in the management of a large department. In addition, health statistics, both public and pertaining to Departmental programs, are maintained by components of this Branch.

Manpower Administration Branch

This Branch (comprised of General Personnel Services, Training and Special Personnel Services, Employee Relations, and Health Manpower Development Sections) provides a broad spectrum of personnel services, including recruitment, personnel transactions, training, employee safety and health, employee rights, and employee/employer relations.

Program Services Branch

This Branch (comprised of Business Services, Office Services, and Facilities Planning Sections) provides centralized clerical, duplicating, correspondence, and other office services support, equipment control, space management, and facilities construction and repair planning services.

Authority

Chapter 4, Statutes of 1965, Second Extraordinary Session. XIV. LEGISLATIVE MANDATES

This program reflects the cost of reimbursing local governments for (1) property tax revenue loss, (2) new programs, and (3) increased level of existing services mandated on local entities by legislation or executive regulations.

DEPARTMENT OF HEALTH—Continued

Authority

The State is required to pay the cost of legislative programs mandated on local governmental entities by Chapter 1406, Statutes of 1972 (SB 90), as amended by Chapter 358, Statutes of 1973. These two pieces of legislation apply to mandates effective after January 1, 1973. As added by such legislation, Section 2229 of the Revenue and Taxation Code provides for reimbursement of lost personal property tax revenues, while Section 2231 provides for the reimbursement of costs of legislative mandated programs.

Following is a table and descriptions of legislative mandates.

Program Requirements	1974-75	1975-76	1976-77

1. General Description

Chapter 954, Statutes of 1973, attempts to insure that students giving X-rays are closely supervised by a licensed instructor or a licentiate of the healing arts by authorizing the Department of Health to give approval to licentiate of healing arts board to provide radiological technology on-the-job training. *Mandate*

To have a radiation specialist, as defined, present in the same room when all but defined students in a school for radiological technologists administer diagnostic or therapeutic X-rays on a human being. *Fiscal Data*

The unit: One hour of supervision by a radiation specialist.

Unit cost: \$8.

2. General Description

Chapter 1494, Statutes of 1974, augments the amount appropriated for Chapter 954, Statutes of 1973, for supervision of students giving X-rays. *Fiscal Data*

The unit: One hour of supervision by a radiation specialist.

Unit cost: \$8.

3. General Description

Chapter 453, Statutes of 1974, establishes a procedure to collect information about the frequency of sudden infant death through a mandated autopsy. The intention of the bill is to provide counseling and information to parents who have experienced the tragedy of suddenly losing an infant. *Mandate*

Requires the county health officer, upon being informed by the coroner of any case in which sudden infant death syndrome is the provisional cause of death, after consultation with the infant's physician of record, to inform all concerned if a determination is made that sudden infant death syndrome is the cause or probable cause of death. *Fiscal Data*

The unit: Contact with the custodian of a sudden infant death syndrome victim.

Unit cost: \$13.

4. General Description

Chapter 1061, Statutes of 1973, revises provisions for review and submission of county Short-Doyle plans, makes changes to timing of submissions, adds language providing for certain precare and aftercare services, provides that no expenditures reimbursed by the federal government shall be included in the Short-Doyle plan, provides that no administrative duties in local mental health services which serve a population in excess of 100,000 shall be carried out by a physician, psychiatrist, psychologist, or clinical social worker who is also performing in clinical program areas, and provides that the Department of Health shall submit a five-year plan for local mental health services by October 1 of each year. *Mandate*

This mandate impacts only upon counties in the following manner:

(1) Include a quality control system, a placement directory and training program in each county Short-Doyle plan.

(2) Perform administrative and supportive functions in local mental health services with staff skilled in those functions. *Fiscal Data*

The unit:

(1) (a) The county share on one month of service in compliance with Section 5661.5 (a), (b), or (c) by a local mental health agency employee.

(b) The county share of one month of expenses incurred through contracts in compliance with Section 5661.5 of the Welfare and Institutions Code.

(2) The county share of one month of service by an employee of a local mental health agency in compliance with Section 5751.2 of the Welfare and Institutions Code.

Unit cost:

(1) (a) \$121

(b) \$250

(2) \$180

5. General Description

Chapter 694, Statutes of 1975, grants developmentally disabled persons the right to have the court appoint a public defender or attorney to represent them during the appointment of a conservator or guardian in a guardianship hearing. Reimbursement is to be made for the cost of such legal service if the person is unable to pay the cost. *Fiscal Data*

Reimbursement is to be made for actual and reasonable costs.

6. General Description

Chapter 835, Statutes of 1975, requires the Department of Health to conduct a program of care and treatment for those persons suffering from cystic fibrosis who are 21 years of age or older. The law provides that the county cost of administering the case under the Crippled Children's Program will be paid by the State. *Fiscal Data*

Reimbursement is to be made for actual and reasonable costs.

XVI. PRICE AND PROVIDER RATE INCREASE

Program Requirements	1974-75	1975-76	1976-77
Totals, Price and Provider			
Rate Increase	—	—	\$70,490,217
General Fund	—	—	\$45,645,864
Federal Funds	—	—	\$24,844,353

Price and provider rate increase funds for Health programs are reflected separately for the 1976-77 fiscal year. Included in this item are provisions for price increases for certain Local Assistance Programs and the state's share of rate increases for nonphysician providers of health care services under the medical assistance program. These funds provide increases averaging 6.5% for labor related costs and 4% for non labor related costs. The funds are to be transferred to their respective program upon order of the Department of Finance. The following is the estimated allocation of General Funds by Program:

1. Medi-Cal	\$29,165,110
2. Local Mental Health	10,877,250
3. Social Services-Adoptions	765,565
4. Crippled Childrens Services	1,299,448
5. Developmental Disabilities	2,634,819
6. Public Health Subvention	903,672
General Fund Total	45,645,864

EMPLOYMENT DEVELOPMENT DEPARTMENT

The Health and Welfare Agency through the Employment Development Department provides comprehensive statewide and local manpower planning, improves the efficiency of and accountability for delivery systems for manpower programs, promptly places job-ready individuals in suitable jobs, provides qualified job applicants to employers, assists potentially employable individuals to become job ready, creates employment opportunities, and pays unemployment and disability insurance benefits.

The department's overall balanced program is designed to achieve its five essential, interrelated and interdependent goals, all of which are equally important. The fundamental goals are:

1. Provide job placements.
2. Furnish job placements and related services to low-income clients.
3. Maintain an unemployment insurance and disability insurance benefit payment system.
4. Provide services to employers.
5. Place welfare recipients in jobs.

Employment Development offers a broad spectrum of services to the employables and their potential employers, including current and localized labor market information, instructions in job and employer requirements, seek-work methods, training and education in demand occupations, job development with employers and industries, placement services, and follow-up to improve job retention.

The resources and programs of the Office of Economic Opportunity are integrated into the objectives and programs of the department.

EMPLOYMENT DEVELOPMENT DEPARTMENT—*Continued*

SIGNIFICANT PROGRAM CHANGES

IXB *Migrant Services* provides temporary housing and other work-related services, including child care, at low cost to migrant farm workers and their families during peak harvest seasons. With the termination of federal aid in 1976, this program will be supported by an initial appropriation of \$3.76 million from the General Fund for 1976-77. *Migrant Services* will provide 25 migrant housing camps, replace 437 migrant houses, construct 163 sanitation facilities, and provide day-care services to 2,100 children. The housing rehabilitation will afford opportunity for off-season employment to families who desire winter work.

I. EMPLOYMENT SERVICES PROGRAM

Program Objectives and Description

The citizens of the State of California benefit from having a stabilized and growing economy. However, many employer job openings remain unfilled with a loss in production of goods and services and at the same time, large numbers of potential job applicants are unable to find employment and suffer wage loss and lack buying power.

The program objective is to provide a labor exchange for employers and job-ready applicants, thereby, reducing the period of time employers' jobs go unfilled and job-ready applicants are unemployed.

Authority

Federal: Wagner-Peyser Act; Title III, Social Security Act; Presidential Executive Order 11422, August 15, 1968.

State: Unemployment Insurance Code; Division I, Part I, Chapters 1, 9 and 9.5: Divisions 2, 3 and 4.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Totals, Employment Services Program	2,636	2,537.1	2,528.6	\$50,509,839	\$50,145,934	\$52,573,629
Federal funds				50,044,703	49,428,769	\$51,783,983
Contingent fund				465,136	717,165	789,646

Program Elements

a. Applicant assessment	567.8	519.4	511.2	\$9,765,010	\$9,799,355	\$10,106,394
b. Job placement	1,019	887.4	887.4	20,476,968	17,021,380	17,902,980
c. Indirect services	849.9	890.5	890.5	16,397,061	18,511,679	19,464,245
Administration distribution	199.3	239.8	239.5	3,870,800	4,813,520	5,100,010

a. Applicant Assessment

The objective of this element is to promptly identify the skills, knowledges and abilities of job applicants and to assist them in making occupational choices, thus reducing the time period in which they are seeking employment.

Assessment is accomplished through a variety of procedures such as completion of work application, analysis of work history, education, individual skills, knowledges, and abilities, and when necessary, by employment counseling and testing. Employment counseling will also be provided applicants with problems of adjustment for the purpose of manpower training, medical assistance, social services, and other services supporting employability.

Output				1974-75	1975-76	1976-77
Individuals assessed				1,147,538	1,220,000	1,167,900
Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	567.8	519.4	511.2	\$9,765,010	\$9,799,355	\$10,106,394

b. Job Placement

The objective of this element is to match the needs and skills of the job-ready with job openings in order to operate an effective labor exchange and to develop openings for those applicants for whom no suitable openings currently exist.

Applicants will be selected and referred to job openings received from nonagricultural and agricultural employers by matching applicant qualifications and job descriptions. Employers will be contacted to develop job openings for applicants for whom no suitable openings currently exist.

Output				1974-75	1975-76	1976-77
Individuals Placed						
Total agricultural						
nonagricultural				293,941	305,000	291,100

Expenditures.....	1,019	887.4	887.4	\$20,476,968	\$17,021,380	\$17,902,980

c. Indirect Services

The objective of this element is to provide support to the direct employment service functions by providing (1) manpower information, (2) employer and union services, (3) community services, (4) management, supervisory and technical services, and (5) career development training. Through such efforts, an effective network of statewide labor market information will be maintained, the relationship between potential users of employment services and the department will be strengthened, and effective supervisory support will be realized.

Labor market information responsibility has been assigned to all field offices of the department (except disability insurance offices), to collect, coordinate, maintain, and disseminate published occupational data and labor market information. Responsibility for identification and dissemination of state and national labor market information needed locally is vested with Employment Data and Research Division.

To strengthen the job placement operation, services to employers and unions are provided through field offices. These services include the provision of available applicant supply information, anticipated changes in the local economy and assistance in applicant recruitment.

To further strengthen the placement services, field office staff works with chambers of commerce, local office advisory committees, civic groups, and governmental agencies to stimulate broadly based community action to solve manpower problems hindering maximum development and use of human resources.

In the area of employment services management and supervision, effort will be maintained to insure that the responsibilities and goals of the department will be met and to take corrective actions to reduce deficiencies and deviations from goals.

II. WORK INCENTIVE (WIN) AND RELATED SERVICES PROGRAMS

Program Objectives and Description

A significant segment of California's population is dependent on welfare payments. Government costs are reduced by making this group self-dependent.

WIN and related services are designed to get employable welfare recipients jobs. Various activities are included within this program: Work Incentive Program (WIN), employment related social services, and Food Stamps. The objectives of these program elements are to place welfare applicants/recipients in regular, unsubsidized jobs at the earliest opportunity and to provide occupational training to the marginally employable.

Employable applicants for and recipients of "Aid to Families with Dependent Children" (AFDC) benefits must register with EDD for employment, manpower services, and training. Intensified employment and supportive services are given to employable recipients in order to assist them in obtaining regular, unsubsidized employment. Coordination of employment and supportive services to those recipients is greatly facilitated by the voluntary collocation of county social service (Separate Administrative Unit, SAU) staff and EDD staff.

In an effort to obtain employment for registrants and WIN participants, EDD staff contacts employers by mail, telephone, and in person to develop jobs. Employment Preparation workshops are conducted for job-ready registrants and WIN participants. These workshops include guided work search, test taking tactics, employer application form completion, and other areas selected to meet the needs of specific groups of participants.

Authority

Federal: WIN—Title IV of the Social Security Act, as amended by PL 92-248 and 92-223.

CWEP—Three-year demonstration project approved by the U.S. Department of Health, Education, and Welfare (HEW) under authority of the Social Security Act. (ended June 30, 1975)

Food Stamps—PL 91-671, PL 92-603 and PL 93-86 amendments to the Food Stamp Act of 1964.

State: WIN—Unemployment Insurance Code, Division 2, Sections 5000-5308.

CWEP—State Welfare and Institutions Code Section 11325.

¹ Evaluation only

a. WIN

Registration with EDD is a condition of eligibility for AFDC benefits unless an individual is determined exempt under the exemption criteria established by federal legislation. Individuals determined exempt from registration may volunteer to register.

At the time of registration, registrants are assessed as to their degree of employability in their local labor market areas. Services are provided in relation to employability.

Recipients selected for WIN components are to be advised of their rights and responsibilities and the purpose of the WIN Program. This orientation may be provided on an individual or group basis.

WIN staff in EDD offices are responsible for determining whether or not a WIN participant has refused to participate. If it is determined that a refusal has taken place, it must be decided if the refusal was "with good cause" or "without good cause". If it is determined that the refusal is "with good cause," the person continues in the program. If it is determined that the refusal is "without good cause," the Separate Administrative Unit provides 60 day counseling after which a sanction may be applied.

The intent of WIN-OJT is to provide a job for the recipient in a contractual agreement which provides vocational training and an opportunity to enter regular, unsubsidized employment. It is intended that the recipient will remain in employment after the completion of the subsidized training period.

The intent of WIN-Public Service Employment (PSE) is to provide a job for the recipient with a public agency or private non-profit organization which serves a public purpose. PSE is to be negotiated for jobs which would not otherwise be performed by regular employees.

Institutional training teaches a specific occupational skill in a classroom setting. This training consists of basic education, English as a second language, General Educational Development, and vocational training.

Output	1974-75	1975-76	1976-77
Participants Served.....	64,908	77,937	78,000

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	924.5	922.8	922.8	\$32,187,801	\$35,926,713	\$35,879,431

b. Employment Related Social Services

Employment Related Social Services are designed to assist in the placement of WIN participants into jobs in the shortest time possible. The need for social services is identified by EDD staff and provided or arranged for by welfare department staff. Employment related services are child care, family planning, counseling services, employment related medical, remedial and health care services not available elsewhere, selected vocational rehabilitation not otherwise funded and other supportive services included in the WIN state plan.

EDD provides the State matching share money for WIN Child Care and thereby has the responsibility for the administration of these funds.

The cost of premises for the co-located staff housed in EDD offices is shared by welfare departments.

Staff filling EDD social services positions facilitate the coordination of EDD local office and county welfare department activities. Only EDD coordinating staff are shown in this element. County welfare participation will be approximately 400 positions during the 1975-76 fiscal year.

EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

Output				1974-75	1975-76	1976-77
Registrants served				340,000	350,000	350,000

Expenditures.....	2	2	2	\$1,733,909	\$1,891,256	\$1,898,696

c. Food Stamps

The objective of Food Stamp work registration is to provide direct job placement and employability services to food stamp recipients. These services are intended to help the food stamp recipients become employed and self-sufficient so that food stamps are no longer needed. Applicants for food stamps are referred to EDD as part of the food stamp process to register for work or employability services. AT EDD the applicant is interviewed and an assessment of his employability needs is made. After registration, the food stamp applicant is regularly considered for any job openings or services that become available.

III. SERVICE CENTER PROGRAM

Program Objectives and Description

The Service Center Program brings together in one location in areas of high unemployment intensive, coordinated governmental and nongovernmental services for long-term unemployed or vocationally handicapped residents who lack employable skills, are disabled, have limited education or poor work habits. The Service Center offices may include consultants on legal aid, housing, social security, family service, education, law enforcement, and veterans' services.

The Service Center Program is being evaluated and a report will be prepared for the Legislature by January 1, 1976. Program changes may result from this report. In addition the Job Agent positions provided in past Service Center budgets are established as a separate program.

Authority

Governor's Executive Order 66-11 (July 1, 1966).
Chapter 1460, Statutes of 1968.
UI Code, Section 301.5.

Output

During this period of evaluation the Service Centers will continue meeting the guidelines established for past program elements. Following submittal of the report to the Legislature on January 1, 1976, program elements will be redesigned based on acceptance of the recommendations in the report.

IV. JOB AGENT PROGRAM

Program Objectives and Description

The Job Agent is responsible for providing direct and intensive services to those individuals in economically disadvantaged areas who, because of racial discrimination, lack of education, impoverishment, or other social or economic reasons, are unable to benefit from mainstream placement functions and therefore require individualized placement assistance. Beyond placement assistance, Job Agents also provide such services as assistance with legal problems, job training, continuing psychological support, client advocacy, and post-employment follow-up.

Job Agent positions which have been funded through past Service Center budgets are established as a separate program.

V. STATE MANPOWER PLANNING OFFICE

The State Manpower Planning Office (SMPO) administers funds provided to the State under the Comprehensive Employment and Training Act of 1973 (CETA) for vocational education services, support of the State Manpower Services Council, and statewide manpower services. SMPO also acts as the prime sponsor for 28 California counties whose population is too small to qualify them for direct federal funding. As Prime Sponsor for Balance-of-State Counties (BOS), SMPO works in conjunction with local manpower organizations to plan and deliver services to meet the needs of the counties' unemployed, underemployed, and economically disadvantaged.

Through the California Manpower Services Council, the office provides for participation by local government, community based organizations, and labor, business, and client groups in the development of manpower policy and comprehensive plans. The office is also responsible for coordination of the manpower and manpower related programs and activities of all state agencies with those of local CETA prime sponsors.

Authority

Federal: Wagner-Peyser Act, Social Security Act; Federal Comprehensive Employment and Training Act of 1973 (CETA). Emergency Jobs and Unemployment Assistance Act of 1974, PL 93-567.

State: Division I, Part 1, Chapters 1, 9 and 9.5 and Division 2, 3 and 4 of the Unemployment Insurance Code; Employment Development Act of 1973.

a. Governor's Grant—California Manpower Services Council

The State Manpower Planning Office will provide staff and other necessary services in support of the California Manpower Services Council, provide technical assistance, and monitor the activities of the states 37 prime sponsors. SMPO will coordinate the programs of individual prime sponsors, state agencies, and local manpower and educational organizations with the purpose of eliminating needless duplication in the delivery of manpower services to the State's unemployed, underemployed and economically disadvantaged. Funds not used for the above purpose will be used to fund special demonstration projects and other manpower activities.

Expenditures.....	20.7	51.2	51.6	\$438,272	\$2,152,517	\$1,457,070

b. Governor's Grant—State Manpower Services

The State Manpower Planning Office will provide labor market, economic, demographic, and other appropriate information for the State's 37 prime sponsors by funding CETA positions in EDD's Division of Employment Data and Research. SMPO will also fund model demonstration training projects to meet the needs of offenders, minority youth, women, and other special groups in the State's labor force and explore more effective ways to deliver manpower services and training.

	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	13.1	27.3	26	\$753,746	\$12,138,270	\$6,069,135

c. Governor's Grant—Vocational Education

The Governor will provide vocational education funds to the Department of Education for the purpose of providing vocational education services to the State's 37 prime sponsors. The level of funding for services provided each prime sponsor will be based on each prime sponsor's percentage of the State's total number of adults in low income families. The services to be provided will be in accordance with non-financial agreements developed between the Department of Education and each local prime sponsor. Vocational Education services include classroom training, counseling, testing, assessment of need, and certain other services.

	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	-	-	-	\$2,665,515	\$13,538,829	\$8,250,000

d. Title I—Balance-of-State Prime Sponsor

The State Manpower Planning Office acts as the prime sponsor for 28 of the State's smaller counties. In conjunction with county manpower agencies, SMPO plans and delivers such Title I manpower services programs as on-the-job training with private employers, work experience with public and private non-profit employers for disadvantaged youth during the school year; and full-time work experience programs for unemployed, out-of-school youth, and classroom training that will lead to unsubsidized employment and/or advanced training.

EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	15.2	29.7	31	\$2,964,502	\$9,497,015	\$4,982,405

e. Title II—Public Service Employment

Under Title II, SMPO as prime sponsor acts in conjunction with individual counties to provide public service employment for the unemployed in city, county, and state government agencies as well as private non-profit organizations. The goal of public service employment is to train the unemployed for transition to full-time, unsubsidized employment.

	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	7.3	15.7	15.7	\$7,617,711	\$7,371,344	\$6,153,975

f. Title III—Summer Youth Programs

In the 28 balance-of-state counties, SMPO as prime sponsor will provide CETA-funded summer employment for economically disadvantaged youth in local government agencies and non-profit organizations

	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	0.1	1.9	1.9	\$1,867,314	\$2,995,742	\$2,498,592

g. Title VI—Emergency Employment Act

In response to the sharp increase in unemployment, Congress authorized Emergency Employment funds under Title VI of the CETA Act. SMPO, through subgrants with the individual counties and the State Personnel Board, has provided emergency employment at the local level in all 28 counties and in the offices of state agencies. Unlike Title II, the purpose of Title VI is to provide emergency employment. Transition to unsubsidized jobs is a secondary goal.

	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	2.3	13.9	—	\$5,150,222	\$23,319,358	—

VI. COMPREHENSIVE EMPLOYMENT AND TRAINING PROGRAM

Program Objectives and Description

Many of the unemployed, underemployed and disadvantaged are unable to compete in the labor market without additional education, vocational training, work experience, on-the-job training incentives, or other assistance. The Comprehensive Employment and Training Program provides comprehensive manpower services, including the development and creation of job opportunities, training, and education to these disadvantaged individuals. However, because of the implementation of manpower revenue sharing for manpower services under the Comprehensive Employment and Training Act of 1973, EDD's participation in manpower programs is expected to decline as other manpower operations assume program responsibility under contracts with prime sponsors. Under CETA, the Employment Development Department's role in manpower programs is no longer that of presumptive deliverer of services. Even in the 28 balance of state counties for which EDD is the prime sponsor, the counties plan their own manpower training expenditures as approved by EDD. In order to extend traditional employment exchange services funded to states to CETA clients and to encourage prime sponsors to choose EDD as a sub-grantee, close cooperation and coordination will be maintained with both balance of state counties and the other prime sponsors in the state.

Authority

Federal: Comprehensive Employment and Training Act of 1973.

a. Comprehensive Manpower Services (Title I)

Contract Services With Prime Sponsors Component

All funds formerly allocated to EDD for statewide manpower programs under MDTA/EOA are now included in the allocations to the 36 prime sponsors under CETA. The state, as prime sponsor, receives approximately 5 percent of the Title I manpower funds for the 28 smaller counties, while 95 percent of the funds go to the 35 local prime sponsors. Under CETA, EDD is involved in bidding for reimbursable contracts with prime sponsors, in competition with other potential program operators. EDD has made a concerted effort to link EDD operations with those of the prime sponsors and to act as a major manpower training resource in local areas. CETA contract services with prime sponsors will continue throughout fiscal year 1975-76. EDD will provide work experience, on-the-job training, vocational education, and placement and related services to target groups of eligible persons identified by the prime sponsors. Planning for fiscal year 1976-77 is based upon estimates from 1974-75 reports.

MTS Phaseout Component

This component has been phased out.

The new decentralized training type program provided for by the Comprehensive Employment Training Act of 1973, has transferred responsibility for Manpower Training Programs to local governments. Prime sponsors may elect to continue to use existing deliverers of service such as EDD, or they may contract with other agencies for those services formerly provided by EDD. EDD's goal is to complete program projects and to negotiate reinstatement of prime sponsor's training programs with EDD. This component provided for the efficient transition of responsibility for Manpower Training Services from EDD to local prime sponsors.

b. Emergency Employment Act Phaseout

During periods of high unemployment when demand in the labor market diminishes, the Public Employment Program provided jobs to unemployed and underemployed persons in public service agencies willing to train and prepare the individuals for permanent work within the agency or with other employers. The Public Employment Program is replaced with the Public Service Employment Program (PSE) established under the Title II of CETA. This element is the phaseout of the Public Employment Program (PEP) established by the Emergency Employment Act of 1971. PEP includes contracts with cities, counties, colleges and universities with a planned phaseout by September 30, 1975. The reduction in participants and costs in FY 1975-76 and the zero output and expenditures is the result of phasing participants into various titles of the CETA program.

Output				1974-75	1975-76	1976-77

Input				1974-75	1975-76	1976-77
Expenditures.....				5.8	0.5	—
				\$178,448	\$9,147	—

c. Public Service Employment Under Titles II and VI of the Comprehensive Employment and Training Act (CETA)

The responsibility for administering state agency participation in PSE is split between the State Personnel Board and the Employment Development Department. EDD is responsible for fiscal accountability of the funds received from each prime sponsor and for selection and referral of applicants to PSE positions. In addition, the coordinating office for Public Service Employment which is the signatory authority for exempt positions, is housed in and staffed by EDD personnel.

Output				1974-75	1975-76	1976-77

Expenditures.....	1.4	6.1	6.1	\$26,004	\$95,311	\$101,410

d. Job Corps (Title IV)

The Job Corps program functions to provide basic and remedial education and entry-level vocational skill training in a residential setting to low-income youth (age 16 through 21) who have been determined unable and/or unwilling to benefit from the education and training available in their home environment.

The Employment Development Department recruits and enrolls disadvantaged young men to fill California's quota of openings in Job Corps Centers. This number is determined at the national and regional level of the Job Corps Division, Department of Labor, based on the number of openings available in Job Corps Centers to which California youth are referred. Additionally, the Employment Development Department provides placement services to all California male and female returnees and relocatees from other states who desire placement services.

The Job Corps program is a continuing program directed by the U.S. Department of Labor. CETA does not transfer responsibility to CETA prime sponsors for the Job Corps program.

Output	1974-75			1975-76	1976-77
Enrolled in training	3,447			3,745	4,000

e. National Alliance of Businessmen-Managers of Manpower Development

The National Alliance of Businessmen (NAB) is a nonprofit corporation organized to assist persons who traditionally have had a problem in finding employment. NAB develops job and training opportunities for disadvantaged, ex-offenders, welfare recipients, veterans and in-school youth. NAB is operated by executives on loan from business and government, with salaries paid by the respective employers and by 14 governmental executives on loan from EDD as managers of Manpower Development (MMD) who coordinate NAB placement activities. Personal and nonpersonal services cost of the MMD are paid by the Department of Labor.

f. Labor Market Information

Through funds provided by the Department of Labor under Title III of CETA, the Employment Development Department fulfills the state's obligation to prime sponsors by providing information regarding local labor area conditions. Using this information, the prime sponsor is then able to gear training programs to the unemployment problems in that particular area.

EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

b. Unemployment Tax Collection

This contractual program is accomplished by the Department of Benefit Payments and funded through a federal grant to this department. The figures relating services provided by the Department of Benefit Payments for Employment Development Department are based on federal formula and are not necessarily accepted under workload computations of the State of California.

c. Unemployment Insurance Support

The unemployment insurance support element has always been critical to a viable quality program. Careful utilization of management and technical resources have, over the years, placed California as one of the low cost states commensurate with a high quality program. The economy of the program and the quality of operations is attributable to effective management and supervision, maximum utilization of staff technical services, planned staff development, continuing research to effect program improvements and initiating special projects to bring new processes to fruition.

The primary mission of supportive services, therefore, is to provide the Unemployment Insurance Program with the direction and resources to improve field office capability to better serve the workers and employers of the state.

Implementation of the embossed card payment system is expected during fiscal year 1975-76. This claims processing technique will be highly automated and will provide better service to the public and more effective controls.

The economic recession and rising unemployment insurance workloads have focused a great deal of attention on the Federal-State Unemployment Compensation programs. While the necessity and basic soundness of the unemployment insurance program has been sharply demonstrated, the need for a system more effectively geared to meet the needs of California's workers and employers is recognized. To this end, California has initiated a project to simplify while improving the steps necessary to file a UI claim. In addition, a request for funding has been made to the Manpower Administration to fund an Unemployment Insurance Redesign of Data Processing. The Primary objective of this redesign is to provide the capability in our field offices to determine monetary eligibility and benefit award information almost instantaneously. Both of the projects will require utmost dedication by UI Support Staff.

Central office and outstationed trainers will continue to provide the necessary training to maintain proficiency of UI staff. During fiscal year 1976-77 emphasis will be on developing better training methods and materials for formalized training to be supplemented by on-the-job training. Refresher training will be directed to correcting weaknesses identified by central office staff evaluations and the UI self-appraisal system and to effect improving the nonmonetary determinations, appeals and overpayment functions. To the extent practicable, employees will be cross-trained for unemployment insurance and employment service functions. This will improve field office staff utilization and permit maximum staff flexibility in meeting fluctuating workloads.

California's unemployment insurance cost model has resulted in significant changes in UI budget allocations wherein actual costs of liquidating UI contingency workloads can be demonstrated. This has resulted in a more realistic allocation of resources with attendant progression towards innovations, methods and procedures to improve the entire program. Unemployment insurance support staff is derived as a percentage of operational man year requirement based upon workload accomplishment. This method of allocation does not entirely meet support needs. The Department of Labor agrees that a better system to arrive at these needs is required and proposes that a study start using cost model methodology to evolve an allocation method based on demonstrated element requirements. During fiscal year 1976-77, UI Cost Model will conduct a total restudy of unemployment insurance functions including regular Support, Administrative, Staff and Technical Support and leave rate assessment versus usage.

Other support activities will include the review of approximately 125 pieces of state and federal legislation affecting the unemployment services function of the department will be reviewed and:

- Necessary regulations will be written and implemented for new laws.
- Monitoring and coordinating litigation affecting UI programs will be a continuous endeavor as will federal legislation and regulations.
- Procedures reflecting new legislation and precedent court decisions will be implemented.
- Approximately 150 Merit Award Board suggestions from EDD employees designed to improve UI functions will be analyzed annually and approved or disapproved.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	483.5	422.6	510.5	\$7,586,403	\$8,581,902	\$10,931,665

d. Appeals Process

The purpose of this element is to expedite benefit payments and to equitably resolve tax determinations, a two-step process to hear, review, and decide contested issues, is paramount.

The object under lower authority is to afford each party a fair and impartial hearing; to issue a decision setting forth all material facts relevant to the issues and contentions of the parties and the applicable principles of law; and to hold hearings and issue decisions promptly within federal time lapse standards.

The objective under higher authority is to review thoroughly the hearing transcript, the exhibits, and decision of the Administrative Law Judges and written argument of the parties to determine whether the rights of the parties were properly decided; and to interpret the law by the designation of appropriate cases as precedents for the guidance of Administrative Law Judges, claimants, employers and the department.

The Division of Appeals is administered by the California Unemployment Insurance Appeals Board. The board consists of five members, appointed by the Governor, for four-year terms.

Personnel of the Appeals Division are appointed, directed and controlled by the Board.

Ten regional offices of appeals receive and dispose of appeals filed at the first or lower authority level. Hearings are held in these offices as well as local offices of the Department.

Second or higher authority appeals are filed at the office of the Appeals Board in Sacramento. The number of staff employed in both the higher and lower authority is based on the unit time experience which has been established by the federal Department of Labor.

The Appeals Board has adopted rules, which set forth the rights and obligations of parties. These rules are published in subdivision 2, Title 22, California Administrative Code. Parties are also informed of their rights on all forms used by the Appeals Division.

The state and federal programs in which an appeal or petition may be filed are: unemployment insurance benefit, including benefits claimed by federal and state employees, ex-servicemen, and individuals pursuing retraining courses; unemployment benefit hearings for persons living in California but claiming from another state; benefit adjudication for individuals who had their hearing outside California but are claiming benefits based on California wages; unemployment disability insurance appeals, including claims against voluntary plan carriers; and determination of tax liability of employers, e.g., transfers of reserve accounts, claims for refunds, and assessments.

A claimant or interested employer may appeal a determination to an Administrative Law Judge (lower authority), and an employer may file a petition to an Administrative Law Judge (lower authority) from an assessment, denial of a claim for refund, or protest to charges to the employer's reserve account, or a transfer of a reserve account. The Administrative Law Judge's decision may be appealed by the interested parties, including the department, to the Appeals Board itself (higher authority).

EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

Output	1974-75	1975-76	1976-77
Unemployment Insurance:			
Ruling appeals (lower authority)	3,718	3,800	3,500
Ruling appeals (higher authority)	203	210	200
Total benefit appeals (lower authority)	71,651	73,595	70,000
Total benefit appeals (higher authority)	10,510	11,850	10,000
Regular Contribution Appeals:			
(Lower authority)	455	550	500
(Higher authority)	45	60	50

State plan	3,230	3,335	3,480
Lower level	2,912	3,000	3,115
Higher level	318	335	365

Appeals process workloads reflect the total workload in Unemployment Insurance, Disability Insurance and the Personal Income Tax Program. The Appeals Board (lower and higher authority) serve all of these programs, thereby providing a fair hearing process for departmental benefit and tax functions. The budget for the Appeals Board is based on the estimated base workload approved by manpower administration. The staffing needs of the Appeals Board may be augmented by increased workload above base approved by manpower administration.

Procedures are not expected to materially differ in 1976-77 and will be adapted to state or federal legislative changes.

VIII. DISABILITY INSURANCE PROGRAM

Program Objectives and Description

In 1946, the Legislature established a system of wage loss indemnification for workers disabled because of nonoccupational illness or injury. When hospitalized, additional costs accrue to the worker. To help him defray these costs additional benefits are provided. To ensure prompt and efficient service to the claimants, the program is administered through decentralized field offices established to process claims, determine eligibility and compute entitlement, maintain accounting records, make claim payments, and provide informational services.

Employers may substitute the state plan of disability insurance with a voluntary plan which must provide at least equal benefits payable at cost not to exceed those under the state plan. There are provisions for elective coverage for employers, self-employed persons and family employees.

Authority

Division I of the California Unemployment Insurance Code.

a. Disability Insurance Benefit Payments

When disabled for nonoccupational injury or illness, the eligible worker receives a weekly benefit amount of from \$25 to \$119 based on wages paid during a 12-month base period. Maximum benefits payable during a period of disability are 26 times the weekly benefit amount or one-half the base period earnings, whichever is smaller. Hospital benefits are payable at the rate of \$12 a day for a maximum of 20 days of confinement in a hospital or under certain specific conditions, a nursing home.

Disability insurance coverage includes (a) most persons protected by unemployment insurance, (b) agricultural workers, (c) employees of district hospitals, and (d) employers, self-employed persons and family employees, if they elect the coverage. To receive disability insurance a person must (1) file a claim in accordance with regulations; (2) serve a non-compensable seven-day waiting period, except that the waiting period is waived from the date of confinement in a hospital; (3) have sufficient wage credits to establish an award; (4) submit to a reasonable examination when required by the department; and (5) file a certificate of disability signed by a duly authorized doctor of medicine, osteopath, chiropractor, dentist, optometrist, podiatrist, government medical officer, or religious practitioner.

EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

b. Voluntary Plan Review

The Unemployment Insurance Code permit employers to substitute private plans for state plan coverage, provided that the costs to the employee do not exceed the cost of the state plan. A voluntary plan may be either insured by an admitted disability insurer, or it may be self-insured. Self-insured plans require that the employers deposit security as determined by the department to guarantee compliance with the terms of the plan.

The department's administrative responsibilities connected with voluntary plans concern the review and approval or disapproval of voluntary plans submitted, depending on whether or not such plans equal state plan coverage. In addition, the department conducts ongoing evaluations of approved voluntary plans, to insure continued compliance with the provisions of the Unemployment Insurance Code.

Employees are relieved of statutory contributions to the State Disability Fund while covered under an approved voluntary plan and are ineligible for state plan benefits for any disability which commenced while they were covered under the voluntary plan. Voluntary plans must bear the additional cost incurred to the disability fund as a result of voluntary plan activities. Such costs are assessed annually.

IX. MIGRANT SERVICES

Program Objectives and Description

Thousands of people, consisting largely of families, follow the farm labor market annually. These families are often borderline poverty cases with all capable family members, including mothers, working in the fields. Young children of these families frequently go unattended.

The major objective is to provide housing for temporary occupancy and other work related services at reasonable costs for migrant farm workers and their families during peak harvest seasons. The day care services provide a controlled environment for the young children, contribute to an orderly childhood development and free the mothers for their contribution to the family income.

The Migrant Services Program provides day care services for children, age 2 through 5. In addition, education, social services, health and medical services, nutritional services, and career guidance counseling programs are offered at migrant housing projects.

In the budget year, 3.76 million General Fund is proposed to replace federal camp support which has been withdrawn and to provide for the first increment of a 3-year program to rehabilitate housing.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing Program Costs	8.3	9	9	\$1,566,399	\$1,512,917	\$3,760,270

Administration Dist.	0.1	0.5	0.6	1,671	7,079	8,972

a. Housing Management

Local housing camps must be supervised to assure occupancy by low income migrant families only. Provisions must also be made for off-season maintenance.

In 1976-77 General Funds will replace Federal money in support of this activity.

Migrant Services insures utilization of housing and day care facilities by proper clientele. It will insure proper operation and maintenance and coordinate the funds for the operation and maintenance.

Migrant services provides for direct supervision, operation and maintenance of housing projects. The section assures that the projects are operated and maintained in accordance with standards required by law and special conditions from the U.S. Department of Labor. The staff required for local management is provided by the local housing authority or board of supervisors. The migrant services section contracts with these local agencies to furnish general funds for support of housing during the season when projects are open for occupancy. The rental income from these facilities is used for the off-season maintenance.

Output	1974-75	1975-76	1976-77
Migrant camps operated	25	25	25
Input			
Expenditures	\$875,595	\$739,378	\$973,298

b. Housing Rehabilitation

There are 874 houses in existing migrant housing centers which are in need of replacement. In addition to replacing the above number of houses, the department plans to provide additional sanitation facilities for 325 houses which currently do not have individual sanitation facilities. This is the first of a 3 year program to replace and renovate the existing deficient units, and will be fully supported by the General Fund with a proposed \$2 million appropriation.

Additional improvements to be provided are complete repair of road and grounds at each of the 25 migrant housing projects.

In addition to restoring run down units this activity will provide off-season employment for those families who desire work during the winter months.

EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

Output	1974-75	1975-76	1976-77

Input			
Expenditures	—	—	\$2,000,000

c. Day Care

The average migrating farm labor family consists of 5.2 members. Since all available family members must contribute to the family income, the younger children are often left unattended.

Day care services will be provided to children ages 2 through 5. A 12-hour period of supervision and care is provided. During this time, the children are fed, participate in educational programs, rest, and play. All care is provided by duly qualified teachers and day care aides. Day care services are provided by an interagency agreement between the Departments of Employment Development, Education, Benefit Payments, and Health.

Output	1974-75	1975-76	1976-77
Number of children served	2,100	2,100	2,100
Input			
Expenditures	\$512,896	\$563,973	\$563,000

d. Migrant Administration

Approximately 35,000 migrants enter California each year. Since some of these migrant farm workers are potential welfare recipients, various services are available to them. Available federal funds and lands donated by cities and counties can be coordinated into services to the migrant farm worker.

Migrant services: (1) provides funds for contracting with local agencies; (2) operates and maintains migrant housing projects; (3) provides staff for administration and supervision of local projects; and (4) accumulates information and develops an annual report of program activities.

Migrant services administers the California Migrant Master Plan. The elements under direct control of migrant services include housing operation, housing maintenance, medical services and nutritional services. These functions are carried out by contracting with agencies of local government to manage programs. Other programs are developed and delivered by other state and local agencies by interagency agreement between Employment Development Department, Department of Education, Department of Health, and Department of Benefit Payments.

Output	1974-75	1975-76	1976-77

	\$176,237	\$202,487	\$215,000

X. OFFICE OF ECONOMIC OPPORTUNITY

Program Objectives and Goals

The objective of the State Economic Opportunity Office is to improve the effectiveness of anti-poverty programs in California. To accomplish this objective, State OEO will determine the extent of poverty in the State, will determine the most pressing needs of the poor, and respond to those needs by marshalling, to the extent possible, all public, private, local, state and federal resources which may have a salutary effect on those needs.

The initial step is to determine the extent and nature of poverty. State OEO has already started to collect this information through its association with two major poverty programs: the 38 Community Action Agencies (CAAs) and the 33 Legal Services Programs in California. Each of these agencies has statistics on the poor who reside in the areas which they serve, and the priority of their needs. Thereafter, State OEO will obtain the same information directly from twenty-eight counties (primarily in Northern California) which are not presently served by poverty programs. This data will be compiled into a comprehensive report which will serve as the basis for a Report to the Governor on the Status of Poverty in California, and a basic resource upon which other state agencies and local governments may base decisions regarding poverty programs.

With knowledge of the extent and nature of poverty in California, State OEO will address the problems of poverty simultaneously on various fronts. The Technical Assistance Project will strengthen the operation of Community Action Agencies by helping them perform their day-to-day functions. Assistance will be provided in such subjects as internal management, fiscal control, program design, etc. Ways of improving efficiency and reducing costs will be developed and demonstrated, i.e., joint banking, common systems for accounting and auditing, and bulk purchasing. The Training Project will help the Community Action Agencies that are strong to train those that are weak, and will provide other special training. The Legal Services Project will focus upon improving the efficiency of the Legal Services Program by reducing costs through joint purchasing and banking and by avoiding multiple litigation of similar issues.

The Program Development Project will address itself to making poverty programs become more self-sufficient. This Project will assist the Community Action Agencies and Legal Services Programs to become a more integral part of local governments, to obtain funds from sources other than the federal government, and to generate their own funds through innovative economic development programs.

The remaining Project, the "Uncapped Counties" (those counties with no poverty programs) Project, will work with local governments to help them provide greater benefits for the poor people of those areas.

8.7	15	15	\$154,188	\$238,831	\$199,040

b. Special Projects

"Uncapped" counties are those counties which are not served by a Community Action Agency, but which nevertheless, have residents who are in need. The first objective of this Project is to identify the social and economic characteristics of these residents. The second objective is to establish priorities according to the number of poor residents, the severity of their needs, and according to the local receptivity for poverty programs. Thereafter, in order of priority, those receptive local governments will be assisted in forming multi-county Community Action Agencies or similar vehicles which will provide the necessary services.

Program Development's objective of making the poverty programs more self-sufficient can best be accomplished by integrating them with local governments and assisting them in generating alternative sources of funds. Community Action Agencies will be trained and encouraged to become local human resources planners and an integral part of the local delivery system. To accomplish this, State OEO will train the agencies in human resources planning and aid them in cooperating more closely with organizations such as the League of California Cities, County Welfare Directors Association, and the County Supervisors Association.

State OEO will assist both Community Action Agencies and Legal Services Programs to broaden their funding base as much as possible. Ultimately, however, self-sufficiency will depend upon each program's ability to generate its own funds. The Program Development Project will design and demonstrate small economic development projects which will promote self-sufficiency among the poverty programs.

As in prior years, SOEO will continue to seek contracts and grants from other agencies for the development of innovative programs that increase the opportunities of disadvantaged persons in California. A current example of this type of program is the Housing Loan Assistant and Housing Loan Aide program jointly sponsored by the State Manpower Office and State OEO, which provides meaningful jobs for thirty-one persons formerly on welfare. Future programs may include the creation of labor-intensive jobs for low-income people, such as the development of "paraprofessional" programs that interface with existing state and federal programs to provide for more effective delivery systems to the low-income population of California.

Authority

XI. CALIFORNIA VIETNAM VETERANS OJT PROGRAM

This program is being phased out. In FY 1974-75, 754 training opportunities (slots) were developed for Vietnam Veterans. All of the money allocated for on-the-job training was obligated in FY 1974-75; however, approximately 369 trainees will be trained in FY 1975-76 and the employers will be reimbursed after the training has been given. Employers are reimbursed for 50 percent of an eligible veteran's salary or wages during the approved training period. This program is providing eligible veterans with immediate employment and the training and experience necessary to find productive jobs in the future.

X. OFFICE OF ECONOMIC OPPORTUNITY

Program Objectives and Goals

The objective of the State Economic Opportunity Office is to improve the effectiveness of anti-poverty programs in California. To accomplish this objective, State OEO will determine the extent of poverty in the State, will determine the most pressing needs of the poor, and respond to those needs by marshalling, to the extent possible, all public, private, local, state and federal resources which may have a salutary effect on those needs.

The initial step is to determine the extent and nature of poverty. State OEO has already started to collect this information through its association with two major poverty programs: the 38 Community Action Agencies (CAAs) and the 33 Legal Services Programs in California. Each of these agencies has statistics on the poor who reside in the areas which they serve, and the priority of their needs. Thereafter, State OEO will obtain the same information directly from twenty-eight counties (primarily in Northern California) which are not presently served by poverty programs. This data will be compiled into a comprehensive report which will serve as the basis for a Report to the Governor on the Status of Poverty in California, and a basic resource upon which other state agencies and local governments may base decisions regarding poverty programs.

With knowledge of the extent and nature of poverty in California, State OEO will address the problems of poverty simultaneously on various fronts. The Technical Assistance Project will strengthen the operation of Community Action Agencies by helping them perform their day-to-day functions. Assistance will be provided in such subjects as internal management, fiscal control, program design, etc. Ways of improving efficiency and reducing costs will be developed and demonstrated, i.e., joint banking, common systems for accounting and auditing, and bulk purchasing. The Training Project will help the Community Action Agencies that are strong to train those that are weak, and will provide other special training. The Legal Services Project will focus upon improving the efficiency of the Legal Services Program by reducing costs through joint purchasing and banking and by avoiding multiple litigation of similar issues.

The Program Development Project will address itself to making poverty programs become more self-sufficient. This Project will assist the Community Action Agencies and Legal Services Programs to become a more integral part of local governments, to obtain funds from sources other than the federal government, and to generate their own funds through innovative economic development programs.

The remaining Project, the "Uncapped Counties" (those counties with no poverty programs) Project, will work with local governments to help them provide greater benefits for the poor people of those areas.

¹ Authorized positions are for contract work on special projects. The positions may be filled for the entire fiscal year or just a portion thereof.

EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

a. Technical Assistance

State OEO will assist the Community Action Agencies to coordinate other programs, improve their delivery of services, and to avoid duplication. This Office will conduct skills workshops and technical briefings on subjects such as fiscal and managerial accountability, program monitoring and evaluation and grant writing.

This Project will evaluate and make recommendations on all Federal grants which are subject to the Governor's review and approval under Section 242 of the Community Services Act of 1974.

Methods of improving the efficiency of Community Action Agencies will be developed by this Project. A typical example is the development of a banking coalition which will provide for common accounting and audit procedures, and will reduce the amount spent by each agency for payroll services. Another example is to reduce operating costs by combining individual purchases to obtain quantity discounts.

Training will be provided to improve the skills of the employees of Community Action Agencies so that they are more effective in their delivery of services. This objective will be accomplished by developing audio-visual and other training materials, by conducting seminars on such subjects as management techniques and leadership training, and by designing staff development programs in manpower, economic development, and other subjects.

State OEO can assist the Legal Services Programs in California by helping them reduce their costs and improve their efficiency. Their costs may be reduced by joint banking and bulk purchasing arrangements which are being developed by State OEO. The efficiency of the legal services programs may be increased by developing a "clearinghouse" procedure, so that issues which are being litigated by one program are not duplicated by another.

The legal services programs will be transferred this fiscal year from the Federal Community Services Administration to the private, non-profit National Legal Services Corporation. State OEO will assist in the formation of a state Advisory Council to the Corporation and in the provision of administrative support to that Council.

The legal services Project will coordinate training so that the stronger legal programs will train the weaker ones. This Project will provide legal technical assistance for the formation of Community Development Corporations.

Output	1974-75	1975-76	1976-77
Number of grants reviewed.....	350	350	350

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	8.7	15	15	\$154,188	\$238,831	\$199,040

b. Special Projects

"Uncapped" counties are those counties which are not served by a Community Action Agency, but which nevertheless, have residents who are in need. The first objective of this Project is to identify the social and economic characteristics of these residents. The second objective is to establish priorities according to the number of poor residents, the severity of their needs, and according to the local receptivity for poverty programs. Thereafter, in order of priority, those receptive local governments will be assisted in forming multi-county Community Action Agencies or similar vehicles which will provide the necessary services.

Program Development's objective of making the poverty programs more self-sufficient can best be accomplished by integrating them with local governments and assisting them in generating alternative sources of funds. Community Action Agencies will be trained and encouraged to become local human resources planners and an integral part of the local delivery system. To accomplish this, State OEO will train the agencies in human resources planning and aid them in cooperating more closely with organizations such as the League of California Cities, County Welfare Directors Association, and the County Supervisors Association.

State OEO will assist both Community Action Agencies and Legal Services Programs to broaden their funding base as much as possible. Ultimately, however, self-sufficiency will depend upon each program's ability to generate its own funds. The Program Development Project will design and demonstrate small economic development projects which will promote self-sufficiency among the poverty programs.

As in prior years, SOEO will continue to seek contracts and grants from other agencies for the development of innovative programs that increase the opportunities of disadvantaged persons in California. A current example of this type of program is the Housing Loan Assistant and Housing Loan Aide program jointly sponsored by the State Manpower Office and State OEO, which provides meaningful jobs for thirty-one persons formerly on welfare. Future programs may include the creation of labor-intensive jobs for low-income people, such as the development of "paraprofessional" programs that interface with existing state and federal programs to provide for more effective delivery systems to the low-income population of California.

XIII. ADMINISTRATIVE, STAFF AND TECHNICAL SERVICES

Program Objectives and Description

The objective of this program is to provide policy direction, coordination, leadership and staff support services to relieve line managers of routine administrative duties so they may direct their resource toward accomplishment of the department goals and objectives.

The areas of support provided are—executive direction, fiscal management, personnel management, management systems, automatic data processing, reports and analysis, information and public relations, and services such as building maintenance, office services, duplicating, etc.

GENERAL ANALYSIS

The capital outlay budget of the Employment Development Department is a renewal of the major departmental building program launched in 1964-65. Since 1967-68 the department pursued the policy of recovering the cost of the construction of buildings and building additions through rental amortization which resulted in restoring money to the funds from which the capital expenditures were made.

The renewed long-term building program proposes to replace leased premises with state-owned buildings in communities with a permanent need for our facilities. The major projects include office building site acquisitions in Santa Rosa, Modesto and San Luis Obispo and an office building addition and parking site acquisition in Merced.

Major Projects

DEPARTMENT OF REHABILITATION

The primary goal of the department of Rehabilitation is to rehabilitate and place into suitable employment the largest possible number of disabled persons by providing them a variety of outreach, counseling, medical, training, placement and follow up services. Within the resources available, priority is given to serving the severely disabled and those moderately disabled with substantial functional, vocational handicaps.

The department has a number of subsidiary goals. These include the removal of mobility barriers to the disabled, the provision of special training to the blind in independent living skills and in the operation of vending facilities, and the development of services in public and private nonprofit community rehabilitation facilities. The department also serves as a principal advisor to the Administration on the problems of the disabled, and works with community and other groups concerned with the problems of the disabled, to assure that their interests are heard and considered.

SIGNIFICANT PROGRAM CHANGES

During 1975-76 the department commenced implementing the requirements of the Federal Rehabilitation Act of 1973 (Public Law 93-112) by establishing a service priority system for use of available resources. First priority is to the most severely disabled; second priority is to the moderately disabled with substantial vocational handicaps. Thus, the major portion of the department's resources will be directed to those persons requiring multiple services over an extended period of time at a greater cost per person. The department also has increased its outreach efforts to assure that the severely disabled are aware of its services and has trimmed back its services to the mildly disabled who have less need for assistance. In the last half of 1975-76 and during 1976-77, the department will emphasize program evaluation and demonstration research to assure that its efforts are effective and efficient in the rehabilitation of the disabled.

To accommodate these major changes \$1,302,620 from the General Fund, matched by over \$5 million federal dollars, have been made available to the department during the budget year.

Of these resources, \$736,000 are new General Fund dollars, while an additional \$566,620 of General Funds have been redirected from other agencies. For this reason, cooperative programs with other departments for services to public offenders and alcoholics are being terminated July 1, 1976. To the extent that public offenders and alcoholics meet the department's new priorities, the disabled will be clients of rehabilitation.

In order to streamline the department and prepare it for the difficult work ahead, the administrative structure has been reorganized and one level of administration eliminated.

One hundred vocational rehabilitation counselor positions will be abolished. The resultant savings in salaries and operating costs will be used to purchase services for the disabled.

Under provisions of Chapter 1167, Statutes of 1975 and Executive Order No. B 11-75 eligible employees in the department who retire during the appropriate dates, will be granted additional service credits in the interest of minimizing the social and economic cost to employees.

SUMMARY OF PROGRAM REQUIREMENTS

I. REHABILITATION OF THE DISABLED

Program Objectives and Description

This is the department's major service program. There are an estimated 530,400 disabled Californians of working age who need basic vocational rehabilitation services to obtain or retain employment. Basic vocational rehabilitation services are delivered to the general disabled community through district and branch offices located throughout the state.

Many other Californians need rehabilitation services which are not vocational in nature. The department assists by providing such services as readers for blind students who could otherwise not attend college, and training in independent living skills for persons too disabled to work.

Authority

Federal—Rehabilitation Act of 1973 (Public Law 93-112).

Rehabilitation Act Amendments of 1974 (P.L. 93-516).

State—Welfare and Institutions Code, Division 10 (commencing with Section 19000).

Program Elements

a. Basic Rehabilitation Services.....	2,125.3	2,099.9	2,105.1	\$72,277,915	\$81,486,283	\$87,166,700
b. Other Rehabilitation Services	19.7	12.7	12.2	1,752,322	434,687	428,084

a. Basic Rehabilitation Services

This is the single most important service delivery effort of the department. Through its rehabilitation counselors, the department evaluates applicants, determines their eligibility, develops a written rehabilitation plan for and with each disabled person, identifies the specific services that each person requires for rehabilitation, and provides such services either by coordinating the use of community resources or purchasing them. Upon completion of an individual's written rehabilitation program, the department helps the disabled person to find suitable employment and maintains follow-up contact and needed post employment services to assure employment stability.

These services are funded in two ways. Services to the general disabled public are financed 80% by federal funds and 20% by state and other matching funds. Services to beneficiaries of Social Security Disability Insurance and of Supplemental Security Income benefits are 100% federally financed.

Existing cooperative agreements, where the matching funds are provided by other state agencies or by local jurisdictions, must in part serve the mildly disabled, thus conflicting with the department's new priorities for services to the severely disabled and moderately disabled with substantial functionally related vocational handicaps. For this reason, on July 1, 1976 the department will terminate its cooperative agreements with the Departments of Corrections and Youth Authority and the Office of Alcohol Program Management. It will continue to provide services to the disabled of these organizations who meet the departments established criteria for priority of services.

^a Total annual benefits divided by fiscal year costs.

¹ Third party certifications not included.

b. Other Rehabilitation Services

The Department also provides certain general rehabilitation services not necessarily vocational in nature. These include the services of counselor-teachers who provide in the home counseling and training in independent living skills to the blind and deaf-blind with no potential for employment. This daily-living component is financed on a contractual basis by state social welfare funds.

Another group of blind individuals who are not vocational rehabilitation clients receive reader services from the Department enabling them to participate in college programs. Such individuals are attempting to further their education, but may not have vocational goals in mind. The Department makes every attempt to stress the vocational goal in the above situations wherever possible.

Another service provided by the Department which benefits many disabled persons, whether they are vocational rehabilitation clients or not, is the effort to prevent, identify and remove architectural and mobility barriers which preclude for many disabled persons full participation in work and community affairs.

II. BUSINESS ENTERPRISE

Program Objective and Description

The Business Enterprise Program provides comprehensive training and supervision that enables blind persons to support themselves in the operation of vending stands, snack bars and cafeterias.

The staff of the program promotes and develops new locations in public and private buildings for vending and food service operations. Services also include the design and installation of new operations, remodeling of older facilities, ongoing supervision of operators and general business services.

Legally blind persons who have been trained by the program are selected on a competitive basis to operate the enterprises. They retain the profits except for a percentage prescribed by law, which is returned to set aside funds for establishment of new enterprises and the maintenance of equipment in existing enterprises.

III. DEVELOPMENT OF COMMUNITY REHABILITATION RESOURCES

Program Objectives and Description

The Department's Rehabilitation Facilities Development Section works cooperatively with local government and private non-profit organizations toward the development and improvement of rehabilitation facility services needed to serve clients of the department and other handicapped people at the local community level. These local services include those of rehabilitation workshops, rehabilitation centers, special facilities for the blind and deaf, halfway houses and alcoholic recovery homes. The Department is placing greater emphasis on the facilities becoming more involved in job development and placement of disabled persons.

The Department also sets standards for services provided by such facilities, inspects and certifies programs which meet standards, and assists all agencies of state government in establishing fee schedules for service purchased from rehabilitation facilities. Each year the Department inventories rehabilitation facility services throughout the State and publishes the California State Plan for Rehabilitation Facilities.

Authority

Federal—Rehabilitation Act of 1973 (Public Law 93-112).
State—Welfare and Institutions Code, Sections 19008, 19013, 19152, 19154, 19400-19402, and 19800-19813.

b. Grant Administration.....	8.7	8.3	8.4	\$5,356,797	\$2,312,039	\$2,214,040

a. Technical Consultation to Rehabilitation Facilities

Rehabilitation facilities specialists and technical consultants provide assistance to local community rehabilitation facilities in general management, program planning, industrial engineering, accounting, public relations, contract procurement, and other technical areas. In the case of workshops, this technical consultation enables local program administrators to integrate what is essentially a rehabilitation service program with a production manufacturing operation to create a setting in which realistic evaluation, work adjustment, and vocational training of disabled people can take place. This consultation has enabled 134 relatively small organizations to provide a high level of service to a substantial number of handicapped persons throughout the State.

DEPARTMENT OF REHABILITATION—Continued

Output	1974-75	1975-76	1976-77
Average daily caseload in workshops	10,539	11,000	11,500

Expenditures	\$482,720	\$545,440	\$558,218
Personnel man-years	20.4	20.3	20.9

b. Grant Administration

The Department administers federally-funded Establishment grants and Innovation and Expansion programs for community rehabilitation facilities and coordinates federal grant programs for facility improvement, training, and related areas. These grants are administered within the framework of the California State Plan for Rehabilitation Facilities. Almost all of the grant programs are administered on the basis of reimbursement for each individual expenditure made by the facility under an authorized project budget. This type of detailed grant administration requires substantial assistance from the Department's Facilities Development Section.

Output	1974-75	1975-76	1976-77
Number of grants awarded by department	174	65	65
Value of grants awarded by department	\$5,079,969	\$2,108,470	\$2,000,000

Input	1974-75	1975-76	1976-77
Expenditures	\$5,356,797	\$2,312,039	\$2,214,040
Personnel man-years	8.7	8.3	8.4

**Includes supervision of 70 Alcoholic Recovery Home grants (contract with State Alcohol Program Management) and nine other direct federal grants.

IV. ADMINISTRATION

Program Objective and Description

This program provides executive direction, planning, program support and administrative services to the department. It is administered through the Director's Executive Office and four divisions.

The Director's Office includes the Civil Rights, Public Information, Legislative and Legal, Auditing and Investigations functions, as well as overall direction of the department's activities.

The Division of Field Operations exercises line administration over 26 district offices providing direct services to disabled persons. The Program Development Division provides staff services in planning, program evaluation, program standards, research, statistics and professional training. The Program Support Division provides administrative direction over ancillary rehabilitation functions such as the Business Enterprise Program and the development of Community Rehabilitation Resources. The division also includes program managers for the deaf and blind and consultants in special program areas. The Administrative Services Division provides fiscal, personnel, business services, management and systems analysis, data processing, and organization and management development services.

Authority

Federal — Rehabilitation Act of 1973 (Public Law 93-112).

State — Welfare and Institutions Code, Division 10 (beginning with Section 19000).

DEPARTMENT OF BENEFIT PAYMENTS

The Department of Benefit Payments consolidates the Health and Welfare Agency's fiscal control and manages the state's welfare payment program. In so doing the department specializes in collection, accounting and accounting systems, auditing, claims payment, payment systems evaluation, and the welfare payment program. The department is composed of three major program areas (audits and collections, welfare program operations, and payment systems evaluation) and administrative support.

The goals of the department are to:

1. Provide timely payments with fewer errors to the unemployed, the disabled, welfare recipients, health care providers and other vendors of benefits under health and welfare programs.
2. Improve the economy and efficiency of the agency's collection of taxes, and recovery of amounts due, owing or collectible as the result of the foregoing payments.
3. Improve the state's ability to detect and prevent fraud and administrative error in benefit payment program delivery systems.
4. Improve fiscal accountability within the payment programs presently administered by the Health and Welfare Agency.

I. SYSTEMS REVIEW AND EVALUATION

Program Objectives and Description

The Department of Benefit Payments reviews Health and Welfare Agency systems. The objectives of the reviews are to determine the adequacy and effectiveness of the systems; to determine whether the systems are consistent and compatible; and to determine if adequate fiscal accountability exists. Through these reviews the agency can minimize any duplication of effort which might exist between the separate systems; enhance the state's ability to control and account for the expenditure of program benefits and subvention funds; and optimize the level of service to the recipients and beneficiaries of the benefit program.

To accomplish these objectives, Systems Review and Evaluation Branch has been established within the Department of Benefit Payments to conduct studies on an ongoing basis.

The Branch conducts systems reviews which concentrate primarily on those programs within the Agency which interface across departmental lines in functions, controls and services provided. These projects are concerned with reducing costs through elimination of overlaps and improvement of services to the client public. This provides a broad perspective of the operations which cannot be readily obtained when a system is reviewed by a department within the boundaries of its individual responsibility.

II. AUDITS AND COLLECTIONS

Program Objectives and Description

A wide variety of services are provided to the people of California by departments within the Health and Welfare Agency. In order to assure that these services are provided on an efficient and fiscally sound basis, it is necessary to audit, collect, and account for the mixture of federal, state, local, and private funds which support these programs. This responsibility has been assigned to the Division of Audits and Collections for the following programs: Unemployment Insurance (UI), Disability Insurance (DI), Personal Income Tax withholding (PIT), and Classified School Employees Trust Fund (CSE). In addition the division recovers overpayments occurring under Medi-Cal, Short-Doyle, and other health subvention programs.

The division performs most of the above activities in its field offices. Employment tax operations are conducted within four area and 37 district offices; health audits and recoveries are conducted from headquarters and three local offices. Out-of-state audits and collections and all support activities are centralized in the headquarters office.

¹ Contingent upon acceptance by the insurance carriers of the proposed state billing procedures.

a. Employment Tax Operations

The Central Operations Branch and Field Operations Branch of the Division of Audits and Collections are responsible for all employment tax functions of the Department of Benefit Payments. All California employers are required to register with the department and to report all wages paid to employees subject to the four statewide employment tax. *The Department of Benefit Payments is responsible for the implementation of Chapter 591, Statutes of 1975, which extends unemployment insurance coverage to agricultural laborers and requires approximately 35,000 agricultural employers to begin making unemployment insurance contributions, effective January 1, 1976. A total of 106 positions were administratively established during 1975-76 to audit this activity. These positions are proposed for continuation in 1976-77.*

1. Unemployment Insurance

In order to fund payments to eligible unemployed California residents who are covered by the Unemployment Insurance Program, California employers are required to pay an unemployment insurance tax for the first \$7,000 annually of wages paid each employee. The contribution rate is determined by the employer's employment experience and by the financial condition of the Unemployment Insurance Fund. The condition of the fund determines whether employers are taxed on a 'high' schedule, which ranges from 0.4 percent to 3.9 percent or on a 'low' schedule which ranges from 0 percent to 3.3 percent. In addition to the normal tax rate, all employers pay an additional tax for the balancing account, which ranges from a minimum of 0.1 percent to a maximum of 1 percent and is determined by the relationship of the credits to the balancing account. Contributions credited to the balancing account are used to pay extended duration benefits to unemployed workers and to offset employer's negative reserve balance and nonchargeable benefit payments. Department of Benefit Payments (DBP) activities are auditing tax collection and accounting relative to such accounts and collections, and the enforcement of delinquent accounts. Payment of UI benefits is made by the Employment Development Department.

A total of 258 man-years were administratively established during 1975-76 to meet the increased workload in audits and collections of the Unemployment Insurance Program. These man-years are also requested for 1976-77. Additionally, an increase in temporary help positions, 38.9 for 1975-76 and 108 for 1976-77, is requested to meet the increased workload in unemployment insurance claims.

Output	1974-75	1975-76	1976-77
Number of subject employers	397,375	404,200	445,000
Tax revenues	\$779,142,633	\$941,000,000	\$1,443,500,000

2. Disability Insurance

In order to fund payments to covered California employees who are temporarily unable to work because of nonoccupational disabilities, all subject employers are required to submit quarterly tax returns stating the wages paid to each worker for employment insured under the Disability Insurance Program. When monthly contributions exceed \$50, returns are submitted monthly. The cost to the worker is 1 percent of the first \$9,000 of wages paid each calendar year. For employers and self-insured individuals who elect disability insurance coverage, the annual cost is 1.25 percent of \$9,000. Department of Benefit Payments activities under this program include auditing, collections and accounting relative to such collections, and enforcement of delinquent accounts. Payment of DI benefits is made by the Employment Development Department.

Output	1974-75	1975-76	1976-77
Number of subject employers	470,590	485,200	495,000
Tax revenues	\$468,242,630	\$494,365,284	\$521,945,288

3. Personal Income Tax

All employers subject to this program are required by law to withhold California personal income tax from the salaries or wages of their employees, and to remit the total withheld to the Department of Benefit Payments. The department operates this program under contract with the Franchise Tax Board for all of the department's administrative cost. Revenue collected is transferred to the state's General Fund.

DEPARTMENT OF BENEFIT PAYMENTS—Continued

Output	1974-75	1975-76	1976-77
Number of subject employers	410,625	417,450	428,360
Tax revenues	\$2,025,877,510	\$2,383,000,000	\$2,867,000,000

4. Classified School Employees Trust Fund

Classified school employees were extended unemployment insurance coverage effective January 1, 1972, at which time liability for collections commenced. School employers contribute to the Classified School Employees Fund to reimburse the Unemployment Insurance Fund. This contribution is on a dollar-for-dollar basis for unemployment insurance benefits paid out to eligible classified school employees. The contribution also pays for the administrative cost of operating this special fund which includes costs required to reimburse the Superintendent of Public Instruction and/or his designated representatives to carry out their legal responsibilities. Department of Benefit Payments activities include auditing, collections and the accounting relative to such collections, enforcement of delinquent accounts, and reimbursement of the Unemployment Insurance Fund. Payment of UI benefits to individual school employees is made by the Employment Development Department.

Output	1974-75	1975-76	1976-77
Number of subject school districts	1,180	1,180	1,180
Tax revenues	\$9,328,527	\$10,000,000	\$10,000,000

5. Legislative Mandate

Unemployment benefits for eligible individuals were increased from \$90 to \$104. At present, the only employees of any local governmental entity compulsorily participating in unemployment insurance are regularly employed classified school employees. Therefore, any classified school employee earning \$2,340 in any quarter in his base period would receive an additional \$15 if otherwise eligible for unemployment benefits.

Output	1974-75	1975-76	1976-77
Legislative mandate (General Fund) ^a	\$97,742	\$203,164	\$300,000

^a Appropriated to the Employment Development Department in 1974-75 and 1975-76.

b. Health Operations

The Department of Benefit Payments has the responsibility for the fiscal audits, fiscal appeals and collection activities of health programs, i.e., Medi-Cal, Short-Doyle, Crippled Children, Tuberculosis, Hospital Construction, etc. The programs are also evaluated in terms of fiscal compliance with state laws and regulations. The following accept and rely upon the health operations audits, appeals and collection activities: Department of Health; State Controller; Department of Finance; Office of Auditor General; US Department of Health, Education, and Welfare; county auditor; county administrators and hospital administrators.

In addition to the normal collection activities associated with health fiscal audits, the Department is responsible for identifying and collecting funds due the Health Care Deposit Fund via third party liability, health insurance coverage, paternity, probate health provider overpayments, etc.

An augmentation of \$120,000 including \$60,000 from the General Fund, is proposed in 1976-77 to finance two additional Attorney General units. This legal staff will assist in recovery of Medi-Cal funds in situations where medical costs were paid for recipients already covered under a private insurance policy. Thousands of claims have been filed to recover several million dollars. Some of the insurance companies involved will not honor claims without court action.

A total of 13 new positions are proposed to perform additional examinations and to conduct appeals of Short-Doyle and of Social Rehabilitation Service Program expenditures. The Department advises that projected recoveries due to the augmented staff will be \$1,250,000.

A total of 13.5 positions are proposed for the Health Recovery Bureau to work in the areas of 1) collection of provider overpayments, 2) beneficiary and provider investigation collections, 3) third party liability collections, and 4) support to the automated health insurance billing system. The Department advises that potential recoveries due to this staff augmentation will be \$2.3 million.

This budget also proposes to abolish 10 positions authorized in the 1975-76 budget for audit of Prepaid Health Plans. This responsibility is proposed for exercise cooperatively by the Departments of Health and Corporations.

Output	1974-75	1975-76	1976-77
Number of audits	625	1,167	1,167
Amount of audit findings	\$16,471,347	\$29,931,140	\$29,931,140
Amount of health recoveries	\$7,355,008	\$7,500,000 ¹	\$10,000,000 ¹

¹ Contingent upon acceptance by the insurance carriers of the proposed state billing procedures.

III. WELFARE PROGRAM OPERATIONS

Program Objectives and Description

Many California residents are unable to support themselves. Through the department's welfare payment program these citizens are provided financial assistance.

The welfare payment program is comprised of four elements: the Supplemental Security Income/State Supplementary Program (SSI/SSP i.e., payments to aged, blind, disabled), ancillary adult programs, payments to children (aid to families with dependent children) and food stamps.

The objective of the program is to provide on behalf of the general public and within the limits of public resources, reasonable financial assistance to eligible needy and dependent families and to monitor, assist in administering, and improve the SSI/SSP and Food Stamp programs.

The estimate of the General Fund cost of the grants to be paid under the welfare payments program reflects the effect of the following: the federalization of the former Adult Aid Programs effective January 1, 1974; a cost-of-living adjustment for AFDC, APSB, and SSI/SSP; AB 813 (Chapter 512, Statutes of 1975) which, effective September 5, 1975, sets the grant level of the State-funded Aid to the Potentially Self-supporting Blind (APSB) recipients equal to the grant for blind persons and married couples paid under the SSI/SSP program; OASDI increases affecting caseload and grants beginning July 1975 and July 1976; cost impact of court cases; Special Unemployment Assistance program (SUA); absent parent child support provisions of PL 93-647, including federal Support Enforcement Incentive Fund (SEIF) program; revised state SEIF program under Chapter 924, Statutes of 1975 (AB 2326), minimum wage increase on January 1, 1975 and January 1, 1976; increased unemployment insurance benefits, and various Food Stamp program changes.

The estimate of General Fund cost does not include the potential effect of federal AFDC quality control sanctions. The average state error rate will be determined during the July through December 1975, base period. Barring any change in federal methodology the potential impact will be included in the May 1976 welfare program cost estimate.

DEPARTMENT OF BENEFIT PAYMENTS—Continued

The welfare program cost estimates show General Fund increase for 1976-77 over 1975-76 of \$100.3 million. This increase is attributed primarily to cost-of-living adjustments to grant levels amounting to \$40.2 million in the AFDC program and \$60.4 million in the SSP Program.

This budget anticipates transfer of 40 legal positions from contract services to personal services. 33 of these positions are from the Technical Hearing Examiner staff of the Office of Administrative Hearings. Another 5 positions are proposed to insure timely review of pending decisions, and the remaining 2 positions are proposed to review requests for rehearings.

Authorization of the proposed permanent positions within the Department for these functions, will realize significant program advantages including better work-product quality and quantity controls, more equitable distribution of workload, and elimination of duplicate clerical functions.

In the latter part of fiscal year 1975-76, the Department of Benefit Payments will begin development of a "Model-Modular County EDP System". Up until the present time, the various counties have been developing their own EDP systems, with some grouping together. The role of the Department has been limited to approval of the systems. Each county has borne the cost of complete development and modification of its own system, which has resulted in duplication of effort and unnecessary cost.

Under the new system, the Department will more closely direct county welfare EDP efforts through:

- 1) standardization of all welfare data elements into a "data dictionary";
- 2) establishment of a Welfare Application Program Library; and
- 3) development of data processing standards

47 new positions are available in the current year and are continued in the budget year for the development, in cooperation with the counties and subject to enabling legislation of a model-modular county EDP System to standardize county welfare data processing operations to insure a unified approach and to reduce costs resulting from duplication of effort.

DEPARTMENT OF BENEFIT PAYMENTS—Continued

a. Payments for Children

This payment operation provides financial assistance to eligible needy dependent children and the parents or other eligible relatives with whom they live.

The program element is divided into three major subelements: aid to family groups, aid to families with unemployed parents, and aid to children in boarding homes and children's institutions. All three subelements are administered by the counties in accordance with regulations, standards, and procedures set by the department as authorized by law.

Title XX of the Federal Social Security Act has mandated (beginning with the 1975-76 fiscal year) a new Child Support Program, designed mainly to increase interstate cooperation and involvement in locating absent parents and recovering child support payments refused to welfare as well as non-welfare families. 43.5 positions have been established administratively and are requested for fiscal year 1976-77 to comply with California's version of the new program, as mandated by Chapter 924, Statutes of 1975.

Aid to Families With Dependent Children Payment Standards

1	\$129	\$144	\$157
2	212	237	258
3	262	293	319
4	311	349	380
5	355	399	434
6	400	448	488
7	438	491	535
8	477	535	582
9	516	578	629
10 or more	554	622	677

Family Groups (AFDC-FG)

Cash grants are provided to children and their caretakers whose income is insufficient to meet their basic needs. Eligibility is limited to those needy families in which the children are deprived of one or both parents due to death, dissolution, or other continuing absence. Eligibility is further based on statutory maximums related to the age of the children and the amount of income plus real and personal property available to the family.

The financial need of the family is determined by the number of eligible persons in the budget group, and is based on an established minimum standard of adequate care. The cost of the grant is shared by the federal, state and county government and may not exceed the maximum aid amounts set forth in state law. In addition to the maximum aid payment, a family may also receive an allowance for recurring special needs such as medical diets and transportation as well as an allowance for nonrecurring special needs caused by sudden and unusual circumstances beyond the control of the family. These are known, respectively, as the Maximum Aid and as the Minimum Basic Standards of Adequate Care (MBSAC). They are adjusted each July with a cost-of-living increase to maintain their purchasing power.

Projections for fiscal year 1976-77 show a small decrease in the FG caseload, reflecting anticipated improvement in the economic outlook. The caseload reduction is estimated to result in a minor General Fund savings from current year expenditures. AFDC-FG grants will, on July 1, 1976, be adjusted for an estimated 11 percent Consumer Price Index change and will increase General Fund cost by approximately \$37 million. The mixed effect of other minor changes results in a net expenditure increase in 1976-77 to the General Fund for AFDC-FG over 1975-76 of \$42.5 million.

Unemployed Parents (AFDC-U)

Needy children may receive assistance when they meet the basic eligibility requirements if their parent(s) is not fully employed. Additional conditions of eligibility require the parent to register for employment and engage in a seek work plan. The basic grant standard is developed in much the same manner as the aid to family groups program.

AFDC-U caseload estimates for 1976-77 indicate a minor drop. This decrease is consistent with projected statewide unemployment trends. The year-to-year caseload reduction is estimated to result in General Fund savings of \$4.1 million; the cost-of-living adjustment effective July 1, 1976, will raise state cost by an estimated \$4.5 million; other cost increases and offsets result in net General Fund cost increase in the AFDC-U program of \$1.8 million.

Boarding Homes and Children's Institutions (AFDC-BHI)

Children who cannot receive care in their own home may be placed in foster homes or private institutions. Federal financial participation in the cost of foster care is available for some of these children. Those not qualified for federal participation may be eligible for benefits from state and county funds. The state funds are subject to a maximum rate set by the Welfare and Institutions Code.

Included within the 1976-77 expenditure estimates for B.H.I. is an additional \$2.7 million General Fund for a measure which will be proposed by the Legislature, increasing the state's share of B.H.I. costs.

b. Payments for Adults

The SSI/SSP is a federally administered program under which eligible aged, blind and disabled recipients receive from the federal government one monthly check comprised of the federal grant payment for SSI and the California grant payment for SSP. The SSI/SSP payment is intended to cover the recipients' basic needs and living expenses. The state monitors the federal payment operation to determine whether, under the supplemental program, state monies are accurately and properly expended and recipients' payments are promptly received. The SSI funding is 100 percent federal. The SSP cost is borne by both the state and federal government and varies under a sharing arrangement embodied in PL 92603 (HR-1). The SSP cost is composed of two segments, the 'protected' area, where the federal government will pay the cost above a certain baseline cost, and the 'unprotected' area, where all costs are state funded. Federal payments in the protected area, commonly known as 'hold harmless,' were about \$65.2 million (based on preliminary and provisional figures) in 1974-75. In 1975-76, the "hold harmless" money is estimated to be \$35.1 million. In 1976-77, it is presently estimated that there will be a baseline cost savings of \$29.4 million. This would not hold true if (1) the adult aid caseload should show considerable growth in 1976-77 due to factor(s) not now present or anticipated or (2) if the final Adjusted Payment Level (APL) after federal audit results in figures close to the APLs arrived at in a recently completed APL Redetermination Study; if the levels established by the study were adopted, it is estimated that the baseline cost savings would be eliminated and there would be "hold harmless" funds of \$26.1 million in 1976-77.

The relative newness of the SSI/SSP program and the virtually complete dependence of state estimators upon conflicting data from the federal government's Baltimore headquarters makes budgeting with a tolerable degree of precision extremely difficult.

Although the data displayed in the budget represents the best assessment by the Department of Benefit Payment's professionals in this field, until such time as SSA's reporting process is improved, state budget estimates on projected caseload and cost for the SSI/SSP program are subject to substantial revision.

Current year General Fund expenditures estimated for the SSI/SSP program have been increased by \$42.5 million in 1976-77. Major factors contributing to this net figure are cost-of-living adjustment (\$61.1 million), caseload increases, and decreases due to OASDI increase, an expected baseline savings, and reduction in mandatory supplement expenditures.

Senate Bill 46 (Chapter 1136, Statutes of 1975) repealed entirely California's responsible relative program. Fifty-five positions are being abolished to comply with this change.

DEPARTMENT OF BENEFIT PAYMENTS—*Continued*

c. Special Adult Programs

In addition to regular SSI/SSP benefits, three ancillary programs established by Chapter 1216, Statutes of 1973 (AB 134), are available to SSP recipients. Each of these is funded by the state and administered by the counties in accordance with regulations, standards, and procedures set by the department as authorized by law. The first is Special Circumstance which provides allowances to eligible recipients for special nonrecurring needs, such as the replacement of essential household furniture and equipment or clothing, required housing repairs, necessary moving expenses, and unmet shelter needs. Next is the Excess Value Home (EVH) Program which provides monthly grants to persons who are ineligible for SSI/SSP solely because their home exceeds the federal resource limitations (currently \$25,000). Last is the Emergency Loan Program for recipients whose regular monthly SSI/SSP payment is lost, stolen or delayed.

An additional program for blind SSP recipients is the Guide Dog Special Allowance (funded under Special Benefits), which offers recipients with a specially trained guide dog an additional allowance to cover the cost of dog food. This differs from the above programs in that the Guide Dog Special Allowance is state administered as well as state funded.

The Aid to the Potentially Self-supporting Blind (APSB) program assists blind recipients with a plan of self-support to become economically independent by allowing them to retain resources in excess of those allowed under the basic SSI/SSP program. APSB grant costs and 50 percent of the administrative costs are state funded. The remaining 50 percent of the administrative costs are county funded.

d. Food Stamps

The objective of this federally funded payment system is to raise levels of nutrition among welfare and other low-income households. This is accomplished through offering eligible households the opportunity to purchase food stamps at a cost presently averaging 57 percent of their redemption value when used to buy foods at local markets. Administration of the system is the responsibility of the U.S. Department of Agriculture, Food and Nutrition Service (FNS), which has an agreement with the Department of Benefit Payments to direct the operation of the system within the state. The Department supervises counties in the determination and certification of the eligibility of applicant households. The bonus value of the food stamps is borne entirely by the U.S. Department of Agriculture. Recent increases in bonus values and coupon allotments have made the program available to a large number of people who were previously not eligible. This fact coupled with stricter federal accountability and mandatory program monitoring requirements has caused the program to grow both in caseload and in administrative staff responsibilities. The administrative cost for certifying welfare households participating in the food stamp program is included in the administrative costs for the childrens program, which is reimbursed by the Department of Health, Education and Welfare (HEW) at the 50 percent level.

For the food stamp nonassistance program, 50 percent of the administrative cost is reimbursed by the U.S. Department of Agriculture with the remaining 50 percent assumed by the state and counties.

The Department, through its Food Stamp Program Management Branch, supervises the county administration of the program by providing consultation and technical assistance in implementing and operating the program on the local level. This unit is the prime intermediary between California counties and FNS. As the single state agency, Benefit Payments is accountable to FNS that the Food Stamp Program is operated in an effective and efficient manner to assure that counties receive adequate and timely instruction and guidance as required so that needy eligible households may be certified promptly and accurately to receive program benefits. The Department is reimbursed for 50 percent of its cost by a combination of FNS and HEW funding.

DEPARTMENT OF BENEFIT PAYMENTS—Continued

There has recently been significant program and administrative changes, both at the state and federal level, in the Food Stamp Program. At the state level AB 134 (Chapter 1216, Statutes of 1973) made the Food Stamp Program mandatory in every county within California effective July 1, 1974, and also mandated, effective July 1, 1975, counties to issue food stamps by at least three different methods. At the federal level a comprehensive outreach program has been mandated by a U.S. District Court order. Counties must ensure that low-income households have information on and access to the Food Stamp Program. Also, final regulations implementing the efficiency and effectiveness regulations of PL 93-347 have been issued which the Department is implementing January 1, 1976. This will require a substantial increase in state level administrative responsibilities. Failure to comply with this federal directive could result in sanctions being applied to the State in the form of a withholding of the federal share of state/county administrative costs.

A total of 83.3 positions were administratively established during 1975-76 for quality control of the food stamp program. These positions are proposed for continuation in 1976-77. Quality control has previously been performed by county welfare Departments. The level of review provided was substantially below minimums required by federal regulations. The Federal Government finances half of all administrative costs for the food stamp program, as well as the full bonus value of stamps issued. One additional position is proposed to coordinate the federally mandated food stamp outreach program.

e. County Administration

County administrative costs are shared by the federal, state, and county governments. AFDC program administrative costs are subject to 50 percent federal reimbursement and 25 percent state reimbursement. The Nonassistance Food Stamp Program is subject to 50 percent federal reimbursement; all other nonfederal administrative costs above the costs incurred by the counties in calendar year 1973 will be borne by the state. The state pays 100 percent of administrative costs associated with the special circumstances, special benefits, and emergency payments programs for adult recipients. The APSB program is shared equally (50 percent) by the state and the counties. Retroactive to July 1, 1975, the administrative costs of child support enforcement under Title IV-D of the Social Security Act is 75 percent federal. Nonfederal sharing for July-September 1975 is 50 percent state and 50 percent county, and beginning October 1975, 100 percent county funds. The state share of each of these programs is subject to the amount appropriated each fiscal year.

County administrative funds are used to pay salaries and benefits of eligibility workers, clerical support, and administrative support staff. These funds are also used to pay for the typical operating costs of space, utilities, supplies, check writing for recipients, EDP, and other operative costs. The majority of administrative funds (82 percent) are used to pay salaries and employee benefits of welfare department employees with the remaining 18 percent being used for operating costs.

The Department of Benefit Payments is currently undertaking a major effort to control county administrative costs. The County Administrative Expense Control Bureau was created in July of 1975 to develop methods of control for county administrative costs during fiscal year 1975-76 and subsequent years. Twelve positions were administratively established during 1975-76 for this purpose and are proposed for continuation in 1976-77. The objective of this new bureau is to provide management with reliable fiscal and statistical data from which decisions can be made, and to work with individual counties and appropriate program staff to implement and monitor the new cost control system. Through this new effort, the department will be able to better define why expenditures are rising, in what specific areas they are rising, and what controls must be placed on counties in order to adequately control county administrative costs.

The department's plan was presented to the Joint Legislative Budget Committee in October, 1975. The plan provides that during FY 75/76 county administrative costs will be reduced by approximately \$2.4 million, compared to allowing counties FY 74/75 operating levels to continue. Of this amount, approximately \$0.6 million is attributable to AFDC and \$1.8 is attributable to NAFS.

These reductions were based on each county's efficiency as compared to the average on a statewide basis. Counties not meeting the average caseload per worker received a limited allocation reduction. Therefore, during the 75/76 fiscal year, counties will be working toward increasing their caseload per worker in order to limit their expenditures. This type of action will allow county administrative costs to be limited by the \$2.4 million as shown above for 75/76.

Because of the \$2.4 million reduction, the December general fund estimate of \$68,874,100 has been reduced to \$66,474,100. Despite the limited success of this cost control program, current expenditure estimates for county administration in 1975-76 will still exceed the appropriation by an amount estimated at \$1,379,410. Since this increase is due to caseload growth, the Department of Benefit Payments will review additional expenditure data to provide the Legislature with more reliable data upon which decisions may be made.

DEPARTMENT OF BENEFIT PAYMENTS—*Continued*

f. Federal Programs

The Cuban Refugee Program was established by Presidential proclamation in 1961 and was implemented in accordance with the Migration and Refugee Assistance Act of 1962 to meet the needs of Cuban refugees who have entered the United States and who are in need of assistance. Funds are available to meet the costs of financial assistance, medical assistance and social services of the refugees.

The Indochinese Refugee Assistance Program was established under the authority of the Indochina Migration and Refugee Assistance Act of 1975 (Public Law 94-23), Special Appropriations for Assistance to Refugees from Cambodia and Vietnam (Public Law 94-24) and federal policy directives.

These federal programs are administered by the county welfare departments under the supervision of the Department of Health, Education and Welfare and the State Department of Benefit Payments.

The function of the Indochinese Refugee Assistance Program and the Cuban Refugee Program is to provide financial assistance, medical assistance, and social services to the Cuban, Vietnamese and Cambodian refugees. These programs are 100% federally funded.

IV. ADMINISTRATION AT STATE LEVEL

Program Objectives and Description

The administration of the department requires management, direction and logistic support necessary to assure the programs are administered according to sound management principles, methods and techniques. Support is provided in the following areas: legal, government and community relations planning, regulations, public information, and administrative services (i.e., accounting, personal, computers, training).

Four new positions are proposed to provide staff support for Medi-Cal Quality Control. Two additional positions are proposed for transfer from the Department of Health Accounting unit. An augmentation of 34.3 new positions is proposed for 1976-77 to provide various support services including training, data processing, personnel, clerical, internal audits, public inquiry and correspondence, AFDC cost control, Cuban refugee coordination, and guide dog food allowances.

In addition, the department has requested \$230,546 to augment the contract with Merit System Services for personnel services provided to county welfare departments. This augmentation will finance test validation.

DEPARTMENT OF CORRECTIONS

The principal programs of the Department of Corrections are the control, care, and treatment of men and women who have been convicted of serious crimes, or those admitted to the civil narcotic program, and committed to state correctional facilities. The department's objectives also include the supervision of men and women who have been paroled from correctional facilities and returned to the community.

Headed by a director, the department is organized into four line divisions: program and policy, administration, institutions, and parole and community services, with support of various staff service functions such as legislative liaison, personnel management and training, and women's affairs. Within the institutions division and located throughout the state are 12 correctional institutions with three of these having reception centers.

Included within the budget are the autonomous entities of the Adult Authority, the Women's Board of Terms and Parole, the Narcotic Addict Evaluation Authority, the Correctional Industries Commission and the Board of Corrections.

I. RECEPTION AND DIAGNOSIS PROGRAM

Program Objectives and Description

A systematic method of intake, diagnosis and classification recommendation is an integral part of the California correctional program. A personal history is compiled on each inmate, incorporating information from law enforcement agencies, courts, other correctional programs, the military, family, friends, schools, etc. This information is documented and used in making parole and term-setting decisions.

In addition to processing new commitments, 90-day diagnostic evaluations and 120-day evaluative reports on convicted offenders are provided to California courts at their request.

Reception Centers are located at the California Medical Facility, California Institution for Men, and the California Institution for Women for female felon commitments. Civilly committed narcotic addicts are received and processed at the California Rehabilitation Center.

Authority

Penal Code Sections 1168, 1203.03, 5068, 8079.

II. INSTITUTION PROGRAM

Program Objectives and Description

The Department of Corrections is required by statute to accept convicted felons from California courts when their sentence is imprisonment in a state correctional facility. It is the department's responsibility to provide secure detention facilities for convicted felons to protect society from further criminal activities and to provide necessary services such as feeding, clothing, medical care and treatment programs including academic and vocational education and psychiatric and counseling services.

Authority

Penal Code, Part III, Titles 1, 2, 3, 5, 7; Welfare and Institutions Code, Division 3.

DEPARTMENT OF CORRECTIONS—*Continued*

a. Security

California law requires that the department provide secure and safe facilities to house convicted felons and civilly committed nonfelon narcotic addicts for the term of their sentences. Inmates are housed in the institutions and in the unit that is equipped with the degree of security needed based upon the inmate's escape risk, violence potential and history of assaultive behavior. Custodial personnel staff assigned posts and perform a variety of functions including supervision of inmates in housing units, dining areas, work details, and security areas.

The family visiting program is vital to the operation of the department. It not only provides for the well-being of the inmate population but also for the maintenance of secure and relatively peaceful institutions. To provide an improved level of service, this program is to be expanded in 1976-77 by adding 37 family visiting units at a General Fund cost of \$300,000.

Output:

	Actual			Estimated	
	1972	1973	1974	1975	1976
Male Felons					
Escapes from guarded perimeters of medium/maximum security institutions	10	7	13	10	10
Rate per 100 ADP05	.04	.06	.05	.05

Input

	1974-75	1975-76	1976-77
Expenditures	\$65,812,153	\$71,244,265	\$71,842,440
Personnel man-years	4,115.1	4,002.8	3,943.6

b. Inmate Support

The California correctional system has implemented rules, regulations, and practices which insure that inmates receive humane treatment and adequate support services, including food, clothing, housing and medical care.

Input

	1974-75	1975-76	1976-77
Expenditures	\$49,100,651	\$53,879,522	\$56,478,959
Personnel man-years	1,045.3	1,050.3	1,050.3

1. FEEDING

Three meals per day are served to the institution population, prepared by inmates on work assignment or participating in vocational programs under supervision of civil service instructors.

Each institution maintains communication with inmate representative groups regarding menu acceptability and quality of food.

Input

	1974-75	1975-76	1976-77
Expenditures	\$15,714,025	\$15,182,948	\$15,855,459
Personnel man-years	170.6	169.3	169.3

2. CLOTHING

Security considerations dictate that inmates wear distinctive clothing for easy identification both in the institution and outside in the event of escape. The clothing function provides clean and suitable clothing for the inmates appropriate to the climate at each institution and conducts vocational training in laundering and drycleaning, sewing skills and clothing distribution. Most of the basic clothing is made by correctional industries.

Input

	1974-75	1975-76	1976-77
Expenditures	\$4,591,929	\$5,367,765	\$4,884,091
Personnel man-years	28.5	29	29

3. MEDICAL-DENTAL SERVICES

The Department of Corrections maintains 561 medical-surgical beds and provides outpatient and inpatient care and treatment for any medical-dental problem arising in the inmate population. A major surgical hospital at San Quentin has been established for departmental use. In addition, the hospitals at the California Mens Colony and California Medical Facility are used for medical and surgical referral patients. Outside medical facilities, as well as medical consultants are utilized when required for highly specialized medical and surgical procedures.

Medical

	1974-75	1975-76	1976-77
Output			
Total number of hospital patients	9,942	9,247	8,599
Average daily sick line	2,214	2,084	1,938
Total complete physical examinations—inmates and staff	32,512	30,236	27,162
Total operations	4,239	3,942	3,667

Dental

	1974-75	1975-76	1976-77
Total surgery procedures	15,079	14,325	13,608
Total fillings	92,857	88,214	83,803
Total dentures, full and partial	5,570	5,291	5,026
Total repair of dentures	3,209	3,048	2,895
Total number of treatments	26,239	24,927	23,680

Input

	1974-75	1975-76	1976-77
Expenditures	\$12,788,956	\$13,384,425	\$13,667,553
Personnel man-years	495.8	500	500

4. HOUSEKEEPING AND MAINTENANCE

Housekeeping services provide the inmates with clean and orderly surroundings and personal care items to promote cleanliness and help instill improved personal habits.

Institutions are maintained chiefly by inmate workers under supervision of civil service trades foreman so they will gain meaningful experience and skill training to be useful after release.

Input

	1974-75	1975-76	1976-77
Expenditures	\$16,005,741	\$19,944,384	\$22,071,856
Personnel man-years	350.4	352	352

DEPARTMENT OF CORRECTIONS—Continued

c. Treatment

The period of time an inmate is confined to a correctional facility provides an opportunity for attitude and behavior modification and personal development through the many rehabilitative programs available. These programs include psychiatric and counseling services, academic and vocational education, leisure-time activities and religion and are designed to assure that treatment meets the need of the individual inmates.

Input	1974-75	1975-76	1976-77
Expenditures	\$22,078,092	\$23,091,360	\$23,402,379
Personnel man-years	1,026.9	1,007	1,007

1. PSYCHIATRIC SERVICES

Many inmates committed to the department suffer from serious emotional and mental problems which result in varying degrees of social disability. To aid in correcting such conditions, institutions utilize professional staff and programs, including psychiatric hospitalization for treatment of those with mental disorders. The major psychiatric hospital of the department is the California Medical Facility at Vacaville. In addition, the California Mens Colony at San Luis Obispo operates a psychiatric program to care for the increasing number of inmates in the system requiring treatment.

Output	1974-75	1975-76	1976-77
Psychiatric and psychological treatment cases	3,695	3,880	4,074
Total psychiatric examinations including Adult Authority reports	18,369	17,450	16,577

Input	1974-75	1975-76	1976-77
Expenditures	\$4,298,592	\$4,607,161	\$4,701,317
Personnel man-years	171.1	172	172

2. COUNSELING SERVICES

Counseling services render casework assistance to inmates and provide information to the paroling authorities through progress reports.

All inmates are continuously evaluated by counseling staff, as to their behavior, attitude, and progress in programs. The counselor also continues to work with the inmate in preparation for his return to the community.

A major court decision has been made which affects the operations of the Department of Corrections. In *Gee vs. Brown* the California Superior Court ordered a limited right to attorneys at parole rescission hearings. To fund implementation of this court decision 10 positions and \$229,420 are required in 1975-76 and 7 positions and \$277,754 are necessary in 1976-77.

Output	1974-75	1975-76	1976-77
Inmates in group counseling	3,696	4,223	4,413
Number of inmate cases prepared for release consideration	30,780	26,960	25,105

Input	1974-75	1975-76	1976-77
Expenditures	\$8,293,795	\$8,733,802	\$9,033,943
Personnel man-years	535.4	514	514

3. ACADEMIC EDUCATION

The average inmate committed to the department has a tested grade placement slightly below the eighth grade level but many do not possess even basic literacy.

Academic education is provided on the premise that the inmate's earning potential is increased as well as his awareness and understanding of his or her responsibilities and opportunities.

Primary emphasis is placed on providing necessary services to eliminate illiteracy and achieve the eighth grade level. College-level courses are also available for qualified inmates.

Output	1974-75	1975-76	1976-77
Average academic enrollment	7,002	7,580	7,000
Elementary diplomas/certificates	728	780	700
High school diplomas	900	950	900
GED high school equivalencies	381	500	450
Associate in Arts degrees	29	30	25
College courses completed	2,235	2,500	2,300

Input	1974-75	1975-76	1976-77
Expenditures	\$3,871,047	\$3,917,337	\$3,779,856
Personnel Man-years	90.6	88	88

4. VOCATIONAL EDUCATION

Many inmates have unstable work records, few marketable skills and little knowledge of how to use the skills they possess. To meet the need for vocational skills, training is conducted in 47 occupational areas, which provides approximately 2,500 work-training stations.

Output	1974-75	1975-76	1976-77
Average enrollment	5,200	5,000	4,500
Number of vocational training areas available	49	47	47
Vocational certificates of achievement issued	1,560	1,500	1,500

Input	1974-75	1975-76	1976-77
Expenditures	\$4,336,845	\$4,202,755	\$4,235,340
Personnel man-years	174.5	176	176

5. LEISURE-TIME ACTIVITIES

Programs of physical fitness and leisure-time activities designed to improve an inmate's physical and emotional well-being are provided at all institutions. These programs occur mainly in the evenings and on weekends and holidays.

Self-help activities in an institution are another means of helping inmates use leisure time constructively.

DEPARTMENT OF CORRECTIONS—Continued

Input	1974-75	1975-76	1976-77
Expenditures	\$609,333	\$830,765	\$842,484
Personnel man-years	25.3	25	25

6. RELIGION

Full-time Chaplains are located in each institution of the department and provide religious services for the major faiths.

Input	1974-75	1975-76	1976-77
Expenditures	\$668,480	\$799,540	\$809,439
Personnel man-years	30	32	32

d. Inmate Employment

Inmates have productive work assignments to minimize idle time and contribute toward the development of certain useful job skills. Inmate employment provides inmates with a source of limited income from correctional industries, conservation camp operations or institution work assignments. Inmates in the correctional system have been adversely affected by inflation so that their buying power has been substantially decreased. In order to relieve this situation partially, an additional \$100,000 is provided in 1976-77 for inmate pay.

Input	1974-75	1975-76	1976-77
Correctional Industries:			
Expenditures	\$14,603,763	\$16,109,950	\$16,793,068
Personnel man-years	228.9	247.8	247.8
Work Projects—Cooperating Agencies:			
Expenditures	\$2,944,894	\$2,923,540	\$3,060,384
Personnel man-years	140.7	137	137
Work Assignments—Support:			
Expenditures	\$936,566	\$948,768	\$1,020,768
Personnel man-years	—	—	—
Totals, Inmate Employment:			
Expenditures	\$18,485,223	\$19,982,258	\$20,874,220
Personnel man-years	369.6	384.8	384.8

1. CORRECTIONAL INDUSTRIES

The objectives of Correctional Industries are to provide constructive work for inmates to reduce idleness, improve work habits and skills of inmates to better prepare them for employment after release, and provide reduced cost of maintaining the prison system through the sale of products and services.

There are 23 major industrial and seven agricultural enterprises operating at 11 institutions throughout the state. Financial support is through the Correctional Industries Revolving Fund, which is maintained by revenues from the sale of products and services made to public agencies.

The average amount earned during the 1974-75 fiscal year was about \$342 per man. Correctional Industries operates at no cost to the General Fund and provides programs that could otherwise represent a substantial General Fund cost.

Output	1974-75	1975-76	1976-77
Average inmate population	24,636	21,840	20,535
Average number of inmates employed	1,955	2,000	2,000
Percentage of total population	8.1%	9.1%	9.7%

Input	1974-75	1975-76	1976-77
Expenditures (Correctional Industries Revolving Fund)	\$14,603,763	\$16,109,950	\$16,793,068
Personnel man-years	228.9	247.8	247.8

2. WORK PROJECTS—COOPERATING AGENCIES

The increasing public use of state and federal natural resources has created a demand for available inmate labor to primarily assist in wildfire suppression and to secondarily perform allied forestry projects and maintain and protect the natural resources of the state. These work projects involve cooperation with both state and federal agencies. The conservation program consists of 18 California Division of Forestry camps.

Output	1974-75	1975-76	1976-77
Man-hours worked in fire suppression	366,691	341,023	330,500
Regular project assignment hours	2,982,869	2,774,068	2,300,000
In-camp work project hours	827,000	769,110	710,000
Average number of inmates assigned	1,020	950	950

Input	1974-75	1975-76	1976-77
Expenditures	\$2,944,894	\$2,923,540	\$3,060,384
Personnel man-years	140.7	137	137

3. WORK ASSIGNMENT—SUPPORT

Operation of the various institutions provide many meaningful assignments for inmates. Feeding, laundry, housekeeping, maintenance, hospital, grounds care, and similar tasks are performed by inmate workers supervised by civil service employees.

Output	1974-75	1975-76	1976-77
Total number of inmates employed	9,000	8,800	8,500
Number of paid positions	6,241	6,241	6,241

Input	1974-75	1975-76	1976-77
Expenditures	\$936,566	\$948,768	\$1,020,768

e. Inmate Welfare Fund

The Inmate Welfare Fund was created in 1945 as a special trust fund for the benefit, education and welfare of the inmates. The fund is administered by the department and derives its income mainly from the profits of inmate canteens. Other sources of funds are sales from handicraft shops, interest on invested reserve moneys of the fund itself and cash donations.

Income from this self-supporting fund is used for such inmate benefits as movies, family visiting, inmate newspapers and library books.

DEPARTMENT OF CORRECTIONS—Continued

Leather goods, jewelry and art work created by inmates are sold to the public at the institutions. A percentage of an item's selling price goes to the Inmate Welfare Fund, and the remainder is credited to the inmate's account. Purchases for materials are paid for by the inmate from his own funds. The program provides earnings to inmates with no other source of income.

Output	1974-75	1975-76	1976-77
Purchase for inmate benefits	\$514,372	\$400,000	\$400,000
Per cent of inmates participating in handicraft	36%	36%	36%
Input			
Expenditures	\$5,152,804	\$5,069,990	\$4,740,137
Personnel man-years	41.3	48.9	48.9
Resources	\$5,438,520	\$5,170,014	\$4,777,942

f. Institution Operations—Administration

Effective leadership, guidance and support are essential to administer and coordinate all institution program activities. To assure the efficient utilization of available resources, it is imperative that institutions are operated within the framework of departmental goals at the most reasonable cost to the state.

Input	1974-75	1975-76	1976-77
Expenditures	\$9,947,385	\$10,473,264	\$11,105,108
Personnel man-years	341.1	332	332

III. RELEASING AUTHORITIES

Program Objectives and Description

The indeterminate sentence law of California provides that the length of time an individual must serve in a correctional institution or on parole will be determined by one of three independent releasing authorities having jurisdiction over male felons, female felons or civilly committed narcotic addicts.

Term setting and parole granting/revocation decisions affecting male felons are determined by the Adult Authority. Women felons' cases are heard by the Women's Board of Terms and Parole. The length of combined inpatient and outpatient treatment for nonfelon narcotic addicts is determined by the Narcotic Addict Evaluation Authority.

Authority

Penal Code, Part III, Titles 1, 2, 3, 5, 7; Welfare and Institutions Code, Divisions 2.5 and 3.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program costs.....	68.1	73	73	\$2,147,238	\$2,512,698	\$2,570,530

Totals, Releasing Authorities (<i>General Fund</i>)	68.1	84	76	\$2,147,238	\$2,839,556	\$2,707,100

Program Elements

a. Adult Authority	54	70	62	1,854,631	2,481,141	2,341,920
b. Women's Board of Terms and Parole	9.1	9	9	187,835	240,174	245,046
c. Narcotic Addict Evaluation Board	5	5	5	104,772	118,241	120,134

a. Adult Authority

The Adult Authority consists of nine members appointed by the Governor. The Board and its hearing officers fix sentences, release on and return from parole, restore civil rights, and make clemency recommendations for all adult male felons committed to prison by the courts.

Federal and state court decisions from 1972 through 1974 made the parole revocation process more formal and complex. More recent court decisions are continuing that trend and are also affecting the parole release and sentencing process. Two major court decisions have been made which affect the operations of the Department of Corrections and the Adult Authority. In *Gee v. Brown*, the California Superior Court ordered a limited right to attorneys at parole rescission hearings. In *re Rodriguez*, the same court required the Adult Authority to set a primary sentence proportionate to the inmate's culpability for his crime, regardless of whether he is given an earlier parole release date. To fund the implementation of these court decisions, 7 positions and \$182,603 are required in 1975-76. In 1976-77, 3 positions and \$134,819 are required from the General Fund.

Output	1974-75	1975-76	1976-77
Adult Authority:			
Institution cases heard.....	30,780	26,960	25,105
Revocation hearings.....	(817)	(720)	(670)
Release granted.....	(10,624)	(9,300)	(8,700)
Parole and Community Services:			
Cases heard	15,240	18,225	18,560
Parole suspended	2,771	3,315	3,375
Reinstatements	1,021	1,220	1,245
Prerevocation hearing	418	500	510
Revocation (community violation/disposition) hearings	524	625	640
Other (mandatory review cases, reaffirmed actions, NTCU (Narcotics Treatment Control Unit) release or placements ordered, parole continuation advices)	10,506	12,565	12,790

Input

Expenditures	\$1,854,631	\$2,481,141	\$2,341,920
Personnel man-years	54	70	62

b. Women's Board of Terms and Parole

The Women's Board of Terms and Parole is a Governor-appointed, half-time state paroling authority consisting of five members, three of whom must be women. Aside from the members, the board has the authority to designate hearing representatives, and presently there is one such representative.

Workload continues to be affected by U.S. Supreme Court rulings *Morrissey v. Brewer* and *Gagnon v. Scarpelli* and California Supreme Court rulings *In re Prewitt*, *In re Sturm*, *In re Valrie*. California Supreme Court ruling *In re Gee* indicates an additional increase in workload due to mandatory legal processes at rescission of parole date hearings.

Personnel man-years	9.1	9	9

c. Narcotic Addict Evaluation Authority

The Narcotic Addict Evaluation Authority consists of four part-time board members.

When a male or female narcotic addict in the Civil Addict Program shows significant progress as a result of treatment and demonstrates the potential to abstain from narcotic drug use, the Superintendent of the California Rehabilitation Center, where such commitments are confined, certifies this progress to the Narcotic Addict Evaluation Authority for release consideration.

In addition, the board considers the cases of outpatients who violate their conditions of release and determines whether these individuals should be returned to inpatient status for further treatment.

Output	1974-75	1975-76	1976-77
Narcotic Addict Evaluation Authority:

Personnel man-years	5	5	5

IV. COMMUNITY CORRECTIONAL PROGRAM

Program Objectives and Description

The primary objective of the Community Correctional Program is to provide the fullest possible protection to the community by increasing successful parole outcome and reducing new crimes and aggressive acts by parolees.

The Community Correctional Program is divided into five geographic regions consisting of 17 districts and 60 parole units.

Authority

Penal Code, Part III, Titles 1 and 7, Part IV, Title 1; Welfare and Institutions Code, Section 3305.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

e. Executive	54.8	47	47	1,400,026	1,298,883	1,337,658

a. Supervision—Case Services

The achievement of the primary objective of the program, protection of society through prevention of serious criminal behavior, is best realized through effective supervision and case services.

The Supervision—Case Services element had been composed of six organizational components through 1974-75. Beginning with 1975-76 Fiscal Year, the two components of supervision of felons (Conventional and Work Unit) were merged into one component, Felon Supervision. The current five components in this element are: (1) Felon Supervision for male and female felons, with case-carrying parole agents supervising caseloads averaging 50 cases per agent; (2) Nonfelon supervision for male and female addicts, with case-carrying agents supervising caseloads averaging 32 cases per agent including cases within 60 days of institutional release and cases where the addicts have been returned for short-term treatment; (3) Work Furlough case supervision, for inmates released shortly before established parole dates, with case-carrying agents supervising caseloads averaging 35 cases per agent; (4) Interstate Unit case supervision for other states' parolees in California, and California parolees in other states; (5) Field Administration and Unit Supervision to provide administrative leadership, guidance, direction, and technical and clerical support.

Felon Supervision:	1974-75	1975-76	1976-77

b. Community Correctional Centers

38 Parolees without adequate resources are more prone to get into difficulty. This element of the program provides residential and other assistance and support in the community under parole management for a short period after release, or in lieu of return to an institution. Community correctional centers are an extension of the treatment program which commenced within the institution. Upon being released from an institution and assigned to a center, the resident has support until he can become established in a job or training program. Residents may also participate in a variety of other treatment programs such as group counseling and psychotherapy. Normally, a field parole unit is located at a center, and parole agents provide supervision and assistance for center residents.

44 The centers are also used as a residence for those men and women participating in the work furlough function, but who are still legally considered inmates. The past several years has seen the resident population at the centers becoming more and more work furlough releases. Selected men and women maintain employment while living at the center as a means of earning money and preparing themselves for residence in the community.

46 Vinewood Center, a community correctional center for female civil narcotic commitments, will close March 1, 1976. The residents will transfer to another center along with some of the staff. The remaining 5.6 staff positions will be deleted from the budget. Funds available from the closing of Vinewood Center will be redirected to support the female parolees at their new location and to support public and private community-based programs.

63				

^a The Sacramento Valley Community Correctional Center was grant-funded in 1974-75 Fiscal Year, and as a result, its population is not computed in the output for that year. This explains why the population beginning Fiscal Year 1975-76 is 30 greater than population end of Fiscal Year 1974-75.

c. Psychiatric Outpatient Services

69 Following their institutional psychiatric treatment, inmates with a history of aggravated assaultive crimes and/or serious sex offenses are often required by the paroling authority to participate in follow-up psychotherapeutic treatment as a condition of parole. Over 95 percent of the parolees receiving attention in the program do so as a requirement of the releasing authority. Diagnostic, as well as psychiatric treatment, services are also necessary for parolees who experience serious emotional difficulties while in the community. Professional estimates indicate that approximately 10 percent of the parole population requires these services. Psychiatric outpatient clinics are operated in Los Angeles and San Francisco, with services provided to outlying areas.

DEPARTMENT OF CORRECTIONS—Continued

d. Special Narcotic Services

Effective parole programming requires implementation of the most effective and economical techniques to prevent and/or detect the use of opiates and to avoid readdiction. Urinalysis, methadone maintenance, and routine physical examinations are utilized to deter and/or detect opiate usage. The methadone maintenance program is carried on at the Central Narcotic Test Clinic in Los Angeles and treats 200 addicts. An additional 150 parolees participate in this program through a federally funded project through the State Department of Health. Approximately 1,235 other parolees are participating in methadone maintenance programs conducted by other private or public agencies or organizations. Narcotic detoxification treatment, an alternative to returning addicts to prison, is provided by contracting for such services with appropriate public or private organizations.

Output	1974-75	1975-76	1976-77
Number of addicts supervised	9,205	9,335	9,430

V. ADMINISTRATION

Program Objectives and Description

The Department of Corrections, in order to successfully achieve the responsibilities charged to it by California law, operates with an administrative organization consisting of the office of the director, four line divisions and several staff services functions.

The director and chief deputy director have overall administrative and program responsibility. The administrative assistant coordinates the day-to-day activities of the office of the director.

On July 1, 1975, an inspector general unit was established from existing resources to evaluate, review and inspect all departmental programs. This includes a continuous monitoring of the twelve institutions and five parole regions for compliance with state and departmental policies and procedure.

The institutions division is responsible for all field operations including institutions, classification, medical, education, records, and related program services.

The administration division is responsible for the business affairs of the department including budgeting, feeding, construction and maintenance, and advises the director on the status of fiscal affairs.

The policy and planning division is responsible for research and statistics, legal and grant management, and guidance and assistance in planning, development and operation of departmental programs.

The parole and community services division is responsible for the casework supervision of all men and women on parole after they have been released from the institutions.

The staff services functions include public information, legislative liaison, women's affairs, and personnel management and training. These offices are responsible for providing advice and counsel to the director and line administrators in their specialty areas.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

VI. UNALLOCATED REDIRECTION

Federal funds, provided through the State Department of Rehabilitation for the support of the Public Offender Program are being redirected in the 1976-77 fiscal year. These funds will be used to expand the state's program for severely, physically disabled persons.

Redirection (General Fund)	1974-75	1975-76	1976-77
	-	-	-683,000

VII. SPECIAL ITEMS OF EXPENSE *

Program Objectives and Description

California law provides for the reimbursement to local jurisdictions for expenditures incurred in providing services related to persons who have been committed to the Department of Corrections. Counties are entitled to reimbursement for the following four principal types of expenditures: (1) transportation of prisoners and parole violators; (2) court costs and county charges; (3) returning fugitives from justice; and (4) detaining state parolees. Special appropriation items provide the funds.

Authority

Penal Code Sections 1389, 1549, 1557, 4016, 4700, 4700.5, 6005, 11190 et seq. and Government Code 26749.

Program Requirements	1974-75	1975-76	1976-77
Continuing Program Costs:			
Transportation of Prisoners	\$199,771	\$200,000	\$200,000
Transportation of Fugitives from Justice	699,767	700,000	700,000
Court costs and county charges	779,486	1,598,934	1,598,934
County charges for detention of parolees	-	300,000	300,000
Totals (General Fund)	\$1,679,024	\$2,798,934	\$2,798,934

* Special items of expense are reflected in the local assistance section.

DEPARTMENT OF THE YOUTH AUTHORITY

The primary objective of the Youth Authority is 'to protect society more effectively by substituting for retributive punishment, methods of training and treatment directed toward the correction and rehabilitation of young persons found guilty of public offenses.'

The department carries out this mandate to protect the public by: (1) providing residential and community rehabilitation programs which will help persons committed to the Youth Authority to become useful and productive citizens, and (2) accumulating a body of knowledge relative to the causes of delinquency and the treatment and control of those who engage in illegal behavior.

The mission of the Department of the Youth Authority is to protect society from criminal and delinquent behavior by children and youth.

Goals

Youth Development: *Increase opportunities for all children and youth* to participate as contributing members of society.

Crime Prevention: *Reduce probability of illegal behavior* by children and youth not yet involved in the justice system but who have exhibited antisocial characteristics.

Offender Rehabilitation: *Reduce continuing illegal behavior* by offenders.

Research: *Systematically develop knowledge* about crime prevention, youth development, and offender rehabilitation.

The department is organized into four branches: Parole and Institutions; Prevention and Community Corrections; Planning, Research, Evaluation and Development; and Management Services. Programs are managed by the branches under direction of the Director of the Youth Authority.

I. COMMUNITY SERVICES

Program Objectives and Description

The objectives of Prevention and Community Corrections Branch is to assist local governmental and private organizations and citizens in development and improvement of delinquency reduction programs; and to assist local government in the development and improvement of juvenile law enforcement and correctional systems.

Other Youth Authority responsibilities include assisting county correctional agencies to increase the effectiveness of their programs through standard setting and inspections, training, special studies, and other technical and financial assistance.

From the inception of the probation subsidy program in 1966-67 through 1974-75, there has been a reduction of 35,793 juvenile and adult commitments by the courts to the state compared to the numbers which could potentially have been committed if past rates had continued. In 1976-77, 46 of the 58 counties will participate in the program, which will include counties accounting for 97.5 percent of the state's population.

c. Delinquency prevention assistance to local communities.....	11.5	9.1	8.8	786,984	642,107	303,480

a. Services to Public and Private Agencies

Output

The Youth Authority offers training courses to local probation and juvenile law enforcement agencies. Courses relating to law enforcement have been accredited by the Commission on Peace Officer Standards and Training.

Assistance is provided to local components of the criminal justice system by disseminating and explaining standards of performance, encouraging the development of delinquency prevention projects and assisting communities to develop new and improved correctional programs. In addition, the department has statutory responsibility for developing juvenile hall standards and standards for jails which detain juveniles. The Youth Authority also develops and administers standards for the performance of probation duties and standards for other subsidized programs. The department has the responsibility of inspecting all its subsidized programs to be certain they are meeting minimum standards.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	34	26.8	26.5	\$1,198,523	\$974,682	\$874,486

b. Financial Assistance

Financial assistance programs provide part of the financing for the maintenance and operation and construction of juvenile homes, ranches, and camps, special probation supervision programs, and delinquency prevention programs of public or private agencies. These programs attempt to reduce the occurrence of delinquency and/or to strengthen local community resources in such a way as to reduce the number of cases penetrating into the criminal justice system.

Output

	1974-75	1975-76	1976-77
1. Construction and Maintenance of Juvenile Homes, Ranches, and Camps Subsidy			
Juvenile homes, ranches, and camps provide institutional treatment at the local level for the following average daily population	3,098	3,149	4,128
Number of facilities	73	80	84
Juvenile camp construction subsidy funds—total capacity available	3,716	3,905	3,994
2. Probation Subsidy			
Total reduction of commitments to the Department of the Youth Authority and Department of Corrections	4,866	5,000	5,000
Youth Authority.....	3,234	3,323	3,323
Corrections	1,632	1,677	1,677
Percent of state population represented by the counties	98%	97.5%	98%

3. Delinquency Prevention Subsidies

Thirty-nine counties are subsidized up to \$1,000 of the administrative expenses of each county delinquency prevention commission. In addition matching funds are used for demonstration delinquency prevention projects sponsored by local communities.

4. San Diego Border Check Station (Program discontinued July 18, 1975)

	1974-75	1975-76	1976-77
Number of juveniles interviewed at international border	15,617	—	—
Number of juveniles turned back.....	5,367	—	—

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	30.2	23.9	23.5	\$27,403,785	\$25,974,371	\$24,951,567

c. Delinquency Prevention Assistance to Local Communities

Output

The department's efforts have resulted in increased activities on the part of delinquency prevention commissions, juvenile justice commissions, and other citizen groups that have sponsored delinquency prevention projects funded through state, local, and federal funds. As a direct result of requests from a variety of community groups, the department conducted drug education, volunteer, delinquency prevention and diversion seminars throughout the state.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	11.5	9.1	8.8	\$786,984	\$642,107	\$303,480

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

II. REHABILITATION SERVICES

Program Objectives and Description

The objectives of Parole and Institutions Branch are:

1. To determine by diagnosis which treatment or training programs or combinations of programs offered by the department can best meet the needs of each ward committed to it.
2. To provide a secure, closed and varied treatment setting for wards during the institution phase of their treatment program and supervision, supportive and surveillance services within the community while they are on parole.

Authority

Welfare and Institutions Code.

Trends—Youth Authority Population

1. Ethnic group composition of wards first committed to the Youth Authority has undergone a significant change in recent years. In 1962, minority group members constituted 44 percent of Youth Authority's commitments. In 1973, 53 percent of the total first commitments were from minority groups.
2. The prior offense records of youth currently being committed to the Youth Authority are more extensive than previously. For example, between 1962 and 1974 the proportion of wards with no prior record has decreased from 6.3 percent to 5.7 percent. Males with a first commitment offense in the category of 'offenses against persons' now comprise 37.3 percent as compared to 18.5 percent of the total male commitments in 1962.
3. Since 1962, the juvenile court-criminal court 'mix' of first commitments to the Youth Authority has shifted significantly. Criminal court commitments have increased as a percentage of the total. The 1962 ratio was 72 percent juvenile and 28 percent criminal court commitments. The 1974 ratio was 50.9 percent juvenile and 49.1 percent criminal court cases.
4. The age of youths first commitments to the Youth Authority is increasing. The median age of all wards committed in 1962 was 16.9 years while in 1974 it was 18.1 years. The median age of those housed in Youth Authority facilities has changed dramatically. The median age on June 30, 1962 was 17.8 while on June 30, 1975 it was 19.
5. There has been a marked increase in violent behavior by Youth Authority wards in institutions. A comparison of 1965-66 to 1974-75 shows attacks on staff up from 24 to 140 and attacks by wards on other wards up from 22 to 374.
6. First commitments to the Youth Authority have decreased from 5,194 in 1962 to 3,002 in 1974. As a result of the screening process resulting from improved probation resources, the Youth Authority is receiving older, more criminally experienced, difficult youth requiring longer periods of institution and parole treatment and supervision. The Youth Authority Board has increased length of stay from an average of 8.6 months in 1961 to 12.3 months in 1974.

Youth Authority institution and parole populations for 1974-75 through 1976-77 fiscal years are shown in the table entitled Statement of Population—Institution and Parole.

STATEMENT OF POPULATION—INSTITUTION AND PAROLE

c. Treatment.....	1,080.2	1,071	1,059.4	22,328,655	24,506,715	24,428,711

a. Diagnosis

All wards received by the Youth Authority go through an intensive diagnostic process at one of three Youth Authority reception centers. The clinical study includes psychological and educational testing, interviewing, medical and dental examinations and observations of daily activities. This information is then used in formulating the final diagnosis and treatment recommendations.

The DeWitt Nelson Training Center provides dental work for all wards transferred to the several Youth Conservation Camps. The pre-camp training program is conducted at this center and the dental work is completed while the wards are being trained. To adequately provide for this activity, two positions and \$51,731 are included in the 1976-77 Fiscal Year.

Due to increasing population, the following living units and clinic units were activated during the current year: Youth Training School—Two living units and one clinic unit; Ventura School—One living unit and one clinic unit. Based on current population projections, three additional living units may need to be activated during the 1976-77 fiscal year. Funds for these living and clinic units have not been included in the Budget and are deferred until decisions are made for the May Revision of the Budget. The Department will examine institutional length of stay with the view of reducing length of stay as an alternative to continuing these units or to opening additional units in the 1976-77 fiscal year. A total of 64.8 positions and \$1,040,888 will be requested in the 1975-76 Fiscal Year Deficiency Bill.

Expenditures	341.5	334.4	326.3	\$7,433,991	\$8,194,808	\$8,160,884

b. Care and Control

Providing adequate care, control, custody and surveillance for youth committed to the department, and thus protection of the public, is one of the major responsibilities of the Youth Authority and must be accomplished within an atmosphere that promotes progress toward individual rehabilitation goals.

Custodial personnel have physical control and security as a primary responsibility. This responsibility is exercised in the living unit, through supervision of recreation activities and work details, movement within the institution, and a variety of other activities in which wards are involved.

The Youth Conservation Camp program provides an alternative incarceration program and supplies manpower to the Department of Conservation for fire fighting assignments. These wards are identified and selected through institutional programs. \$63,025 are being requested to provide two-post coverage during the night shift at the four Northern California Conservation Camps.

Four major court decisions affect the operations of the Department of the Youth Authority and the Youth Authority Board. In *re Wolff v. McDonnell*, United States Supreme Court order, requiring certain "due process" standards in correctional institution disciplinary proceedings. In *re Olson*, First District Court of Appeals, disclosure of Department files to wards, and In *re Love*, California Supreme Court, full disclosure to parolees of information in the Department's possession. In *re Lacroix and re Valrie*, to change existing parole violation system to comply with the California Supreme Court decision. In *Gee v. Brown* requiring higher "due process" standards for institutional residents who have been referred to parole when accused of serious institution rule or law violation which may result in the rescinding of their referral to parole. An additional 43.5 positions and \$753,117 are included in the 1976-77 fiscal year.

Output

All the youth committed to the Youth Authority are eventually returned to the community under parole supervision. Supervision and control of the parolees' activities are supplemented by other casework services, including individual and group counseling, assistance in obtaining employment and school placement, when appropriate, foster home placement, and other supportive services.

The parole agent is responsible for face-to-face contact with youth assigned to his caseload as well as all contacts with private and public agencies and interested citizens with respect to them. The parole agent's parolee supervision responsibilities include maintaining controls over the parolee's activities in school, employment, and the community.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	2,235.3	2,183.7	2,162.3	\$47,482,417	\$52,342,337	\$52,296,908

c. Treatment

Each Youth Authority institution and parole unit provides a variety of counseling and other treatment services. These services include small group counseling and individual counseling, guided group interaction, activity groups and traditional, clinically oriented therapy, academic and vocational education, religious counseling and psychiatric evaluation and treatment.

The preponderance of wards in institutions operated by the Department of the Youth Authority are between 16 and 20 years old. Their backgrounds frequently include a history of poor school experiences. Only 6.8 percent of first admissions in 1971 had no reported school misbehavior, and only 7.2 percent had achieved high school graduation. The reading and math achievement levels are severely depressed. Sixty-three percent of the wards had reading comprehension levels three or more years below their age-grade expectancy, and 85 percent had math achievement levels three or more years below their age-grade expectancies. Currently, five teaching positions at the five Youth Conservation Camps are funded from federal funds. \$104,133 are being requested to continue these positions in the 1976-77 fiscal year.

A survey of student attitudes at Preston School found that their understanding of the world of work was what one would expect from a 13-year-old. The employment record of these students is relatively poor. A survey of parolees found that approximately 40 percent of males and 60 percent of females of parole caseloads 'in the labor force' are unemployed at any point in time.

A ward pay plan has been implemented to provide incentive for older and more sophisticated wards for work not directly related to training but necessary for the operation of the institution. The wards are paid on a sliding scale of \$0.04 to \$0.12 an hour, with an average rate of pay of \$0.08 an hour. Wards in the Youth Authority system have been adversely affected by inflation so that their buying power has been substantially decreased. In order to relieve this situation, an additional \$14,500 is provided in 1976-77 for ward pay. During the 1974-75 fiscal year, a medical psychiatric psychiatric treatment program for mentally ill juvenile offenders became operational at the Northern Reception Center and Clinic. This program cares for a limited number of youth in Northern California. In addition, the department operates a similar program in Southern California, funded by Los Angeles County Mental Health.

The Youth Training School provides psychiatric services to wards with serious psychiatric and psychological disorders and provides casework services for wards. Casework services are performed at a ratio of one per 100 wards compared to one per 50 wards at all other Youth Authority institutions. To reduce the casework services to a 1:50 ratio, 23 positions and \$358,163 are included in the 1976-77 fiscal year.

Output

PAROLE VIOLATION STATUS OF PAROLEES

Year of release	Number released to California parole supervision	Revoked or discharged for violation within 15 months	
		Number	Percent

III. RESEARCH

Program Objectives and Description

This program provides the evaluation and feedback to management mandatory to determine which programs are effective and should be continued, those that show promise and should be reinforced and those that should be discontinued.

1. To provide planning to guide and help implement the long-range program.
2. To provide the department with an information system as a basis for arriving at sound management decisions.
3. To provide the department with a research capability and a system for evaluating how well its program objectives are being met.

Authority

Welfare and Institutions Code.

The Division of Research has two major areas of responsibility. One is the operation of the departmental information system, and a second is to provide research services to ongoing programs and to special demonstration projects.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program costs.....	87.1	79.3	79.3	\$1,948,192	\$2,169,896	\$1,705,109

Federal funds				207,510	175,630	—
Reimbursements				772,202	744,958	375,895

Program Elements

a. Information systems	31.1	30.2	24.4	695,504	788,933	553,330
b. Research and evaluation	56	54.3	43.9	1,252,688	1,420,962	998,900

a. Information Systems

Information is collected on the principal decision points in the movement of wards through the department's rehabilitation program from the point of initial referral to final discharge. Predictions of future institutional and parole caseloads are made for support budgeting and Capital Outlay budgeting.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	31.1	30.2	24.4	\$695,504	\$788,933	\$553,330

b. Research and Evaluation

The evaluation resource is the primary means whereby the department fulfills its commitment to careful, scientific evaluation of its program to ensure its resources are being used most effectively.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	56	54.3	43.9	\$1,252,688	\$1,420,962	\$998,900

Output

Output is measured in terms of the timeliness, comprehensiveness, accuracy, and relevance of data made available to management.

IV. YOUTH AUTHORITY BOARD

Program Objectives and Description

The Youth Authority Board is mandated by statute to make objective decisions as to a ward's readiness for release on parole, his conduct while on parole, possible return to court, and readiness for discharge from the jurisdiction of the Youth Authority.

The objectives of the Youth Authority Board are:

1. To protect the public.
2. To assure the rehabilitation of the youthful offender.

Four major court decisions affect the operations of the Department of the Youth Authority and the Youth Authority Board. In *re Wolff v. McDonnell*, United States Supreme Court order, requiring certain "due process" standards in correctional institution disciplinary proceedings. In *re Olson*, First District Court of Appeals, disclosure of Department files to wards, and In *re Love*, California Supreme Court, full disclosure to parolees of information in the Department's possession. In *re Lacroix* and *re Valrie*, to change existing parole violation system to comply with the California Supreme Court decision. In *Gee v. Brown* requiring higher "due process" standards for institutional residents who have been referred to parole when accused of serious institution rule or law violation which may result in the rescinding of their referral to parole. An additional 4.5 positions and \$113,218 are included in the 1976-77 fiscal year.

Authority

Welfare and Institutions Code.

In June of 1972 and May of 1973, the U.S. Supreme Court decided two cases, *Morrissey vs. Brewer* and *Gagnon vs. Scarpelli*, which placed a substantial workload increase on the Youth Authority Board. The *Morrissey vs. Brewer* decision set down minimum requirements for due process procedures for the revocation of parole of any person. The *Gagnon vs. Scarpelli* decision provided the right to request counsel and created an obligation upon the state to ensure counsel is provided under certain circumstances for any person who was undergoing a parole violation or revocation process.

Changes in ward profiles have required the Youth Authority Board to designate a larger percentage of the ward population as Full Board (requiring at least three board members or representatives to determine ward disposition) and Special Services Cases (intensive parole supervision). Following is the results in this requirement:

DEPARTMENT OF THE YOUTH AUTHORITY—*Continued*Percentage of Wards to Total Population
Designated Full Board and Special Services

As of	Full Board	Special Services
June 30, 1971	6.6%	7.3%
June 30, 1972	11.1%	8.9%
June 30, 1973	16.4%	9.9%
June 30, 1974	19.3%	10.6%
June 30, 1975	24.3%	13.7%

These cases usually require a longer institutional stay, longer and more intense parole supervision and, consequently, a greater amount of attention by the Board before a decision to release into the community and, later, to discharge from Youth Authority jurisdiction.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program costs.....	32.7	33.5	33.5	\$1,110,226	\$1,215,073	\$1,276,863

General Fund				1,110,226	1,207,053	1,328,767

V. ADMINISTRATION

Program Objectives and Description

All of the department's operational and program areas require overall leadership, coordination, and administrative support. Administration provides the following support services necessary for the attainment of overall department objectives:

1. Provide leadership and coordination for departmental programs.
2. Insure the most efficient and effective use of the available manpower and resources.
3. Provide administrative, business and other services necessary for the efficient operation of the department's programs.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

Program Elements

a. Executive	15.5	17	16.5	318,908	446,623	452,923
b. Support services	144.5	160.2	155.7	3,037,600	4,303,274	4,420,135

a. Executive

The Director of the Youth Authority is the chief administrative officer of the department and chairman of the Youth Authority Board.

The office of the director, including the chief deputy director, combines with the branch deputy director to constitute the central administrative core within which the responsibility for all major policy determinations, program planning, and evaluation is centered.

The director personally carries the responsibility for coordinating policy and procedure between the program operation arms of the department and the case decision-making authority of the Youth Authority Board. A mutually supportive relationship between these two entities is essential to the effective operation of both.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	15.5	17	16.5	\$318,908	\$446,623	\$452,923

b. Support Services

General administrative services are provided to support the various program operations of the Youth Authority. Staff services for fiscal management, management analysis, data processing, facility construction and maintenance, and safety are provided by the Administrative Services Division. Staff services for personnel and training are provided by the Division of Personnel Management.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	144.5	160.2	155.7	\$3,037,600	\$4,303,274	\$4,420,135

Output

All of the support services are performed at the request of managers involved in the program areas. There are few output measures other than the relationship of administrative costs compared to total program costs.

CALIFORNIA HEALTH FACILITIES COMMISSION

During the 1974 legislative session, AB 4396 (Chapter 1171) was enacted which renamed the Hospital Disclosure Act as the California Health Facilities Disclosure Act, effective July 1, 1975. This bill also changed the name of the California Hospital Commission to the California Health Facilities Commission and increased the membership from 7 to 13. In addition, this bill provided that the Commission would develop a uniform accounting and reporting system for long-term care facilities as it has for hospitals. During the 1975 legislative session, AB 1812 (Chapter 1169) further expanded the membership of the commission to 15.

The goal of the California Health Facilities Commission is to implement a uniform system of accounting and reporting for all subject health facilities and based upon the reported data from that system to (1) encourage economy and efficiency in the provisions of health care services, (2) enable public agencies to make informed decisions in purchasing and administering publicly financed health care, (3) encourage organizations which provide health care insurance to take into account financial information provided to the Commission in establishing reimbursement rates, (4) provide a single uniform health data system for use by other state agencies, (5) provide accurate information to improve budgetary planning, (6) identify and disseminate information regarding areas of economy in the provision of health care consistent with quality of care, and (7) create a body of reliable information for research into the economics of health care.

SUMMARY OF PROGRAM REQUIREMENTS

I.	Increase staff to process uniform hospital data reports	2	\$25,822
I and II.	Increase staff with addition of one legal counsel	1	18,088

I. UNIFORM ACCOUNTING AND REPORTING—HOSPITALS

Program Objectives and Description

The objective of the California Health Facilities Commission is to develop and administer a uniform system of accounting and financial and statistical reporting for all of the hospitals of California. Secondary objectives include the analysis and publication of information collected under these regulations to provide governmental and private agencies and individuals with accurate cost information and to use this information as a basis for recommending methods for more efficient operation and provision of health care services.

Within four months of completing each fiscal year, on or after June 30, 1975, all hospitals are required to submit prescribed annual financial and statistical reports to the Commission. During the current and budget years the Commission will prepare summaries, compilations, or supplementary reports which will be available to the public for inspection. The Commission will use the information submitted as a basis for doing long- and short-range special studies with the purpose of recommending economies in the provision of health care services.

During the 1974-75 fiscal year the Commission was awarded a contract by the Department of Health, Education, and Welfare to develop hospital care statistics. Since the Commission is required by Section 441.16(c), Health and Safety Code, to develop such statistics for use by other state agencies, this contract permitted the Commission to accelerate and augment this activity.

During the 1975-76 fiscal year the first annual hospital financial reports will be submitted to the Commission. In order to process these reports, the Commission will be developing the required data processing systems. To develop the software package two programmer positions were approved for the current year to augment such services purchased from other state agencies. *During the current year an additional programmer position was administratively established and this position is budgeted for continuation during the budget year. This position was established in lieu of contracting for programming services at a higher cost to the Commission. This additional position will develop the computer programs required to process the uniform hospital data reports. Effective January 1, 1977, one additional clerk typist is being requested to process the uniform hospital data reports to be submitted after that date.*

The California Health Facilities Disclosure Act authorizes the appointment of an attorney to the staff (Section 441.12, Health and Safety Code). This attorney position has been proposed in this budget and will work approximately 65% for this program. The balance of his work will be related to the Commission's Long Term Care Facility program.

Authority

Part 1.7 (commencing with Section 440), Health and Safety Code.

CALIFORNIA HEALTH FACILITIES COMMISSION—Continued

II. UNIFORM ACCOUNTING AND REPORTING—LONG-TERM CARE FACILITIES

Program Objectives and Description

The objective of this program is to develop and implement a uniform system of accounting and financial and statistical reporting for all skilled nursing and intermediate care facilities in California. The responsibility for this program was added to the Commission by the enactment of legislation (AB 4396) during the 1974 session to be effective July 1, 1975. Long-term care facilities will begin using the uniform system of accounting and reporting for fiscal years beginning on or after July 1, 1976. Also, during the budget year the Commission will be developing the data processing system necessary to process the disclosure reports submitted during the 1977-78 fiscal year.

As mentioned in the Hospital Program description, the Commission is proposing to add one attorney to the staff who will apply approximately 35% of his time to this program.

Authority

Part 1.7 (commencing with Section 440), Health and Safety Code.

III. ECONOMIC STABILIZATION PROGRAM FOR CALIFORNIA HEALTH CARE FACILITIES

Program Objectives and Description

During the 1973 legislative session, legislation was enacted (AB 2123) which required the Commission to develop for submission to the Legislature no later than July 1, 1975, a proposal for an economic stabilization program for establishment of a system to retard inflationary increases in hospital costs and prices. That proposal was completed and sent to the Legislature and the Governor on March 29, 1975.

EDUCATION

DEPARTMENT OF EDUCATION

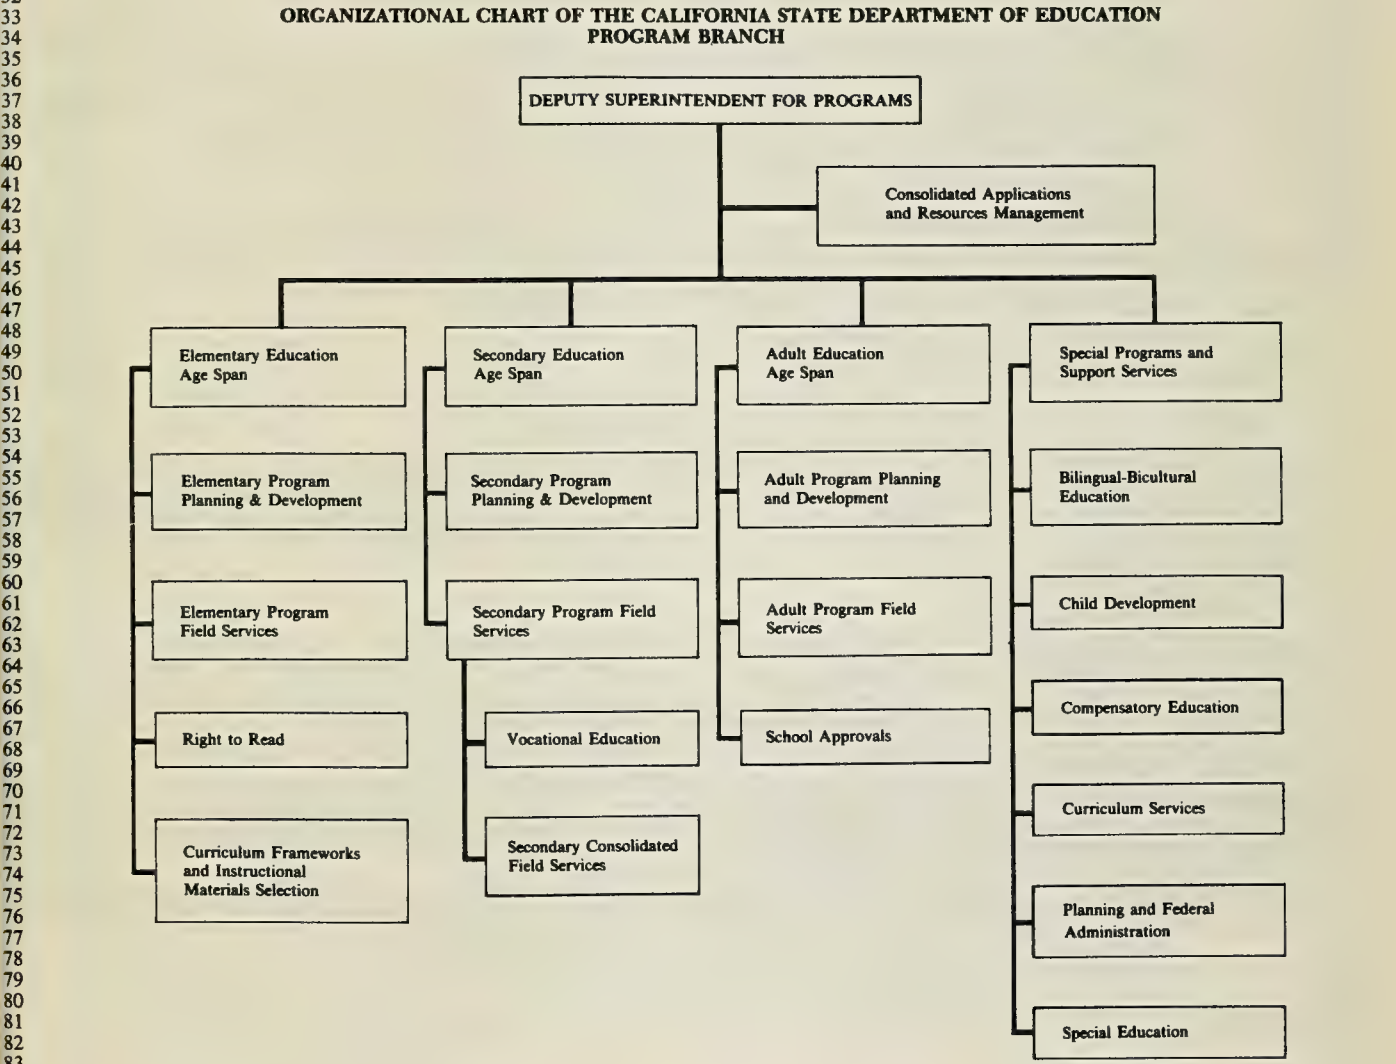

The decision of the Los Angeles Superior Court in Serrano vs. Priest is being appealed to the State Supreme Court. The lower court held the K-12 school financing system to be in violation of the equal protection clauses of the California Constitution. A final decision by the State Supreme Court is expected in the spring of 1976. If the State Supreme Court upholds the decision, major changes in California's system of school finance may be necessary.

California's public education system is administered at the state level by the Department of Education, under the direction of the State Board of Education and the Superintendent of Public Instruction, for the education of more than 5 million students from preschool age through adulthood. The department's organizational structure, which emphasizes delivery of elementary, secondary and adult programs, recognizes the organizational arrangement existing in schools as well as the particular needs of students at different age levels. At the same time the department recognizes the need to integrate delivery of services across age spans to meet special student needs.

- Operations of the department are divided into eight budget programs:
- I. Elementary Education
 - II. Secondary Education
 - III. Adult Education
 - IV. Special Programs and Support Services
 - V. Administrative Support Services
 - VI. Department Management and Special Services
 - VII. Library Services
 - VIII. Legislative Mandates

In 1975-76 the department modified its organizational structure to ensure more direct administrative responsibility and accountability within the age spans and more integration across age spans. The organizational structure now provides for: (1) greater congruency among departmental priorities, organizational structure, the program budget, and the actual program operations; (2) a simpler integration mechanism and communication system within the program branch; (3) a reduced span of control and, therefore, a more effective management arrangement for the Deputy Superintendent for Programs; (4) more substantive administrative authority in the program branch associate superintendents; and (5) a fourth associate superintendent in the program branch (the Associate for Special Programs and Support Services) who is responsible for supervising those offices whose programs address student needs which cross age spans. An outline of the reorganized department structure of the program branch is displayed in Figure 1.

I. ELEMENTARY EDUCATION

The elementary education program includes general statewide leadership and the administration of specially funded state and federal programs for elementary schools. Of prime importance is the early childhood education (ECE) reform effort, designed to restructure primary education in California from kindergarten through grade three. There also is emphasis on services to educationally disadvantaged and to limited-English-speaking children.

The elementary education age span is responsible for all department operations affecting elementary schools receiving funds through the consolidated application. The staff also cooperates with secondary education and the special programs and support services offices to ensure compatibility and integration where necessary.

For the budget display, elementary education activities are divided into:

- A. Early childhood education.
- B. Consolidated categorical programs.
- C. General activities (including the right-to-read program and the curriculum frameworks section).

Elementary education operations are organized into two basic sections: elementary field services and elementary program planning and development. Elementary field services is responsible for (a) providing assistance to school districts in developing funding applications, (b) reviewing school plans for both compliance and quality, (c) conducting on-site program reviews, and (d) providing technical assistance to schools with identified program weaknesses. Elementary program planning and development is responsible for (a) developing policy, (b) developing workable implementation strategies, (c) preparing internal budget and management plans, (d) coordinating development of educational materials for use in elementary schools, and (e) supporting the operations of the field services program.

Figure 2 illustrates the statewide testing results for grade 6 in California from 1965-66 to 1974-75. As of the printing of this budget the Department of Education has not provided a display to illustrate pupil reading performance in grades 2 and 3. Nevertheless, available data reveal that reading achievement scores for pupils in grades two and three have been improving steadily since the first statewide testing was conducted in 1966. For the past several years, the scores of California pupils in grades two and three have exceeded national averages. The results for 1974-75 show that the level of performance was maintained in grade two and improved again in grade three.

For pupils in grades six, scores in the basic skill areas had been declining for several years, stabilized in 1973-74, and then registered a sharp upturn in 1974-75. However, the scores for California students were still below national averages ranging from a percentile rank of 48 in reading to the 43rd percentile in language.

DEPARTMENT OF EDUCATION—Continued

Figure 2

Statewide Standardized Test Results, California Public Schools, 1969-70 Through 1974-75
Achievement Tests, Grade Six

	COMPREHENSIVE TESTS OF BASIC SKILLS, Form Q, Level 2																	
	Reading ^a						Language ^a						Arithmetic ^a					
Year administered	1969-70	1970-71	1971-72	1972-73	1973-74	1974-75	1969-70	1970-71	1971-72	1972-73	1973-74	1974-75	1969-70	1970-71	1971-72	1972-73	1973-74	1974-75
Number of pupils tested	328,754	333,734	341,035	342,946	336,054	21,723	327,059	331,766	338,749	340,320	332,568	21,723	326,901	331,609	339,244	340,778	333,972	21,723

A. Interquartile Ranges (25th, 50th, and 75th Percentile Scores) Compared to Publisher's Norms^b

Figure 1 is a grid showing publisher's percentile ranks for 10 publishers. The grid has 10 columns (one for each publisher) and 4 rows. The rows are labeled on the left: 'Publisher's percentile rank' at the top, followed by '75', '50', and '25'. A dashed line is drawn across the grid at the 75 percentile rank level. A legend on the left indicates that the shaded area represents the 'Middle 50 percent of California pupil scores'. The shaded area is bounded by a solid line at the 50 percentile rank and a dashed line at the 75 percentile rank. The grid shows that for most publishers, the middle 50 percent of scores falls between the 50 and 75 percentile ranks. However, for Publisher 10, the middle 50 percent of scores extends above the 75 percentile rank, as indicated by the shaded area continuing above the dashed line.

B. Publisher's Percentile Ranks and Grade Equivalent Scores of the State Quartile Scores (25th, 50th, and 75th Percentiles)

75th Percentile (State Q3)																	
State raw score	71.8	71.4	70.5	70.6	70.6	74.4	68.4	67.9	66.5	66.7	66.4	71.3	84.8	83.2	81.5	81.6	87.3
Publisher's percentile rank	74	72	72	72	72	72	68	68	65	65	62	68	74	68	65	65	68

50th Percentile (State Q2)																	
State raw score	61.7	61.2	59.8	60.0	59.9	66.4	58.3	57.5	55.5	55.6	55.1	61.9	74.9	72.6	69.8	70.2	78.9
Publisher's percentile rank	48	46	44	44	44	48	43	43	39	39	37	43	47	43	38	38	44
Publisher's grade equivalent	6.0	5.8	5.7	5.7	5.7	6.6	5.7	5.7	5.4	5.4	5.3	6.2	5.9	5.8	5.5	5.5	6.4
25th Percentile (State Q1)																	
State raw score	45.7	45.3	43.7	44.3	44.2	53.7	44.3	43.2	41.0	41.2	40.4	48.5	58.9	56.1	52.9	53.6	65.7
Publisher's percentile rank	24	23	21	21	21	26	21	19	17	17	16	20	24	21	18	19	22
Publisher's grade equivalent	4.5	4.4	4.3	4.3	4.3	5.1	4.3	4.2	4.1	4.1	4.0	4.8	4.8	4.7	4.5	4.6	5.2

^aData for 1969-70 through 1973-74 represent fall norms, and the publisher's percentile rank and grade equivalent scores are based upon fall norms. Data for 1974-75 are based upon the performance of pupils tested in the spring of 1975 in a representative sample of California schools. Therefore the publisher's percentile rank and grade equivalent scores for 1974-75 are based upon spring norms. Any comparison of 1974-75 results with earlier years should take this difference into consideration.

^bThe three broken horizontal lines indicate the publisher's 75th, 50th, and 25th percentiles. The shaded columns represent the middle 50 percent of the test scores of California pupils in grade six. The top of each column represents the 75th percentile score for California pupils, the bottom represents the 25th percentile score, and the break in the middle of the column represents the 50th percentile score.

c. General Activities	10.1	12.6	14.8	548,413	707,115	783,005

a. Early Childhood Education

In 1976-77 early childhood education (Chapter 1147/72) will be in its fourth year, and it continues to be a top priority program in the Department of Education. (Table 1 shows the number of school districts, schools, and children involved.)

The goal of ECE is to provide individualized instruction that gives each participating child a chance to reach maximum potential. The program is designed so that the pupil, at the end of third grade or its equivalent, has acquired the skills, self-confidence, and social adjustments needed to complete his or her schooling successfully. A critical goal of the program is to reduce the pupil-adult ratio to 10:1 through the use of community aides and parent participation.

Program activities for 1976-77 are:

- Each elementary school expecting to receive funds will submit a school program plan to the department by July 1, 1976.
- Each ECE school visited will receive a quality assessment of its program, indicating strengths and weaknesses.
- Schools found to be out of compliance with regulations in the visitation will be in compliance by May 1 of the school year.

The early childhood education reform effort is budgeted in 1976-77 for the largest one-year expansion in the history of the program. State assistance to local schools is scheduled to increase by \$34,500,000—an increase of 54.6% over the 1975-76 budget.

Related to this local assistance expansion are budget increases in the Department of \$434,983 for program administration, and \$65,017 for program evaluation of early childhood education. Eleven additional staff positions are proposed to meet the additional workload connected with administration and evaluation of the expanded ECE program.

DEPARTMENT OF EDUCATION—Continued

The total increase of \$35 million proposed for 1976-77 will allow ECE to serve an additional 218,000 students and will result in a total of \$98.8 million being provided for early childhood education to serve 52% of the enrollments in grades K-3. This major expansion of ECE reflects the high priority given by the Superintendent of Public Instruction and the Governor to the goal that upon completion of the third grade, all students will have the skills necessary for continued educational success in California public schools.

Table 1

b. Consolidated Categorical Programs

In 1973 the department initiated a consolidated approach for federal and state categorical programs to reduce the administrative burden on school district staffs. The consolidated application process requires school districts to coordinate use of funds from the following special sources:

- Early Childhood Education Program
- Elementary and Secondary Education Act, Title I
- Elementary and Secondary Education Act, Title II (IV.B), Phase I
- Miller-Unruh Basic Reading Act
- Educationally Disadvantaged Youth Program (SB 90)
- American Indian Early Childhood Education
- State Preschool Program
- State Bilingual Education

The consolidated application process is composed of three steps:

1. The process is initiated by the district's consolidated application for special program funds on Form A-127D. The department processes the application for action by the State Board of Education.

2. Each school receiving funds then develops the comprehensive school plan (Form A-127ES) which details the allocation of resources and outlines provisions for personalized instruction for all children, plus extra services for the neediest. The department reviews these plans for compliance and quality.

3. A third document, the consolidated evaluation report (Form E-127P) assesses how well the school met the objectives of its plan, accounts to federal and state agencies on use of funds received, and provides information for statewide evaluation of categorically funded programs.

Throughout the process the department's elementary education staff provides planning assistance, on-site reviews, school plan review ratings, and program improvement assistance to the 2,800 schools and 850 districts participating. The staff also reviews all school plans submitted and programs visited to ensure adherence to state and federal regulations. (Most of the consolidated programs are not limited to elementary education. Descriptions of the individual programs, except the Miller-Unruh reading program, appear under Program IV, Special Programs and Support Services.) The Miller-Unruh program provides reading specialist teachers to improve the reading achievement level in primary grades. In 1976-77 efforts will be continued to strengthen the total program for young children by further integrating the Miller-Unruh program with the Early Childhood Education Program.

c. General Activities

1. Right-to-Read

The right-to-read program, authorized by the federal Cooperative Research Act (PL 92-318), is used in California to assist schools in adopting exemplary reading practices. The department's primary responsibilities are to identify and demonstrate ways to improve reading programs, to coordinate departmental reading instruction services, and to assist reading programs, with emphasis on administrator and teacher inservice training.

Program objectives for 1976-77 are:

- For all local educational agency directors (approximately 125) to use right-to-read program planning documents to develop improved reading programs.
- For 90 percent of the students in the participating districts to be reading at grade level as measured by the state assessment program.

Authority

PL 92-318.

2. Curriculum Frameworks and Instructional Materials Selection

The department provides staff assistance to the State Board of Education and the Curriculum Development and Supplemental Materials Commission in evaluating and adopting instructional materials for use in California's elementary schools.

Primary responsibilities are to develop curriculum frameworks and instructional materials selection criteria, to prepare calls for bids for instructional materials and to review publisher submissions, to coordinate and monitor legal compliance and to evaluate the content of materials submitted by publishers, to coordinate selection of material to be placed in adoption, and to prepare buyers' guides to assist elementary school districts in their selection process.

Chapter 929/72 established textbook and instructional materials evaluation, selection, adoption, acquisition, and distribution on a biennial cycle. Instructional materials for half the elementary subjects will be adopted in 1976-77 for introduction into schools in 1977-78. The balance will be adopted in 1977-78 for use in 1978-79. This adoption process repeats itself every two years.

Program objectives for 1976-77 are:

- Reduce the instructional materials adoptions cycle to less than 24 months.
- Develop an instructional materials matrix for adopted materials.
- Prepare buyers' guides for use by local elementary schools.

Revisions to the instructional materials adoptions process have reduced the adoption cycle from six years to two years. To facilitate this process, in January 1975, the State Board of Education established 53 Legal Compliance panels and 30 Instructional Materials Evaluation panels. To meet the increased workload resulting from these changes, the Governor has proposed an additional \$54,675 for two additional technical positions in the Textbook and Curriculum Frameworks Unit in 1976-77.

DEPARTMENT OF EDUCATION—Continued

II. SECONDARY EDUCATION

The department provides general statewide leadership for secondary education (grades seven through twelve) and administers specially funded state and federal programs for intermediate and secondary schools.

The major priority is development of plans for Reform of Intermediate and Secondary Education (RISE). Special emphasis also is being given to (a) extra services needed to improve and expand vocational education programs, and (b) services needed to meet special needs of educationally disadvantaged and limited-English-speaking students. The unit also administers the state traffic education program.

Secondary education maintains close coordination with elementary education, especially in activities concerning administration of the consolidated delivery system; with adult education for activities related to vocational education and technical training; and with special programs and support services for such activities as demonstration programs in reading and mathematics and bilingual-bicultural education. External coordination is maintained with manpower agencies and county superintendent offices, which provide technical support for the consolidated delivery system.

The secondary education age span is divided into (a) secondary program planning and development, which includes RISE planning, secondary education policy development, and helping vocational education and consolidated field service units improve planning and management, and (b) secondary program field services, which is primarily concerned with the vocational education program, including career education, the consolidated application delivery system for secondary schools, and the driver education/traffic safety programs.

For the budget display, secondary education activities are divided into:

- A. General secondary education
- B. Consolidated categorical programs
- C. Traffic safety education
- D. Vocational education

Figure 3 shows the statewide testing results for California pupils in grade 12 for the years 1969-70 to 1974-75. Student performance in grade 12 continued its gradual but consistent downward trend and is now well below national averages. Language (written expression) is again the lowest area, with the median California pupil scoring at the 32nd percentile rank. The scores in mathematics and reading are both at the 41st percentile rank.

State raw score	24	24	24	24	24	18	22	22	21	19	18	17	25	25	25	20	25	
Publisher's percentile rank																		

^aData for 1969-70 through 1973-74 represent fall norms, and the publisher's percentile rank and grade equivalent scores are based upon fall norms. Data for 1974-75 are based upon the performance of students tested in the spring of 1975 in a representative sample of California schools. Therefore the publisher's percentile rank and grade equivalent scores for 1974-75 are based upon spring norms. Any comparison of 1974-75 results with earlier years should take this difference into consideration.

^bThe three broken horizontal lines indicate the publisher's 75th, 50th, and 25th percentiles. The columns represent the middle 50 percent of the test scores of California students in grade twelve. The top of each column represents the 75th percentile score for California students, the bottom represents the 25th percentile score, and the break in the middle of the column represents the 50th percentile score.

d. Vocational Education	151.2	168.7	171.2	55,435,344	59,615,103	53,258,436

a. General Secondary Education

The Commission for the Reform of Intermediate and Secondary Education (RISE), established in July 1974, held extensive deliberations and reported its recommendations for comprehensive reform. Among issues emphasized were:

- Students should be recognized as the primary client served by the educational system.
- Students should be afforded a personalized learning program and have multiple program options from which to choose.
- Student progress should depend on demonstrated proficiency in achieving specified educational outcomes.
- The school should have extensive interaction with the community it serves.

The department is preparing a plan for statewide implementation of the secondary reform program which will be the basis for Department of Education sponsored legislation in 1976.

It is important to note that in addition to the 4.1 man years specified in this component, 10.6 man years funded from categorical resources (see II.B.) are assigned to conduct and coordinate secondary short-range planning and policy development, to handle short-term program development assignments, and to assist with development of the comprehensive RISE implementation plan and related data collection and research activities.

Chapter 408, Statutes of 1975 (SB 841/75) gives school districts the authority to include for ADA counting purposes the attendance of pupils participating in an independent study program. This authorization provides students, teachers, and school districts with greater flexibility in the selection of learning methods and increases their access to community resources. The increased use of community resources as aids to learning, as well as an emphasis on personalized instruction with regard to time, location, and method of instruction, are school reforms promoted by Chapter 408/75. These elements are all basic components of RISE.

Chapter 371, Statutes of 1975 (SB 1243/75) provided funding for a statewide High School Proficiency Exam. This exam will be given twice in 1975-76 and is available to any 16 or 17 year old who wishes to obtain a High School Proficiency Certificate. The certificate is legally the equivalent of a High School diploma and any 16 or 17 year old who has received such a certificate can, with the permission of his/her parent(s), leave high school. The High School Proficiency Exam provides students with another option for meeting individual career and/or educational objectives.

b. Consolidated Categorical Programs

An estimated 68,000 students in 268 schools in 130 districts are being served through the secondary consolidated programs receiving funds from special programs. These programs (described in Program IV, Special Programs and Support Services) include ESEA, Title I; ESEA, Title II (IV.B), Phase I; Educationally Disadvantaged Youth (SB 90); and State Bilingual Education.

Program activities for 1976-77 are:

- A total of 268 secondary schools will have submitted comprehensive program plans which comply with state and federal regulations.
- Two hundred secondary schools, after visits by the secondary consolidated field service section, will have programs that comply with state and federal regulations.
- The joint county-state planning committee will evaluate the degree of cooperation between the state and county superintendents for delivering services to elementary and secondary schools.
- Eighty percent of secondary schools participating in an experimental program to enhance joint secondary-county field services in districts within County Superintendents' Area 3 will be in compliance with state and federal regulations.
- All schools operating demonstration programs integrating vocational and compensatory services for educationally disadvantaged students will achieve their objectives as determined by on-site reviews.

Local Assistance	—	—	—	613,760	1,302,369	1,302,369

c. Traffic Safety Education

Approximately 50 percent of all traffic accident victims in California are under 24 years old, and 27 percent of all victims, excluding drivers, are under 14. In an effort to reduce the number of accidents, driver education instruction is provided to 350,000 students annually at the appropriate age (including interested adults). A traffic safety program is being developed with federal funds to include four additional elements: pedestrian, bicycle, motorcycle, and passenger safety.

Program objectives for 1976-77 are:

- All participating schools will operate driver education programs in accordance with state regulations.
- All school district requests for technical assistance to improve driver education will be met.

Authority

Education Code Sections 8503 and 18255; Vehicle Code Section 2900.

2. Driver Training	4.9	5.2	5.2	171,770	198,821	203,669

d. Vocational Education

Federal law states that the purpose of vocational education is to ensure that all persons of all ages in all communities in the state will have ready access to vocational and career education or retraining. Similarly, Education Code Section 7504 says it is the policy of the people of California to provide an educational opportunity for each individual so that every graduate of a state-supported educational institution shall have sufficient marketable skills to obtain suitable employment.

Within this broad mandate the department's vocational education unit administers the following federally funded programs: Vocational Education Amendments of 1968 (PL 90-576), Comprehensive Employment and Training Act (CETA; PL 93-203), and Education Professions Development Act (EPDA; PL 93-35). In addition, the unit coordinates career education services (ESEA, Title V [IV.C]; PL 93-380) and administers regional occupational programs and centers (Education Code Section 7451.7).

Operations are organized into three major sections:

a. Field operations, with three regional offices, which provides technical assistance to districts to develop plans and implement effective vocational programs.

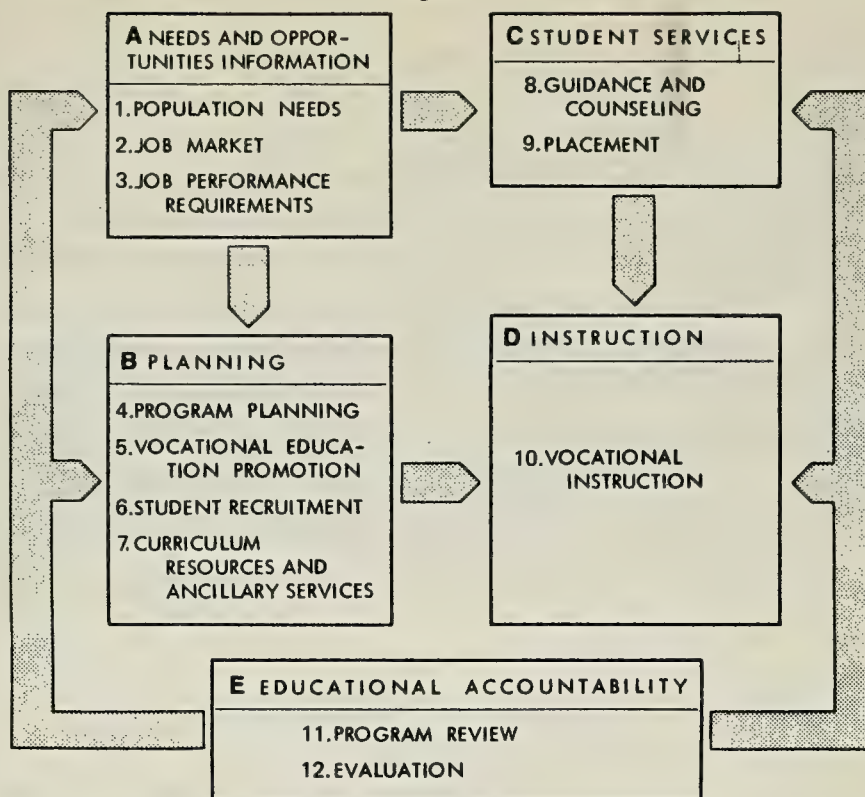

b. Instruction, which provides specialized curriculum and professional development assistance in manpower programs and agricultural, business, homemaking, and industrial education.

c. Services, which assists in developing statewide vocational and career education plans, and administers vocational research and innovation projects and the vocational information system.

Coordination is maintained with the adult education staff and other appropriate agencies for program compatibility and effective use of vocational resources.

* A student participating in a vocational class throughout the school year constitutes one enrollment.

DEPARTMENT OF EDUCATION—Continued

The vocational education delivery system focuses on plans required by each vocational education program administered by each local educational agency, regional occupational program or center, or prime sponsor. These plans consist of twelve functions grouped into five categories. (See Figure 4 describing the Twelve Functions of Vocational Education.)

The use of all funds must be consistent with the vocational education program plans submitted to the department annually by local educational agencies. The plans must also give emphasis to the expansion of vocational education and the development of special services for educationally disadvantaged, handicapped, and limited-English-speaking students who cannot succeed in regular vocational programs.

Objectives for 1976-77 are:

a. Each local educational agency, regional occupational program or center, or prime sponsor will prepare a vocational education plan and submit fiscal and statistical reports that comply with federal and state regulations.

b. As part of a continuing program, 20 randomly selected local educational agencies and regional occupational programs will participate in formal program reviews (50 additional districts will conduct their own reviews).

c. Vocational education programs will be expanded 5 percent to a total of 1,886,306 secondary, postsecondary, and adult enrollments. (See chart of vocational education enrollment data.)

d. Twenty-five percent of all vocational education programs will have developed curricula reflecting job performance requirements provided by the Manpower Management Information System.

e. At least 25 percent of the vocational education staff (state and local) will improve their leadership skills through the coordination of an inservice development program.

f. Career education plans will be developed by 125 districts as the result of technical assistance provided directly by the career education staff or by the elementary and secondary consolidated categorical program units.

g. Approximately 20 research and 10 innovation projects will be completed and will be consistent with vocational education program planning and development priorities.

h. All schools operating demonstration programs integrating vocational and compensatory services for educationally disadvantaged students will achieve their objectives as determined by on-site reviews.

Chapter 1269, Statutes of 1975 (AB 1821) appropriated \$1,850,000 for 1975-76 and 1976-77 to support Regional Adult and Vocational Education Councils. Administrative activities in the State Department of Education and Chancellor's Office of the Community Colleges will be supported with \$375,000 and \$225,000, respectively, allowing \$1.25 million in local assistance for the regional councils. The regional councils will be operational statewide by July 1, 1976. Their primary responsibility will be to review and make recommendations on vocational and adult continuing education courses and to prevent unnecessary duplication of such courses within a region.

In addition to the AB 1821 state operations support for vocational education, the Governor's budget proposes an increase of 2.5 positions in the Vocational Education unit in order to enhance the Department's ability to monitor and review ROC/P's as well as to provide better course approval, consulting, and supervisory support to ROC/P's. The current staff has not been able to effectively monitor ROC/P's due to rapid growth in the number of these programs from 37 in 1972 to 66 in 1975-76.

Authority

PL 90-576; PL 93-35; PL 93-203; PL 93-380; ESEA, Title V (IV.C); Education Code Section 7451.7.

III. ADULT EDUCATION

Adult education includes programs in citizenship and English, adult basic education, vocational and technical education, a wide range of special interest classes, and civic education. The adult education age span is responsible for management of adult school programs in unified and high school districts and in postsecondary private schools, including management of adult basic education programs funded under provisions of the Adult Education Act of 1966 as amended (PL 91-230) and the approval of schools for veterans' training under a contract with the Veterans Administration.

The adult education age span works with the elementary and secondary education age spans and with special programs and support services to coordinate efforts and provide support for the following systemwide activities: adult vocational education, parent education (parent participation programs), bilingual-bicultural programs, and high school equivalency examination programs.

This age span is organized in three sections: adult program planning and development, adult field services, and school approvals. The adult program planning and development section administers special experimental projects under provisions of Section 309 of the Adult Education Act, develops instruments to assess needs, and prepares long- and short-range plans. The other two sections are discussed below.

Authority

PL 91-230.

DEPARTMENT OF EDUCATION—*Continued*

a. Adult Education Instruction

According to census data, 4,062,000 of the 14 million Californians over 25 have not completed high school. More than a million have not completed eighth grade. This program provides opportunities for all adults who seek additional education. During 1973-74 more than 1.2 million adults enrolled in classes. Of that number, 185,000 were enrolled in adult basic education programs, and approximately 400,000 were enrolled in vocational education programs.

The Education Code requires that the department review all course offerings. This necessitates consultation with school districts, the preparation of guidelines for administration and for curriculum development, and the preparation and distribution of reports on students.

Major objectives for 1976-77 are:

a. A total of 310 unified and high school districts will participate in this program: 2,500 students will obtain certificates of completion of elementary school, 18,000 will receive high school diplomas, 6,000 will attain U. S. citizenship, 75,000 will obtain certificates of proficiency in vocational education, 27,000 will obtain certificates of proficiency in areas of adult general education (such as parent and civic participation programs), and 15,000 graduates of vocational programs will secure employment as a result of their training.

b. One hundred school districts will provide literacy instruction to 100,000 adults in PL 91-230 classes in adult basic education: 10,000 adults will obtain eighth grade equivalency certificates, 12,000 will obtain employment or will be upgraded in employment, 5,000 will leave the program and enter vocational training programs, 1,500 will leave the welfare rolls, 1,200 will receive U. S. citizenship, and 1,600 will register to vote for the first time.

Both the general fund component and the adult basic education component are administered by adult education field services.

The 1975-76 Budget Act placed a "cap" on the growth in Average Daily Attendance (ADA) which the State will fund in nonmandatory adult education programs and Regional Occupational Centers and Programs (ROC/ROP's). This action was prompted by the dramatic annual increases in ADA in these programs and by a growing concern over whether scarce state funds were being directed at the most essential educational priorities.

By limiting state apportionments to a five percent ADA growth in adult and ROC/ROP programs, a moratorium was placed on the growth in these programs. This allows time to reexamine the State's priorities and funding mechanisms for adult education and ROC/ROP's and to work out meaningful long-range reform. *The cap is proposed for continuance in the 1976-77 fiscal year until statutory reforms to these programs are enacted. It is estimated that the removal of the five percent "cap" on Adult and ROC/ROP ADA would result in a \$65 million increase in state apportionments in 1976-77 excluding community colleges which would have an additional cost of \$97.4 million.*

This budget proposes that Adult Education field staff be increased by 2.5 positions to exercise greater control over adult education programs. Adult education has experienced rapid growth during the past three years and due to this growth the Department has not been able to effectively perform its course approval, monitor, review and consulting functions. The new staff will help local school districts to provide high quality adult education programs that will meet state and local priorities.

Authority

Education Code Division 6, Chapter 5.5; PL 91-230.

b. Postsecondary Education (School Approvals)

This element administers the general education development (GED) testing program, approves training courses offered by private and public schools for veterans under Title 38, U. S. Code, and approves courses offered to other adults by private postsecondary proprietary schools under the provisions of Division 21 of the Education Code. During 1976-77 the department will continue to ensure that all courses meet the educational standards mandated by these codes and that GED testing centers are in compliance with state regulations.

IV. SPECIAL PROGRAMS AND SUPPORT SERVICES

This program provides statewide leadership in special programs and assists elementary, secondary, and adult education age spans deliver services to local educational agencies. When services are delivered by one of the age spans, responsibility for including temporary or permanent reassignment of personnel will be shared by the appropriate office.

Special programs and support services include:

- A. Bilingual-bicultural education.
- B. Child development.
- C. Compensatory education.
- D. Curriculum services.
- E. Planning and federal administration.
- F. Special education.

a. Bilingual-Bicultural Education

The department supplies administrative and consultant services to local educational agencies to implement and improve bilingual and American Indian education programs. Bilingual programs include those authorized by the Bilingual Education Act (Chapter 1258/72) and the bilingual teacher corps program (Chapter 1496/74). American Indian programs include the American Indian early childhood education program (Chapter 1052/72), which will terminate after 1975-76, and the American Indian education centers program (Chapter 1425/74).

1. Bilingual Education

Approximately 233,000 limited and non-English-speaking students attend California schools. The goal of bilingual education is to continue instruction in the student's primary language while he is learning English. Programs authorized by the Bilingual Education Act (Chapter 1258/72) reached 11,000 students in 72 school districts in 1974-75 and will include approximately 20,000 students in 100 districts in 1975-76.

Further, a San Francisco Bilingual Study Program, established in 1971 to develop bilingual materials and methods for Chinese students, will be continued through 1977 by Chapter 262, Statutes of 1975 (AB 893).

Additional students in this group are served through programs authorized by ESEA, Title VII and ESEA, Title I (Migrant), as well as the programs usually included in elementary and secondary consolidated applications, such as ESEA, Title I; early childhood education and educationally disadvantaged youth. The consolidated application requires schools with 15 percent or more students with English language problems to provide special instruction for these students. Schools with less than 15 percent are required to show how their needs are met.

The bilingual education staff monitors and reviews programs in conjunction with the elementary and secondary field service teams. It also provides participating school districts with technical assistance in standards, policies, and procedures.

Program objectives for 1976-77 are:

a. All districts will identify limited and non-English-speaking students and those students who would benefit from a bilingual-bicultural program.

b. Students in funded programs will receive English language development assistance and appropriate subject matter instruction in the language the student understands best.

c. Participating students will make statistically significant progress in language development, reading, mathematics, and multicultural education.

d. Participating districts will develop inservice programs and will conduct pupil progress evaluations.

The State Department of Education identified 233,000 limited-and non-English speaking students in California schools in 1974-75. The Department indicates that of this number the special needs of 133,000 are being met by state and federal categorical aid programs, as is indicated by Figure 7 on page 842. In addition, 70,000 students are being served by local funds only.

In 1975-76, the State Bilingual Education Program (Chapter 1258/72) was expanded by almost 110%. Further, from 1974-75 to 1976-77, K-3 pupils served by the Early Childhood Education Program will, if approved at the proposed level, have expanded from 22 percent to more than 51 percent. This program has a bilingual component. It is therefore expected that in 1976-77, the special language needs of California's limited-and non-English speaking student population will be addressed through application of the combined resources from state, local and federal levels.

¹ Sixty-seven per cent of school districts in the state responded. These responding districts enroll ninety per cent of the students in California.
[†] In the student survey, some districts are also included in Miller-Unruh Reading Specialist Program funds as well as Miller-Unruh Chapter 841/1972 (AB 612) "only" funds. The Miller-Unruh Bilingual Aide Program was funded in 1974-75 for \$243,000. The Miller-Unruh Reading Specialist Program was funded for \$15,349,625.

DEPARTMENT OF EDUCATION—*Continued*

2. Bilingual Teacher Corps

The bilingual teacher corps program provides instructional aides who teach in public schools while completing courses leading to a bilingual-cross-cultural credential. Funds allocated during 1975-76 will pay stipends and related expenses to 365 qualified applicants. The 1976-77 objective is that the competency of participating teacher aides will be assessed in the following areas: language proficiency, culture, professional preparation, and community relations.

3. American Indian Early Childhood Education

California has one of the largest American Indian populations in the United States. The Department of Education estimates that more than 30,000 native American Indian students attend California public schools. Statistics show these students have an excessively high drop-out rate, a low academic achievement record, and a low self-image. Chapter 1052/72 authorized ten kindergarten through grade four pilot projects for three years in rural equalization-aid district public schools with 10 percent or more American Indian students. These districts received technical assistance from the department's American Indian education unit. At the end of 1975-76, these pilot projects will have completed their third full year of operation and legislative authorization for these projects thus ends.

Authority

4. American Indian Education Centers

Ten education centers for the benefit of American Indian students, parents, and public schools have been established by Chapter 1425/74 and approved by the State Board of Education. In 1975, the Governor signed legislation (Chapter 851/75) increasing local assistance funding for these centers by over seventy percent.

Program objectives for participating students in 1976-77 are:

- Tutored Students will show statistically significant achievements, particularly in reading and mathematics.
- Self-concepts of American Indian students and adults will improve.
- Students and adults will receive individual and group counseling on personal adjustment, academic progress, and vocational planning.

b. Child Development

The office of child development is responsible for developing, implementing, and managing the department's program to help school districts and other agencies provide education and care centers for needy children from low-income families. Preschool education and child care services are provided to school districts and other agencies through the child development program field services section, with support from the development services and funding assistance sections.

1. Preschool Education

State preschools provide a part-time child development program for four-year-olds and their parents. The intent is to enhance the development of the child by involving parents in the education of their children to the maximum extent possible. The program provides the participants and the community with a model from which to develop similar local programs. More than 19,000 children are enrolled in programs administered by 185 agencies (67 private nonprofit agencies and 118 school districts and colleges). In addition, in 1975 the Governor signed Chapter 795, Statutes of 1975 (AB 778). This legislation appropriates \$199,303 to provide scholarships for 1,178 preschool permit teachers and aides, to allow them to continue their professional development.

Program objectives for 1976-77 are:

- At least 70 percent of children enrolled in preschool programs will make statistically significant achievement gains.
- Eighty percent of the parents will be involved three or more times during the year in parent participation activities.
- Ninety percent of children enrolled for their first year will complete health examinations by the end of the school year, and 90 percent of those with health defects will be referred for treatment.

Authority

Education Code, Sections 16700-16784.

2. Child Care Services

Child care services provide for children from prekindergarten through age 14. Major goals are (a) to provide the family with a wider range of child development services in the areas of education, health, nutrition, social services, parent participation, parent education, and supervision by professional and nonprofessional staff; and (b) to increase opportunities for parents to work or receive employment training. Child care services are currently delivered through more than 300 public and private child development agencies serving over 50,000 children in more than 1,000 locations. Additionally, Chapter 1012, Statutes of 1975 (AB 229) provided \$200,000 to expand Campus Child Care Centers to enable parents to have adequate child care while they are pursuing educational advancement. Further, the child care pilot study, authorized by Chapter 1191, Statutes of 1973, will be continued in 1976-77 with the reappropriation of the balance of the \$3 million provided by the bill.

Program objectives for 1976-77 are:

- Ninety percent of enrolled children and their families will receive full services in education, health, nutrition, social services, parent participation, and parent education.
- One hundred percent of participating parents, due to the provision of child development support services, will be able to seek or maintain employment.

DEPARTMENT OF EDUCATION—Continued

Authority

Education Code, Sections 16700–16784, Chapter 1012/75.

c. Compensatory Education

The compensatory education element is responsible for administration of education programs for disadvantaged youth. Authorization and funding are provided through PL 89-10, as amended by PL 89-750 and PL 93-380; and by Chapter 1406/72 (SB 90). A major portion of these services is delivered by the elementary and secondary education consolidated application process (see I.B.).

The Department of Education estimates that approximately 1,200,000 educationally disadvantaged children in preschool through grade 12 attend public and nonpublic schools or institutions for neglected and/or delinquent children. Experience shows that without appropriate services these students will be two and one-half years below grade level by the end of sixth grade; up to 70 percent will drop out of high school.

Program objectives for 1976–77 are:

a. Programs will raise students' academic achievement to levels in reading, mathematics, and language which are commensurate with the achievement levels of the general California student population in grades K–12. Also, these programs will include bilingual-bicultural education and parent education and involvement.

b. Schools serving 75 percent of the disadvantaged students will show significant program improvement which will be reflected on their consolidated evaluation reports.

c. All school plans submitted and all programs visited will be in compliance with state and federal regulations or will have a plan prepared to effect compliance.

Authority

PL 89-10, as amended by PL 89-750 and PL 93-380; Chapter 1406/72 (SB 90); Education Code, Sections 6450–6455.

1. Educationally Disadvantaged Youth

The purpose of this unit is to provide quality educational opportunities for children classified as educationally disadvantaged because of (a) low family income, language problems, and transiency, and (b) achievement below the 50th percentile for California students in their grade. Emphasis is placed on instruction in language, reading, and mathematics. State funds available through Chapter 1406/72 (SB 90) have extended compensatory education programs to approximately 212,000 full-time equivalent eligible students. Management of field operations and distribution of services are provided through the elementary and secondary education age spans (see I.B. and II.B.).

2. ESEA, Title I

This federal law provides programs for disadvantaged students in state-operated institutions and for children attending schools in low-income areas. Approximately 300,000 full-time equivalent students in kindergarten through grade 12 receive services in preschool and elementary local educational agencies and in institutions for neglected and delinquent youth. Administrative services and planning assistance are provided by the elementary and secondary education age spans through the consolidated programs application process (see I.B. and II.B.1.).

3. Migrant Education

California's migrant children are among the state's most educationally disadvantaged. They make slow progress in school because of irregular attendance. They come from poor families, seldom speak fluent English, and have above-average health problems. To meet the needs of these children, the State Board of Education adopted the *California Master Plan for Migrant Education* to provide health and welfare services, preservice and inservice education of professional and nonprofessional personnel, transportation and other services, child development activities, and active parent involvement. Master plan services are delivered through regional offices and implemented by service agreements with local school districts. During 1974-75 1,068 schools in 214 districts enrolled 61,049 migrant children.

Authority

Chapter 1037/73; Education Code, Sections 6464-6464.6.

4. Management Services

Management services coordinates the following compensatory education programs delivered through its field operations: demonstration programs in reading and mathematics, professional development and program improvement centers, new careers in education, and follow-through technical assistance.

In 1974-75, there were 30 demonstration programs in reading and mathematics which featured intensive instruction to develop average competence in underachieving disadvantaged students in grades seven, eight and nine. Demonstration centers are evaluated annually, and the lowest-achieving and least cost-effective programs are terminated. Chapter 1127, Statutes of 1975 (SB 420) extended the authority for conducting Demonstration programs to September 1, 1978, and provided an additional \$1,045,000 above the \$2,000,000 already appropriated for Demonstration programs in the 1975-76 Budget Act.

Eight professional development and program improvement centers, situated in schools which have large concentrations of educationally disadvantaged students and one or more compensatory education programs, train school personnel to teach reading and mathematics more effectively.

The new careers in education program places interns in schools with large numbers of disadvantaged students for training under the supervision of experienced teachers. The program is available to low-income minority persons who have completed at least 60 units of college work and are willing to prepare to teach the disadvantaged in elementary schools. In 1974-75 a total of 37 participants received this professional training, together with on-the-job training and money for tuition and books.

Follow-through technical assistance provides state-level assistance to local district projects and liaison between the U. S. Office of Education's National Follow-Through Division and the 16 local projects, the six to eight follow-through model sponsors, and other agencies and organizations.

d. Curriculum Services

Curriculum services is responsible for assisting local school districts and other appropriate agencies in improving the quality of education. Programs administered include (1) state-mandated curriculum activities, (2) health education, (3) pupil personnel services, (4) mentally gifted and talented, (5) continuous learning, (6) disaster preparedness, and (7) other curriculum activities, including conservation education and instructional television.

1. State-Mandated Curriculum Activities

This unit is responsible for providing curriculum development services in language arts, mathematics (including metrics), science (biological and physical), art, music, humanities, social studies, physical education, recreation, and athletics. During 1974–75 the staff responded to more than 6,000 requests for services, conducted 50 workshops attended by more than 2,500 teachers and administrators, and operated 80 model projects for 1,200 participants.

Program objectives for 1976–77 are:

a. Assist educational agencies requesting assistance in curriculum development, improvement, and operation.

b. Provide leadership, service, and information regarding Education Code requirements and California Administrative Code, Title 5 regulations.

2. Health Education

Health education is responsible for the administration of: school health, health education, venereal disease education, education on genetic diseases and disorders, alcohol education, drug education, and nutrition education. Assistance, information, and training are provided for school districts to develop health education programs. During 1974–75 the staff responded to 6,000 requests for service; conducted 300 workshops and training sessions attended by 13,500 teachers, administrators, and other school personnel; and operated 27 model projects for 850 participants.

Program objectives for 1976–77 are:

a. Thirty percent of the districts' programs for public elementary schools will have instruction in health education, a 15 percent increase over 1974–75. This instruction will include the ten major content areas described in the *Framework for Health Instruction in California Public Schools* and will meet other criteria for a health program developed by the Department of Education.

b. Twenty percent of the state's secondary schools will have health education instruction meeting the department's criteria, an increase of 10 percent over 1974–75.

c. At least 15 percent of the public school districts will provide a health service program meeting the department's criteria, a 5 percent increase over 1974–75.

3. Pupil Personnel Services

Pupil personnel services assists schools, county superintendents, and teacher-training institutions in developing and improving programs in guidance and counseling, school psychology, school social work, and child welfare and attendance. In 1974–75 the unit published a state plan for improvement of pupil personnel services, established and monitored a pilot career guidance resource center, and identified and evaluated 11 promising practices. Additionally, staff members monitored 23 ESEA, Title III guidance and counseling projects, worked on program improvement with personnel in the offices of county superintendents, 166 school districts, and 127 schools. The staff also assisted in developing 15 program development and career guidance packages.

Program objectives for 1976–77 are:

a. A minimum of 200 elementary and secondary schools will complete new pupil services plans based on identified student needs.

b. A minimum of 500 pupil personnel specialists will improve their planning, implementation, and evaluation skills.

c. A minimum of 30 additional effective practices will be identified, evaluated by on-site visits, and disseminated to the field for use in program improvement, especially career guidance.

4. Mentally Gifted

The mentally gifted minors program was established to (a) provide educational opportunities for gifted children, (b) ensure that gifted children are given adequate opportunity to develop their intellectual, academic, creative, leadership, and career potential, and (c) provide appropriate learning opportunities for children in the upper 2 percent of general mental ability. The program currently serves 186,000 students in kindergarten through grade twelve in 300 school districts attended by 90 percent of the state's students. Program grants are awarded on the basis of prior approval applications, and expenditures are monitored and audited for compliance.

Program objectives for 1976–77 are:

a. Thirty audited district programs will be in compliance with all requirements or will have developed a compliance plan.

b. Approximately 650 school district coordinators of gifted programs, teachers, and administrators will participate in 14 regional workshops conducted to improve planning and evaluation.

c. All school districts receiving state funds for conducting research in the area of gifted education will be in compliance with program and funding requirements or will have developed a compliance plan.

DEPARTMENT OF EDUCATION—*Continued*

5. Continuous Learning

The Legislature enacted Education Code Sections 32110–32114 to enable school districts to offer year-round kindergarten through grade 12 programs. At the same time, the Department of Education recommends continuation of the traditional nine-month calendar. The purpose of the year-round program is to provide (a) better utilization of space and facilities, (b) alternatives to meet changing life-styles and needs of individuals and families, and (c) expanded curriculum opportunities.

Program objectives for 1976–77 are:

- a. Twenty new districts and ten new high schools will initiate year-round programs.
- b. Approximately 1,200 secondary teachers and administrators will participate in eight regional workshops on conducting and teaching year-round programs at the secondary level.

6. Disaster Preparedness

The intent of federal and state legislation is to prepare all students to survive natural or man-made disasters. The department has responsibility to (a) help schools develop and carry out civil defense and disaster preparedness plans required by the California Administrative Code, Title 5, Education, Section 560, and (b) provide teachers and school administrators with current information on disaster preparedness. During 1974–75 the unit held 84 workshops for teachers and administrators and involved 350,000 students in program activities.

Program objectives for 1976–77 are:

- a. A total of 150,000 students in kindergarten through grade 5 will receive at least one hour of instruction in disaster preparedness.
- b. A total of 200,000 students in grades six through 12 will receive a minimum of 8 hours of instruction in disaster preparedness.

7. Other Curriculum Activities

a. Conservation Education. The department is required to provide assistance to local educational agencies in establishing interdisciplinary conservation education programs at the local level. The services provided include (1) leadership, program, and coordination services for local educational, governmental, and community agencies; (2) maintenance and operation of a materials library. In 1974–75, the unit administered 32 projects which were funded through the grant program, developed teacher inservice training activities, ten curriculum development projects, and coordinated conservation education activities with other state agencies. Similar projects are planned for 1975–76.

In 1976–77, the grant program for environmental education projects will be administered by the Resources Agency.

Program objectives for 1976–77 are:

- a. To provide assistance to local educational agencies in establishing conservation education programs at the local level.
- b. To maintain and operate the central library for conservation education materials in the Department of Education.
- c. To provide available conservation education materials to local educational agencies upon request.

Authority

Education Code Sections 565–570.2.

b. Instructional Television. The unit approves plans of school districts and county superintendents for instructional television programs, processes claims, maintains a file on production costs of all instructional television programs developed entirely with public funds, and works with and carries out plans of the State Instructional Television Advisory Committee. During the 1974–75 school year, 50 county superintendents and 72 school districts conducted programs involving 1,760,027 students.

e. Planning and Federal Administration

Under provisions of PL 93-380, former categorical programs funded by ESEA, Titles II (IV.B), III, V (IV.C), and VIII and by NDEA, Title III (IV.B) are consolidated into ESEA, Title IV. Personnel and activities funded under those programs (except for functions formerly performed under provisions of ESEA, Title V (IV.C), which remain the responsibility of the executive branch of the Department of Education) will be consolidated into the planning and federal administration element after a phase-in year for PL 93-380 during 1975–76. This unit also provides executive secretary and staff services to the Educational Innovation and Planning Commission.

1. Planning

This unit was established to give planning assistance to all offices within the Special Programs and Support Services Program and to coordinate program planning and development with activities of other department branches. The unit also coordinates the delivery of all department services and benefits directed to nonpublic elementary and secondary schools.

Program activities for 1976-77 are:

a. All age span units will develop program plans, internal reports, and evaluation procedures consistent with department goals and priorities and age span program objectives.

b. The Educational Innovation and Planning Commission, through staff-prepared reports, will advise the State Board of Education and recommend initiation of innovative educational programs.

c. The State Board of Education and the department will establish 1977-78 priorities and revise department goals, using the planning component's 1976 statewide educational needs survey and other information.

d. Non-public elementary and secondary schools will demonstrate compliance with regulations. In addition, nonpublic schools and their administrative agencies will be better able to identify ways to improve the quality of their programs and services.

2. Federal Administration

During 1975-76, categorical programs funded by ESEA, Titles II (IV.B), III, V (IV.C), and VIII and by NDEA, Title III (IV.B) will be consolidated into ESEA, Title IV as prescribed by PL 93-380. Phaseout requirements for these programs will be completed by the federal administration unit in 1976-77.

ESEA, Title IV, Part B, learning and library resources, now includes NDEA, Title III (IV.B), ESEA, Title II (IV.B), and the guidance, counseling, and testing portions of ESEA, Title III. Part B provides funds for pupils in all elementary and secondary public and nonprofit, nonpublic schools for the acquisition of school library resources; instructional equipment, materials, and minor remodeling; and guidance, counseling, and testing services.

ESEA, Title IV, Part C, educational innovation and support, consolidates state-administered ESEA, Title III and ESEA, Title V (IV.C) programs and includes the nutrition and drop-out prevention sections of ESEA, Title VIII, formerly administered through the U.S. Office of Education. School districts may apply for funding, and nonprofit, nonpublic schools may participate in local projects to (a) improve programs at the local level and (b) develop models for other educational agencies. Projects are based on the recommendation of the Educational Innovation and Planning Commission, serving as the state advisory council, and are approved by the State Board of Education.

Program objectives for 1976-77 are:

a. For PL 93-380, Title IV, Part B:

(1) All 450 participating projects monitored will be in compliance with federal regulations and state guidelines or will have a plan that corrects areas of noncompliance.

(2) Fifty local educational agencies (LEAs) will conduct, with departmental review, staff development programs based on need identified in project applications.

(3) One hundred percent of the LEAs and/or private schools that received ESEA, Title II (IV.B), Phase II or NDEA, Title III (IV.B) project approval during 1973-74 will submit reports indicating that 75 percent of objectives have been met.

b. For PL 93-380, Title IV, Part C:

(1) At least 80 percent of the original ESEA, Title III districts will continue at least part of their programs after funding terminates, and at least 50 percent of these districts will make use of parts of their programs in at least one additional school.

(2) The ten incentive grants will result in at least 50 schools in 25 LEAs and nonpublic school systems adopting and implementing one or more complete instructional strategies.

(3) The ratio of nonpublic students directly involved in projects to the total nonpublic school student population will equal the comparable ratio as applied to the public school student population.

f. Special Education

In California there are approximately 325,000 children receiving services to meet their exceptional needs. The goal of special education is to make effective programs available for every school age individual with exceptional needs.

Department services include (1) the *California Master Plan for Special Education*, (2) educational improvement for the handicapped, (3) research and development, (4) special schools, (5) clearinghouse depository for the handicapped, and (6) other special education programs.

1. Master Plan for Special Education

Chapter 1532/74 established the *California Master Plan for Special Education* authorizing a three-year pilot study in up to ten responsible local agencies. After three years (1978), the Legislature will determine whether to make statewide use of the plan.

The master plan is designed to solve problems that developed during 50 years of supportive but fragmented legislative attention to handicapped children which resulted in more than 27 different programs with varied funding. Under this approach the handicapped were rigidly labeled, and many may not have received appropriate services. The master plan proposes a program delivery system that is flexible, eliminates labeling, and provides an individualized instructional plan for each child. The plan also requires instruction in a setting that promotes maximum interaction with the general school population.

A new section called IMPACT (Implementation of the Master Plan Activities Coordination Team) began operations in October 1974 and has provided coordination services and technical assistance to 16 responsible local agencies desiring to operate programs for handicapped children that follow master plan concepts. Six of these agencies, covering 109 school districts with 23,000 exceptional students, started programs in July 1975.

DEPARTMENT OF EDUCATION—Continued

Recent Federal legislation (S.6 which is an amendment to P.L. 93-380, EHA Title VI-b) has authorized increased expenditures for special education programs similar to the Master Plan. In 1978 when the Legislature considers statewide implementation, these Federal funds might be available for expansion.

TABLE 18

Master Plan for Special Education

EXPENDITURES	1974-75	1975-76	1976-77

TOTALS, MASTER PLAN FOR SPECIAL EDUCATION	\$400,150	\$10,404,910	\$24,406,100

2. Educational Improvement for the Handicapped

The department administers federal grants under the Education for the Handicapped Act (EHA; PL 93-380) and other programs involving educational improvement for the handicapped.

Programs funded and monitored are local educational agency program-improvement projects, private agency deaf-blind services, special educational personnel development programs, seven demonstration child service centers, and six exceptional child identification pilot projects.

During 1976-77 the unit will conduct 10 to 12 inservice training workshops for 1,500 persons in special education to implement service to children through California Master Plan for Special Education concepts. A special project will provide information and training in preschool education for the handicapped and determine the extent to which EHA, Part B projects have been replicated. Another project, "Search and Serve," will implement a system to identify, assess, and place children through age 21 who are not receiving educational services.

³ Figures for 1975-76 and 1976-77 are estimates including autistic program and the Master Plan for Special Education.

DEPARTMENT OF EDUCATION—Continued

3. Research and Development

Education Code Section 1804 authorizes the research and development program and provides funds to individuals, organizations, agencies, and institutions of higher education to conduct studies in special education for handicapped and gifted children. Between 20 and 25 such projects will be funded in 1976-77.

4. Special Schools

The Department of Education operates six special schools for handicapped children under provisions of Education Code Sections 25551-26401. These schools provide highly specialized services for low-incidence blind, deaf, multihandicapped deaf, multihandicapped blind, deaf-blind, and neurologically handicapped children. During 1975-76 1,800 pupils are expected to be served. The schools are administered through the Office of Special Education; each campus is supervised and directed by a special school superintendent. New structures for the California School for the Blind and the California School for the Deaf in northern California are planned to be completed for occupancy during 1978-79.

5. Clearinghouse Depository for the Handicapped

Education Code Sections 9503 and 9504 authorize the department to operate a clearinghouse depository for the handicapped, a direct service program offering free materials and specialized equipment to pupils in California's public and nonpublic schools and colleges. During 1976-77 an estimated 124,500 students will benefit.

DEPARTMENT OF EDUCATION—Continued

6. Other Special Education Programs

This unit provides consultive, technical, and administrative direction to local educational agencies offering direct services to individual pupils with exceptional needs. It also is responsible for the following categorical programs: (a) development centers for the handicapped, (DCH) (b) special program for autistic pupils, (c) speech and hearing handicapped, (d) deaf and hard of hearing, (e) blind and visually handicapped, (f) multihandicapped, (g) orthopedic and other health impaired, (h) educationally handicapped, and (i) mentally retarded (educable and trainable).

The development centers for the handicapped are designed for severely multihandicapped, developmentally disabled children between 3 and 21 years of age whose handicaps are so severe that without the program they would either remain at home or be institutionalized. During 1974-75 approximately 90 centers maintained by 50 local educational agencies enrolled nearly 3,000 children.

Chapter 407, Statutes of 1974 (SB 1782) requires that "... during the period between July 1, 1974 and September 1, 1978, there be an orderly phase-in of pupils identified as being eligible for the DCH program, so that by September 1, 1978, all eligible pupils shall be served." This budget proposes an additional \$1,549,670 in Local Assistance and \$45,521 for support of related administrative activities in the Department of Education in order to serve an additional 472 pupils in the DCH's. Through this proposed augmentation, which will meet the identified 1976-77 waiting list requirements, an orderly progression to the mandated 1978 goal will continue.

The special program for autistic pupils was mandated by Chapter 1527/74 to provide these children with education and ancillary services in special day classes of no more than six pupils. This unit also monitors approximately 40 experimental programs involving about 10,000 handicapped children.

V. ADMINISTRATIVE SUPPORT SERVICES

Administrative support services brings together resources of personnel and funding that provide support to the department's program branch. These resources support all three age spans: elementary, secondary, and adult.

The program consists of two major elements: (1) apportionment and distribution of aid and (2) administrative services to local education. Chapter 949, Statutes of 1975 (AB 861) appropriated \$200,000 in 1975-76 to the Superintendent of Public Instruction from the Driver Training Penalty Assessment Fund for allocation to school districts and county superintendents of schools for costs incurred by them for modifications to certain schoolbuses used to transport pupils in wheelchairs. The modifications are in accordance with standards adopted by the State Board of Education in November of 1974. The \$200,000 will be available to school districts and county superintendents of schools until June 30, 1976.

1. Administration and Apportionment of State Aid

This component collects data from school districts and county superintendents: attendance reports, public school enrollments, financial reports, private school enrollments, research data and publication, and penalty systems.

The Bureau of School Apportionments and Reports provides administration, control, and supervision of General Fund apportionments, various types of special reports, and administration research activities. All local assistance in the Department of Education from other than federal funds is apportioned by the bureau, which reports on the following: (a) annual financial report of school districts, (b) school districts spending less than the specified amount for teachers' salaries, (c) special education costs, (d) costs for adult classes, (e) ratio of administrators to teachers, (f) salaries of certificated employees, (g) *California Public Schools Selected Statistics*, and (h) enrollment data for the new school year. The bureau also prepares data on school finance for statistical purposes and for the development of models for proposed school finance measures.

In 1976-77 the objectives of this component will be to (a) meet the legal deadline for apportionments (with the increase of pilot programs there has been a steady increase in the number of apportionments), (b) automate the apportionment processes and administrative research functions, (c) standardize data collection procedures, (d) provide leadership in development of alternative proposals to conform with the *Serrano v. Priest* decision, (e) provide leadership in upgrading the information system to school districts and county superintendents, and (f) develop closer liaison with program consultants and managers within the department.

Included within this program element is the effect of the significantly increased funding level for schools provided by Chapter 277, Statutes of 1975 (SB 220). This legislation increased the statutory Foundation Program adjustment by \$21 for fiscal 1975-76 (from \$63 to \$84) and reduced the 1976-77 Foundation Program for summer school ADA by 20 percent. The effect of this legislation is to increase state apportionments by approximately \$80 million in 1975-76 and \$50 million in 1976-77, and to increase state property tax relief subventions by \$8 million in 1975-76 and \$12 million in 1976-77.

The 1975-76 Budget Act placed a "cap" on the growth in average daily attendance (ADA) which the State will fund in nonmandatory adult education programs and regional occupational centers and programs (ROP/ROC's). Prompted by the dramatic annual increases in ADA in these programs and by a growing concern over whether scarce state funds were being directed at the most essential educational priorities, this action will allow time for the State to reexamine its priorities and the funding mechanisms for adult education and ROP/ROC's. The cap is proposed for continuance in the 1976-77 fiscal year until statutory reforms to these programs are enacted.

It is estimated that the removal of the five percent cap would result in a \$162.4 million increase in state apportionments in 1976-77, \$65 million of the increase would be in K-12 and \$97.4 million would be in 13 and 14.

TABLE 21
AVERAGE DAILY ATTENDANCE IN CALIFORNIA PUBLIC SCHOOLS ¹

Level	Average Daily Attendance, By Year ²		
	1974-75	1975-76	1976-77
Elementary.....	3,089,416	3,071,000	3,027,900

Education Code, Sections 17300-18480

2. Textbook Management and Distribution

Instructional materials to be used in elementary schools are adopted by the State Board of Education on the basis of recommendations by the Curriculum Development and Supplemental Materials Commission, on a biennial cycle. Instructional materials for one-half the subjects will be adopted in 1976-77 for introduction into the schools in 1977-78. The balance will be adopted in 1977-78 for use in 1978-79. This adoption process repeats itself every two years.

Program objectives for 1976-77 are:

- Prepare and distribute price lists and order forms of state-adopted instructional materials to 960 school districts and 940 participating nonpublic elementary schools by September 1976.
- Arrange for state printing and commercial purchase of \$29 million worth of instructional materials ordered by school districts by February 1977.
- Complete delivery of all instructional materials ordered by the schools prior to the start of the 1977-78 school year.

DEPARTMENT OF EDUCATION—Continued

3. Surplus Property

The department acquires surplus federal personal property and food commodities and distributes them to eligible schools, institutions, and other agencies. The level of operation depends on the quantity and variety of equipment, supplies, and food made available. For the past two years there has been a decline in the availability of usable property. This has been due to (a) the nationwide proliferation of eligible recipient organizations competing with California and (b) changes in regulations which authorize the General Services Administration and the Department of Defense to dispose of certain classes of property by exchange or sale rather than the donation program. Food distribution activities have also declined, caused in part by the elimination of certain federal food assistance programs and by diminishing food surpluses.

Program objectives for 1976-77 are:

- a. Provide usable surplus property having a federal acquisition cost of \$35 million, at a cost not to exceed 5 percent of acquisition cost.
- b. Distribute food commodities having a market value of \$32 million, at a cost not to exceed 10 percent of the value of the food distributed.

Authority

Federal Property and Administrative Services Act of 1949, Public Law 152; the Agricultural Acts of 1935 and 1949; the National School Lunch Act of 1946; and sections 451 and 457 of the Education Code.

Savings to recipients

* 1976-77 projection based on program objectives.

4. Food and Nutrition Services

The department administers and supervises the National School Lunch Program and the School Breakfast Program and administers the payment of federal and state funds to school districts and other eligible agencies through the Office of Food and Nutrition Services. The purpose of these programs is to assist schools in providing nutritious meals to pupils, with emphasis on free or reduced-price meals to children from low-income families. The department is also involved in establishing food delivery systems to schools without food services, helping existing programs improve food delivery systems, and ensuring that food service programs meet nutritional requirements established by federal and state governments.

Program objectives for 1976-77 are:

- a. Assist 6,000 schools to provide daily lunches and 1,400 schools to provide daily breakfasts.
- b. Encourage the improvement of the qualifications of food-service personnel through college-level courses and on-the-job training.
- c. Provide assistance in food analysis, recipe development, and kitchen design.
- d. Improve procedures for automatic data processing of claims, to accelerate payment and reduce cash-flow problems.
- e. Improve student knowledge of food selection and acceptance, in coordination with the health education component, so that students who do not participate in the school food service program will begin to do so.
- f. Implement inservice training programs in food-service management for school district personnel.

Chapter 1487, Statutes of 1974 (SB 2020) appropriated \$12.5 million in 1974-75 to provide a \$.05 per meal reimbursement to public school districts for all meals served to students. This amount has been adjusted for participation growth and inflation in 1975-76 and results in a total of \$14.9 million for a \$.0536 per meal reimbursement. The Governor subsequently signed Chapter 1277, Statutes of 1975 (SB 120) which extends this reimbursement to private schools and certain child development agencies, as well as to public schools. This bill additionally mandates that by 1977, all public schools will serve at least one hot meal to needy pupils, and provides an additional reimbursement for such meals served in low-wealth school districts.

The proposed levels of funding for the Child Nutrition Program in 1975-76 and 1976-77 (\$34.5 million and \$45.5 million respectively) represent a cumulative \$48.2 million increase over the estimated program levels (\$14.9 million and \$16.9 million respectively) that existed prior to the passage of SB 120.

Of this amount, \$10.1 million was appropriated by Chapter 1277/75 (SB 120) for 1975-76. However, program growth has been greater than anticipated and revisions of previously incomplete data on meal participation now indicate that increased funding is necessary. Also, the passage of a Federal Child Nutrition bill, HR 4222, over a presidential veto, will greatly increase the number of reduced price meals served. School districts are eligible to receive the State reimbursement for these meals. HR 4222 takes effect January 1, 1976.

Due to these factors, an additional \$9.5 million for 1975-76 will be requested through deficiency legislation. The Governor further proposes full funding in 1976-77, a \$28.6 million increase over the program level for 1976-77 estimated prior to the Governor's signature of SB 120.

DEPARTMENT OF EDUCATION—Continued

The \$45.5 million proposed to continue this program in 1976-77 represents an increase of \$11.0 million (32%) over the latest proposed level of \$34.5 million for 1975-76. Of the total proposed program support for 1976-77, \$23.9 million will provide a \$.0577 per-meal reimbursement for all meals served, and \$20.8 million will support additional reimbursements for meals served to needy students. The remaining \$0.8 million will be used for program administration and for nutrition education projects.

Federal funds				319,894	493,915	480,936
Reimbursements				75,763	55,130	55,770
Element Components						
1. School Facilities Planning	19.6	18.8	18.8	550,233	553,850	575,013
2. Field Management	22.7	26.1	26.1	731,319	1,133,960	1,133,778

1. School Facilities Planning

The department provides school facilities planning services to all school districts on request and, by legislative mandate, to districts not governed by city boards of education. The services include assistance in long-range master planning, selection of school sites, evaluation of existing facilities, translation of district educational programs into building space, and planning capital outlay financing programs.

School districts currently face problems of fluctuating enrollment, alternative educational programs, new developments in the construction industry, and capital outlay funding. The department provides assistance not otherwise available in documenting the districts' educational objectives, evaluating existing facilities in terms of those objectives, and identifying present and future facilities needs. Services also include assistance in establishing priorities in capital improvement programs.

In addition, the department is responsible for (1) assisting school districts in the development of long-range master plans when state monies are borrowed, (2) establishing and maintaining school building standards, and (3) administering capital outlay programs supported by the federal government in areas impacted by federal activities or struck by major disasters.

Program objectives for 1976-77 include:

- a. Assist 25 or more school districts with growing or declining enrollments to develop long-range master plans, and assist 75 or more school districts to update long-range plans.
- b. Assist those remaining districts not in compliance with the Field Act to develop proposals for the replacement or rehabilitation of unsafe buildings.
- c. Ensure that 85 percent of plans developed and submitted by districts for approval will meet minimum requirements.
- d. Conduct research, including a project for coordinated community planning, review and evaluate 25 or more exemplary educational programs, environments, and facilities designs, and disseminate this information.
- e. Assist ten or more school districts with growing or declining enrollment in conducting space-utilization studies and explore greater utilization of existing facilities, including year-round education.
- f. In cooperation with other state agencies, develop procedures in planning facilities consistent with the master plans for early childhood education, special education, migrant education, and vocational education.

Authority

Education Code, Sections 254, 255, 1205, 15001, 15005, 15302, 15409, 19559.1, 19559.2, and 19700.61.

2. Field Management

The department provides information to school districts and county superintendents on effective organization and methods, new applications and techniques, and the requirements and options established by law or other directives.

The field management component deals with all noncurricular aspects of school operations, including but not limited to school district organization, pupil attendance accounting and welfare, risk management, school finance, budgeting and accounting, unemployment insurance, pupil transportation operations, school bus design and construction, bus driver training, the Stull Act, the Winton Act, the Master Teacher Act, Cal-OSHA, and problems related to the energy crisis. In addition, the component provides field services for other department program managers by assisting with on-site reviews of financial and attendance reports for special programs and projects.

Another segment of field management is the management assistance team which analyzes and reports on the administrative operations of school districts and county superintendents. The management assistance team will conduct 24-26 studies in 1976-77.

Chapter 791, Statutes of 1975 (AB 340) provided additional support to the Department of Education for the purpose of developing a driver training course for drivers of farm labor vehicles in California. The Department is charged with the responsibility of training the necessary personnel to conduct the course; to furnish training materials used in the course; and to monitor on-going activities. The Departments of Education and Motor Vehicles are required to report to the Legislature by December 1, 1976 on the implementation and effectiveness of the provisions of Chapter 791.

Program activities for 1976-77 are:

- a. Conduct workshops and seminars on (1) classified employees' unemployment insurance, (2) school budgeting and accounting, (3) school attendance accounting, (4) teacher evaluation (Stull Act), and (5) school bus driver training classes.
- b. Prepare reports on (1) alternate plans for school finance related to the Serrano decision, (2) proposals to reorganize school districts, and (3) status reports on school personnel matters.
- c. Publish materials and forms for (1) school attendance accounting, (2) training for bus drivers, (3) pupil work permits, and (4) teacher evaluation (Stull Act).

DEPARTMENT OF EDUCATION—*Continued*

VI. DEPARTMENT MANAGEMENT AND SPECIAL SERVICES

The Department of Education, with a staff of approximately 2,500 employees, is responsible for providing leadership to California's public schools and for disbursing approximately \$3.0 billion in funds, materials, and supplies to local educational agencies. The management of these resources and the achievement of educational program objectives depend on the leadership, policy direction, and support services provided by the management and special services program.

The program consists of (a) department management and (b) special services.

1. Executive

This consists of the offices of the Superintendent of Public Instruction and his deputies and assistants and a centralized staff which includes legal counsel, governmental affairs, program evaluation and research, education information/dissemination (which includes media services and publications), student liaison, intergroup relations, and policy analysis and special projects.

The Superintendent, in cooperation with the State Board of Education, determines priorities to meet the changing needs of the public schools. His office recommends to the public and to the Legislature the actions that are necessary to provide effective educational programs.

The Office of Program Evaluation and Research reports directly to the Office of the Superintendent of Public Instruction. The functions and responsibilities of OPER are carried out in four areas: (1) evaluation services, (2) management information, (3) research and special programs, and (4) state assessment. The results of the state assessment (testing) program are shown in the Elementary and Secondary program narrative.

The 1976-77 budget for the Office of Program Evaluation and Research includes an additional \$86,517 and 1.5 proposed new research and evaluation consultant positions. These increases have been budgeted in order to meet increased workload resulting from the expansion of early childhood education (see Elementary Education Program) and the annual evaluation required for the American Indian Education Centers Program

2. Program Management

The Superintendent of Public Instruction must have an effective management system within the department to ensure the delivery of responsive and accountable educational services to all students.

In the program management component, education program managers are responsible to the Superintendent, through the Deputy Superintendent for Programs, for implementation of programs for elementary education, secondary education, adult education, and special programs and support services. These managers are supported by the management of bilingual-bicultural education, special education, vocational education, compensatory education, child development, curriculum services, and planning and federal administration.

The Administration branch of the department is managed by the Deputy Superintendent for Administration. Included are the management units for the Division of Financial Resources and Distribution of Aid and the Division of Administrative Services. Also included in the management component is the management unit of the Division of Libraries.

Included in the budget for Program Management is the continuation of a fourth Associate Superintendent position (the Associate Superintendent for Special Programs and Support Services). This position was created in 1975-76 on a one-year trial basis and has made substantial progress in coordinating several previously fragmented managerial activities.

Authority

Education Code, Sections 362 and 27001.

3. Management Services

Under the direction of the Deputy for Administration, this component provides administrative and financial support services to the department's program operation. Administrative services include personnel and training, and management analysis. Financial services include budgets, fiscal reports, accounting, audits, and business services.

Management services consists of both indirect cost units and service units. Indirect cost units are departmental activities which support and are distributed to all programs on the basis of direct labor costs incurred. Service units are departmental activities which provide direct services to all programs but which are centralized for greater efficiency and to avoid duplication. Service units are charged at established billing rates to offset the cost.

The Management Services budget includes two proposed new positions: (1) an associate management auditor in the Internal Audits Office; and (2) an associate personnel analyst in the Personnel and Training Office. The budgets for the two units have been increased by \$22,753 and \$26,231 respectively to provide personal services and operating expenses for the new positions which are proposed to meet projected workload demands in both units. Both positions will be funded through indirect cost charges.

DEPARTMENT OF EDUCATION—Continued

1. Special Assistance to the State Board of Education

The Legislature and the State Board of Education are the governing and policy-making bodies for public elementary and secondary education in the state.

The Board is composed of ten nonpaid lay members appointed to four-year terms by the Governor. Special Services provides the board with administrative and staff assistance.

Authority

Education Code, Sections 101-112, 151-161.

2. Education Commission of the States

The commission is the operating arm of the compact for education, established to improve state systems of education.

Authority

Education Code, Sections 31020-31025.

3. Advisory commissions and committees

These commissions and committees, composed of professional and lay members, provide the Board and the Superintendent of Public Instruction with informed recommendations in the development of educational policies.

Authority

Education Code, Sections 583-583.9, 576-582.1, 584-584.6, 585-585.7, 586-586.6.

4. Advisory Council for Vocational Education

The council is responsible for evaluating vocational education and advising the State Board of Education, the Board of Governors of the California Community Colleges, and other agencies on matters relevant to vocational education programs. *As a result of the Council's review of workload requirements, General Fund Support in 1976-77 has been reduced by \$88,836 from the 1975-76 level.*

Authority

Education Code, Sections 6261-6267.

5. Council for Private Postsecondary Educational Institutions

The Legislature, through Division 21 of the Education Code, has established its intent to encourage privately supported higher education and to protect the integrity of degrees and diplomas conferred by private schools. This council is responsible for advising the Superintendent of Public Instruction on the development of policies and regulations necessary for the governance of these private schools. It also advises the Superintendent on the denial, withdrawal, and/or suspension of approval of courses offered by private schools to meet the requirements for degrees and diplomas.

Authority

Education Code 29005.

VII. LIBRARY SERVICES

The State Library's goal is to make needed information readily available to users in a coordinated, effective, and economical manner. The State Library assists the public libraries in providing timely, excellent, free library service for all residents of the state.

The program elements are (a) reference and research services for the Legislature and state agencies, (b) statewide library support and development, (c) special clientele services, and (d) State Library support services.

a. Reference and Research for the Legislature and State Agencies

The State Library maintains reference and research materials for the Legislature and state agencies. A central library reduces costly parallel efforts in each agency. When agency libraries are required, the State Library offers backup support. A workshop was held in 1974-75 for state agency libraries to discuss mutual problems and find ways in which the State Library could assist. Additional workshops are planned for 1975-76 and 1976-77.

In the budget year, emphasis will continue on providing comprehensive reference service on various topics by making use of automated information retrieval systems. Training courses will continue to develop staff competence in the use of these automated systems. The collection will be developed to be responsive to the needs generated by the automated information retrieval systems.

b. Statewide Library Support and Development**1. Government Depository Program**

The State Library acts as a coordinating authority in California for the collection and distribution of all state and federal publications. It determines the best locations for depositories so local library users will have immediate access to the documents. The objective of the depository program for 1976-77 is to ensure that state agencies provide copies of all publications for listing and to make this list more timely and useful through the use of automated indexing.

Authority

Government Code, Sections 14901-14912.

2. Interlibrary Loan and Reference Support

The State Library offers interlibrary service to (a) supplement the collections of California public libraries, (b) locate materials not held at the State Library, and (c) answer reference questions and supply information to assist local libraries.

In November 1975, the second edition of the *California Union List of Periodicals* (CULP) was published, listing 50,000 titles with 300,000 locations. The third edition will be issued in March 1976, listing 75,000 titles and 400,000 locations. In 1976-77 significant changes in reference and interlibrary loan transactions are expected as the result of recommendations of a study made of public library systems in June 1975.

Authority

Education Code, Section 27051(e).

3. Consultant and Research Services

This program provides advisory and technical assistance to California libraries. Studies and surveys are made, local programs are evaluated, research assistance is provided, and training is offered. Statistical data from all public libraries are published annually. The consulting staff assists the State Librarian in the administration of the Public Library Services Act, which provides assistance to 20 public library systems, and of the Federal Library Services and Construction Act, which also provides grants to public library systems.

In 1976-77, models for organization and staff development in selective libraries will be designed. Training programs will be offered local libraries for services to minority persons. Local libraries will be assisted with information and referral services for the aged, and access to machine-readable information banks.

Authority

Education Code, Sections 27051(f) and (j).

4. State and Federal Grants Program

Since 1963, under the Public Library Services Act (PLSA), the State Library has awarded planning, establishment, and per capita grants for developing and maintaining public library systems. These now number 20 and cover the entire state, including 148 of the 182 public libraries in California. The primary objective of the program is to encourage interjurisdictional cooperation for improved services at lower costs. Since no single library has the capacity to meet the demands of all citizens, the pooling of resources will give each citizen access to the widest possible range of information resources.

Authority

Education Code, Sections 27051(m), 27053, and 27111-27146.

c. Special Clientele Services

1. Books for the Blind and Physically Handicapped

The federal government produces talking books (recorded on tape or record) and books in braille for those not able to use conventional printed materials. The braille and talking books are made available by the Library of Congress to designated agencies which then lend them to eligible blind and handicapped patrons. The State Library is one of the agencies responsible for this service in California.

Due to the recent growth in the number of individuals requesting this service, the State Librarian, in the current year, studying the feasibility of implementing an automated circulation system in the Books for the Blind and Physically Handicapped Unit.

Authority

Education Code, Sections 27051(i), 27055, and 27056.

2. Processing Center

The processing center was closed as of June 30, 1975. Its purpose had been to provide book-processing services to contracting libraries to take advantage of volume purchasing, cataloging, and processing. In 1974-75, an attempt was made to establish the service as self-supporting. However, cost analyses revealed that the center could not compete with computerized commercial services. When the center closed, positions were phased out and the employees placed in other positions.

d. State Library Support Services

1. Administration

The objectives of the State Library's administration are to (a) maintain leadership in planning library services at local, state, and national levels, (b) administer the State Library and its programs efficiently, (c) budget and expend funds wisely, and (d) coordinate state and federal grants for libraries according to law.

The 1976-77 budget includes an additional librarian position for the California Section to catalog and process the backlog of library materials donated to the State Library.

Authority

Education Code, Sections 27000-27105.

2. Collection Management and Control

The objective of this component is to prepare and control necessary informational materials for the service elements of the program. By acquiring and organizing books, periodicals, and other types of publications, the State Library complies with its legislated responsibility to provide these informational services. Selection of materials for the State Library is based on (1) anticipated need, (2) requests by state employees, officials, and legislators, and (3) available funds.

Materials are purchased in these subject categories: (1) social and political science, (2) law, (3) science and technology of direct interest to state agencies, (4) educational management and technology, (5) public administration, (6) economics, (7) library and information science, and (8) California history.

In 1975-76 it is estimated that approximately 9,800 books will be acquired and processed by the State Library's order/cataloging operations. The number of periodical and serial subscriptions as well as microform publications to be acquired is in addition to the number of books to be acquired.

In 1976-77 the State Library will acquire and process a comparable number of books and other publications.

Authority

Education Code, Sections 27051(c) and (d) and Section 27052.

VIII. LEGISLATIVE MANDATES

Section 2231(a) of the Revenue and Taxation Code requires the state to pay local governmental units the costs of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973. Within the program area of the Department of Education, there are two legislative mandates: one relates to procedures and hearings required for dismissal of certificated employees of public schools; the other relates to public school pupil disciplinary procedures.

These mandates affect public school districts. These entities will incur higher costs because of the two legislative mandates. Funds are appropriated to the State Controller for allocation and disbursement to these entities upon their claims for reimbursement of costs incurred.

STATE BUILDING PROGRAM
EXPENDITURESActual
1974-75Estimated
1975-76Proposed
1976-77*Schools for the Blind and Deaf, Fremont, California*

Pursuant to Chapter 1120, Statutes of 1973, the Schools for the Blind and Deaf will be located on a single site of approximately 91 acres in Fremont, California. This site will contain a facility for the blind with a capacity of 150 children, 50 blind-deaf and 100 with multiple impairments. The same site will also contain a facility for the deaf with a residential capacity of 100 elementary students, 250 secondary students, and 50 multihandicapped students. The single site will promote capital and operational economies which are administratively or operationally practical and educationally sound in the joint or mutual use of such facilities as maintenance, utilities, health services, food preparation, purchasing and storage. However, each school will maintain the integrity of its own educational programs.

Recognizing the need to replace the existing facilities located in Berkeley, the 1973 Legislature appropriated \$3,100,000 for site acquisition, planning, construction and equipment for a new facility. In keeping with legislative intent the 1974-75 budget appropriated \$19,942,000 for working drawings, construction and equipment for the permanent facilities on a single site located in Fremont, California. The 1976-77 Budget includes \$19,300,000 for working drawings, construction and equipment funds in augmentation of the 1974-75 appropriation.

Diagnostic School for Neurologically Handicapped—Northern California

This is a residential school which provides a comprehensive assessment of a handicapped child's developmental and learning potentials and establishes a medical and educational program to enable the child to return to a local school. The school is located on 2.8 acres and consists of a two-story building housing classrooms, dormitories, kitchen and dining rooms, playrooms, parent bedrooms, examination rooms, infirmary and administration offices. In addition the grounds provide play areas for the children and a single-story facility currently being used for storage. The 1975-76 capital outlay program provided one major project totaling \$127,440 to correct life and safety requirements in the existing facilities.

Diagnostic School for Neurologically Handicapped Children—Central California

Chapter 634, Statutes of 1973, authorized establishment of a third diagnostic school to be located in central California. Funds were included in the act for operation in the second half of fiscal year 1973-74 but not for purchase or construction of a facility.

The Department of Education was able to secure a 10-year lease of a four-year-old facility located in Fresno. The lease is effective from January 1, 1974 to December 31, 1983. The facility is comprised of approximately 34,000 square feet of space on 6.1 acres. The state and the owner have shared in the cost of building modifications to meet the diagnostic needs of the students and Field Act requirements. The state is responsible for maintenance of equipment, minor repairs and maintenance of the building, grounds and landscape.

Chapter 176, Statutes of 1975, Item 375.5 appropriated \$1.7 million from the Capital Outlay Fund for Public Higher Education Fund to purchase the facility, which upon completion will eliminate the existing lease arrangement and provide a facility which meets the short and long-term objectives of diagnostic education.

CONTRIBUTIONS TO TEACHERS' RETIREMENT FUND

The objective of this program is to provide state financing of teacher retirement benefits which are not funded by either the employer's or employee's contribution.

Contributions to the Teachers' Retirement Fund are derived from three separate sources: members, employing school districts, and an annual amount from the General Fund.

Chapter 1305, Statutes of 1971, placed the system on a reserve funding basis. On July 1, 1972, teachers began contributing 8 percent of their remuneration to the system. Employing school districts were required to increase their contributions from 4 percent of teacher payroll for the fiscal year ending June 30, 1974 to 8 percent by July, 1978. For fiscal year 1976-77, the school districts will contribute 6.4 percent of payroll. State funds are provided to low-wealth school districts through the apportionments for public schools to accommodate this increase.

In addition, the state has contributed \$135 million each year since 1972 and will continue to do so for the next 26 years.

Authority

Section 14112, Education Code.

DEBT SERVICE ON PUBLIC SCHOOL BUILDING BONDS

PROGRAM ANALYSIS

Program Objectives and Description

The electorate of California has previously authorized state school building general obligation bonds totaling \$2,240,000,000 of which \$2,065,000,000 in bonds has been issued and sold as of November 1975.

The November 5, 1974 ballot included a new bond act totaling \$150,000,000 as provided by Chapter 475, Statutes of 1974, to be known as the "State School Building Aid and Earthquake Reconstruction and Replacement Bond Law of 1974" which the electorate approved; \$50,000,000 of the new bond act is for rehabilitation and \$100,000,000 is for new construction. In addition, the State School Building Lease Purchase Bond Law of 1976, if approved by the state electorate in June 1976, would authorize an additional \$200,000,000 in general obligation bonds in order to provide loans to local school governing boards for the lease-purchase of school facilities.

In 1975-76, a \$125,000,000 bond sale has been authorized to finance the continuing cash needs of the following period for the outstanding final apportionments made to the school districts, and another \$100,000,000 in bond sales are planned for the 1976-77 fiscal year prior to June 30, 1977 for the ongoing requirements of the program's apportionment financing.

The repayment of loans from the school districts will amount to \$935,798,111 as of June 30, 1977, of the total debt service paid to bondholders, totaling \$1,755,457,670 as of June 30, 1977. Repayments amount to 53.3 percent of the debt service from the beginning of the program.

The school districts of the State of California are required to first utilize their individual maximum bond-borrowing capacity to within 95 percent, or be within \$25,000 of reaching the 95 percent requirement, before the district is eligible for a state loan in this program. The school districts with an unpaid outstanding loan balance repay the State General Fund on a formula basis which involves the district-assessed property valuations and a partially offsetting local district bonded indebtedness payment of the fiscal year with the net amount due for repayment each year over a period of 30 years. If a district during the 30-year repayment period requests a one-year deferral of its annual repayment, then under existing statutes an additional 10 years is added making a 40-year repayment period for that district's outstanding loan. If after the prescribed period there is still a district loan balance outstanding, then the statutes permit the unpaid balance to be canceled.

STATE SCHOOL BUILDING SAFETY PROGRAM

Chapter 500, Statutes of 1972, appropriated thirty million dollars to be made available to the School Building Safety Fund for the repair and replacement of local school buildings in compliance with Field Act requirements.

Chapter 22, Statutes of 1973 authorized apportionment loans totaling fifteen million dollars from the State School Building Act Bond Law of 1966 to assist school districts which lack matching funds in order to qualify for state loans to comply with Field Act safety requirements. Chapter 383, Statutes of 1974 authorized an additional twelve million dollars from the State School Building Aid Fund for loans to school districts for matching funds to provide for the safety features required in active school buildings under the Field Act.

Chapter 122, Statutes of 1975, provides an additional seven million dollars to the twelve million dollars available from the State School Building Aid Fund for loans to school districts.

These funds were fully encumbered prior to June 30, 1975, but will not be fully apportioned until June 30, 1976.

COMMISSION FOR TEACHER PREPARATION AND LICENSING

The Commission for Teacher Preparation and Licensing was established by Chapter 557, Statutes of 1970, with the specific objective of insuring excellence in education by encouraging high standards of quality and diversity through broad minimum standards and guidelines. The Commission is organized into six program units: approved programs, examinations and evaluation, licensing, professional standards, beginning teacher evaluation study—which is fully federally-funded—and administration. Programs are managed by program chiefs under direction of the executive secretary and based on policies of the commission. Staff functions of the commission include program approval, monitor and review, external assessment of teacher preparation programs, administration of examination and evaluation programs, licensing of qualified credential applicants, review of charges of immoral or unethical conduct of public school certificated personnel, and general administrative and office functions.

SUMMARY OF PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
I. Approved programs.....	\$328,348	\$353,893	\$408,766

II.	Assessment of programs to insure accountability	1	28,500
III.	Credentials workload	5	50,000
IV.	Professional standards workload and extraordinary price increases	1	34,500

I. APPROVED PROGRAMS

Program Objectives and Description

To provide state leadership for the planning, development, and approval of programs offered in California institutions for the preparation of teachers and other public school personnel. To evaluate teacher education programs in California in accordance with standards established or adopted by the Commission for Teacher Preparation and Licensing. Staff assistance was provided during 1974-75 to 70 institutions of higher education in the development of 109 professional preparation programs for teaching and service credentials which were granted conditional approval. Projections indicate that at least 20 institutions will be developing and seeking approval for at least 55 specialist and services programs. Staff assistance will be provided to assure early correction of program deficiencies identified during initial approval. One additional consultant in Teacher Preparation is proposed for bilingual/cross-cultural program emphasis.

Authority

Education Code Sections 13102, et seq.; California Constitution, Article IX and Article IV.

Output

The primary output of approved programs are the educational personnel prepared through the professional preparation programs developed by California institutions and approved by the Commission. During 1974-75 conditional approval was granted to 109 programs.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

General Fund	-	-	-	9,303	1,371	-
Teacher Credentials Fund.....	-	-	-	319,045	352,522	408,766

II. EXAMINATIONS AND EVALUATION

Program Objectives and Description

To establish, maintain, and evaluate an examination system in accordance with the law. To provide policies and procedures for evaluating and approving teacher education programs. Fifteen subject matter advisory panels were selected in 1973. Twelve of the 15 panels developed, reviewed in the field, and presented for adoption, scope and content statements for subject matter areas. During 1975-76 the three remaining scope and content statements will be developed. A nationally administered examination system has been adopted on an interim basis. The system makes available examinations for all but four subject matter areas—three of which were added by legislation during 1974. During 1975-76 the Commission proposes to develop an agriculture examination. Also, in 1975-76 the Commission plans to evaluate the existing system and, based upon this evaluation, propose either continuance of the interim system, modification of existing examinations, or development of new examinations on a priority basis. During 1974-75, programs at four institutions were reviewed through the pilot external assessment system, and during 1975-76 programs at nine institutions are being assessed in the second pilot phase. In 1976-77 programs given initial approval in 1973 will continue to be assessed. One additional Consultant in Teacher Preparation is proposed to preserve accountability for results.

Authority

Education Code Sections 13145 et seq.

Totals, Examinations and Evaluation	5.9	6	7	\$224,170	\$266,458	\$342,977

III. LICENSING

Program Objectives and Description

To provide a licensing service to school districts, counties, educational institutions, and individuals which insures uniform administration and enforcement of standards.

To provide rules and regulations to govern the Commission's procedures for teacher licensing and implementation of improved standards for existing and new licenses.

To provide updated, revised, and simplified procedures for processing applications, with the end objective of reducing costs and the time required to evaluate the applicant's qualifications.

During 1974-75 licensing processed over 120,000 applications with an average processing time of 30 days. In addition to evaluation of credential applications, this unit provided information services to the field and to individual applicants by personal interview, telephone, and correspondence.

An additional \$50,000 for five man-years of temporary help is proposed to meet increased workload.

Authority

IV. PROFESSIONAL STANDARDS

Program Objectives and Description

To initiate proceedings to suspend and revoke certification documents for cause in accordance with the policies of the Commission for Teacher Preparation and Licensing and under authority of the Education Code.

To recommend to the Commission the termination of suspension orders and reissuance of certification documents when satisfactory evidence of rehabilitation has been presented.

Professional standards in concert with the committee of credentials reviews the personal and professional conduct of individual applicants and credential holders. Such review occurs when there are allegations relating to arrest records, unprofessional conduct, mental health problems, or physical health problems.

An additional Junior Staff Analyst is proposed to provide quick identification of serious allegations relating to teachers, and \$19,500 are added for extraordinary price increases in fingerprint fees and investigative.

V. BEGINNING TEACHER EVALUATION STUDY

Program Objectives and Description

To identify teacher behavior which is related to student achievement in reading and mathematics.

To develop measurement procedures and instruments to assess that teacher behavior.

To stimulate modification of teacher preparation programs by emphasizing the improvement of teacher competence.

During the 1974-75 fiscal year, the commission received federal funds to develop a research design to study teacher behaviors related to student achievement in reading and mathematics. The federal grant during fiscal year 1975-76 provides funding for additional field work, including instrument revision and additional generation of research hypotheses.

Authority

Chapter 557, Statutes of 1970; Education Code Section 13114.

Output

A funding contract was received from the National Institute of Education covering fiscal years 1974-75 through 1977-78. These funds provide for refinement of measurement instruments, generation of additional research hypotheses, a large field study in 1976-77 to test these hypotheses, and, in 1977-78, the development of policy recommendations based on the research.

CALIFORNIA POSTSECONDARY EDUCATION COMMISSION

The California Postsecondary Education Commission was established by Chapter 1187, Statutes of 1973. A successor to the Coordinating Council for Higher Education, it assumed its duties on April 1, 1974. It has 23 members; 11 are directly connected with public or private postsecondary education, 12 represent the general public.

The commission is responsible for developing and annually bringing up to date a comprehensive five-year plan for postsecondary education. It also reviews and integrates the long-range plans of the three public segments of higher education (University of California, California State University and Colleges, and California Community Colleges). Another primary duty is to advise the Governor and the Legislature on the need for and location of new institutions and campuses, and proposals for new programs. The commission is a clearinghouse for information on higher education.

Operations are divided into:

I. Information systems. The commission is responsible for developing state-level data collection systems to help in making informed decisions on postsecondary education. It also is engaged in a pilot project to establish nationally compatible systems.

II. Coordination and review. The commission reviews proposals for new programs and facilities by public institutions in order to (1) provide coordination, (2) prevent duplication, and (3) provide efficient transmittal of state and federal support.

III. Planning and special projects. The commission develops and keeps the five-year plan up to date, integrates the long-range plans of the public segments, and conducts and/or monitors special studies requested by the Legislature.

IV. Federal programs. The commission administers certain federal programs, and has been designated by the federal government as the primary postsecondary education planning agency for the state under Section 1202 of the 1972 higher education amendments.

The commission also develops criteria to evaluate the policies and plans for postsecondary education and submits reports as requested by the Governor and the Legislature.

SIGNIFICANT PROGRAM CHANGES

Program	Description	Man-Years	Dollars
I. Information Systems EDP		2	\$139,525

I. INFORMATION SYSTEMS

Program Objectives and Description

This unit has responsibility for developing information systems at the state level to collect, store, retrieve, analyze, and disseminate information which will facilitate making informed decisions about postsecondary education. The Education Code specifically directs the commission to "act as a clearinghouse for postsecondary education information and as a primary source of information for the Legislature, the Governor, and other agencies, and develop a comprehensive data base insuring comparability of data from diverse sources."

A standing committee of commissioners advises the staff on policy matters. A technical advisory committee representing public and independent postsecondary education, the Legislative Analyst's Office, the Department of Finance, and other state agencies furnishes advice on the design and feasibility of information systems development.

In addition, the staff works closely with the National Center for Higher Education Management Systems and the Western Interstate Commission for Higher Education; California is one of five pilot states in a three-year project to develop information bases at the state level which are compatible nationally. *In the budget year, this unit will initiate an electronic data processing system which will provide increased storage, collection and retrieval capacity for information gathered by the Commission.*

Authority

Education Code Section 22712, specifically Section 22712.14.

Totals, Information Systems.....	3	7	9	\$90,588	\$181,474	\$337,995

II. COORDINATION AND REVIEW

Program Objectives and Description

This unit has the primary responsibility of reviewing and reacting to segmental and institutional plans for new programs, institutions, campuses and other facilities, and programmatic budget requests. The review is based on policies, criteria, and standards which the commission has adopted. Facility, budget, and program reviews are conducted in a manner that (1) provides coordination among interrelated elements, (2) prevents wasteful duplication, and (3) provides an efficient way to transmit state and federal support for programs and facilities.

The staff has undertaken development of criteria for state support of new and existing programs. It also is responsible to the Legislature and the Governor for special studies and projects related to coordination and review.

Authority

Education Code Sections 22710, 22711, and 22713.

CALIFORNIA POSTSECONDARY EDUCATION COMMISSION—Continued

III. PLANNING AND SPECIAL PROJECTS

Program Objectives and Description

The commission is required to prepare a five-year state plan making the most effective use of resources in providing opportunities for postsecondary education. The plan must be brought up to date annually. The planning unit, guided by long-term goals established by the commission, alerts the commission to problems affecting the plan, proposes solutions or alternatives to those problems within the boundaries of available resources, and works with the segments in their planning efforts. From these activities, the five-year plan is developed and kept up to date.

The unit also is responsible for integration of the long-range plans of the segments, after review and recommendation by the coordination unit. During the first years, the staff will work with the public segments (University of California, California State University and Colleges, and California Community Colleges) so that all plans will be in a format compatible with the commission's planning data needs.

A second major function of the planning unit is to conduct and/or monitor special studies requested by the Legislature. In the current year, the Commission is expected to complete special studies on: community college student flow, financial conditions of independent institutions, E.O.P. programs, the need for health science trained professionals, community service fellowships, engineering curricula and intercollegiate athletics. *One man-year of temporary help has been added in the current year to accomplish the community service fellowships and intercollegiate athletics studies.*

Authority

Education Code, Sections 22710, 22711, 22712, 22713; ACR 159/73.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program costs.....	7.9	8	8	\$209,710	\$257,726	\$262,693
Special projects.....	1.3	3	—	59,526	253,487	—
Totals	9.2	11	8	\$269,236	\$511,213	\$262,693

IV. FEDERAL PROGRAMS

Program Objectives and Description

The commission serves as the administrative agency under several titles of the 1972 amendments to the federal Higher Education Act of 1965. Federal programs not closely related to planning, coordination, or information are administered by this unit. This involves development of a state plan for expenditure of federal funds, review of proposals for funding, and monitoring of funded projects.

Two programs are currently assigned to the unit. Title I, Community Service, emphasizes the development of strong, cooperative relationships among institutions of postsecondary education, local community governments, and community groups, in the solution of pressing community problems. Special consideration is given to programs that incorporate the resources of several institutions into a regional consortium. Title VI-A, Instructional Equipment, provides federal funds to postsecondary institutions for the acquisition of classroom and laboratory equipment in order to improve the quality of instruction in selected areas. Federal funds are available for administration of both programs. One-third state matching is required for Title I.

In addition, Education Code Section 22752 designates the commission as the federal "1202 Commission" for California in order to comply with the Federal requirement that one agency be designated to receive all planning funds. The commission receives federal funds, is responsible for planning and administering the Higher Education Facilities Act of 1965, and accepts other responsibilities required by the U.S. Office of Education. The staff also reviews proposals submitted by California institutions for Funds for the Improvement of Postsecondary Education provided by the U.S. Office of Education.

Authority

PL 89-329 Title I, Title VI-A, and Title VII; Education Code Section 22752.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program costs.....	1.9	10	10	\$976,181	\$1,002,675	\$1,002,675

V. EXECUTIVE

Program Objectives and Description

The Director provides leadership to the staff in the primary, long-range planning effort of the Commission. At the same time, at the direction of the Commission, he advises the Governor, the Legislature, and other State agencies concerning policies and funding for California postsecondary education, based on the work of staff in the several units. The Director also works with a statutory advisory committee composed of the chief executive officers of each of the public segments and the State Superintendent of Instruction (or their designees) and other representatives of postsecondary segments, in reviewing Commission agenda items and associated documents. The Executive function includes liaison with the advisory committee and the segments, generally.

Authority

Education Code, Sections 22710, 22711, 22712, and 22713.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program costs.....	5.6	7	7	\$177,973	\$219,440	\$230,503

VI. STAFF SERVICES

Program Objectives and Description

Staff services is responsible for internal commission budget, personnel, commission agenda, preparation and distribution of reports, and general housekeeping functions. The commission contracts with the Department of General Services for accounting and personnel services.

In 1976-77, \$16,000 is provided for rent to allow renegotiation of the Commission's lease for office space when the present lease expires November 1, 1976.

Authority

Education Code, Sections 22710, 22711, 22712, and 22713.

CALIFORNIA POSTSECONDARY EDUCATION COMMISSION—*Continued*

VII. COMMISSION

Program Objectives and Description

The Commission has 23 members: two representatives each of the Regents of the University of California, Trustees of the California State University and Colleges, and the Board of Governors of the California Community Colleges; two representatives of the independent colleges and universities appointed by the Governor; the chairmen of the California Advisory Council on Vocational Education and Technical Training and the Council for Private Postsecondary Educational Institutions; the President of the State Board of Education or his designee; and twelve representatives of the general public. These twelve are appointed as follows: four by the Governor, four by the Senate Rules Committee, and four by the Speaker of the Assembly. The Commission selects its chairman from among the public members.

The budget provides for stipends of \$50 per member per meeting as authorized, together with necessary travel and expenses for Commission meetings. For 1976-77, an additional \$13,500 is proposed to carry out the provisions of Chapter 20, Statutes of 1975, which provides that Commissioners shall receive stipends for subcommittee meetings as well as regular Commission meetings.

Authority

Education Code, Sections 22710.5, 22711, 22712, and 22713.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program costs.....	-	-	-	\$49,693	\$57,504	\$71,004

VIII. WESTERN INTERSTATE COMMISSION FOR HIGHER EDUCATION

The Western Interstate Commission for Higher Education (WICHE) is a public, nonprofit agency established to coordinate and expand interstate and interinstitutional cooperative programs and to gather data for improving planning and management in postsecondary education. Thirteen states participate, with three commissioners from each, appointed by their governors for four-year terms. The main office of the commission's staff is located in Boulder, Colorado; there are also five regional offices. California's annual assessment since 1973 has been \$28,000. In addition, the Department of Health budget includes \$7,500 annually as a contribution to support the WICHE mental health program.

The commission has three divisions:

A. *The Division of General Services* includes a student exchange program in the health sciences, a four-state regional medical program, a program to encourage access to higher education by students from ethnic minorities, and continuing education programs in nursing and library science.

B. *The Division of Mental Health* was formed in 1956 at the request of the Western Regional Conference of the Council of State Governments. Major programs seek to improve mental health services on the campus and in the community. These include seminars in psychiatric education for general practitioners, and WICHE conferences to demonstrate methods for training personnel and developing mental health programs.

C. *The National Center for Higher Education Management Systems* was established to assemble and interpret data designed to improve higher education planning and management at the institutional, state, and national levels.

Authority

Education Code, Sections 31001-31008.

Program Requirements	1974-75	1975-76	1976-77
Western Interstate Commission for Higher Education	\$28,000	\$28,000	\$28,000
Mental health program ^a	(7,500)	(7,500)	(7,500)

^a Funds for this program are included in the appropriation for the Department of Health.

CALIFORNIA EDUCATIONAL FACILITIES AUTHORITY

The California Educational Facilities Authority issues revenue bonds to assist private higher education institutions in the expansion and construction of nonsectarian education facilities. Because of its ability to issue tax exempt bonds, the Authority provides lower-cost financing to private education institutions than those schools would be able to secure on the open market.

The law specifically provides that bonds issued shall not be a debt or liability or a pledge of the faith and credit nor the taxing power of the state or any of its political subdivisions. The full faith and credit of the participating institution will be pledged to the payment of bonds.

A total of \$150,000,000 of bonds was authorized by the Educational Facilities Act. As of November 1, 1975, bonds in the amount of \$51,340,000 have been sold as follows: 1) Stanford University (\$16,920,000); 2) University of the Pacific (\$7,520,000); 3) California Lutheran College (\$1,800,000); 4) San Francisco Conservatory of Music (\$1,200,000); 5) Santa Clara University (\$4,000,000); 6) Loyola Marymount University (\$1,150,000) and 7) University of Southern California (\$18,750,000).

This is a trust activity and involves no state revenues or expenditures. All expenses must be paid from revenues and other moneys available to the authority.

The California Educational Facilities Act is contained in Sections 30301 through 30337 of the Education Code.

UNIVERSITY OF CALIFORNIA

The University of California is the state university and the land-grant institution of the State of California. It was established by the Organic Act of 1868, and was written into the State Constitution of 1879 as a public trust, to be administered under the authority of an independnt governing board—the Regents of the University of California. Presently, the board of regents includes 24 members; 7 ex officio, 16 appointed by the Governor with the approval of the Senate for staggered terms, and 1 student appointed by the board.

The administrative structure of the university is headed by a president who is responsible for overall policy development, planning, and resource allocations. Chancellors have primary responsibility for the management of campus resource allocations as well as campus administrative activities.

The regents have delegated authority to the academic senate to determine conditions for admission (subject to constraints of the Master Plan for Higher Education), degree requirements, and approval of courses and curricula. Special faculty committees serve in an advisory capacity to the regents, the president, and the chancellors in a variety of matters.

There are nine university campuses. Eight of them offer undergraduate and graduate instruction and professional education; the ninth is a health sciences campus. As a departure from the traditional academic organization of the older campuses, the San Diego and Santa Cruz campuses are being developed on the "cluster college" principle.

A master plan for the development of higher education in California was enacted in 1960 and is referred to as the "Donahoe Higher Education Act." This act defines responsibilities of the three segments of public higher education, the University of California, the California State University and Colleges, and the community colleges. It states that the University of California will be the primary state-supported academic agency for research and that the university has exclusive jurisdiction in public higher education over instruction in the professions of law, medicine, dentistry, and veterinary medicine. Sole authority is also vested in the university to award doctoral degrees in all fields, except that joint doctoral degrees with the California State University and Colleges may be awarded.

The University of California is charged with conducting higher education programs in four major areas:

1. Instruction of able young people, by transmitting to them knowledge and skills and by helping them to experience with their teachers the processes of developing and testing new hypotheses and fresh interpretations of knowledge. The university offers lower division, upper division, graduate and postdoctoral programs on each of its general campuses.

2. Research directed toward advancing the understanding of arts and sciences and the interpretation of human history. The university provides faculty time and the essential libraries, laboratories, and other resources necessary to further faculty research which is intimately connected with teaching in the University—especially at the advanced graduate level.

3. Education for professional careers—education grounded in the understanding of relevant sciences and literature, and enlightened by experience in the methods by which the boundaries of knowledge are pushed back. Education for the professions is a tradional role of the university. It is a role that assumes added significance as each Californian depends more on the expert knowledge and personal integrity of professionals for a variety of specialized services.

4. Public service contributing to the fulfillment of the university's obligation to disseminate knowledge and bringing to faculty and students the stimulation of applying their knowledge and special skills to the problems of modern life. Because of rapid sociological and technological change, increasingly greater numbers of people return to the university to keep themselves abreast of such change.

In order to maximize its productivity the university is engaged in a comprehensive new initiative in university academic planning and policymaking. Its academic planning and program review board is the center of the university's academic planning activity. Composed of faculty, students, and administrative staff, the board is charged with developing the university academic plan and the corresponding resource requirements.

1976-77
SIGNIFICANT PROGRAM CHANGES

Program	Description	Dollars
I.	Enrollment related	\$3,636,080
I.	Advanced faculty for UCR/UCLA biomedical program	143,500
I.	Enrich Instructional Support	3,900,000
I. and VIII.	Increase instructional support and maintenance and operation of plant	5,000,000
IX.	Student financial aid, Educational Opportunity Program	275,000
XI.	Merit salary adjustments	10,195,382
XI.	General price increases	3,482,055
XI.	Utility price increases	4,334,000

HIGHLIGHTS OF PROGRAMS OR WORKLOAD CHANGES

An overall General Fund expenditure of \$644.3 million is proposed for 1976-77 including a salary increase of \$25.2 million. The operating budget for the 1976-77 fiscal year proposes a net General Fund increase of \$31.9 million over the current fiscal year. This provides for an increase of: (a) \$3.6 million for general campus and health science instruction related to a planned enrollment increase over the current planned level of 0.7 percent; (b) \$3.9 million for an improvement in the instructional support rates per FTE faculty; (c) \$5.0 million from the Capital Outlay Fund for Public Higher Education, available for 3 years, for the purposes of funding increases in instructional equipment replacement and an increase in maintenance of plant; (d) \$1.0 million for additional workload related to the operation and maintenance of plant; (e) \$21.6 million for fixed cost increases; (f) \$2.5 million to provide funds for operating the Orange County Medical Center as a University teaching hospital for a full 12-month period; (g) \$512,000 for support of the clinical education programs for the schools of dentistry and veterinary medicine; (h) \$3,667,000 for social security coordination and (i) \$1.6 million to fund the revised U.C. Retirement System actuarial assumptions.

In addition to the above increases, the budget proposes in 1976-77 a 50 percent (\$275,000) increase in the level of state support for the EOP program in addition to the funds made available as a result of the enactment of AB 2412 (Chapter 1017). As in the case of the legislation which initiated funding for this program, the Regents are required to provide equivalent matching funds from nonstate sources. *The 1976-77 budget, therefore, proposes a program level of \$1,650,000 for the EOP program of which \$825,000 are state funds. This augmentation reflects the Governor's concern for increasing services to disadvantaged students.*

Many programs are proposed for a continuance at generally the same level as 1975-76. Included is the Drew medical program at \$1.8 million, as authorized by Chapter 1140, Statutes of 1973; the podiatric medicine program at \$545,500, as authorized by Chapter 1497, Statutes of 1974; the medical education program at Berkeley for \$267,000; the undergraduate teaching excellence program at \$1 million; the deferred maintenance program at \$500,000; research on mosquito control at \$100,000; and aquaculture at \$334,000.

Personnel positions funded from all fund sources will increase by 315.99 FTE including 84.02 faculty. Faculty increases consist of 18.02 for the general campuses and 66 for the health sciences. Other changes are: general campus and health science instruction programs, 62.99 non-faculty positions; summer sessions, 2.00; University Extension, 1.57; public service, libraries 6.99; and operation and maintenance of plant, 37.50. The remaining positions are largely associated with the acquisition of Orange County Medical Center as a University Teaching Hospital.

Instruction Programs

General Campuses: The eight general campuses are budgeted to accommodate a planned enrollment increase of 0.3 percent or 315 full-time students over the planned enrollment for the current fiscal year. This yields a general fund increment of \$581,513 for 18.02 FTE faculty positions, 2.73 FTE teaching assistants, related support and employee benefits at the current, budgeted level. In addition, the budget proposes a \$3.7 million improvement in the instructional support rate resulting in a 4.7% increase (before distribution of price increase contained elsewhere in the budget) in the budgeted instructional support rate per FTE faculty changing it from \$11,053 to \$11,568 per FTE faculty.

Revised general campus enrollment projections for 1975-76 are estimated to total 109,938 FTE students, an increase of 3,266 FTE (3.1%) from the amount originally budgeted for 1975-76. Section 28.9 of the 1975 budget act permits the Director of Finance to authorize the accelerated expenditure of amounts budgeted for the University, provided the enrollments exceed original budget expectations by at least 2%. In order to accommodate the intent of Section 28.9, the 1975-76 budget has been augmented by \$1,853,000. This represents the amount necessary to fund enrollments which exceed

UNIVERSITY OF CALIFORNIA—Continued

a 2% increase. A deficiency appropriation will be requested to accommodate this overenrollment.

Health Sciences: Additional state funds totaling \$3.3 million have been included for 1976-77, including 66 FTE faculty and related support resulting from application of the University-approved student/faculty ratios for each health science school. Included in the general fund increase is a 15.9% enrichment in the budgeted instructional support per FTE faculty in the schools of nursing, a 4.6% enrichment in the budgeted instructional support rate for the UCSF school of dentistry, and a 15.3% enrichment in the budgeted instructional support rate for the UCLA school of public health.

UNIVERSITY OF CALIFORNIA—Continued

INSTRUCTION—GENERAL CAMPUSES

Program Objectives and Description

General Campus instruction includes most of the direct instructional resources associated with the schools and colleges located on the eight general campuses. These resources include faculty, teaching assistants, and various instructional support staff, supplies, and equipment needed to provide the breadth of courses and degree programs necessary to achieve the University's diverse instructional responsibilities. Included are classroom and laboratory instruction as well as joint scholarly research activities of students and faculty.

The Governor's Budget provides workload funding of \$581,513 to accommodate a planned enrollment increase of 315 FTE students, 0.3 percent, over the budgeted 1975-76 level. This increase will maintain the current, budgeted ratios of budgeted students to faculty and undergraduates to TA's. In addition, the budget provides for a 4.7 percent increase in the budgeted instructional support rate per FTE faculty to enable the University to meet its high priority needs in the areas of instructional equipment replacement and instructional computing. This latter increase amounting to approximately \$3.7 million for the general campuses will allow the University to substantially meet its needs in these areas. In addition, the budget provides, in the provisions for allocations account, \$5 million available for three years from the Capital Outlay Fund for Public Higher Education for the purposes of funding instructional equipment replacement and maintenance of plant.

^a Includes 3.35 faculty in the Sea Grant Program supported from Regents' Funds.

^b Includes all expenditures for employee benefits in general campus instruction.

^c Not available.

Health Sciences

The instructional program in the health sciences is carried on in 14 schools which provide education in various health fields to students preparing for careers in health care, teaching and research. The health science schools are located on six campuses and include five schools of medicine, two schools of dentistry, two schools of nursing, two schools of public health, one school of pharmacy, one school of veterinary medicine, and one school of optometry. In addition, three innovative programs in medical education are being developed in Berkeley, Fresno, and Riverside. The physical, biological, and behavioral science programs of the general campuses complement the programs of the health science schools. Professional students, interns, residents, fellows, practicing professionals, students in allied health and public health programs, and graduate academic students who will become teachers and researchers are participating in these programs.

Additional state funds totaling \$3.3 million are proposed for the health sciences to accommodate a planned enrollment increase of 464 FTE students over the budgeted 1975-76 level. Included in this increase are \$2.9 million in enrollment generated workload which includes 66 FTE faculty and related support, \$143,500 for advanced faculty funding for the UCR/UCLA biomedical program, and \$200,000 for enrichment of the budgeted instructional support rates per FTE faculty at the schools of nursing (15.9%), UCSF school of dentistry (4.6%), and the UCLA school of public health (15.3%).

Extended University

The Extended University of the University of California was an experimental program whose pilot phase extended through 1974-75. The program was initiated in 1972-73. Degree programs were offered to students qualified to engage in university studies, but who were effectively denied access because of university requirements with respect to part-time study, work obligations, finances, location, home responsibilities, and other reasons which prevent full-time residential study.

UNIVERSITY OF CALIFORNIA—Continued

Summer Sessions

University of California summer sessions are self-supporting instructional programs offering courses for both degree credit and in selected specialized programs. The summer programs provide a broad spectrum of instructional offerings. The specialized programs include intensive language courses conducted at several campuses which enable students to accelerate their progress toward degrees, and serve as refresher courses for new and continuing students and for language teachers. Programs in education are offered to improve instruction in California's schools and colleges; credits earned may be applied to California teaching credential. Courses tailored to meet the specific needs of midcareer professionals are also offered. The change from the six-week, two session format to one eight-week session at the Berkeley campus has resulted in a lower enrollment projection for 1975-76.

University Extension

University Extension is the largest institution of its kind—the nation's leading "noncampus university"—with an annual projected 1976-77 enrollment of 407,000 students participating in approximately 12,000 classes, short courses, seminars, field studies, and similar activities throughout every county in California and in several foreign lands. It has open admissions, optional credit, free student selection of curriculum, and because of the nature of its students, no generation gap. University Extension is a self-supporting enterprise and its offerings depend entirely on student and other user demand.

Program organization varies from campus to campus, depending on the size of the program and the characteristics of the campus. Normally, programs have a disciplinary orientation; for example, arts and humanities, business administration, dentistry, education, engineering, health sciences, medicine, nursing, physical sciences, social sciences, and urban affairs. Statewide programs are established when there are valid reasons (e.g., when a single university unit can more effectively and economically serve the entire state). The Continuing Education of the Bar program comprises about 80 percent of the enrollments in statewide programs.

Instructional Costs and Faculty Productivity

Tables 1 and 2 present a display of instructional cost and student credit units per faculty. The cost data reflect all State general funded costs of instruction including a pro rata share of libraries, maintenance of plant and other institutional services. Total faculty costs have been included as a component of instructional program expenditures. Unit costs by level are derived from annualized fall quarter contact hours. Table 1 displays unit costs data for all four levels of students and reveals a significant difference in cost per unit of credit between levels. Table 2 displays student credit units per faculty according to the three levels of instruction and provides cost at each level. Interpretations of these data are only meaningful in the context of a full understanding of the differentiation of function among segments of public higher education in California and the resulting differences in educational approaches.

II. RESEARCH

Program Objectives and Description

The University is designated by the Donahoe Act as "... the primary state-supported academic agency for research." Its research activities contribute to the social, economic, and technological progress of the state and the nation. More specifically, the university, through the application of mission-oriented research toward the solution of complex problems facing society, enables man to control his environment more effectively. In addition, the research process is essential to the training of scholars in the methodology of inquiry and the nature of the creative scholarly process, especially in the advanced graduate and professional instructional programs. State general funds support for organized research will be provided in 1976-77 at the current level. Price increase funds are included in provisions for allocation and program maintenance.

State restricted funds for organized research will be reduced by \$200,000 in 1976-77. The present \$510,000 appropriation to the Institute of Traffic and Transportation Engineering from the State Transportation and Research account will be reduced by the amount of the \$200,000 allocation from Chapter 1130, Statutes of 1975. The intent of this statute was to redirect the efforts of the University. This will reduce the Institute's total funding from \$710,000 in 1975-76 to \$510,000 in 1976-77. Also proposed for reduction in the budget year is a \$192,000 appropriation from the Real Estate Education, Research and Recovery Fund. The \$192,000 will be appropriated to Real Estate and the University may apply for an allocation of funds from the Real Estate Commissioner.

III. PUBLIC SERVICE

Program Objectives and Description

Activities funded within this function are campus public service, cooperative extension, the Charles R. Drew Postgraduate Medical School, and the California College of Podiatric Medicine program being developed in conjunction with the UC San Francisco School of Medicine.

Included within the campus public service category are arts and lectures and a number of other programs such as professional publications, services to industry, and community service projects. The majority of programs are financed from user fees, general funds support, professional publications, C. R. Drew, and California College of Podiatric Medicine.

Cooperative extension, previously known as agricultural extension, provides information and services to the public, particularly farmers, homemakers, youth, agriculture-related industries, and all types of private and governmental institutions. The purpose is to solve specific, often local, problems through the application of research results generated by cooperative extension or other university units.

In 1975-76, \$1.7 million was appropriated to the University for the support of a program of clinical health sciences education, research, and public service at the Charles R. Drew Postgraduate Medical School, to be conducted with UCLA. Programs which were specified by the act to provide the greatest public benefits are: (1) continuing education of physicians and other health professionals and consumers of health sciences, (2) community medicine, designed to improve the health status of the citizenry, the health care delivery system and health sciences education, (3) internship and residencies, including a family practice residency program at the Martin Luther King Hospital and other appropriate facilities and clinics, and (4) such other programs of clinical health sciences education, research, and public service as the regents and the Charles R. Drew Postgraduate Medical School deem in the public interest, provided that the above specified programs are first funded. State funding was originally authorized by the Legislature in 1973 (Chapter 1140/23-SB 1026). Funds are included for price increase in 1976-77 to continue the program at the 1975-76 level of operation.

Chapter 1497/74 appropriated \$541,000 for the support of an educational program in podiatry to be operated in conjunction with the California College of Podiatric Medicine in San Francisco. Funds are included for price increase in 1976-77 to continue the program at the 1975-76 level of operation.

IV. ACADEMIC SUPPORT—LIBRARIES

Program Objectives and Description

The university libraries provide ready access to books, documents, and other scholarly materials for the university's student, faculty, staff, and faculty from other California colleges and universities. In addition, the libraries may grant borrowing privileges to any California adult. University libraries serve both instructional and research needs and thus must be diverse in nature and maintain comprehensive information about man's knowledge. The rapid expansion of knowledge requires an intensive effort to keep library materials current.

For reference-circulation activities, 6.92 staff positions are provided to accommodate the 315 FTE enrollment increase recognized for 1976-77; \$34,200 will provide for 1,000 additional volumes for the Riverside-Los Angeles Biomedical program.

Other

Program Objectives and Descriptions

General Campus Programs: Other academic support on the general campuses is comprised of a number of partially self-supporting activities organized and operated in connection with educational departments and conducted as a basic support for the departments' educational programs. These supporting services contribute greatly to the quality and effectiveness of the instructional programs.

Many diversified programs are included, the largest being the demonstration schools (university elementary school, nursery schools, and a psychology clinic school) which serve as interdepartmental teaching laboratories for experimentation, research and teacher training. These programs receive part of their support from general funds. The demonstration schools not only educate hundreds of children, but contribute to the advancement of education through research efforts and application of results; through development of new programs of teacher education, and dissemination of new knowledge to public schools.

Other activities include vivaria, which provide centralized facilities for ordering, receiving and care of all animals necessary for teaching and research in the biological sciences; support for arts by direct sponsorship of performances and exhibits and funding for galleries and museums; support of specialized physical science and engineering projects which are of service to academic departments and to industry, support for intercollegiate athletics at the smaller campuses.

Ancillary Support—Health Sciences: In addition to human medicine teaching hospitals, the university operates the dental clinics and neuropsychiatric institutes at UCLA and UCSF, a veterinary medicine teaching facility at UCD, and an optometry clinic at UCB. These facilities are extensions of the health sciences schools, and provide clinical experience essential to the educational process.

Dental Clinics: The School of Dentistry and its related clinic activities at San Francisco have been an integral part of the university since 1881; the UCLA dental clinic was opened in 1967. The mission of both clinics is to serve as teaching laboratories where university dental students gain essential clinical experience practicing in tandem with technician trainees under the direction of licensed faculty dentists. The clinics are funded by the state and by income from patients. In the budget year, an additional \$830,000 is provided from a combination of state general funds and patient income. \$125,000 is provided from patient revenues to allow for price, range and merit salary adjustments on the restricted fund portion of the budget. From the remaining combined funds, \$600,000 is provided to eliminate an anticipated deficit and \$105,000 is provided to allow additional patient sittings for the clinical curriculum.

UNIVERSITY OF CALIFORNIA—Continued

Veterinary Medical Teaching Facility: The Veterinary Medical Clinical Teaching Facility (VMCTF) is a specialized laboratory of the UCD School of Veterinary Medicine and provides for clinical teaching needs relating to the diagnosis, treatment, prevention and control of disease of animals. Programs are carried out at the VMCTF, and other locations such as the UCD campus vivaria and primate center, on ranches and in other off-campus locations. Part of the budget is derived from fees for services rendered, and part from State support. An increase of \$270,000 is provided in 1976-77 to be financed by a combination of state general fund and patient income. This increase recognizes increased clinical requirements of a new curriculum which provides greater and earlier exposure of the student to the clinical environment. \$220,000 of the increase addresses a deficit created by the increased clinical need and \$50,000 provides for program enrichment.

Neuropsychiatric Institutes: The neuropsychiatric institutes at San Francisco and Los Angeles are the state's largest resources for psychiatric residents and a major training resource for social workers and related mental health professionals. They were transferred from the State Department of Health on July 1, 1973. An additional \$628,000 is provided in 1976-77 to be financed from increased patient income. This increase is provided for a new integrated four-year residence program (\$262,000), to finance increased malpractice insurance (\$163,000) and to reduce the budgetary savings target (\$203,000) in line with the rest of the University.

V. TEACHING HOSPITALS**Program Objectives and Description**

The University operates four human medicine teaching hospitals for the clinical training of its health sciences students: Davis-Sacramento, Los Angeles, San Diego, and San Francisco. The 1976-77 budget provides for University operation of the Orange County Medical Center for the entire 1976-77 fiscal year. This facility is the primary clinical training center for the Irvine medical school. Through other clinical affiliations with the Veterans Administration, county hospitals, and private and community hospitals, UC students are exposed to the full range of primary, secondary, and tertiary care and diagnostic and therapeutic techniques.

State support of \$2,472,240, of which \$1.4 million is for clinical teaching support, is provided for the first full year of operation of the Orange County Medical Center as a University activity. Total operating budgets at the five hospitals will increase by more than \$34 million to \$274 million in 1976-77.

VI. STUDENT SERVICES

Program Objectives and Description

The student services program includes six elements: student admissions and records, cultural and social activities, counseling and career guidance, financial aid administration, student health services, and supplemental educational services.

No increase in state funds is proposed for 1976-77 except for price increase and merit salary adjustments carried elsewhere in the budget.

VII. INSTITUTIONAL SUPPORT

Program Objectives and Descriptions

Activities funded within this function include planning, policymaking, and coordination within the offices of the chancellors, president and the offices of the regents. Also included for funding are a wide variety of supporting activities such as police, accounting, payroll, personnel, materials management, publications, and federal program administration, as well as self-supporting services such as telephones, storehouses, garages, and equipment pools. No increase in State funds is proposed for 1976-77, except for price increase and merit salary adjustments.

VIII. OPERATION AND MAINTENANCE OF PLANT

Program Objectives and Description

This function includes resources for the maintenance and preservation of the university's physical plant which comprises 32 million square feet of building and related equipment with a current replacement value of \$2.2 billion. Major component elements include utilities and refuse disposal, custodial and grounds maintenance, structural and equipment maintenance, plant administration, and fire departments on two campuses.

The State General Fund increase shown in this program (\$1,026,528) provides for selected workload associated with the addition of new building areas to the University inventory. The budget also provides, in provisions for allocation, \$5.0 million from the Capital Outlay Fund for Public Higher Education for maintenance of plant and instructional equipment replacement. These funds are available for 3 years and are unspecified between the two areas for which they are provided in order to provide as much flexibility as possible.

IX. STUDENT FINANCIAL AID

Program Objectives and Description

The University of California provides numerous financial aid opportunities for undergraduate and graduate students with financial need. During 1974-75, it is estimated that 38,500 students received assistance from one or more financial aid programs which are administered by the university, at a total cost of more than \$58 million. The major sources of income for University-administered programs include student fees, Federal funds, and Regents' sources, including private gifts and scholarships and loan funds. Nearly all of the funds are from non-State sources.

In addition to the University's budgeted financial aid programs, students have alternative sources of assistance. The Federal government insures bank loans (the Federally Insured Student Loan Program-FISL), provides veterans benefits, and makes grants from the new Basic Educational Opportunity Grant Program (BEOG). In addition, graduate students receive traineeships and fellowships from numerous Federal programs, and the California State Scholarship and Loan Commission provides scholarships and grants directly to students.

In September 1975, the Legislature passed and the Governor signed AB 2412 (Chapter 1017) which provided \$1.1 million for 1975-76 and 1976-77 to increase the University EOP program. \$550,000 of the available State Funds were to be expended in each year. The measure requires that the University provide matching funds.

The Governor's Budget proposes in 1976-77 a 50 percent (\$275,000) increase in the level of state support for the EOP program in addition to the funds made available as a result of the enactment of AB 2412 (Chapter 1017). As in the case of the legislation which initiated funding for this program, the Regents are required to provide equivalent matching funds from nonstate sources. The 1976-77 budget, therefore, proposes a program level of \$1,650,000 for the EOP program of which \$825,000 are state funds. This augmentation reflects the Governor's concern for increasing services to disadvantaged students.

X. AUXILIARY ENTERPRISES

Program Objectives and Description

Auxiliary enterprises are those noninstructional services provided to individuals, primarily students, in return for specific user charges. The organizational units providing these services, which include student housing, parking, intercollegiate athletics, food service, and various others, are largely self-supporting.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

XI. PROVISIONS FOR ALLOCATION

Program Objections and Description

These budgetary provisions serve as a temporary repository for bulk appropriations which are destined for allocation (1) from universitywide provisions to campus provision, and (2) from campus provisions to operating programs and subprograms where expenditures will occur. The major provisions for allocation include funds for 1975-76 salary merit increases and promotions, salary range adjustments, academic position upgradings, staff reclassifications, price increases, deferred maintenance, and unallocated endowment income. Also included are negative appropriations reflecting the university's assigned budgetary savings target. In 1976-77, \$5 million under restricted funds is proposed from the Capital Outlay Fund for Public Higher Education, available for 3 years, for the purposes of funding instructional equipment replacement and maintenance of plant. It is anticipated that \$3.5 million will be expended in 1976-77. The 1976-77 increases for the fixed cost items are included in the "program maintenance, fixed costs, economic factors" section.

XII. PROGRAM MAINTENANCE: FIXED COSTS AND ECONOMIC FACTORS

Program Objectives and Description

The elements of program maintenance—fixed costs and economic factors includes funds for merit increases for eligible academic and staff, price increase allowances for utilities, library purchases, supplies, equipment and other non-salary items, necessary shifts in utility consumption from gas to oil, and malpractice insurance increases to fund the continuation costs of a 1975-76 deficit in the State's share, plus full-year costs related to the Orange County Medical Center. A total increase of \$21.6 million is proposed for these purposes.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

Malpractice insurance	—	—	2,923,000

UNIVERSITY OF CALIFORNIA—Continued

XIII. SPECIAL REGENTS' PROGRAMS

Expenditures for Special Regents' Programs for 1976-77 will total \$23.1 million, an increase of \$1.5 million over 1975-76. These programs are financed from Regents' Restricted Funds.

Student Aid: The primary Special Regents' Program is the multi-million dollar Student Aid Program. These funds, in conjunction with Student Aid Programs funded from Educational Fee income, have been used to bring the University within the reach of more students who would otherwise not be able to attend. The allocation for Student Aid is especially important as costs to students at the University have sharply increased over the past few years. Student Aid consists of scholarships, fellowships, grants-in-aid, loans, and work-study employment; it is provided to both undergraduate and graduate students. An increase of \$900,000 is proposed for 1976-77 to mitigate the effects of inflation on students' budgets.

Given the uncertainties of Legislation introduced in Congress and in the Legislature, it is proposed that the \$900,000 increment for 1976-77 be provided in the form of a Student Aid Contingency Reserve which later can be allocated to assure the most equitable distribution of limited funds.

INSTRUCTION

Instructional Improvement Program: In 1975-76, the Regents provided funds for Teaching Improvement (\$300,000, Special Regents' programs), Innovative Projects (\$400,000, Special Regents' Programs) and Teaching Excellence (\$300,000, Educational Fee Income). These three programs are being consolidated into one Instructional Improvement Program to enhance coordination.

In addition to Regents' Funds, \$1 million has been provided by the State for 1976-77 to improve undergraduate instruction. Programs provide grants to faculty to encourage the identification and development of new instructional techniques and experimental approaches to instruction. Funds provide for the development of instructional methods and materials and for experimentation with special teaching equipment, as well as for further development of computer-aided instruction, visual aids, and use of educational television. The grants are not intended to provide long-term support for a project or for the application of its results.

Education Abroad Program: The objectives of the Education Abroad Program are to foster students' communication skills, cultural enrichment, and understanding of the modern world in addition to furthering the students' academic progress. The Education Abroad Program enables students to benefit from involvement in a different culture at 13 University-affiliated centers in 12 foreign countries. Support for the program is provided by State and University funds and by regular student fees. The bulk of the funds is allocated to honor reciprocity agreements with host institutions; students pay the costs of transportation, housing, and normal living expenses. It is proposed that the program be continued at the 1975-76 level of \$411,000.

Ethnic Studies Programs: Ethnic Studies Programs have provided minority students with an opportunity to attain a better appreciation of their cultural heritage. Campuses have used the funds to accelerate and expand curriculum offerings by providing basic support for research and community activities, and by assisting in the review of library resources and needs related to Ethnic Studies. An increase of \$26,000 is proposed to meet program needs and an increase of \$50,000 is proposed for 1976-77 in salary range increments, merits and employee benefits for those positions supported on Regents' Funds.

Research and Public Service

Regents' Faculty Fellowships: Regents' Faculty Fellowships are used in several ways: for Summer Faculty Fellowships, for junior faculty members whose usefulness to the University is significantly increased by a summer devoted exclusively to scholarly work, and for fellowships providing summer support or sabbatical leave supplements to aid the creative or scholarly efforts of faculty members in the arts and humanities. It is proposed that the program be continued at the 1975-76 level of \$451,600.

Regents' Research Programs: Since 1970, the Regents have supported a research program designed to support the highest priority projects not already funded from other sources. Built into the program is \$125,000 for 1976-77 salary and related increments.

University's Council on Energy and Resources: This program designed to enhance the use of university research results by the public will be funded by \$50,000 in Regents' Funds.

Program to Improve the Dissemination of Research Results: The University is proposing to discontinue this program in 1976-77.

Community Teaching Fellowship Program: This program is designed to enable graduate students in mathematics to teach mathematical concepts to educationally disadvantaged children in elementary schools. The program has provided the side benefit of financial support for minority students, and has also served as a model for more effective training of prospective elementary school teachers. A \$5,000 increment is proposed for 1976-77 to provide increases in staff salaries and support.

Lawrence Hall of Science: This facility is used as a laboratory to upgrade the teaching of elementary, secondary, and college science courses. Experimental classes are conducted, and the staff assists school districts in planning and maintaining modern science facilities. The Regents' subsidy comprises a small part of the total funds needed to support the Lawrence Hall of Science programs. It is proposed that the \$300,000 budgeted for 1975-76 be continued in 1976-77.

Isla Vista: This is a continuing program of University involvement in community services which affect the large number of University students who reside in Isla Vista. It is proposed that the \$94,100 provided in 1975-76 be continued in 1976-77 to implement improvements recommended by the Commission on Isla Vista for the following types of activities: a governmental entity capable of providing essential community services through its own funding mechanism, medical and counseling services, planning and physical improvement, an annual community survey, and an Isla Vista Affairs Office.

Support Program

Inter-campus Exchange Program: The judicious sharing of certain resources among the campuses, including library materials and research facilities for faculty and graduate students, means that each campus does not have to provide full and duplicative services. Major activities supported include: faculty and graduate student research, the inter-campus library and bus service, student and faculty art and cultural exchanges, inter-campus student activities, and inter-campus conferences on teaching and research. Expenditures of \$699,800 are proposed for 1976-77, representing a \$103,000 increase over 1975-76 to reflect increases in salaries and employee benefits and, particularly, sharply rising transportation costs.

Gifts and Endowments: The Gifts and Endowments programs on seven campuses (excluding Berkeley and Los Angeles) have been funded since the mid-1960's from a combination of various Regents' Funds. Gifts and Endowments expenditures currently supported by other Regents' Funds have been transferred to the University Opportunity Fund beginning in 1975-76. A total of \$346,000 is required to continue the 1975-76 program adjusted for 1976-77 salary levels.

Alumni and Development: It is proposed that \$321,000 be allocated in 1976-77 to finance the second two years of a ten-year plan for developing a computer-assisted alumni and development information system. This system establishes a standard data format and coding system for gift reporting, and uses the existing alumni and development data processing system at the Los Angeles campus as a common system. Campuses other than Berkeley will phase into the Los Angeles system during the course of the ten-year plan on a scheduled basis as their alumni and development activities warrant the level of sophistication it offers.

In 1972, the Regents encouraged development of strong alumni programs on the Irvine, San Diego, and Santa Cruz campuses. To sustain the momentum of the growing alumni programs on these campuses, salary support in the form of a one-time allocation (\$245,000) for the three-year period, from July, 1975, through June, 1978, is provided in 1975-76.

Correction of Seismic and Fire Hazards: It is proposed that the \$2 million allocated for 1975-76 be continued in 1976-77 for the President to allocated as required for life safety projects. These projects consist primarily of seismic deficiency corrections and secondarily, of fire detection and prevention systems in University structures not eligible for State support.

UNIVERSITY OF CALIFORNIA—Continued

Deferred Maintenance: It is proposed that the \$500,000 of University Opportunity Funds allocated for this program in 1975-76 be continued in 1976-77 to qualify for one-to-one matching funds from the State. These University funds, together with matching State funds, are allocated by the President for completion of the highest priority projects on each campus' deferred maintenance backlog inventory.

Management Studies: An allocation of \$75,000 is included for the President to allocate on an ad hoc basis to study particular problem areas that cannot be resolved within departmental resources. These studies (e.g., salary administration, manpower, and expenditure standards) may require additional temporary staffing, supplies and expense, computer time, and outside consultants.

Teaching Assistant Loans: It is proposed that \$200,000 be provided for short-term loans for teaching assistants (and for those in similar positions) to ease financial hardships during the period of initial employment to receipt of the first paycheck.

Data Processing: The Information Systems Division (ISD) is responsible for developing and operating data processing systems for administrative functions of all campuses and of Systemwide Administration (except for hospitals, libraries, and the major ERDA laboratories). The 1975-76 support for this activity (\$788,000) is proposed to continue in 1976-77.

Data System for Instructional Resources: Development of a new and improved information system on classes, courses, and facilities was undertaken in 1971 and became operative in 1973. The level of quality which is demanded for data generated by the new system has substantially increased workload for both the campuses and Systemwide Administration. The \$250,000 provided for 1975-76 workload is proposed to continue in 1976-77.

Provisions for Contingencies: The President's Provisions for Contingencies total \$750,000; \$500,000 will be distributed among the nine Chancellors. These funds permit each Chancellor and the President to identify his immediate needs and to allocate funds in the context of overall priorities.

Sub-Total.....	1,679.00	238.00	16.00
Adjunct and In-Residence Faculty	100.00	341.00	424.00
Total.....	1,779.00	579.00	440.00

¹ The following faculty and fund source groups are non-comparable due to academic and fund source restrictions and limitations.
² Budgeted faculty requirements are determined in accordance with approved student/faculty ratios.
³ Extramural faculty support is temporary in character. Many faculty supported from extramural funds (e.g., Federal training grant funds), are restricted to instructing specific types of students in specific programs and, thus, are non-comparable to budgeted faculty.
⁴ Faculty supported from non-University fund sources (e.g., Veterans Administration) devote substantially less time to instruction than is required of faculty supported from budgeted or extramural funds due to primary patient care responsibilities imposed under their basic (non-University) employment relationships.

GENERAL ANALYSIS

The 1976-77 budget for the general campuses is designed to make existing and funded facilities operable; to alter, renovate and/or remodel existing facilities to accommodate new and innovating teaching techniques; to permit more effective use of existing space; to provide for changes in student mix and fluctuations in enrollments among disciplines; and to correct the most critical code and environmental deficiencies.

Health sciences bond funds will provide facilities which will permit increasing outputs of health sciences professionals within the capability of the \$155.9 million in construction bond funding authorized in 1972, supplemented by assured Federal matching grants. Supplemental funds will be required over the next several years in recognition of essential life safety requirements not contemplated in the original bond issue.

Objectives

The University of California is a statewide institution of higher education with the following major functions:

1. Instruction

- Broadly based instruction leading to the baccalaureate degrees,
- Graduate programs leading to master's degrees and doctoral degrees, and programs of postdoctoral instruction,
- Instruction in professional fields,
- Programs for the preparation of teachers, and
- Joint doctoral programs with the state colleges.

2. Research

The University is designated by the master Plan for Higher Education in California as the primary state-supported academic agency for research, both basic and applied, and as the primary public repository for scarce documents and other unique library resources needed for the doctor's degree and for research programs.

3. Public Service

Provide public service in areas related to the university's programs of instruction and research.

For the list of standard (lettered) footnotes, see the end of Capital Outlay section of the budget.

MAJOR PROJECTS			
Life sciences, unit 3—complete equipping life sciences unit 3, a six-story laboratory building	—	\$500,000 ^{3 E}	\$470,000 ^{E g}
Powell library—life safety and rehabilitation—improve earthquake resistance, make other safety improvements, and improve the utility of the building	—	48,000 ^{g W}	—
Central control system—adapt building air conditioning systems to the central control system in various buildings	—	—	70,000 ^{W g}
Site development, 1976-77—complete the south portion of the court of sciences.....	—	—	185,000 ^{W C g}
Relocation of baseball facility.....	—	—	310,000 ^{1 C}
Utilities and site development, 1976-77	—	—	1,247,000 ^{1 P W C}
Bikeways, step 1	—	—	440,000 ^{1 P W C}
Parking structure—Westwood Plaza south.....	—	—	115,000 ^{1 P W}
Ackerman union A—level remodeling and expansion.....	—	—	549,000 ^{1 C E}
	—	—	200,000 ^{1 C}
Kinsey Hall—life safety and rehabilitation	\$545,000 ^{h P W C}	—	—
Campus storehouse building renovations	999,000 ^{3 W C}	—	—
Utilities, 1975-76	—	240,000 ^{3 C}	—
Faculty center addition	—	367,000 ^{2 P W C}	—
	—	183,000 ^{1 P W C}	—
Ackerman union student store expansion	1,500,000 ^{1 P W C E}	—	—
James E. West alumni and development center	2,043,000 ^{1 P W C E}	—	—
North campus student facility	1,200,000 ^{1 P W C E}	—	—
Placement and career planning center	810,000 ^{1 P W C E}	—	—
Swimming pool expansion, sunset canyon recreation area	315,000 ^{1 P W C}	—	—
Exterior safety lighting	200,000 ^{g W C}	—	—
	295,000 ^{g P W C}	—	—
Heating plant fuel storage.....	—295,000 ^{g P W C}	—	—
	321,000 ^{3 W C}	—	—
Service yard expansion	27,000 ^{3 E}	—	—
Totals, Major Projects	\$7,960,000	1,338,000	\$3,586,000
TOTALS, EXPENDITURES, CAPITAL OUTLAY	\$7,960,000	\$1,338,000	\$3,586,000

HASTINGS COLLEGE OF LAW

University of California

The law school was founded in 1878 by Serranus Clinton Hastings, the first Chief Justice of the Supreme Court of the State of California. On March 26, 1878, the Legislature provided for affiliation with the University of California. The college board of directors has the primary responsibility through its executive officers, for the administration of all affairs of the institution. The Chief Justice of the Supreme Court of the State of California is president of the board of directors, which is composed of eight members. The juris doctor degree is granted to the graduate of Hastings College of Law by the faculty of the University of California and signed by the President of the University.

The overall objectives of the college are: 1. To provide students a top quality education so that they will become experts in the field of law, and thus be able to achieve a high level of professional competency. 2. To provide the legal profession with promising young men and women who can meet the needs of an increasingly interrelated and interdependent society. 3. To ensure that its graduates are sensitive to the problems of the administration of justice, have an appreciation of the technological-social-economic context in which legal institutions are shaped, and understand the responsibilities of the law as a means of deliberate change.

To accomplish the objective of providing a top quality education, the college has adopted a faculty recruitment policy which has resulted in the acquiring of a distinguished group of senior professors known as the "Sixty-five Club". Since 1940, the college has deliberately sought out members of other prestigious law school faculties who, after achieving national reputation as legal scholars and teachers, have reached the customary retirement age. These men have brought the advantage of a broad perspective of experience in their chosen field, and the instructional skills unmatched by any law school in the nation. In addition, adjunct faculty (comprised of outstanding legal specialists in specific fields of practice in the San Francisco Bay area), administrative faculty (dean, vice dean and registrar, associate dean, assistant dean—student affairs, director of clinical programs, director of legal research and writing, and law librarian) and other regular faculty under the age 65 provide instruction to Hastings students. In 1976-77 it is planned to continue the enrollment level of 1,500 students.

SIGNIFICANT PROGRAM CHANGES

Program	Description	Dollars
I.	Add 1 faculty position	\$29,030
III.	Increase legal educational opportunity program for aid to disadvantaged students	74,903
IV.	Add 1 personnel officer	20,600
IV.	Add 2 deferred maintenance projects	37,600
IV.	Add 1 minor capital outlay project	50,000

SUMMARY OF PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77

General Fund	2,684,019	3,172,810	3,556,773
Federal funds ^a	357,968	606,830	606,830
Personnel man-years	158.5	170.7	173.2
Student Enrollment:			
Regular students	1,502	1,528	1,500
Summer session	250	275	268
Gross cost per student ^b	\$2,580	\$2,873	\$3,165
Net General Fund cost per student	\$1,787	\$2,076	\$2,371
Number of graduates	482	505	495

^a Federal funds and expenditures therefrom are not included in overall budget totals.

^b After deduction of expenditures for summer session and federal funds.

I. INSTRUCTION PROGRAM

Program Objectives and Description

The principal objectives are:

1. Develop in the students the required competency in substantive law demanded by the legal profession.
2. Develop students' skills in research and writing.
3. Provide students with an adequate background in the law through the study of comparative law, legal history and jurisprudence.
4. Instill in students through theory-practice clinical courses, a level of professional competence and skill that will shorten the period of training in the law office.
5. Develop special skills in advocacy for trial lawyers.

The instruction program is designed to provide thorough and systematic instruction in those branches of the law which will best prepare students for their responsibilities to the community as members of the legal profession. It is composed of three elements including the classroom, theory practice, and Trial and Appellate Advocacy. Through these elements, it is planned that the student will receive a combination of theoretical instruction, practical experience, and specialized training as trial lawyers.

a. Classroom

In this element, students receive top quality instruction in classroom seminar, lecture and discussion sessions which are conducted by a professionally qualified group of regular faculty members supplemented by an adjunct faculty comprised of outstanding legal specialists in special fields of practice. Legal research and writing is a special seminar program calling for intensive training in advance techniques of legal research and writing including drafting of documents, legislation, and briefing.

The budget proposes the addition of 2 positions and related expenses in the classroom element. These are: 1 faculty position to accommodate a curriculum change which requires all third year students to undertake either an independent research project or special seminar, and 1 clerk-typist position for audio-visual workload.

Administrative faculty.....	—	1	1			
Staff	9.2	10	11			
Student assistants.....	2.3	3	3			

b. Theory-Practice

In this element, students receive training and insights in the skills of courtroom and office practice. This includes practical experience in preparation and conduct of trials including brief and oral arguments before the court. The experience assists the students in achieving proficiency in preparation and trial of civil cases, appellate procedures and legal medicine. The following activities are examples of this involvement:

1. All second-year students, except those eligible and who elect to work on the Hastings Law Journal or the Constitutional Law Quarterly are required to participate in the largest and most comprehensive moot court experience in the country. The course is operated under supervision of the Director of Moot Court with the assistance of a student moot court board. This board selects and edits cases involving controversial issues which are assigned to the students. Two students, working as a team, brief and argue their assigned case. Oral presentation of argument is held and prominent members of the judiciary, practicing attorneys and selected students serve as judges.
2. A substantial number of students elect the trial practice course where the emphasis is on demonstrative evidence, jury selection, opening statements, examination of witnesses, or direct cross-examination and argument.
3. Third-year students who have achieved a cumulative average of at least 74 percent for two years are permitted to enroll in the legal clinic seminar for firsthand experience with actual cases, interviewing clients, gathering facts, interviewing witnesses and preparing the case for trial. This is done through a volunteer-participation program including legal aid, public defender's office, district attorneys, private attorneys, and many others.

Expenditures.....	3.2	4	4	\$70,015	\$101,941	\$102,329

II. INSTRUCTIONAL SUPPORT PROGRAM

Program Objectives and Description

The principal objectives are:

1. Provide reference material so that students and faculty members can prepare for various aspects in the learning and teaching of law.
 2. Provide students and faculty members with a current publication of recent developments in the changing laws.
- Students and faculty members need reference material for various preparations and presentations in the legal education process and need to be kept informed of current developments in the changing aspects of the law. The instructional support program is composed of the library and scholarly publications elements and ensures that student and faculty members will have the use of reference material and will be kept informed, with members of the bench and bar, of current developments through the preparation and publication of the scholarly publications.

b. Scholarly publications	1	1.8	1.8	56,009	113,094	120,149

a. Law Library

In the law library, provision is made to maintain a carefully selected collection of legal reference material sufficient in number and scope to allow students and faculty members to research questions of law in preparation for classroom presentations and assignments, and for moot court, trial practice and legal clinic assignments. At the present time Hastings Law Library consists of about 123,000 volumes. Budgeted acquisitions add to this at the approximate rate of 9,000 volumes per year. The library is open 102 hours per week to maximize the availability of reference material.

Student assistant	3.4	5.5	5.5			

b. Scholarly Publications

In this portion of the budget, provision is made to keep students, graduates, members of the bench and bar informed of current developments in the law and problems related to the legal profession. This is accomplished by preparing two scholarly publications including the Hastings Law Journal six times a year and the Hastings Constitutional Law Quarterly four times a year.

The Law Journal is devoted to indepth analysis and discussion of significant legal problems and the Constitutional Law Quarterly concentrates on the constitutional aspects of problems. The articles range from exhaustive discussions by eminent legal scholars and members of the legal profession to notes and comments by students on recent developments in the law. Students selected to participate in the work of these publications find it a rewarding and valuable educational experience. Approximately one hundred will participate in the Law Journal and eighty in the Constitutional Law Quarterly. The benefits of this experience are realized not only during the formal legal education, but also are apparent in the advantage the student has when seeking a position after graduation.

III. STUDENT SERVICE PROGRAM

Program Objectives and Description

The principal objectives are:

1. Provide comprehensive student health services involving both on-campus treatment by a doctor and nurse, and more extensive medical attention at the University of California Medical Center.
2. Provide supportive financial aid and counseling through loans (federal, state, private), scholarships, grants-in-aid, special grants based upon financial hardship, and the student pay-work study portion of the program to assist students in meeting their financial needs.
3. Provide employment for second- and third-year students in various private and public law offices and agencies on a part-time basis during the academic year.
4. Provide comprehensive placement services for graduating students.

The student service program is composed of three elements: health services, financial aid and placement. Through these functions, the students are provided with services to assist in maintaining good health and necessary financial assistance to complete the instruction program and placement services are available in order to realize the full benefits from a legal education.

HASTINGS COLLEGE OF LAW—Continued

University of California

a. Student Health Services

The student health service provides on-campus dispensary care including services of a nurse and physician four hours a day, five days a week. Emergency care is provided at the San Francisco Medical Center, University of California. Hospitalization is also provided at the San Francisco Medical Center. The basis for the medical service is an agreement entered into between the medical center and the college.

Expenditures.....	-	-	-	\$105,470	\$106,000	\$106,030

b. Student Financial Aid

The financial aid office is responsible for planning, developing, and providing financial assistance for students who would not be given the opportunity for legal education without additional resources. The functions of the office are divided into four groups: (1) information dissemination and application processing, (2) need analysis and award distribution, (3) financial, loan and work counseling, (4) reports and program development.

All financial aid applicants are required to file the college scholarship service "Graduate and Professional Students' Financial Statement", which gathers, processes, and evaluates information concerning family and student assets and liabilities. These statements combined with student interviews determine the type and amount of financial aid for which the applicant is eligible.

The financial aid office also assists students in the securing of financial resources from external programs.

The budget proposes a significant increase in program funding for 1976-77 reflecting the Governor's concern for increasing services to disadvantaged students. The number of grants will be increased from 149 to 237, an addition of 88 grants at an average cost of \$850.

IV. INSTITUTIONAL SUPPORT PROGRAM

Program Objectives and Description

The principal objectives are:

1. Provide active leadership in meeting current administrative problems.
2. To provide management with fiscal information on resources used in relation to resources available and to provide business services.
3. Provide a reasonable selection system for accepting students.
4. Provide for maintenance of student records.
5. To maintain physical plant facilities and provide security to permit operations of the programs.
6. To foster a continuing relationship between the alumni and the college including the involvement of alumni in campus community affairs.

This program is carried out through the activities of executive management, business services, registrar, admissions, facilities operation and community relations offices.

f. Community Relations	4	4	4	55,118	59,887	64,060

a. Executive Management

Administration of the college is the responsibility of the dean and his chief administrators including a vice dean and registrar, one associate and two assistant deans. The dean and the registrar are, by statute, the officers of the college. The dean serves as chief executive officer and the registrar serves as secretary to the board of directors. Administrative responsibility includes fiscal management and planning, coordination of instructional programs, curriculum planning, personnel management, development of new instructional and theory practice programs, public relations, supervision and development of physical plant operations, alumni promotion and fund development.

The budget proposes to transfer \$1,900 of general expense funds from executive management to the registrar element to aid in the funding of the automated registration and reporting system.

Administrative	5.3	6	6			
Staff	9.1	8.8	8.8			

b. Business Services

The various services include accounting, budgeting, cashing, contract preparation, mailing services, personnel, unemployment insurance, purchasing and supplies.

The budget proposes to add 1 personnel officer and related expenses to enable the college to more effectively manage and plan the human resources of the institution.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	14.1	16	16	\$188,921	\$216,229	\$241,655

Totals, Business Services.....	14.1	16	17	\$188,921	\$216,229	\$262,255

c. Registrar

The Registrar is responsible for all official records held by Hastings College of Law, including all student records and statistical information. Records describe each individual student: his or her academic achievement, personal data, placement, medical, financial (loan and scholarship), honors, law journal, etc. As such, they are an integral part of the official "picture" of each individual student, and become a part of the permanent record of each student.

The budget proposes to eliminate 1 Clerk II position and related staff benefits and transfers the \$8,835 involved to operating expenses within the registrar element to enable the College to finance the continuation of the automated registration and reporting system. In addition, \$1,900 of general expense is transferred from executive management to this element for the same purpose.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77

Totals, Registrar	4	4	3	\$38,124	\$43,457	\$45,737

d. Admissions

Students are accepted through a screening process so that students most highly qualified and with the greatest aptitude for the law are selected. Special attention is devoted to student applications under the legal education opportunity program in an effort to ensure that the student may reach the academic goal. Selection is based on the applicant's undergraduate record, the law school admission test score and other information submitted.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	3.6	4	4	\$40,747	\$48,185	\$50,144

HASTINGS COLLEGE OF LAW—Continued

University of California

e. Facilities Operation

Daily housekeeping, maintenance of the physical plant, security and preservation of order in the college area are provided in facilities operation in order to maintain the quality of the physical environment. Adjustments are made to provide the necessary maintenance staff.

One janitor position has been approved in the current year and is proposed for continuation in the budget year along with an additional half-time janitor position. Both positions are financed from reimbursements.

In addition, the budget proposes to add two deferred maintenance projects at \$37,600 to rebalance and clean the ventilating systems (\$25,000) and to repaint the exterior of the original building (\$12,600). Also included is \$50,000 for minor capital outlay to construct additional women's toilet facilities and \$3,500 is proposed for the rental of space for adjunct faculty offices on the basis of 1 office for each 4 adjunct faculty.

Totals, Facilities Operations.....	21.3	22.5	23	\$435,220	\$475,414	\$595,986

f. Community Relations

The Office of Community Relations includes the functions to carry out the responsibility for the general development and fund raising for the college. These responsibilities include preparing and issuing all press releases on law school activities and faculty members and coordinating special programs jointly sponsored by the law school and external entities on both a local and national basis. This office also maintains all alumni association records and files for over 6,100 alumni; issues an alumni bulletin three times a year and an alumni directory biannually; and plans special events for alumni, students, and members of the legal community. The association includes approximately 160 members of the judiciary and a number of California legislators.

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES

Introduction

The individual California State Colleges were brought together as a system by the Donahue Higher Education Act of 1960. In 1972, the system became the California State University and Colleges (CSUC), and 14 of the 19 campuses received the title of "university".

The oldest campus, San Jose State University, was founded in 1857 and became the first institution of public higher education in California. The newest campus, California State College, Bakersfield, began instruction in 1970.

Responsibility for the California State University and Colleges is vested in the Board of Trustees, whose members are appointed by the Governor. The trustees appoint the chancellor, who is the chief executive officer of the system, and the presidents, who are the chief executive officers on the respective campuses.

The trustees, the chancellor and the presidents develop systemwide policy, with actual implementation at the campus level taking place through broadly based consultative procedures. The Academic Senate of the California State University and Colleges, made up of elected representatives of the faculty from each campus, recommends academic policy to the Board of Trustees through the chancellor.

Academic excellence has been achieved by the California State University and Colleges through a distinguished faculty, whose primary responsibility is superior teaching. While each campus in the system has its own unique geographic and curricular character, all campuses, as multipurpose institutions, offer undergraduate and graduate instruction for professional and occupational goals as well as broad liberal education programs. Each campus requires for graduation, a basic program of "general education—breadth requirements" regardless of the type of bachelor's degree or major field selected by the student. A limited number of doctoral degrees are offered jointly with the University of California.

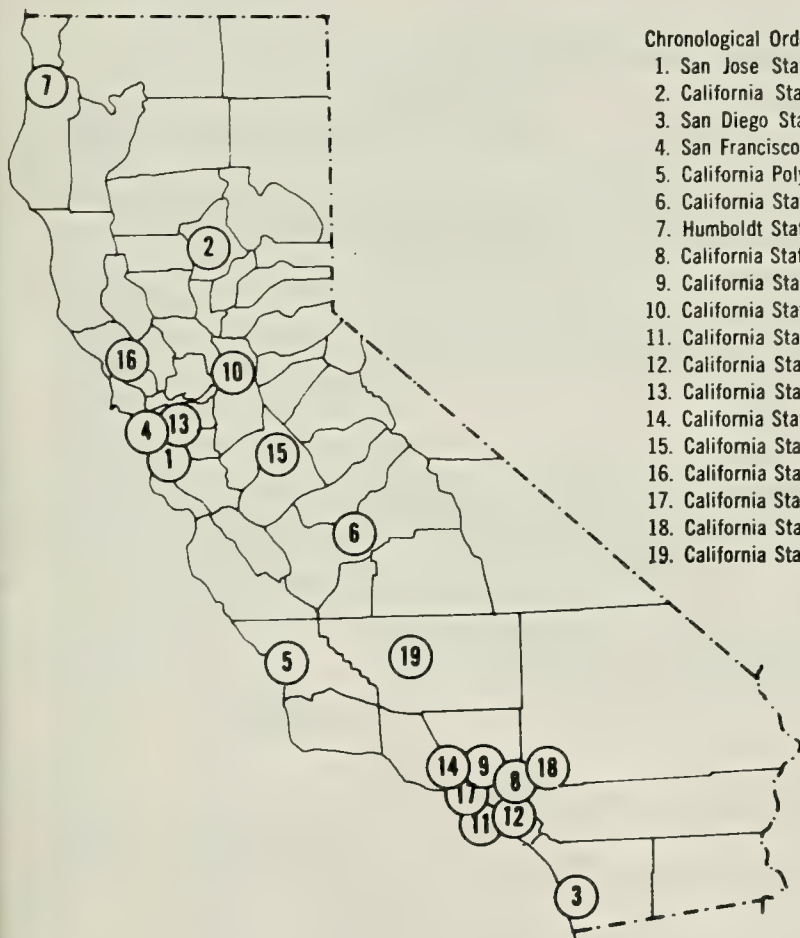

Presently, under the system's "new approaches to higher education," the campuses are implementing a wide variety of innovative programs to meet the changing needs of students and society. Examples of pilot programs currently authorized are instructional television projects, minicourses, and credit-by-examination. A consortium of the California State University and Colleges fosters and sponsors local, regional, and statewide certificate programs to meet the needs of individuals who find it difficult or impossible to attend classes on a campus.

The program objectives of the California State University and Colleges are:

1. To provide instruction in the liberal arts and sciences, the professions, applied fields which require more than two years of college education, and teacher education—both for undergraduate students and graduate students through the master's degree.
2. To conduct research to the extent that it is consistent with the primary function of the California State University and Colleges.
3. To provide public services to the people of the State of California.
4. To provide services to students enrolled in the California State University and Colleges.
5. To provide institutional services to support the primary functions of instruction, research, public services, and student services in the California State University and Colleges and to ensure that legal obligations related to executive and business affairs are met.

The locations of the 19 campuses show the statewide coverage of this, one of the largest baccalaureate degree higher education systems in the nation.

^b Federal funds and expenditures are excluded from overall budget totals.

SIGNIFICANT PROGRAM CHANGES

GENERAL

This budget provides for 239,410 full-time equivalent (FTE) students. This total includes 410 FTE students enrolled in the International Program. This is an increase of 5.3 percent over the actual 227,324 enrollment in 1974-75, and an increase of 4.1 percent over the 1975-76 budgeted level of 230,005. It is currently estimated that CSUC will serve 236,800 FTE students during 1975-76. CSUC experienced an unanticipated surge in enrollments in 1975-76, as is the case with higher education institutions across the country. Faculty productivity, measured in terms of average student credit units generated by faculty FTE, is continued at the 1975-76 level of 273 units per faculty after adjustment for salary savings. This is equivalent to a student-faculty ratio of 17.8 to 1 and requires an average of slightly more than 12 weighted teaching units for a full-time workload (which includes independent study) per faculty. The following table exhibits the student-faculty ratio for past years:

Year	FTE Student-Faculty Ratio	Student Credit Unit-Faculty Ratio
1970-71	16.26:1	244
1971-72	18.25:1	274
1972-73	17.90:1	269
1973-74	17.82:1	263
1974-75	17.80:1	273
1975-76	17.80:1	273
1976-77	17.80:1	273

Overall General Fund increases in 1976-77 total \$61.7 million and are directed toward program improvements and maintenance in the state-supported CSUC programs. These augmentations include almost \$7 million for price increases attributable to an inflation rate experienced by all state programs. The most significant 1976-77 item of increase in terms of dollars is \$27.4 million for salary benefits. In addition, the \$32.7 million salary increase expenditure for fiscal year 1975-76 is included in the expenditure detail.

The following table identifies major budgetary changes included in the 1976-77 Governor's Budget. The most significant proposals are then described in detail.

Highlights of the 1976-77 Governor's Budget Proposal
for The California State University and Colleges

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

ENROLLMENT ADJUSTMENTS

Revised enrollment projections for 1975-76 are estimated to total 236,800 FTE students, an increase of 6,795 FTE students (3%) from the amount originally budgeted for 1975-76. Section 28.9 of the 1975 budget act permits the Director of Finance to authorize the accelerated expenditure of amounts budgeted for CSUC, provided the enrollments exceed original budget expectations by at least 2%. In order to accommodate the intent of Section 28.9, the 1975-76 budget has been augmented by \$2,195,000. This represents the amount necessary to fund enrollments which exceed a 2% increase. Stated in terms of FTE students, 1975-76 enrollments increased by 6,795 over the budgeted level, and additional funding is requested for 2,195 FTE students. A deficiency appropriation will be requested to accommodate this overenrollment.

The proposed 1976-77 budget also recognizes the increase in enrollments. The 239,410 FTE students budgeted for 1976-77 represents a 4.1% increase over the amount originally budgeted for 1975-76. To accommodate the increased workload, \$10,810,974 has been added (\$8,615,974 plus \$2,195,000 included in the revised 1975-76 budget). CSUC continues to project a "steady-state" enrollment condition into the future. It is not possible to ascertain the reasons for the surge in enrollments in 1975, but one factor appears to be economic conditions in general. The unemployment rate for college-aged persons continues to be high and it is believed that this has caused increased numbers of persons to remain in or return to school. Enrollments, therefore, are expected to stabilize once again as soon as the economy improves.

SABBATICAL LEAVES

The current CSUC policy regarding eligibility for sabbatical leaves requires that a faculty member complete at least six years of continuous teaching service. The 1976-77 budget proposes an additional \$303,780 to provide a total of \$3.4 million to be used to grant leaves at the ratio of one leave for each 12 eligible faculty. These sabbatical leaves can be granted for a full year at half pay, or for one-half year at full pay.

LIBRARY

CSUC, in response to a Department of Finance recommendation, is proceeding in the development of systems under the title of the Library Development Project, which will lead to improved library usage and efficiency through interlibrary cooperation and automation. This project was originally designed as a four-year, phased effort to be completed in 1977-78. Due to technical difficulties, the project has encountered considerable delay, and it is now estimated that the project will be completed in 1983-84. The 1975-76 budget contains \$1,254,197 to fund the amended phase-one portion of this project. Activities in 1975-76 center around the conversion of manual library listings to a machine-readable format. In 1976-77, the conversion will continue. Due to continued problems with library transactors (an automated circulation control system), this phase of the project will be extended into the 1977-78 fiscal year. Accordingly, no funds are included in the 1976-77 budget for library transactors.

The proposed 1976-77 budget includes \$8,361,896 to continue acquisition of 439,000 library volumes per year. This continues the plan to provide CSUC with library volumes sufficient to achieve a ratio of 40 volumes per FTE student.

COMPUTING SUPPORT

The CSUC data processing program is designed primarily to serve students as a part of their curricula. In 1976-77, the budget has been increased by \$786,555 to improve the capabilities of the data processing system. To support increased utilization of the computer by academic and administrative units on every campus, an amount of \$125,053 is provided for 9.6 additional positions. An additional \$139,148 is provided for upgrading existing hardware on selected campuses. To insure appropriate maintenance of campus computer terminals, a total of 16.5 equipment technician positions are provided, and 10 data control clerks have been added to insure that instructional jobs are accurately and expeditiously handled. For this purpose, \$361,481 has been included in the budget. To increase the effectiveness of the central computing facility, an amount of \$160,873 has been added for operating systems support, central timesharing, and dual processing which is required during the transfer to the Chancellor's office of the central timesharing facility.

EXTERNAL DEGREE FEE WAIVERS

External Degree Programs are currently supported entirely from student fees and operated within the Special Fund of Continuing Education—Extension. Since these programs are full-fledged degree programs, they are more costly than most extension programs. Therefore, it is considered important to have a state-supported financial aid program especially designed for certain students enrolled in external degree programs.

The fee waiver program was first funded in 1973-74. In 1974-75 fee waivers totaling \$117,580 were granted to low income students enrolled in 27 external degree programs. Fee waivers provide partial financial assistance to adult students who: want to continue their education, have a degree objective, and have a low income. (For example, single students with an annual income of \$5,500 or less receive a full fee waiver.) Qualified students are admitted to the programs and the programs are reimbursed in the amount of those fees waived. The 1975-76 budget includes \$120,000 for this purpose. The 1976-77 budget proposes an increase of \$75,145 for increased FTE students, and \$4,800 for price increase to provide a total of \$199,945. This request is based on an anticipated increase of 1,100 FTE students, from 2,242 to 3,342 FTE students.

FINANCIAL AID ADMINISTRATION

Fifty-five Financial Aid Office positions and 47.9 Business Office positions are requested.

This proposal is a request for additional campus positions to perform the increasing workload requirements related to application processing, eligibility determination, awarding and disbursing of financial aid, loan billing and collection activity, record-keeping and reporting functions. The objective of this proposal is to:

- Ensure compliance with all federal, state, systemwide, and campus administrative policies and procedures;
- Improve the financial aid services and thereby insure maximum access to education for all students who qualify; and
- Improve the management efficiency of campus financial aid programs.

This increased staffing will provide improved services to student aid recipients and more timely information to program managers. Improved loan collection and reporting activities will reduce the need for General Fund support to match new federal loan funds, as amounts collected become available for new loans.

The federal government reimburses a portion of the cost for administration of federal financial aid programs. Current policy provides that the balance of financial aid administration expenditures will be financed by the Student Services Fee. In view of this policy and the decreasing level of federal reimbursement, it is proposed that the cost of this increased staffing be financed by an approximate \$4 increase in the Student Services Fee.

CAMPUS SECURITY

Fourteen additional peace officer positions are proposed to insure a minimum level of staffing at all campuses. The positions would be allocated to the small campuses which presently have fewer than 11 authorized peace officer positions. This allocation would permit a minimum of two officers to be on duty during every shift.

There is increasing concern about the security of campus personnel and property in view of increasing crime both on and off campus. In addition, a study of law enforcement at a representative campus indicates that minimal coverage requires two peace officers per shift. This proposal is to bring the campuses of Bakersfield, Humboldt, San Bernardino, Sonoma, and Stanislaus up to that staffing standard.

EDUCATIONAL OPPORTUNITY PROGRAM

The Educational Opportunity Programs in The California State University and Colleges began formally in the fall of 1969, following a number of successful pilot efforts. Since that time, state funding has supported this program at varying levels.

In 1976-77, a significant increase in program funding is proposed. It is anticipated that first year grants will be increased from 4,270 in 1975-76 to 8,426 in 1976-77. Total grants will increase from 12,139 to 16,705. Funding for counseling, tutorial and other administrative services will increase

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—*Continued*

from \$2,243,411 in 1975-76 to \$3,681,808 in 1976-77. Total general funds for this program will increase from \$6,649,136 in 1975-76 to \$10,382,333 in 1976-77. This augmentation reflects the Governor's concern for increasing services to disadvantaged students.

The provision of grants to EOP students is designed to supplement regular financial aid consisting primarily of federal grants, loans, and work-study. EOP students, like all other applicants for financial aid, must be able to demonstrate a need for financial assistance. The determination of need is governed by nationally recognized evaluation procedures. Students who evidence legitimate financial need may be awarded aid within the constraints of available funds. Typically, this aid is awarded as a "package" consisting of grants and self-help in the form of loans and work-study.

CAPITAL OUTLAY STAFFING

In recognition of the declining capital outlay workload in the CSUC system, the 1976-77 budget proposes a reduction of \$103,567 in general fund support. Systemwide, 3.8 positions will be eliminated.

I. INSTRUCTION**Program Objectives and Description**

The California State University and Colleges (CSUC) educational program is designed to educate and grant degrees, credentials, or certificates to qualified students in the liberal arts and sciences, and certain applied fields and professions. Through regular classroom efforts and special supplemental programs, the CSUC program attempts to prepare students for a profession, occupation, or advanced study, or to update knowledge and upgrade skills. Although teaching activity may take place in other programs (e.g., the academic support program), formal study for credit toward a degree or certificate at higher education institutions usually falls within the instruction program.

Currently, the instruction program consists of three subprograms: regular instruction, special session instruction, and extension instruction.

Table II displays the 1976-77 changes in FTE and head count students on each campus for the past, current and budget years. Table III provides similar information for other instruction program components: special (summer) session instruction and extension instruction.

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

a. Regular Instruction

The primary function of the California State University and Colleges is the instruction of undergraduate and graduate students, through the master's degree level, in the liberal arts and sciences, applied fields, and certain professions. The regular instruction subprogram includes those instructional programs operating during the academic year that are part of a formal degree or certificate curriculum and are managed by the regular academic departments. Table IV displays the distribution of undergraduate and graduate FTE students within the various academic disciplines.

Academic planning is carried out on each CSUC campus and ensures the availability of appropriate instructional resources. These include faculty; technical, clerical, and administrative personnel; facilities; equipment; operating supplies and materials; libraries; and other services.

Academic advisement of students in the California State University and Colleges typically is carried out by the teaching faculty and department chairpersons as part of the ongoing instruction program. The faculty advisor assists students in planning their academic programs and acquaints them with the various education requirements for a degree.

The instructional programs on the Humboldt, Los Angeles, Hayward, Pomona, San Luis Obispo, San Bernardino, Dominguez Hills, and Bakersfield campuses are offered with instruction on the quarter system. Instruction is provided on a semester basis at the other CSUC institutions except Stanislaus which operates on a 4-1-4 term basis. The Los Angeles, San Luis Obispo, Hayward, and Pomona campuses are year-round operations, with a state-supported summer quarter.

All curricular offerings are based on the Master Curricular Plan for the California State University and Colleges and are expressed in an academic master plan for each campus. The Chancellor may approve the establishment of new academic programs when such programs have been projected in an academic master plan previously approved for that campus by the Board of Trustees. These programs are subject to review by the Postsecondary Education Commission.

In 1974-75, the California State University and Colleges awarded approximately 55 percent of the bachelor's degrees and 35 percent of the master's degrees granted in California. More than 200 different baccalaureate and/or master's degrees are offered in broad discipline areas. Table V displays the number of baccalaureate and master's degrees conferred over the past five years through 1974-75.

TABLE V
Recent History of Undergraduate and Graduate Degrees Conferred 1970-71—1974-75

Year	Undergraduate degrees	Graduate degrees	Total
1970-71.....	40,651	7,567	48,218
1971-72.....	43,178	8,183	51,361
1972-73.....	46,699	8,291	54,990
1973-74.....	48,018	8,714	56,732
1974-75.....	44,818	9,475	54,293

In 1975-76, \$1.285 million was provided for the development and evaluation of an innovative instructional program. Examples of fund use include a weekend college, credit by examination, assessment of credit for work and other outside experiences, increased use of media in instruction, modularized courses for self-paced learning, and efforts to familiarize faculty with specific instructional technologies. The level of funding included in the 1976-77 budget is \$1.099 million.

Project evaluation by the Office of the Chancellor is an integral part of the innovative program. Periodic progress reports are being provided to the CSUC Board of Trustees, faculty and the executive and legislative branches of state government.

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—*Continued*

1976-77 Regular Instruction Program

The 1976-77 Trustees' instructional faculty proposal increases the total CSUC faculty from 12,900.6 for 1975-76 to 13,427.0 for 1976-77. This is the result of an increase in FTE enrollment from the budgeted level of 229,630 in 1975-76 to 239,000 in 1976-77. Not included in these totals is the 1975-76 budget deficiency authorization of \$2,195,000 to partially fund a current year enrollment increase of 6,795 full-time equivalent students.

The faculty budget includes 32 positions that will be allocated by the Chancellor's Office to reduce the impact of increased student demand in certain course offerings. The method of distributing instructional faculty positions should favorably affect normal student progress, reduce excess credit accumulation and aid the CSUC system in meeting shifts in student demand.

Instruction of students by the budgeted faculty will require a systemwide per term average productivity of 273 student credit units per full-time equivalent faculty (SCU/FTEF), which is equivalent to the student faculty ratio of 17.8 to 1 budgeted for the current 1975-76 year. This productivity goal will require an average faculty workload slightly exceeding 12 units per term including faculty units earned for independent study.

In 1971, the Legislature directed the Department of Finance to cooperate with the California State University and Colleges, the University of California, the Postsecondary Education Commission (successor to the Coordinating Council for Higher Education), and the Legislative Analyst, to develop a faculty productivity-based method of budgeting faculty positions for both CSUC and the University of California. The method selected is the "productivity ratio," Table VI, Faculty Productivity by Campus, displays changes between the past, current and budget year in average student credit units generated by faculty on each of the 19 campuses. Table VII, Faculty Productivity by Discipline, illustrates the differences in 1974-75 actual and 1975-76 estimated data among the academic disciplines. It should be noted that a substantially lower ratio exists in the professional disciplines of nursing, engineering and architecture as contrasted with the high ratios in such disciplines as psychology, home economics, and business and management.

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

Steps were initiated by the Coordinating Council for Higher Education to develop "costs of instruction" information (the Postsecondary Education Commission is continuing to collect this type of data). This budget displays in Table VIII the unit cost data for the CSUC.

"Unit cost" is a variable which captures the influence of class size, faculty productivity, and other critical instructional factors.

This budget contains \$3.4 million for sabbatical leaves at the continuing ratio of one leave for every 12 eligible faculty; the leave is based on a full year's leave with one-half year's pay or a half year's leave with full pay. Funding sabbatical leaves is a positive recognition that professional development and teaching effectiveness are enhanced by these leaves.

Recent changes in statutes augmenting practice teaching requirements (the "Ryan Act") have increased the amounts of funds due local school districts who provide practice teaching services. The 1976-77 budget includes a total of \$733,158 to fund these contracts.

In the use of innovation funds, special emphasis has been placed on competency-based learning. Administration of experimental programs in credit-by-examination has been undertaken. This budget provides \$150,000 to support credit-by-examination activities on a continuing basis.

Input

	1974-75	1975-76	1976-77
Expenditures	\$332,279,928	\$367,501,734	\$386,785,566
Personnel man-years	17,809.2	17,181.7	17,879.1

b. Special Session Instruction

The California State University and Colleges operates summer sessions on all campuses except for the Pomona campus. (The Pomona campus is one of four campuses offering a state-supported summer *quarter*.) Table III displays actual and full-time equivalent enrollments for summer session on each campus. This is a fully reimbursed institutional term, and is not part of the ongoing college year in CSUC. The special session instruction subprogram includes all programs that offer credit toward a formal degree or certificate and are in operation during a summer session. Summer sessions throughout the CSUC system have been experiencing declining enrollments since 1969 when 12,331 full-time equivalent students were enrolled; preliminary estimates indicate enrollments increased somewhat in 1975 over 1974. In 1976-77, 8,398 FTE students are projected. A CSUC systemwide task force currently is studying the whole range of Continuing Education programs.

Input

	1974-75	1975-76	1976-77
Expenditures	\$5,714,283	\$5,971,307	\$5,384,790
Personnel man-years	487.9	491.5	441.2

c. Extension Instruction

Extension instruction, primarily a non-state-supported function designed to serve a variety of needs, is offered year-round by The California State University and Colleges. One aim is to provide students a means for making up deficiencies in the educational program and to accelerate the attainment of degrees and credentials. Within the field of continuing education, teacher education provides access for teachers to new techniques to improve instructional expertise. Courses are concentrated at the upper-division level and are designed to satisfy school district and state credential requirements. The extension instruction subprogram includes all program elements that are managed separately by an extension division or similar agency within the system.

Projected extension enrollments in 1976-77 are 9,088 full-time equivalent students. Table III displays estimated enrollments for this instructional component.

Input

	1974-75	1975-76	1976-77
Expenditures	\$3,483,958	\$4,429,569	\$4,345,576
Personnel man-years	264.2	326.7	320.8

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

II. RESEARCH

Program Objectives and Description

Governmental agencies, business, industry and various other groups require research assistance. Generally, research is authorized in the CSUC when problems are within the competence of the faculty, when adequate financing can be provided for facilities, staff and equipment, when students are involved and receive stipends or salaries, and when the projects will make classroom instruction more effective. Currently, no General Funds are authorized for this activity and all activity is completely reimbursed.

The research program consists of all those research elements commissioned by an agency external to the institution or by an organizational unit within the institution. This program contains only those research projects awarded directly to the campus and does not include foundation projects. Individual or project research, the only subprogram, contains the academic department research activity that has been created as a result of a contract, grant, or specific allocation of resources to conduct a study or investigation of a specific scope. These projects normally are of a more temporary nature than those undertaken in formal research organizations.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Research	3.6	9.7	10	\$59,101	\$152,073	\$138,969
General Fund	—	—	—	-12,629	—	—
Reimbursements	3.6	9.7	10	71,730	152,073	138,969

III. PUBLIC SERVICE

Program Objectives and Description

The public service program contains all the program elements within the institution that are directed toward the benefit of the general public. Programs that are controlled or operated by outside agencies but are housed or otherwise supported by the institution fall within the public service program. Currently, the only general funds authorized for public service program activities are to cover the instructionally related activities at the educational television station at San Diego State University. Historically, reimbursements to this program have exceeded expenditures resulting in an abatement to the General Fund.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program costs	31.8	16	16	\$383,481	\$320,646	\$326,958
General Fund	—	—	—	-34,473	—	—
Reimbursements	31.8	16	16	417,954	320,646	326,958

IV. ACADEMIC SUPPORT

Program Objectives and Description

The academic support program provides the library, audio-visual, data processing, and ancillary (e.g., college farms, nursery schools), activities that are required to display, retain, and preserve materials and in other ways to assist the academic functions of the system.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program costs	2,903.1	2,920.2	3,010.1	\$56,305,002	\$62,606,398	\$65,810,464
General Fund	2,895.3	2,912.4	3,001.5	53,593,369	59,719,978	62,792,447
Reimbursements	—	—	—	844,066	904,243	965,349
Continuing Education Revenue Fund	7.8	7.8	8.6	75,667	102,177	102,668
Auxiliary organizations	—	—	—	1,791,900	1,880,000	1,950,000

Program Elements

a. Libraries	1,698	1,682.3	1,720.5	29,707,489	32,960,403	34,645,933
b. Audiovisual services	396.1	389.4	400.2	6,657,051	7,011,284	7,348,697
c. Computing support	467.3	469.8	508.0	12,198,131	13,647,497	14,437,133
d. Ancillary support	341.7	378.7	381.4	7,742,331	8,987,214	9,378,701

a. Libraries

Library services consist of all activities which directly support the libraries of the nineteen CSUC campuses. The libraries provide the bibliographic and informational resources necessary in order to help carry out the teaching and research functions of the CSUC. The expenditures required to support the library system include:

a. Collection purchasing, processing (including cataloging and classifying), preserving, and exhibiting library materials which include: books, periodicals, kits, models, microforms, and art objects.

b. Services—reference and referral services to students, faculty and other system users, including institutions, i.e., interlibrary loans and other resource sharing.

c. Operations—management, supervision, training, planning, and equipment maintenance.

The system operates a library at each of the 19 campuses. It has no branch libraries. CSUC library holdings as of June 30, 1975 total 8.1 million volumes and collections range in size from 132,036 volumes at Bakersfield to 684,823 volumes at San Jose.

TABLE IX
Library Volume Activity

	1974-75	Estimated 1975-76	Estimated 1976-77
Annual Collection Change:			
Volumes budgeted	500,000	439,000	439,000
Volumes withdrawn †	60,889	61,000	61,000
Volumes added by purchase *	464,774	—	—
Total Volumes Held Systemwide:			
Countable Total *	7,264,880	7,580,000	7,898,000
Actual Total ‡	7,716,490	8,063,000	8,406,000

* Only those acquired with state and federal funds (excludes gifts and exchanges).

† Discarded obsolete/worn-out materials.

‡ Excludes government documents maintained as a separate collection, curriculum library materials, children's books not cataloged in the general collection and microforms.

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

Expenditures in this program element relate to the acquisition and processing of books, periodicals and a variety of other materials; maintenance of current holdings and card catalogs; services to individual students, faculty members, and other library clients; interlibrary loans; and supervision of these activities.

In addition to the regular library activities, CSUC is engaged in a major developmental program known as the Library Development Project. This project when completed, through the utilization of advanced EDP techniques and equipment, will bring into being a system which will result in better utilization of existing library holdings, provide for a system of cooperative acquisition and processing of books, reduce low-use or obsolete material, and enhance inter-library borrowing. This project is multi-year in nature with a completion date of 1983-84 under current planning.

1976-77 Program

Total funding of \$1.3 million will be provided in 1976-77 to continue to implement the library development program in accordance with the plan approved for this project. The major activity will encompass the development and implementation of the first phase of the union shelflist conversion.

The ongoing library budget is designed to maintain the level of book acquisitions and reader services provided in the 1975-76 budget. Thus, basic book acquisition will remain at 439,000 volumes for 1976-77.

Input	1974-75	1975-76	1976-77
Expenditures	\$29,707,489	\$32,960,403	\$34,645,933
Personnel man-years	1,698	1,682.3	1,720.5

b. Audiovisual Services

Audiovisual services include activities associated with providing these materials to support the primary programs of instruction, research and public service. The scope of audiovisual services includes utilization, materials preparation and technical services.

The use of instructional television by the California State University and Colleges has long been a matter of interest and concern. In January 1965, the Trustees adopted a resolution which established policy guidelines for its orderly development. This resolution recognized the use of television as important means for making the instructional process more productive and efficient.

Television is being used in nearly half of the CSUC campuses in a variety of applications and for professional curricula in broadcasting.

Input	1974-75	1975-76	1976-77
Expenditures	\$6,657,051	\$7,011,284	\$7,348,697
Personnel man-years	396.1	389.4	400.2

c. Computing Support

Although support to instruction is the principal responsibility of this element, funds are included to support both academic and administrative computing activities. Students are the largest users of CSUC computing facilities. Computer support for instruction takes two forms: (1) training in computer and information sciences; and (2) using the computer as a tool for instruction and research in a number of academic programs.

The demand for specialists in computing technologies affords the California State University and Colleges full opportunity to offer curricular programs in computer and information sciences at selected institutions serving large geographic areas. The goal of computing programs is to produce individuals both at the undergraduate and graduate level sufficiently competent in computer technology to meet the demand in this field.

Instruction in other areas further increases demand for computer time. Access is essential in the fields of business, engineering, and mathematics and is becoming a prerequisite for architecture, biological sciences, physical sciences and social sciences.

Recognizing that computer support increases the quality of instruction in all fields, and that a significant number of students need some knowledge of computing in order to enter a variety of occupations, CSUC campuses will continue to provide exposure to the largest possible number of students. The goal of instructional usage in CSUC is to make students especially knowledgeable in the use of modern information-systems technology.

The budget continues funds appropriated to support the expansion of computing capabilities throughout the system including a substantial growth of instructional timesharing. The budget also includes the continuation of funds appropriated in 1974-75 for the implementation of computer-assisted registration (CARS) activities on several campuses.

Input	1974-75	1975-76	1976-77
Expenditures	\$12,198,131	\$13,647,497	\$14,437,133
Personnel man-years	467.3	469.8	508.0

d. Ancillary Support

Certain professional instructional programs are much more effective when there are facilities available for practical application of the principles taught in the classroom. There are several clinics, bureaus, centers and institutes that fulfill this objective. Examples are the nursery schools at San Diego and San Francisco which provide practice teaching experience at the preschool level. In addition, there are college farms at Fresno, Chico, San Luis Obispo, and Pomona operated in conjunction with those campuses' agricultural instructional program, a project program at Northridge for education of the deaf, and the medical technology program at San Francisco. Natural resources and fisheries facilities at the Humboldt campus and the Moss Landing marine facility at San Jose State University complement the many disciplines concerned with natural sciences and the conservation of natural resources. Long Beach State University administers the Southern California Ocean Studies Consortium, which also provides service to five other campuses. Humboldt State administers two programs which are responsive to the needs of the Indian Community in Humboldt County.

The costs of these ancillary facilities are a direct result of the enrollment in the professional curricula involved. In this subprogram are accumulated those academic support expenditures that are not appropriately classified in other subprograms.

Input	1974-75	1975-76	1976-77
Expenditures	\$7,742,331	\$8,987,214	\$9,378,701
Personnel man-years	341.7	378.7	381.4

V. STUDENT SERVICE

Program Objectives and Description

The student service program includes all activities related to the student body except for degree-related activities and student records. Activities in this program are designed to contribute to the student's physical well-being and to his intellectual, cultural, and social development outside of the context of the formal instruction program. Student service programs are supported by the General Fund, the CSUC student services fee, and through the self-supporting organizations.

Typically, campuses provide students with food, health care services, housing, a bookstore, cultural and recreational activities, counseling, testing, and financial aid.

Program Elements

a. Social and cultural development	158.6	141.7	145.8	12,007,344	12,178,923	12,314,126
b. Supplementary educational services	14	20.7	21.4	100,486	133,173	129,989
c. Counseling and career guidance	789.1	822.5	993.4	11,860,308	13,640,001	15,750,037
d. Financial aid	252	232.8	295.3	32,190,760	38,018,452	39,950,484
e. Student support	714.7	788.3	788.0	57,187,078	61,654,650	64,303,980

a. Social and Cultural Development

Student activity programs in The California State University and Colleges have been established to provide for the student's social and cultural development outside of the degree curriculum. These are student activities primarily supported and controlled by the student body such as student associations, student newspapers, annual convocations, lectures and special conferences. Informal, out-of-classroom programs of a cultural, social or recreational nature complement and supplement academic disciplines, provide experiences in self-government, offer social skills and acceptance of responsibility, and develop effective human relations. These are considered an essential part of the educational program. Coordination of off-campus programs is also accomplished through this element.

Input	1974-75	1975-76	1976-77
Expenditures	\$12,007,344	\$12,178,923	\$12,314,126
Personnel man-years	158.6	141.7	145.8

b. Supplementary Educational Service

This subprogram contains all program expenditures that provide matriculated students with supplemental instruction outside of the normal academic program. Supplemental, non-credit instruction is provided to educationally, and otherwise, disadvantaged students who have demonstrated that they would otherwise be capable of, and would benefit from, a college education. Services are provided principally through the educational opportunity program's tutorial service.

Input	1974-75	1975-76	1976-77
Expenditures	\$100,486	\$133,173	\$129,989
Personnel man-years	14	20.7	21.4

c. Counseling and Career Guidance

Counseling and testing programs recognize that in order for the state and the student to realize maximum return on their investments, college communities should provide professional counseling services. Students needing such services may be aided in evaluating their educational objectives, strength of motivation, intellectual potential, and vocational and professional goals.

The placement program provides occupational information and placement of students in professions for which they have been prepared. This responsibility includes the careful articulation between instructional programs and the changing professional needs of the business and government communities and follow-up on the placement of graduates. The placement office provides services to the student from the time he enters college until he is ready to enter full-time employment.

In 1976-77, \$3,681,808 is provided for advising, counseling and other services for EOP students.

Input	1974-75	1975-76	1976-77
Expenditures	\$11,860,308	\$13,640,001	\$15,750,037
Personnel man-years	789.1	822.5	993.4

d. Financial Aid

Financial aid consists of those financial counseling services; analyses of financial needs; administration and disbursement of scholarships, grants, loans and other services that are established to provide financial aid services and assistance to students. This reflects not only the cost of operating such activities, but also the amount of financial aid disbursed to students. The offsetting collections and revenues are shown in the reimbursements program.

Financial aid offices provide information regarding the costs of college attendance and the availability of sources of financial aid. They are responsible for the administration of a complex program of student awards including scholarships, grants, fellowships, loans and employment designed to make it possible for students in need to initiate or continue their academic programs. The student financial aid officer develops written materials describing the various programs for which he has responsibility, initiates applications for federal funds, evaluates student requests, counsels students, makes financial aid awards and submits detailed reports of fund expenditures.

There are several systemwide student financial aid programs which are partially or totally funded by the federal government. These include the National Direct Student Loan, College Work-Study, and Educational Opportunity Grant Programs of the U.S. Office of Education (HEW); the Nursing Student Loan, and scholarship programs of the Public Health Service; and the Law Enforcement Education Loan and scholarship programs of the Department of Justice.

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

Other programs include the State Scholarship, Graduate Fellowship and College Opportunity Grant Programs administered by the California State Student Aid Commission (formerly the Scholarship and Loan Commission) and institutional scholarships, grants, and loans. The state also provides financial assistance to educationally and economically disadvantaged students through the Educational Opportunity Program.

The Federally Insured Student Loan Program (FISL), under which banks make loans guaranteed by the federal government, provides systemwide student financial assistance. Total borrowing by students in the CSUC system under this program for the 1975-76 academic year was approximately \$20 million. The FISL Program is administered by the campus through verification of student registration and financial need to private lending banks.

The total of all programs administered by CSUC is included in the statewide table included in the budget presentation of Higher Education Student Assistance which follows the budget presentation of the Student Aid Commission.

1976-77 Program

State support will continue through the primary programs of the California State Student Aid Commission (state scholarships, graduate fellowships, and college opportunity grants), through matching provisions of federal programs, and through the CSUC-administered Educational Opportunity Program. *The 1976-77 Educational Opportunity Program is proposed to increase by approximately 50 percent, reflecting the Governor's commitment to increase services to disadvantaged students.*

Table X displays details of the state-supported Educational Opportunity Program for 1974-75 through 1976-77.

Input	1974-75	1975-76	1976-77

e. Student Support

Each campus maintains facilities for housing and parking which are totally self-supporting. The special revenue funds are Dormitory Revenue and Auxiliary Enterprise Funds.

As in all special fund operations, the parking program is maintained through the collection of revenue for the use of the facilities. Construction is financed by special revenue bond issues which are liquidated from operating revenues.

TABLE XI

	1974-75	1975-76	1976-77
Total Number of Parking Spaces	81,020	85,652	86,845

TABLE XII

	1974-75	1975-76	1976-77
Dormitory System Capacity	16,012	15,900	15,900

The change in dormitory capacity reflects the deactivation of student dormitories at CSU, Northridge due to student nonuse.

The health services subprogram of student support is concerned with the health and medical needs of students. Accordingly, the campus health centers are part of a total approach to the provision of comprehensive medical and health care.

Basic on-campus health services include: outpatient medical services; X-ray services; a clinical laboratory; physician-prescribed medicines; immunizations; first aid and emergency care; personal health supervision and counseling; health evaluation and review; campus public health service; plus educational, and advisory, administrative, and supplementary services.

Included also within student support are special services such as the operation of bookstores, cafeterias, vending machines, and other retail services which are provided to the student body. These services are tailored to the campus community and provide for student employment as well as contribute to the students' overall campus experience. All such services are provided on a self-supporting basis, at minimal cost to the students and others.

Input	1974-75	1975-76	1976-77
Expenditures	\$57,187,078	\$61,654,650	\$64,303,980

VI. INSTITUTIONAL SUPPORT

Program Objectives and Description

The institutional support program consists of those activities within the institution that provide institutionwide support to the other programs for the day-to-day functioning of the organization. Activities within this program maintain the institution's effectiveness and continuity and ensure that the CSUC system's operations are consistent with public higher education policy as developed by the Legislature, amplified and interpreted by the Governor, administered by the Board of Trustees, and implemented by the chancellor and the campus presidents.

Development of management policies and provisions of communication, personnel, payroll, purchasing and inventory control, accounting, budgeting, legal and other services are provided in this program.

g. Community relations.....	80.9	76.1	76.6	2,170,157	2,363,654	2,470,866

a. Executive Management

This subprogram consists of all central executive-level activities concerned with the management and long-range planning of the entire system. The Trustees assumed responsibility for administration of The California State University and Colleges on July 1, 1961. The board is responsible for policy determination, coordinated planning, management, administration, and control of the state university and colleges system. As the chief executive officer of the Board of Trustees, the chancellor, appointed by the board, is responsible for implementing policies and programs enacted by the trustees, and recommending executive appointments to the trustees.

Campus presidents are appointed by the Board of Trustees based upon the recommendation of the chancellor, and after consultation with the academic senate and the administrators of the campus involved. They are given authority and responsibility over all campus matters within the policy framework established by the Legislature, Governor, Board of Trustees and the Chancellor.

The Trustees' Audit Staff reports directly to the board and is responsible for an ongoing independent management audit of the operations of the campuses and the chancellor's office.

Physical planning and development includes programming, planning, direction, and operation of a statewide plan for the development of physical facilities. This includes presenting capital outlay programs; reviewing, approving and executing capital outlay funding to the campuses; developing new approaches for improving physical development and space management; and with other divisions, conducting special studies relating to space requirements.

Budgeting is concerned with the planning, coordination, preparation, and review of support budgets. Activities involved in the budgeting process are the preparation of instructions and guidelines for development of the annual support budget for each campus, review and analysis of institution support budget requests, providing counsel, advice, and information on budget preparation, and providing program costs and justification data required by interested individuals, agencies, and appropriate review bodies.

The legal services unit advises the trustees, the campuses, and the chancellor and his staff on legal issues and represents them as necessary.

The Academic Senate represents the CSUC facilities for all campuses for the purpose of advising the Board of Trustees and other concerned agencies on matters affecting academic policy. Its members are chosen by the full-time faculty on the individual campuses. The 1976-77 budget contains \$338,330 for support.

Institutional research is to plan, execute and evaluate studies of varying scope and detail to provide an informed and reliable basis for the formulation, implementation and evaluation of educational policies and long-range planning for The California State University and Colleges.

Input	1974-75	1975-76	1976-77
Expenditures.....	\$17,916,492	\$19,756,775	\$20,062,003
Personnel man-years.....	785.7	795	798.2

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

b. Financial Operations

The financial operations subprogram includes those central operations related to the fiscal affairs and fiscal control in The California State University and Colleges including financial aid administration.

Input	1974-75	1975-76	1976-77
Expenditures	\$10,593,397	\$11,040,270	\$12,265,508
Personnel man-years	709.6	706.6	772.2

c. General Administrative Services

This subprogram includes the cost of student admissions and records, employee personnel administration and records, administrative data processing and all other central administrative services provided for in the institutional support program.

Input	1974-75	1975-76	1976-77
Expenditures	\$17,429,892	\$19,360,516	\$20,098,142
Personnel man-years	1,208.2	1,290	1,331.2

d. Logistical Services

Purchasing, inventory, and property control involve preparation of specifications, preliminary negotiation of contracts and leases, preparation of procurement documents, receiving and checking deliveries, preparing stock-received reports, identifying and labeling all equipment, maintaining adequate supply inventories, taking periodic physical inventories, and providing for the maintenance and repair of equipment. Also included is the maintenance and operation of campus utilities and motor vehicles and security and the environmental health and safety of the staff and students. In addition, security is provided for each campus, encompassing building and equipment security, crowd control and crime control.

1976-77 Program

Certain campuses have experienced increased criminal activity in the recent past. This budget provides funds for security officers to seek to reduce crime on "high risk" campuses and for California Law Enforcement Teletype System (CLETS) terminals on the Pomona, Fresno and San Francisco campuses.

Input	1974-75	1975-76	1976-77
Expenditures	\$24,133,674	\$25,937,661	\$28,163,824
Personnel man-years	997.7	996.5	1,023.8

e. Physical Plant Operations

The plant operation and maintenance element includes all activities necessary to maintain the physical facilities of the campuses. The total existing building square footage under custodial care for the system is 24 million square feet. Total existing college acreage is 5,251 acres plus an additional 7,068 agricultural acres. Maintenance of electrical, heating, and plumbing systems, making repairs, painting, grounds maintenance and janitorial services are required for support.

New buildings containing 717,808 square feet will be occupied in 1976-77 and funding of \$1,423,497 is included in this budget to accommodate new personnel and operating expenses.

Input	1974-75	1975-76	1976-77
Expenditures	\$56,799,702	\$61,796,885	\$69,089,819
Personnel man-years	3,174.3	3,462	3,556.4

f. Faculty and Staff Services

This program element consists of the budget allotments for overtime and related faculty and staff service items. Identification of these expenditures facilitates budgetary control.

Input	1974-75	1975-76	1976-77
Expenditures	\$3,622,519	\$3,534,454	\$4,613,989

g. Community Relations

The public affairs programs in The California State University and Colleges maintain communication with the public, business, professional, governmental, cultural, alumni and other constituent groups. Excluded from this subprogram are activities which are designed primarily to provide public service to the community.

Input	1974-75	1975-76	1976-77
Expenditures	\$2,170,157	\$2,363,654	\$2,470,866
Personnel man-years	80.9	76.1	76.6

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

VII. INDEPENDENT OPERATIONS

Program Objectives and Description

The independent operations program collects all those program elements that benefit students and faculty and independent financing agencies but are not directly related to the objectives of an institution of higher education. Currently, any campus facilities and manpower used to provide specialized services to agencies of government and industry are provided on a fully reimbursed basis.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program costs.....	1,132.9	1,064.6	1,185.4	\$45,434,160	\$43,991,579	\$46,561,064

Federal funds	-	-	-	1,126,787	-	-
Reimbursements.....	1,132.9	1,064.6	1,185.4	15,257,309	15,141,579	17,711,064
Foundations:						
Federal funds	-	-	-	18,197,023	18,200,000	18,200,00
Other.....	-	-	-	9,290,927	8,800,000	8,800,00
Auxiliary organizations.....	-	-	-	1,986,241	1,850,000	1,850,000

Program Elements

a. Institutional operations	483.5	525.3	551.8	\$10,042,421	\$10,205,045	\$11,426,582
b. Outside agencies	649.4	539.3	633.6	35,391,739	33,786,534	35,134,482

a. Institutional Operations

Identified are those costs associated with certain projects contracted for and administered through auxiliary organizations of The California State University and Colleges. The expenditures and related reimbursements are either reported by each auxiliary organization or reported as reimbursed activities through the General Fund support budget. Operations like the credit union, college union, and associated student body are included under Institutional Operations.

Input	1974-75	1975-76	1976-77
Expenditures	\$10,042,421	\$10,205,045	\$11,426,582
Personnel man-years	483.5	525.3	551.8

b. Outside Agencies

Outside agencies contain those special projects that are controlled or operated by outside agencies but are housed or otherwise supported by the institution. The projects themselves are sponsored and financed by agencies of the federal government, state government, local community, private and public foundations, and business and industry. The objectives of these projects are prescribed by the sponsoring agency and are independent of the educational mission of The California State University and Colleges. However, significant benefits do accrue to the campus community and the instructional program.

Input	1974-75	1975-76	1976-77
Expenditures	\$35,391,739	\$33,786,534	\$35,134,482
Personnel man-years	649.4	539.3	633.6

SUMMARY

Established as a system in 1960, the California State University and Colleges offers as its primary function bachelor's and master's degrees in the liberal arts and sciences, in applied fields, and in the professions—including the teaching profession. Faculty research is authorized to the extent that it relates to the teaching mission.

The Board of Trustees of the California State Colleges has as one of its major functions the planning of the physical facilities necessary to accommodate the increasing number of students in an orderly manner.

The California State University and College system consists of 19 campuses.

The 1976-77 budget is designed to meet needs in the areas of making existing and funded facilities operable, continuing an orderly planning activity, removing architectural barriers to the physically handicapped, and provide for other critically needed facilities.

CURRENT CAPACITY AND PROJECTIONS OF THE NEED FOR ADDITIONAL CAPACITY

The initial step in determining current capacity is to determine the amount of space available in terms of assignable square feet (ASF) for each room. The appropriate space and utilization standards, depending on the type of room, the discipline by which it is used, and the level of instruction for which it is primarily intended, are then applied to arrive at existing FTE capacity. Lecture and laboratory FTE capacity are summarized on a campuswide basis in Table I.

Projected future classroom and class laboratory space needs are determined by comparing existing lecture and laboratory space with the space requirements of anticipated FTE enrollments in lecture and laboratory courses. Projections of needed or excess FTE capacity at each campus are summarized on a campuswide basis in Table II.

The Board of Trustees, at its November 1972 meeting, revised and restated the enrollment ceilings for each of the 19 campuses. These ceilings, in terms of full-time equivalent students in the academic year, are shown in Table III. Table III also shows the projected FTE enrollment for the 19 campuses.

Enrollment projections for the system are provided by the Department of Finance and are based upon trend extrapolations of age and sex specific participation rates applied to appropriate age and sex groups in the projected statewide population. The future rates are based upon a five-year historical comparison of actual numbers of students in the system with comparable age groups in the estimated total population. The trends are established by extending past experience into the future for a maximum of two years, at which point they are held constant, reflecting a constant relationship of enrollment to population in each age and sex category. This projection is compared to the results of a student flow model which utilizes projected California public and private twelfth-grade graduates as the driving data series, and which takes into account the following: the number of first-time freshmen attending the California State University and Colleges, the numbers of transfers of class level and institution of origin, and the number of continuing and returning students and their rates of survival by class level.

The chancellor's staff then converts these systemwide projections of enrollments into annual full-time equivalent (FTE) students, based upon the average number of units for which students are enrolled equated to a factor of 15 student credit units per full-time student. This total systemwide projection is then allocated to the individual campuses.

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

Trustees of the California State University and Colleges

The Board of Trustees of the California State University and Colleges is charged with the responsibility of governing the state college and university system including the capital outlay program.

MAJOR PROJECTS

Preliminary planning for rehabilitation projects	—	\$150,000 ^{Pg}	—
Master planning	\$-5,927 ^{Ph}	22,037 ^{Ph}	\$190,000 ^{Pg}
	5,383 ^{Pg}	190,000 ^{Pg}	—
	200,192 ^{Ph}	4,808 ^{Ph}	—
The funds are requested for continuing architectural, landscape architectural, and engineering master planning and consulting services. This will provide an average of \$10,000 for each of the 19 operating campuses. The funds will be allocated to the campuses based upon planning needs.			
General studies	36,920 ^{Pg}	—	50,000 ^{Pg}
	39,836 ^{Ph}	60,164 ^{Ph}	—
The funds will be used for topographic surveys, engineering studies, utility studies, traffic studies, and other miscellaneous studies necessary for physical planning of the State University and Colleges.			
Preliminary planning	—	100,000 ^{Pg}	250,000 ^{Pg}
The planning funds are needed for preparing schematic and preliminary plans for projects scheduled for funding working drawings in 1977-1978.			
Remove architectural barriers to the handicapped	37,796 ^{PWCh}	962,204 ^{PWCh}	500,000 ^{PWCEg}
	83,546 ^{PWh}	203,937 ^{PWh}	—
	—	1,500,000 ^{PWCEg}	—
These funds will be used to remove architectural barriers to the handicapped. It is possible that these funds may be used as matching funds for Federal assistance under the provisions of the Vocational Rehabilitation Act.			
Minor construction	554,202 ^{PWCg}	287,888 ^{PWCg}	4,000,000 ^{PWCEg}
	2,256,068 ^{WCh}	4,000,000 ^{PWCEg}	—
	161,253 ^{Pg}	1,743,932 ^{WCh}	—
Funds are requested for minor construction for 1976-77. These funds will be allocated to the campuses for preliminary planning, working drawings, construction and equipment for projects costing \$100,000 or less.

California State College—Bakersfield

The trustees of the California State University and Colleges and the Coordinating Council for Higher Education advised the Legislature in 1965 of the need for the establishment of a California State College in Kern County.

The college opened September 1970 in facilities on its permanent campus and is currently master planned for an enrollment of 12,000 FTE students.

MAJOR PROJECTS

Central plant III.....	\$28,631 ^{PWh}	\$8,369 ^{PWh} 565,000 ^{Cg}	\$7,000 ^{Eg} —
This is the initial and only phase of equipment for this project. The project is scheduled for completion in September 1976.			
Initial cafeteria.....	46,757 ^{Cg} 6,817 ^{Ch}	847 ^{Cg} 1,873,183 ^{Ch}	\$81,000 ^{Eg} —
This is the first of two phases of equipment for this building. The building is scheduled for completion in September 1976.			
Science building II.....	4,564 ^{Wg} 2,879,119 ^{Cg}	— 293,881 ^{Cg}	319,000 ^{Eg} —
This is the first of two phases of equipment for this project. The building is scheduled for completion in September 1976.			
Fine arts building (Little Theatre).....	55,775 ^{PWg} —	97,225 ^{PWg} 5,171 ^{PW1}	1,791,000 ^{Cg} —
This project will provide a 500-seat assembly area with stage; arena theatre and auxiliary areas. The State-supported portion of the project will contain about 12,125 assignable square feet (ASF) and 19,610 gross square feet. The project is scheduled for completion in March 1978.			
Parking.....	29,380 ^{C1}	324,126 ^{C1}	—

California State University—Chico

California State University, Chico, established in 1887, offers courses in teacher education, general education, arts and sciences, and certain occupational fields including engineering and agriculture.

The university is located on a site totaling 119 acres in the City of Chico, with an additional 644 acres in the university farm. The ultimate enrollment for this campus has been set at 14,000 FTE students.

MAJOR PROJECTS

California State College—Dominguez Hills

The California State college, Dominguez Hills, was established as South Bay State College by Chapter 65, Statutes of 1960, First Extraordinary Session. The name was redesignated to California State College at Palos Verdes and finally redesignated to California State College, Dominguez Hills. A 354-acre site in the Dominguez area of southwest Los Angeles was selected by the Trustees of the California State University and Colleges and acquired by the state.

This campus is currently master planned for an enrollment of 20,000 FTE students.

MAJOR PROJECTS

Classroom office building		\$3,955,401 ^{Ch}	\$207,691 ^{Ch}	\$318,000 ^{Eg}

California State University—Fresno

The California State University, Fresno is a five-year institution offering programs in agriculture and general education, and credential programs in elementary and secondary education. The university is located on a site of 1,413 acres northeast of the City of Fresno. The main campus totals 327 acres currently master planned for enrollment of 20,000 FTE students. The balance of 1,086 acres is devoted to agricultural use.

California State University—Fullerton

The California State University, Fullerton is located on a site of 238 acres in the City of Fullerton with a master planned enrollment of 20,000 FTE students to be contained within the existing site. Funds for construction of the first permanent building were appropriated in 1961. This facility, a six-story science building, was completed in the fall of 1963, and housed all of the programs of the university.

Currently, this campus contains facilities which project a modern, high-rise profile in a suburban setting. The university is within ten miles of 70 percent of the population of Orange County, its main service area.

California State University—Hayward

The California State University, Hayward was established by Chapter 1961, Statutes of 1957, as the State College for Alameda County. The trustees have since authorized the change in name to California State University, Hayward. This university offers courses in occupational and professional subjects, bachelor and master degree programs in various liberal art fields, and an elementary and secondary education credentials program. This university occupied its permanent 343-acre site in the fall of 1963. The current master plan calls for campus development on the existing acreage to accommodate an ultimate enrollment of 18,000 FTE student.

MAJOR PROJECTS

Site Development 1977 (Hillary Street relocation).....		—	—	\$16,000 ^{Wg}
This project is for construction of improved campus access and egress roads to a relocated Hillary street. It will be constructed in conjunction with the City of Hayward's construction of Hillary street and is scheduled for completion in September 1978.

California State University—Humboldt

The California State University, Humboldt, is a five-year institution offering both graduate and undergraduate programs in liberal arts, teacher education, and vocational training curricula. The latter includes curriculums in forestry management, fisheries, game management and oceanography. The university is located on a site of approximately 142 acres in the City of Arcata. The university's marine laboratory is located on an additional 1.9 acres in the City of Trinidad 15 miles north of the main campus. The university is currently master planned for an enrollment of 10,000 FTE students.

MAJOR PROJECTS

Utilities to Library Addition	—	—	\$212,000 ^{W Cg}

California State University—Long Beach

The California State University, Long Beach, was established in 1949 as an upper division liberal arts college, and beginning in the fall of 1953 was authorized to offer lower division courses. It is now a five-year multipurpose university offering instruction for undergraduate students and graduate students, through the master's degrees, in the liberal arts and applied science fields and in the professions, including the teaching profession.

In 1951, the university was permanently located on a 322-acre site donated by the City of Long Beach which is adequate to support the current master plan enrollment of 25,000 FTE students.

California State University—Sacramento

The California State University, Sacramento, was established in 1947. The university offers courses leading to bachelor's degrees in business, engineering, government services, laboratory technology, nursing, social service and teacher education. Master's degree programs are available in business administration, public administration, applied life science, social work, engineering, applied mathematics, education, and psychology. In addition, the university offers preprofessional curriculum preparatory to graduate study in law, medicine, dentistry and others, and also has an elementary and secondary education credential program. The university is currently master planned for an enrollment of 25,000 FTE students.

California State College—Sonoma

California State College, Sonoma is a fully accredited five-year institution with programs in the liberal arts, sciences and in the professional fields of teacher education and enterprise management. Its primary service area is Marin, Napa, Sonoma, and the southern parts of Lake Mendocino, and Solano Counties.

Sonoma State College was established by Chapter 66, Statutes of 1960, First Extraordinary Session of the California Legislature. It opened its doors in September of 1961 in rented quarters in what is now the City of Rohnert Park. The college moved to its permanent 220-acre campus two miles east of Rohnert Park in August of 1966.

This campus is currently master planned for an enrollment of 10,000 FTE students.

MAJOR PROJECTS

Library addition	\$37,811 ^{Wg}	—	\$2,696,000 ^{Cg}
This will provide the second phase of permanent library space for the college for a target enrollment of 6,100 FTE. The project provides 620 reader stations and a stack capacity of 138,000 volumes. Also included is permanent space for the computer facility. This building will have approximately 37,000 assignable square feet and a gross area of 50,600 square feet. The project is scheduled for completion in September 1978.

California State College—Stanislaus

California State College, Stanislaus is an accredited institution with programs in the liberal arts and sciences and in the professional fields of teacher education and business administration. Its primary service area is Calaveras, Mariposa, Merced, San Joaquin, Stanislaus, and the Tuolumne Counties.

Stanislaus State College was established by Chapter 1681, Statutes of 1957, and opened its first classes in rented facilities on the Stanislaus County Fairgrounds on September 10, 1960. It began full operations on the permanent campus in July 1965. This campus is master planned for 12,000 FTE students.

California Polytechnic State University—San Luis Obispo

California Polytechnic State University, San Luis Obispo, provides accredited educational programs with emphasis on the applied fields of agriculture, engineering, business, and home economics, together with the closely related supporting fields of physical sciences, natural sciences, and mathematics. A program of required general education courses combines with the college's occupationally centered instruction to prepare graduates for citizenship, leadership, and constructive community living.

The university is located just outside San Luis Obispo at the foot of the Santa Lucia mountain range, 12 miles from the Pacific Ocean. The campus has been gradually augmented to its present 5,099 acres of which 374 acres compose the main campus and the balance is agricultural land.

This campus is currently master planned for an enrollment of 15,000 FTE students.

California State Polytechnic University—Pomona

California State Polytechnic University, Pomona provides accredited educational programs at the university level in agriculture, arts, business, engineering, science, and in the preparation of elementary and secondary teachers.

The Pomona campus, originally founded by W.K. Kellogg as an Arabian horse ranch in 1925, was given to the State of California in 1949 for use by the California State Polytechnic College. Academic instruction began on the 1,098-acre campus in 1956, including 619 acres for agriculture. A master plan to accommodate 20,000 FTE students has been approved.

CALIFORNIA MARITIME ACADEMY

The California Maritime Academy was established in 1929 to educate officers for the United States Merchant Marine. Subsequently the program has been broadened, but it is still directed toward providing well-trained, college-educated officers for the maritime industry.

The four-year program of the academy, which the student attends for 11 months of each year, includes an annual three-month dockside exercise and cruise aboard the training ship, Golden Bear. The students operate the ship under the supervision of the licensed merchant marine officers who comprise the majority of the faculty. These cruises enable midshipmen to meet minimum Coast Guard regulations for time required at sea, and actual ship handling is learned under operating conditions.

The California Maritime Academy is under the direction of a Board of Governors appointed by the Governor. The board adopted the following statement as the goal of the academy:

"... To provide instruction in the nautical sciences, marine engineering and related fields, including all those necessary to provide the highest quality officer for the American Merchant Marine and California industries and licensing therein."

Inherent in the goal of the academy are the following objectives:

1. To educate each midshipman in an accredited college program in nautical science, marine engineering and related fields.
2. To train each midshipman in the skills and knowledge essential to licensing in the American Merchant Marine.

SUMMARY OF PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
I. Instruction	\$568,711	\$679,001	\$789,710
II. Academic Support	333,993	398,764	468,400
III. Student Services	549,997	656,658	749,943
IV. Institutional Support	780,457	931,810	1,011,528
TOTALS, PROGRAMS	\$2,233,158	\$2,666,233	\$3,019,581
Reimbursements	-483,730	-517,143	-687,568
NET TOTALS, PROGRAMS	\$1,749,428	\$2,149,090	\$2,332,013
General Fund	1,463,852	1,802,390	1,944,095
Federal funds ^a	285,576	346,700	387,918
Personnel man-years	91.8	101.6	107.4
Enrollment	312	349	414
Graduates	58	99	9 ^b
Gross cost per student	\$7,157	\$7,639	\$7,294
General Fund cost per student	4,692	5,164	4,690
Annual student tuition and medical fees ^c	480	480	480
Annual student load (semester units) ^d	45	45	45

^a Federal funds and expenditures therefrom are not included in budget totals.

^b Interim class, transition to four-year program.

^c Annual cost of tuition and fees for three full semesters. Room and board costs are \$1,650 for the 11-month, three-semester, school year; out-of-state tuition costs are \$930 per year; student activity fees are \$50 per year.

^d This is the average load for the school year (three semesters).

I. INSTRUCTION

Program Objectives and Description

The instruction program provides general education classes and specialized courses to prepare students for careers as licensed officers in the merchant marine and the maritime industry. The curriculum provides for specialization in either nautical industrial technology or marine engineering technology. An expanded list of options in related fields will be available in 1976-77 covering: Marine Transportation, Marine Business Management, Maritime Specialties, Instrumentation and Automation, Ocean Technology, Ship Construction Technology and Nuclear Technology. Satisfactory completion of the academic program and successful performance on the United States Coast Guard license examination enables a student to graduate from the four-year program with a bachelor of science degree in one of these specialties. Graduates are eligible for reserve commissions in the U. S. Navy or Coast Guard and, after passing Coast Guard examinations, are licensed as third mates or third assistant engineers in the merchant marine.

Students select their area of specialization before starting classes for their first trimester. In the past, the academic program was largely prescribed. Now, electives and optional areas of concentration are available.

Recent developments in the maritime industry are currently being reflected in curriculum development, and considerable effort is being made toward the goal of accreditation of the academy by the Western Association of Schools and Colleges, the Engineers' Council for Professional Development and the National Association of Industrial Technology.

The academy has been granted "candidate" status by the Western Association of Schools and Colleges. The Engineers' Council for Professional Development has awarded "candidate" status to the marine engineering technology curriculum and the National Association of Industrial Technology has provided professional consultation on the nautical industrial technology curriculum.

Practical skill in navigation and ship operations is essential in the development and training of deck and marine engineering officers. Sea training is also one of the requirements for the merchant marine license issued by the Coast Guard. Six months of sea training is required by the Coast Guard during the course of study at the academy. This provides experience and training in navigation, seamanship, ship operations, and communications for midshipmen specializing in nautical industrial technology, and provides experience and training in the operation of marine engineering plants for midshipmen specializing in marine engineering technology.

An additional 1.5 assistant professors and 1 clerk are proposed in 1976-77 to meet the needs of expanding enrollment and a broader curriculum.

II. ACADEMIC SUPPORT

Program Objectives and Description

To provide coordination and support services for the achievement of the academy's academic objectives.

Support services include operation of the library and maintenance of the training ship both in port and at sea. A staff of skilled personnel instruct and assist the midshipmen in performing the tasks required to maintain the ship.

Program Elements

a. Library	1	3	3	\$53,105	\$63,404	\$76,959
b. Ship Operation	9.7	12	12	280,828	335,360	391,441

a. Library

The library develops, obtains and makes available to students and faculty the bibliographical and informational resources necessary to carry out the primary function of instruction. *The library is being expanded to meet the needs of increased enrollment and a broadened curriculum.*

Input

	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	1	3	3	\$53,105	\$63,404	\$76,959

b. Ship Operation

Ship operations provides the basis for practical seamanship, navigation and marine engineering instruction to all students. This includes daily operation and maintenance of the training ship, waterfront facilities, and all assigned small craft. An annual training-at-sea trimester is normally conducted in the months of January, February and March to provide the practical shipboard training necessary to meet Coast Guard licensing requirements. Annual shipyard overhaul and repair of the vessel is paid by the U.S. Maritime Administration (MARAD) and is not included in this budget. *Sufficient funds are provided in the 1976-77 budget to meet extraordinary price increases for fuel oil and marine paint.*

Input

	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	9.7	12	12	\$280,828	\$335,360	\$391,441

III. STUDENT SERVICES

Program Objectives and Description

Included in this program are financial aid, health support, housing, and food. These are needed to support students who are required to live on campus. The academy's daily routine provides residence facilities and meals for the midshipmen on nearly a year-round basis. This continuing requirement is interrupted four times during the year: Christmas recess (two weeks); sea-training trimester (12 weeks); spring recess (one week); and summer recess (three weeks). During 1976-77, third-class midshipmen will remain on campus during the sea training trimester to receive additional academic instruction.

One Student Affairs Officer administratively established in the current year will be continued in 1976-77, and an additional one is proposed along with an increase in temporary help for food services.

CALIFORNIA MARITIME ACADEMY—Continued

IV. INSTITUTIONAL SUPPORT

Program Objectives and Description

The institution requires executive management to direct the activities of the various departments. The administrative staff and plant operation personnel provide the necessary ancillary services in support of the training program provided for midshipmen. The 67-acre campus contains three classroom buildings, residence hall, dining hall, gymnasium, seamanship building, library and administration building, which require continuous maintenance and upkeep. In addition, the following facilities will become operational late in 1976-77: new residence hall, faculty office building, and an auditorium/lecture hall.

Institutional support will be improved during 1976-77 with the addition of a clerk-typist and an increase in janitorial staff.

CALIFORNIA MARITIME ACADEMY—Capital Outlay

STATE BUILDING PROGRAM EXPENDITURES

Actual
1974-75Estimated
1975-76Proposed
1976-77

The California Maritime Academy is located on 67 acres adjacent to the north end of the Carquinez Bridge in Vallejo. In recent years the academy's curriculum objectives have been exhaustively studied by a task force appointed by the Governor. It was decided that the Academy should update the curriculum. Chapter 1069, statutes of 1972 (Dunlap) provided statutory authority for this redirection. A reconstituted Board of Governors developed Master Academic Plan for conversion to a four year curriculum and achieving full academic accreditation. A supporting plan for physical development was prepared and \$6.2 million was appropriated in 1974-75 to provide the physical facilities necessary to meet those objectives.

Following a six-month moratorium on all major capital outlay expenditures and an exhaustive reexamination of the Academy's physical requirements, the Legislature reappropriated \$5.7 million in the 1975-76 fiscal year to complete the most critical portion of the capital outlay improvement program. The construction of these projects will commence in current year. The construction program proposed for 1976-77 consists of three major projects: preliminary plans and working drawings for the corporation yard, phase 2; construction funds for the mechanical utilities system; and preliminary plans and working drawings for area and street lighting.

MAJOR PROJECTS

Master planning	\$10,000 ^M	-	-
Aerial survey	6,000 ^P	-	-
Soil tests, seismic and geological report	10,000 ^P	-	-
Residence hall	54,500 ^{PW}	\$3,320,500 ^{WCE}	-
Electrical distribution system	6,000 ^P	334,000 ^{WC}	-
Faculty office addition	-	446,000 ^{PWCE}	-
Administration addition	-	125,300 ^{PWCE}	-
Physical education facility	-	273,400 ^{PWCE}	-
Commissary remodeling	-	50,100 ^{WC}	-
Library addition	-	209,100 ^{PWCE}	-
Corporation yard, phase I	-	105,700 ^{PWC}	-
Auditorium-lecture hall	-	763,000 ^{PWCE}	-
Program development	13,050 ^P	-	-
Perimeter road	-	5,400 ^{PW}	-
Preliminary plans and working drawings for corporation yard phase II	-	-	\$15,000 ^{PW}
This project will provide approximately 4,000 assignable square feet of space to include multi-trade, paint shop, groundskeeper shop, locker/showers and office area.			
Mechanical utilities system	-	16,000 ^{PW}	264,500 ^C
This project will replace existing gas distribution system, expand domestic water system to new buildings and building additions, extend sanitary sewer system to residence hall, storm drainage from new facilities.			
Electrical distribution area and street lighting	-	-	12,400 ^{PW}
This project will replace deteriorated and obsolete transmission lines, and add area and street lighting for safety in new areas developed under the expansion program.			
TOTALS, EXPENDITURES	\$99,550 ^g	\$5,648,500 ^g	\$291,900 ^g

BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES

The objectives of the Board of Governors of the California Community Colleges are:

1. To give direction, coordination, planning and leadership to California's Community Colleges in order to achieve systematic development toward their fullest potential.
2. To promote quality education in community colleges.
3. To improve district and campus programs through informational and technical services on a statewide basis, while recognizing the community-oriented aspect of California's network of 103 community colleges.
4. To seek adequate financial support while ensuring the most prudent use of public funds.

The Board of Governors of the California Community Colleges has 15 members appointed to four-year terms by the Governor with the advice and consent of the Senate. The board's headquarters is in Sacramento, headed by a chancellor appointed by the board. The agency operates with administrative, professional and clerical staff and has small regional offices working under its occupational education unit in Los Angeles, Oakland and Sacramento.

The board was established by Chapter 1549, Statutes of 1967, to provide statewide leadership to the public community college segment of California higher education.

c. Government, district and public affairs	4.7	5.8	6.1	143,317	154,133	180,901

a. Chancellor's Office

The chancellor represents California Community Colleges in nationwide communications of higher education, reports to the Board of Governors and directs programs and staff operations.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	6.4	6.1	5.8	\$197,133	\$210,687	\$208,913

b. Analytical Studies

The major purpose of this office is to collect and analyze data, to develop a central information system necessary for fiscal and program decisions, and to coordinate the development of a statewide educational plan. Two clerical positions in the current year were limited to December, 1975. Three and one-half positions are proposed in the 1976-77 budget. One and one-half man-years in temporary help are for further development of an automated information system and two clerical positions are for data collection on enrollment projections.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	7.3	7.7	9.2	\$164,638	\$193,123	\$252,387

c. Government, District and Public Affairs

This program maintains relationships with state and local governments, monitors legislative orders and publishes public information. The 1976-77 budget includes an additional position, established administratively in 1975-76, for additional legal workload. There is also a minor shift of 0.3 man-years in temporary help from the Chancellor's Office to this program element.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	4.7	5.8	6.1	\$143,317	\$154,133	\$180,901

^a Federal funds and expenditures therefrom are not included in budget totals.
^b Nongovernmental cost revenues and expenditures are excluded from budget totals.

BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES—*Continued*

II. PROGRAMS AND OPERATIONS

Program Objectives and Description

The Programs and Operations function concerns the development, implementation, and coordination of policies and procedures necessary to fulfill the goals established by the Board of Governors.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program costs.....	89.1	89.7	86.7	\$8,561,372	\$10,207,548	\$14,031,371
Workload adjustments.....	—	4	11.5	—	245,735	458,869

e. (1) Student personnel services.....	7.6	7.9	7.9	207,593	239,704	244,393
e. (2) Extended opportunity programs and services (EOPS)	—	—	—	6,170,500	7,656,018	11,484,027
f. Occupational education.....	32	33	34	860,240	1,183,274	1,290,530

a. Administrative and Fiscal Services

This program element provides all necessary management and staff services for the chancellor's office and administers community college basic aid and equalization apportionments. Local plans are reviewed, coordinated and recommended to the Board of Governors. In addition district claims for reimbursement from the Community College Construction Program Fund are reviewed and processed for payment.

Chapter 940, Statutes of 1973 transferred the responsibility for community college apportionments from the State Department of Education to the Board of Governors of the California Community Colleges. By 1975-76, the responsibility will have been completely transferred. While the initial apportionment activities will be performed manually in 1975-76, subsequent duties will be accomplished through automation.

The 1976-77 budget includes two additional positions, established administratively in 1975-76 to assume the increased workload as a result of apportionments "cap" of the 1975 Budget Act and use of automated apportionments system. This budget provides for continuation of a limited term position approved in the 1975-76 budget for attendance accounting practices and proposes one-half position for duplicating machine operations.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	19.4	23.1	23.6	\$543,329	\$519,813	\$525,770

b. Credentials

Administrators and teachers in California Community Colleges are required to obtain teaching credentials. The credentials office administers this program including application review, processing, revoking and reinstating of credentials. A fee of \$15 is collected per application. The fees received are to be used only to reimburse the operating costs of this element. In the current year a one-time increase of one man-year in temporary help was provided to reduce credential applications backlog. The 1976-77 budget proposes continuation of two limited-term positions approved in the 1975-76 budget and four additional man-years in temporary help for workload increases.

Output	1974-75	1975-76	1976-77
Applications reviewed	24,355	26,000	28,000
Credentials issued.....	19,390	24,000	26,000
Applications processed by hearing committee	550	590	598

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	11.6	10	13	\$277,997	\$269,755	\$340,694

c. Academic Affairs

This element concerns the approval of educational master plans and programs for community colleges and the provision of guidance to colleges in developing and implementing quality instructional programs to meet the wide range of needs of students and communities throughout the state. Academic affairs also coordinates with other sectors of California public higher education in the administration and transfer of community college students into four-year institutions, reviews and recommends on adult classes eligible for state apportionment, devises improved methods of instruction, and assists regional and state level planning by coordinating continuing education and special education programs.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	7.9	9.1	9.1	\$214,295	\$275,291	\$286,081

d. Facilities Planning

Facilities Planning maintains and annually updates 5-year capital outlay programs for the 103 community colleges and 70 districts. Most of the work is mandated by law, with the facilities planning section reviewing and assisting in programming and planning construction projects.

This section also prepares annual capital outlay budgets for presentation to the Department of Finance and the Legislature, approves projects for state funding, approves new campus site proposals, and annually updates facilities inventories for all community colleges.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	10.6	10.6	10.6	\$287,418	\$309,428	\$318,745

BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES—*Continued*DISTRIBUTION OF COMMUNITY COLLEGE AID AT THE
COMMUNITY COLLEGE DISTRICT LEVEL

FIG. 1

Total Community College Fiscal Year ADA
(1970-71 through 1976-77)

BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES—Continued

The Foundation Program is composed of (1) basic aid, which is required by the State Constitution; (2) district aid which represents local effort; and (3) equalization aid, which is provided by the state to assist less wealthy community college districts to achieve the level of the foundation program. The distribution of community college aid for 1974-75 is shown on the preceding page in Fig. 1. The Legislature for 1975-76 placed a limitation on state aid apportionments of 105 percent of the average daily attendance reported for the 1974-75 second principal apportionment. *It is proposed that the 105 percent limitation on state aid apportionments be continued for 1976-77 based upon the average daily attendance subject to the limitation, reported for the 1975-76 second principal apportionment (See Fig. 2). This "cap" is proposed for continuance until statutory reforms to these programs are enacted.*

The apportionment of funds is based upon the average daily attendance (a.d.a.) of students in each community college district.

The enactment of SB 6 (Chapter 209, Statutes of 1973) provides a statutory annual increase in the State Foundation Program in 1975-76 of \$63 per ADA and in 1976-77 of \$66 per ADA.

Largely as a result of this annual adjustment in the Community College Foundation Program and the increase in assistance to new Community Colleges, apportionments will total approximately \$461 million in 1976-77, an increase of more than \$79 million (21%) over that provided in 1975-76. This total is based upon the premise that the 105 percent ADA limit will be continued. Without this limitation apportionments would increase by an estimated additional \$97.4 million or 46.4% over 1975-76, excluding high school adults and ROC/ROP which would have an additional cost of \$65 million.

ADA by Fiscal Year

Community College	1974-75	1975-76	1976-77
Other than defined adults	552,963	592,400	621,800
Defined adults	142,411	149,750	157,050
Totals	695,374	742,150	778,850

GENERAL ANALYSIS

There are 103 colleges in operation, administered by 70 separate governing districts, serving the entire State of California from Eureka and Weed in the north to Chula Vista and Imperial in the south. Two additional community colleges are in process of organization and development.

California Public community colleges by law have three principal purposes: (1) offering transfer courses; (2) providing vocational training; and (3) providing general education. Transfer courses are similar and equivalent to the standard lower division (freshman and sophomore) offerings of the public and private universities and colleges. In addition, each community college attempts to satisfy the needs which are particular to each community.

In recognition of the continuing need for state support of the Community College Capital Outlay Programs, the Legislature enacted and the electorate approved bond issues of \$50 million in 1965, \$65 million in 1968, and \$160 million in 1972, through the issuance of State General Obligation Bonds, solely for Community College Capital Outlay Projects. The remaining funds, from the 1972 bond issue (\$160 million), are expected to be available for capital outlay purposes for the previously chaptered 1972-73, 1973-74, and 1974-75 Budget Acts, including necessary augmentation.

The 1975 Budget Act provided an appropriation of \$20,407,400 from Chapter 176, payable from the Capital Outlay Fund for Public Higher Education; to the Board of Governors of the California Community Colleges to be allocated to the community college districts in accordance with the schedule in the detail of that budget. Projects totaling approximately \$38 million were not supported in the 1975-76 budget because the bond funds (1972 Bond Issue) that traditionally had provided financing for community college construction were exhausted, and until additional financing is authorized by the people, the appropriation of state funds was held to only the minimum essential to maintenance of the capital program.

Included in the 1976-77 budget are 27 districts with a proposed capital outlay program of \$62,039,344. Of this amount, a state appropriation of \$34,059,600 is to be provided from the Community College Construction Program Bond Act of 1976 which is to go before the electorate in June 1976. The remaining funds in the amount of \$27,979,744 are to be district matching funds.

The following constitutes a breakdown of the anticipated \$34,059,600 of State matching funds for 48 projects. The types of projects included in the 1976-77 Capital Outlay Program are as follows:

Site Development, Utilities and Physical Plant

Site development projects totaling \$1,143,900, including off-site development, utilities, and physical plant facilities, are included for three districts and represent 3.4 percent of the total 1976-77 Capital Outlay Program.

General Academic and Lecture Facilities

General academic and lecture facility projects totaling \$4,495,600 in five districts, representing 13.2 percent of the total 1976-77 Capital Outlay Program.

Science and Vocational Technology Facilities

Science and vocational technology programs have been expanding significantly in all districts. Included in this proposed program are additional facilities for eighteen districts, totaling \$18,787,800 which represents 55.2 percent of the total 1976-77 Capital Outlay Program.

Libraries and Resource Materials Centers

The funds for the construction of new, and the expansion of existing, library and resource material centers in six districts total \$7,920,100 and represent 23.3 percent of the total 1976-77 Capital Outlay Program.

Physical Education Facilities

Physical Education project totaling \$11,800 is included for one district.

Remodeling Projects

Remodeling projects totaling \$1,465,000 are included for five districts and represent 4.3 percent of the total 1976-77 Capital Outlay Program.

Other Projects

This group of projects includes: warehouse and maintenance (\$29,700) and site development (\$205,700), which are for two districts. This balance of projects represents .6 percent of the 1976-77 Capital Outlay Program.

MAJOR PROJECTS

Allan Hancock Community College District	\$35,700 ^a	\$931,900 ^b	\$200,200
Allan Hancock College:			
Library Addition	—	—	200,200 ^c
Funds for equipment are requested. This request will provide equipment for the initial and only phase for general library areas and audio visual facilities including a television studio. The project includes remodeling of 9490 assignable square feet and constructing an addition of 15,843 assignable square feet.			
Butte Community College District	-9,849 ^a	72,400 ^a	—

For the list of standard (lettered) footnotes see the end of the Capital Outlay section of the budget.

CALIFORNIA COMMUNITY COLLEGES—Capital Outlay—Continued

STATE BUILDING PROGRAM EXPENDITURES	Actual 1974-75	Estimated 1975-76	Proposed 1976-77
Cabrillo Community College District	224,924 ^a	2,158,600 ^g 66,100 ^a	191,400
Cabrillo College:	—	—	—
Occupational Center	—	—	191,400 ^{E c}
Funds for equipment are requested. This request will provide equipment for the initial and only phase for classrooms, offices, and teaching laboratories for nursing, early childhood, electronics, basic electricity, general metals and welding. The buildings will contain 27,565 assignable square feet.	—	—	—
Cerritos Community College District	187,000 ^a	—	—
Chaffey Community College District	321,900 ^a	\$247,300 ^g	1,967,700
Chaffey College:	—	—	—
Vocational education building	—	—	946,500 ^{W C c}
Funds for working drawings and construction are requested. This project will provide classrooms, offices, and teaching laboratories for drafting, graphic arts, photography, and police and fire science. The building will contain 19,391 assignable square feet.	—	—	—
Auto shop and technical laboratory building	—	—	1,021,200 ^{W C E c}
Funds for working drawings, construction, and equipment are requested. This project will provide classrooms, offices, and teaching laboratories for auto mechanics, metal trades, and welding. The building will contain 18,715 assignable square feet.	—	—	—
Citrus Community College District	492,600 ^a	—	—
Coast Community College District	2,019,822 ^a	113,000 ^g	4,356,600
Golden West College:	—	—	—
Educational unit #1	—	—	1,776,800 ^{W C c}
Funds for working drawings and construction are requested. This project will provide classrooms, offices, and teaching laboratories for art, photography, and police science. The building will contain 22,322 assignable square feet.	—	—	—
Orange Coast College:	—	—	—
Chemistry building	—	—	2,210,700 ^{W C c}
Funds for working drawings and construction are requested. This project will provide classrooms, offices, and teaching laboratories for chemistry. The building will contain 21,198 assignable square feet.	—	—	—
Business education addition	—	—	369,100 ^{W C c}
Funds for working drawings and construction are requested. This project will provide offices and teaching laboratories for business management and marketing. Also includes 1,536 assignable square feet of remodeling in existing building. The addition will contain 4,716 assignable square feet.	—	—	—
Contra Costa Community College District	399,080 ^a	5,066 ^a	2,550,000
Contra Costa College:	—	—	—
Applied arts, administration and maintenance complex	—	—	2,550,000 ^{W C c}
Funds for working drawings and construction are requested. This project will provide classrooms, offices, and teaching laboratories for engineering, textile technology, data processing, journalism, dental assisting, childhood development, police science, culinary arts, and appliance repair. Also includes audio visual service areas, a television studio, maintenance, and storage space. The building will contain 59,850 assignable square feet.	—	—	—
Foothill Community College District	—	—	434,700
DeAnza College:	—	—	—
Classroom building	—	—	434,700 ^{C c}
Funds for construction are requested. This project will provide nine forty-two station and one-hundred station general purpose classrooms with related service area. The building will contain 6,915 assignable square feet.	—	—	—
Fremont-Newark Community College District	108,214 ^a	—	—
Glendale Community College District	855,900 ^a	148,400 ^g	—
Grossmont Community College District	515,500 ^a	274,300 ^a	5,425,700
Monte Vista College:	—	—	—
Site development, phase II	—	—	53,500 ^{W C c}
Funds for working drawings and construction are requested. This project will provide electrical service to the initial phase of buildings on the campus.	—	—	—
Site Development, phase III	—	—	210,600 ^{W C c}
Funds for working drawings and construction are requested. This project will provide the main entrance road, sidewalks, curbs, gutters and landscaping to the first phase of buildings on the campus.	—	—	—
Vocational technical and arts building	—	—	4,663,900 ^{C c}
Funds for construction are requested. This project will provide classrooms, offices, and teaching laboratories for agriculture, architecture, industrial technology, electronics, metal trades, drafting, plastics, engineering, English, mathematics, physical sciences, psychology, social sciences, apprenticeship trades, welding, heavy equipment, and auto mechanics will also include a resource center, food service facilities, and administrative offices. The building will contain 71,054 assignable square feet.	—	—	—
Powerplant and maintenance facility	—	—	497,700 ^{C c}
Funds for construction are requested. This project will provide the central power plant, including chillers, boilers, and switchboards. It will also provide maintenance area and initial warehousing for the campus. The building will contain 4,154 assignable square feet.	—	—	—

CALIFORNIA COMMUNITY COLLEGES—Capital Outlay—Continued

STATE BUILDING PROGRAM EXPENDITURES		Actual 1974-75	Estimated 1975-76	Proposed 1976-77
Hartnell Community College District		1,817,100 ^a	165,900 ^g	—
Imperial Community College District		23,004 ^a	—	—
Kern Community College District		168,158 ^a	—	269,800
Bakersfield College:				
Trade technical addition		—	—	269,800 ^{W C c}
Funds for working drawings, construction, and equipment are requested. This project will provide teaching laboratories and offices for auto mechanics and auto body. The building will contain 13,446 assignable square feet.				
Lassen Community College District		959,272 ^a	\$68,200 ^g	376,600
Lassen College:				
Remodel old science labs		—	—	214,700 ^{W C c}
Funds for working drawings and construction are requested. This project will provide the conversion of science laboratories in a relocatable building to permanent teaching laboratories for construction trades and small engines. The remodeling will consist of 3,406 assignable square feet.				
Second well and water distribution		—	—	161,900 ^{W C c}
Funds for working drawings and construction are requested. This project will provide a thermal well which will furnish hot water to the existing boiler room.				
Los Angeles Community College District		1,462,400 ^a	167,300 ^g 14,103 ^a	464,500
Los Angeles Harbor College:				
Auto technical laboratory addition		—	—	31,900 ^{C c}
Funds for construction are requested. This project will provide additional teaching laboratory space for auto mechanics and related facilities. The addition will contain 3,600 assignable square feet.				
Los Angeles Southwest College:				
Permanent facilities, phase IA		—	—	254,800 ^{E c}
Funds for equipment are requested. This request will provide the initial and only phase of equipment for classroom, offices, and teaching laboratories for physical sciences, life sciences, business, mathematics, English, foreign language, arts, drama, speech, data processing, home economics, and psychology. Also includes equipment for learning resource center, administrative offices, maintenance shops, and health services. The building contains 147,439 assignable square feet.				
West Los Angeles College:				
Classroom and laboratory building		—	—	62,700 ^{E c}
Funds for equipment are requested. This request will provide the initial and only phase of equipment for classrooms, offices, and teaching laboratories for business, biology, foreign language, and data processing. The building contains 29,105 assignable square feet.				
Library and audio visual building		—	—	103,300 ^{E c}
Funds for equipment are requested. This request will provide the initial and only phase of equipment for library study, stack, and service areas, audio visual service areas, a television studio, and office space. The building contains 46,319 assignable square feet.				
Physical education buildings		—	—	11,800 ^{E c}
Funds for equipment are requested. This request will provide the initial and only phase of equipment for physical education shower and locker facilities, faculty offices, and health service space. The building contains 27,126 assignable square feet.				
Los Rios Community College District		531,463 ^a	59,900 ^a	—
Marin Community College District		2,000,000 ^a	201,400 ^g	—
		—	16,000 ^a	—
Merced Community College District		997,370 ^a	—	331,200
Merced College: Welding and metal technology building		—	—	331,200 ^{W C c}
Funds for working drawings and construction are requested. This project will provide teaching laboratories for welding and metal trades. The building will contain 6,554 assignable square feet.				
Napa Community College District		88,200 ^a	—	—
North Orange County Community College District		2,698,600 ^a	570,600 ^g	—
		—	42,684 ^a	—
Palomar Community College District		195,200 ^a	—	1,496,300
Palomar College:				
Life and earth science building		—	—	446,100 ^{W C c}
Funds for working drawings and construction are requested. This project will provide classrooms, offices, and teaching laboratories for biology and geology. The building will contain 6,159 assignable square feet.				
Industrial technology building		—	—	1,050,200 ^{W C c}
Funds for working drawings and construction are requested. This project will provide offices and teaching laboratories for auto technology, metal trades, and building trades. The building will contain 25,212 assignable square feet.				
Pasadena Area Community College District		1,830,000 ^a	218,400 ^g	—

College of Alameda:				
Library building		—	—	242,000 ^{E c}
Funds for equipment are requested. This request will provide the initial and only phase of equipment for library study, stack, carrel, and service areas, audio visual service areas, offices, a language laboratory, and a television studio. The building contains 34,315 assignable square feet.				
Airport facility addition		—	—	836,200 ^{W C c}
Funds for working drawings and construction are requested. This project will provide a classroom, an office, and teaching laboratories for aeronautics. Also will provide minor remodeling to existing 10,288 assignable square feet of teaching laboratories. The building will contain 14,162 assignable square feet.				
Laney College:				
Remodel existing building for art		—	—	326,300 ^{W C E c}
Funds for working drawings, construction, and equipment are requested. This project will provide the conversion of an existing building into offices and teaching laboratories for sculpture, ceramics, and printmaking. The remodeling will consist of 12,139 assignable square feet.				
Merritt College:				
Remodel old library		—	—	296,000 ^{W C c}
Funds for working drawings and construction are requested. This project will provide the conversion of the old temporary library into a seminar room, offices, and teaching laboratories for home economics, business, mathematics, and English. The remodeling will consist of 10,538 assignable square feet.				
Rancho Santiago Community College District		245,151 ^a	—	—
Redwoods Joint Community College District		227,500 ^a	—	646,000
College of the Redwoods:				
Public safety building		—	—	646,000 ^{C E c}
Funds for construction and equipment are requested. This project will provide classrooms, offices, study area, and teaching laboratories for police science. The building will contain 8,179 assignable square feet.				
Riverside Community College District		804,333 ^a	1,075,900 ^g	—

Santa Barbara City College:		-	85,535 ^a	-
Marine technology building		-	-	414,600
Funds for working drawings and construction are requested. This project will provide offices and teaching laboratories for marine technology. The build- ing will contain 5,351 assignable square feet.		-	-	414,600 ^{W C c}
Santa Clarita Community College District		858,800 ^a	99,100 ^g	-
Santa Monica Community College District		-	-	3,356,200
Santa Monica City College:		-	-	3,356,200 ^{W C c}
Library and instructional materials center		-	-	-
Funds for working drawings and construction are requested. This project will provide a general classroom, language laboratory, teaching laboratories for business, library study, stack, carrel, and service areas; a television studio and control room, and audio visual service areas including production, repair, storage and graphics. The building will contain 49,520 assignable square feet.		-	-	-
College of the Sequoias Community College District		21,300 ^a	-	289,700
College of the Sequoias:		-	-	130,000 ^{W C E c}
Remodel south wing of administration building		-	-	-
Funds for working drawings, construction, and equipment are requested. This project will provide remodeling of classrooms into teaching laboratories for art, ceramics, sculpture, graphics, and drafting. Also includes an addition for art kilns and storage. The remodeling will consist of 5,674 assignable square feet and the addition will contain 2,290 assignable square feet.		-	-	-
Welding laboratory		-	-	159,700 ^{W C E c}
Funds for working drawings, construction, and equipment are requested. This project will provide a faculty office and teaching laboratory for welding. The building will contain 4,596 assignable square feet.		-	-	-
Shasta-Tehama-Trinity Joint Community College District		74,593 ^a	-	-
Sierra Joint Community College District		915,134 ^a	85,366 ^a	455,400
Sierra College:		-	-	455,400 ^{W C c}
Metal shop addition		-	-	-
Funds for working drawings and construction are requested. This project will provide classrooms, offices, and teaching laboratories for carpentry, weld- ing, and metal trades. The addition will contain 7,357 assignable square feet.		-	-	-
Siskiyou Joint Community College District		-	-	140,600
College of the Siskiyou:		-	-	140,600 ^{W C E c}
Vocational education building		-	-	-
Funds for working drawings, construction, and equipment are requested. This project will provide classrooms, offices, and teaching laboratories for weld- ing, small engine repair, and agriculture mechanics. The building will con- tain 6,396 assignable square feet.		-	-	-
Solano County Community College District		-37,625 ^a	-	172,900
Solano College:		-	-	172,900 ^{C E c}
Horticulture building		-	-	-
Funds for construction and equipment are requested. This project will provide an office, greenhouse, and teaching laboratories for ornamental horticul- ture. The buildings will contain 3,334 assignable square feet.		-	-	-
Sonoma County Community College District		84,300 ^a	2,086,500 ^g	1,920,600
Santa Rosa Junior College:		-	-	120,600 ^{E c}
Liberal arts building		-	-	-
Funds for equipment are requested. This request will provide the initial and only phase of equipment for classrooms, offices, and teaching laboratories for philosophy, ethnic studies, social science, English, and foreign languages. The building contains 36,098 assignable square feet.		-	-	-
Environmental science building		-	-	1,800,000 ^{W C c}
Funds for working drawings and construction are requested. This project will provide classrooms, offices, and teaching laboratories for geology, oceanog- raphy, meteorology, astronomy, animal science, forestry, horticulture and general agriculture. Also includes a greenhouse and lathhouse. The building will contain 25,369 assignable square feet.		-	-	-
State Center Community College District		1,378,369 ^a	24,900 ^g	-
Sweetwater Community College District		-	158,954 ^a	-

STUDENT AID COMMISSION

The Student Aid Commission, formerly known as the State Scholarship and Loan Commission, is composed of eleven members who are appointed by the Governor, the Assembly Speaker, and the Senate Rules Committee on a rotating basis. Terms are for four years except for two student members whose terms are for two years. The commission administers six active programs of student financial assistance:

Specific program responsibilities include:

1. A scholarship program designed both to enable needy students to attend the California college of their choice and to encourage increased enrollment in private institutions.
2. A fellowship program for needy graduate and professional students in fields with manpower shortages.
3. A grant program to increase the availability of education in California colleges for disadvantaged students.
4. An occupational educational grant program to provide training to skilled workers in critical occupations.
5. A subsidy contract program with independent colleges and universities to increase enrollment in private medical schools.
6. A college education aid program for needy children of law enforcement officers killed or permanently disabled in line of duty.

The commission also is responsible for (1) collections under the State Guaranteed Loan Program, (2) providing supervised clinical training to U.S. citizens who are graduates of foreign medical schools, (3) research to consolidate information on student aid, and (4) grants for students interested in real estate careers.

SUMMARY OF PROGRAM REQUIREMENTS		1974-75	1975-76	1976-77
I. Scholarship Program		\$34,975,925	\$41,906,787	\$48,439,777
II. Graduate Fellowship Program		1,079,640	2,132,540	2,125,905

SIGNIFICANT PROGRAM CHANGES

Program	Description	Awards	Dollars
I. Scholarship—statutory expansion		+ 4,132	\$4,975,058
I. Scholarship—special adjustment to reflect 1975-76 level		-	1,511,700
III. College opportunity grants—statutory expansion		+ 2,346	3,058,094
III. College opportunity grants—50% increase in new grants		+ 2,375	1,801,800
IV. Occupational education and training grants—statutory expansion		+ 320	351,080
XI. Establish student aid information and report program (Ch. 1270/1975)		-	115,246

Along with the change in name and method of appointments, the enactment of Chapter 1270, Statutes of 1975 (AB 1031) increased the awards available to students and added the following responsibilities to the commission's duties:

1. Report every two years on the impact and effectiveness of state-funded programs.
2. Collect and disseminate data regarding financial resources and needs of students and potential students, and the scope and impact of state, federal, and institutional programs.

^a Nongovernmental cost revenues and expenditures are excluded from budget totals.
^b Federal funds and expenditures therefrom are not included in budget totals.

STUDENT AID COMMISSION—Continued

3. Report annually on the aggregate financial needs of students and the degree to which current programs meet those needs, and also report on criteria utilized in distributing funds.
4. Develop and make available a single common application form and a single common financial statement to be used for public student aid funds administered by the commission and public institutions; also approve supplemental forms used by the public institutions.
5. Award grants to part-time students on a full-time equivalency basis.
6. Permit use of grants at more than 500 postsecondary institutions, compared with approximately 240 previously.

Average	\$10,000	\$10,000	\$10,000

I. SCHOLARSHIP PROGRAM

This program assists academically able, financially needy students to complete four years of college. It also assists independent colleges by diverting students from state-supported institutions, which expands educational opportunities by providing alternative choices to students. The funds are distributed directly to schools in the names of the students. Scholarships cover tuition and fees only.

The average state scholarship is estimated at \$1,172 for 1976-77. The scholarships are coordinated with other awards, including federal Basic Educational Opportunity Grants. Federal State Student Incentive Grant funds of \$5,487,057 are included in the budget.

Chapter 1270 Statutes of 1975 increases the number of new awards by 1,167 for a total of 14,395, and the maximum award increases from \$2,500 to \$2,700. This results in an average award increase of \$12.50. Because of the unexpected increases in the costs of 1975-76 awards, the 1976-77 budget contains a special adjustment of \$37 per award.

An additional 2.6 positions in 1975-76, and 12 positions in 1976-77 are included to handle the program increases.

STUDENT AID COMMISSION—Continued

II. GRADUATE FELLOWSHIP PROGRAM

This program, established to assist needy graduate and professional students, emphasizes fields where there are manpower shortages. Chapter 375 Statutes of 1974 requires that consideration be given to academically able students who are disadvantaged and that the parents' income be a factor in determining need. The fellowships are coordinated with awards made by colleges and private groups.

Starting in 1976-77, it is anticipated that disadvantaged students will receive the highest priority in the selection of fellowship winners. The 1976-77 budget proposes to continue the program at the same level as 1975-76.

III. COLLEGE OPPORTUNITY GRANT PROGRAM

Over the years, the number of disadvantaged students in higher education has been disproportionately low. This program assists disadvantaged students who have a potential for college success and community leadership. Selection is made on a basis of need, grades, and student and school recommendations. Grants include funds for tuition and living allowances (subsistence). Federal State Student Incentive Grant funds of \$1,263,807 are included in the budget.

Chapter 1270 Statutes of 1975 increases the number of college opportunity grants by 1,450 to provide 4,550 new grants with a maximum grant of \$3,400. Four new positions in 1975-76 and 8 new positions in 1976-77 are included to handle this program increase.

The budget also reflects an additional 50 percent increase in new awards based on anticipated legislation to be sponsored by the Governor. This will increase the number of new grants by another 2,275 for a total of 6,825 new awards in 1976-77. This is more than double the 3,100 new awards provided during 1975-76. The total number of awards during 1976-77 will be 12,783, an increase of 4,621 over 1975-76, and the total program funding increases from \$9 million in 1975-76 to \$14 million in 1976-77. This reflects the Governor's priority of increasing programs for disadvantaged students.

IV. OCCUPATIONAL TRAINING GRANT PROGRAM

This program is designed to provide skilled workers for critical occupations by supplying postsecondary occupational education aid to needy and talented students. Grants up to \$2,000 for tuition and \$500 for related training costs may be awarded. Selection is made on the basis of need, grades, recommendations, and skill. The budget includes Federal-State Student Incentive Grant funds of \$136,367.

Chapter 1270, Statutes of 1975 added 275 occupational training grants for a total of 975 new grants. To provide for the increased workload, 1.2 positions were added in 1975-76 and 2.5 positions are proposed for 1976-77.

V. GUARANTEED LOAN PROGRAM

The federal government has had direct control over the guaranteed loan program since November 1967, leaving the state with the single responsibility of furnishing administrative services for collecting outstanding loans made before that date. Collection activities are performed by contract with a private collection agency. Costs of these services are reimbursed from interest earned by federal funds deposited in the State Guaranteed Loan Reserve Fund. In 1976-77 0.6 man-year is proposed reflecting a redistribution of staff among smaller programs.

Authority

Education Code Sections 43000 to 43200.

Totals (Guaranteed Loan Reserve Fund)	1.1	1.2	1.8	\$21,771	\$24,197	\$37,372

VI. LAW ENFORCEMENT PERSONNEL DEPENDENTS PROGRAM

This program provides college grants to needy dependent children of law enforcement officers killed or permanently disabled in the line of duty. Awards, in amounts not to exceed \$1,500 per year, cover the costs of tuition and living expenses. In 1976-77, 0.2 man-years is proposed, reflecting a redistribution of staff among smaller programs.

Authority

Labor Code Section 4709.

Totals, Law Enforcement Personnel Dependents (General Fund)	—	—	0.2	\$11,781	\$17,744	\$21,827

VII. MEDICAL STUDENT CONTRACT PROGRAM

This program is designed to encourage private colleges and universities to expand their enrollment of medical students and thus increase the supply of physicians. Medical schools at these institutions become eligible for a state grant for each student enrolled above the 1970-71 level.

Awards provide up to \$12,000 each for the additional students enrolled at Stanford and the University of Southern California medical schools. The attorney general has ruled against participation by the Loma Linda University School of Medicine, and funds previously appropriated to Loma Linda University were reverted in the 1975 budget act.

During 1976-77, one position will be distributed among the Guaranteed Loan Program, Law Enforcement Personnel Dependents Program and the Real Estate Program to reflect the actual distribution of workload among these small programs.

VIII. SUPERVISED CLINICAL TRAINING PROGRAM

This program is designed to provide supervised clinical training to U.S. citizens who are graduates of foreign medical schools. Funds are awarded directly to medical schools for qualified students participating in clinical training programs. This program was continued as a result of the enactment of Chapter 196, Statutes of 1975 (AB 531).

The 1976-77 budget includes 30 grants.

X. REAL ESTATE SCHOLARSHIP PROGRAM

Through the California State University and Colleges, the Commission grants assistance to students interested in a real estate career. The program is financed by interest on a \$200,000 endowment from the Real Estate Fund. The California State University and Colleges system selects students and the Student Aid Commission administers the awards within broad guidelines provided in the Business and Professions Code. In 1976-77, 0.2 man-year is proposed, reflecting a redistribution of staff among smaller programs.

XI. STUDENT AID INFORMATION AND REPORT PROGRAM

Chapter 1270, Statutes of 1975 (AB 1031) assigns two new functions to the Commission.

a. Student Aid Information

The Commission will disseminate information about all institutional, state, and federal programs to potential applicants, with the primary focus on potential applicants with the greatest financial need. \$85,246 and 2.4 new positions are proposed for this purpose.

STUDENT AID COMMISSION—Continued

b. Reporting

The Commission will collect and disseminate various data concerning student financial aid including reporting to the legislature on or before January 1, 1978, and every two years thereafter, on the impact and effectiveness of state-funded programs. The commission will also report on the criteria utilized in distributing available student aid funds. In addition to the Legislature, this report will be made available to the Governor, postsecondary educational institutions and the California Postsecondary Education Commission. The budget includes \$30,000 for contract services in 1976-77 for reporting.

Authority

XII. ADMINISTRATION AND SUPPORT SERVICES

The departmental administration staff provides necessary services for all commission programs. Costs are prorated among the programs. The budget includes 2 additional positions as a result of workload generated by the various program increases. The Commission's use of automated data processing continues to grow. The budget anticipates the completion of the automated payment system and implementation of the new College Opportunity Grant processing system.

HIGHER EDUCATION STUDENT ASSISTANCE

The State of California plays a significant role in directing assistance to students who have the desire to continue their education beyond high school but who, without financial assistance, would find it difficult or impossible to continue. Through the state's many programs, which complement and supplement other resources, assistance is provided to students who attend private as well as public institutions at both graduate and undergraduate levels.

- The various programs through which California provides higher education student assistance include:
- University of California:
 - Educational Opportunity Program
 - Loans, including fee and tuition waivers
 - Presidential Work-Study Program
 - Board of Governors of the California Community Colleges:
 - Extended Opportunity Program and Services
 - Board of Trustees of the State University and Colleges:
 - Educational Opportunity Program
 - Fee and tuition waivers
 - Work-Study Program
 - Department of Veterans Affairs:
 - Educational Assistance Program
 - Student Aid Commission:
 - State Scholarship Program
 - College Opportunity Grant Program
 - Graduate Fellowship Program
 - Occupational Training Grant Program
 - Educational Assistance to Dependents of Deceased or Disabled Peace Officers

In addition, the federal government is providing assistance for a variety of educational assistance programs in all segments of higher education, including private institutions.

Financial assistance is usually provided to individual students through "packages" of assistance, put together at the campus level. The Student Aid Commission and individual campuses coordinate awards to individual students to the extent possible to assure efficient utilization of funds. The assistance package is made up of a combination of grants, loans, work-study, and other aids appropriate to the individual's needs.

As a result of Chapter 1270, Statutes of 1975, the Student Aid Commission will assume increased responsibility for coordinating and reporting on all aspects of student financial assistance in California.

Highlights of Program

The State of California continues to make rapid advances in the scope and magnitude of its financial assistance opportunities to needy students. State programs provide a balanced diversity of financial aid programs to meet the special needs of different groups. The Governor's Budget provides a 50% increase in expenditures for all EOP programs. The budget also allows for a 50% increase in the number of new COG awards. These augmentations reflect the Governor's concern for increasing services to disadvantaged students.

State Scholarships

This program assists academically able, financially needy students to complete four years of college at institutions of their choice. The program indirectly assists independent colleges by diverting students from state-supported institutions. Awards may be used for tuition and fees only. The average state scholarship is budgeted at \$1,172 for 1976-77.

College Opportunity Grants (COG)

The College Opportunity Grant Program is targeted to meet the needs of low-income disadvantaged students who have demonstrated a strong academic record while in high school. A living allowance assists a COG student in meeting the costs of living away from home. A COG student who attended a community college may, in his or her last two years of undergraduate study, receive additional support for tuition costs at any accredited four-year college in California. The number of new awards in 1976-77, based on anticipated legislation to be sponsored by the Governor, will be increased by 50 percent. This will increase the number of new awards to a total of 6,825 in 1976-77, more than double the 3,100 new awards provided in 1975-76.

Graduate Fellowships

The Graduate Fellowship Program provides tuition costs for disadvantaged and talented graduate students. Students who are chosen as graduate fellows may use their fellowships at any accredited school in California. Emphasis is placed in fields where there are manpower shortages.

Occupational Education and Training Grants (OETG)

The Occupational Education and Training Grant Program is unique in that it assists students preparing for a vocational or occupational career. Awards are made to students electing public, private nonprofit and proprietary institutions alike. Students are enrolled in a wide variety of courses of study including, for example, such fields as surgical technician, correctional officer, and secretary.

Educational Opportunity Programs (EOP)

While the state has emphasized freedom of student choice in its financial aid programs by leaving to the student the option of which institution to attend, the state has also provided assistance to students through institution-based programs. The various opportunity programs permit campuses of the three public segments and Hastings College of Law to recruit, counsel, and otherwise assist specially selected low-income disadvantaged students. The 1976-77 expenditures for EOP programs at the three segments and Hastings have been increased by 50% over the levels that would have been available by the traditional funding formulas. It is anticipated that this increase will be used for both the special services that assist EOP students to stay in school and direct grants to students.

During 1975-76, state funds of \$550,000 were planned for expenditure for the University of California EOP program. During 1976-77, state funds of \$825,000 will be available and when matched with Regents funds will increase the EOP program at the University to \$1,650,000.

Federal Programs

In addition to the state and institutionally funded programs, California students also participate in the various federal student aid programs. These programs play a significant role in extending educational opportunities to Californians. The newest of these programs provides Basic Educational Opportunity Grants (BEOG) to financially needy students and has substantially increased the amounts of financial aid to Californians. All potentially eligible students applying for state financial aid are required to apply for BEOG. The amount of BEOG received is taken into account in "packaging" the student. BEOG thus provides the state with the flexibility to allocate funds to more students or to increase the total financial aid package that a student receives. During 1976-77, BEOG will expand to include fourth-year students.

HIGHER EDUCATION STUDENT ASSISTANCE—*Continued*

EDUCATIONAL OPPORTUNITY PROGRAMS

Prior to the 1960's, California's higher education systems served, in disproportionate numbers, a racially and economically stratified segment of the population. During the early part of the decade a white student was twice as likely to become a college freshman as was a member of a racial or ethnic minority.

Throughout the 1960's, individual colleges responded to this situation with localized programs for minority students. This tendency was strengthened by the decisions of the University of California and the California State University and Colleges to begin admitting a limited number of students who showed considerable promise but did not qualify for admission under normal standards. Special efforts were needed to finance these students, to integrate them into the campus, and to alleviate the deficiencies in educational preparation which precluded their regular admission. By 1968 both the university and the state university and colleges had begun substantial Educational Opportunity Programs, and in 1969 the Legislature formally authorized state-funded programs at CSUC (S.B. 1072, Chapter 1336) and the community colleges (S.B. 164, Chapter 1579).

Between 1969-70 and 1973-74 (the latest year for which figures are available) minority enrollment in the public segments increased from 11.6 percent to 21.6 percent. This increase is not wholly attributable to EOP, and reductions in EOP funding would not necessarily result in proportionate declines in minority enrollments. Yet, Educational Opportunity Programs clearly have been major contributors to these changes.

EOP programs in each of the segments share common elements: recruitment, admissions assistance, orientation, financial aid, tutoring, counseling, and other services.

The 1976-77 Governor's Budget proposes a 50 percent increase in expenditures for all Educational Opportunity Programs at the three segments and Hastings. It is anticipated that this increase will be used for both direct grants to students and the special services that assist EOP students to stay in school. These augmentations reflect the Governor's concern for increasing services to disadvantaged students.

The following tables contain further data on the CSUC, Community College and Hastings programs.

CLASSIFICATION OF FUNDS IN THE STATE TREASURY

Revenues and expenditures in the program budget and the summary schedules reflect the activities of many separate funds. Schedules 4 and 5 provide a complete list of these funds. The Index lists those funds for which Fund Conditions are included in the budget and references the page number. General Fund and Special Fund expenditures represent the cost of government and are included in budget totals; and along with selected Bond Funds, are included in the overall expenditure totals.

GENERAL FUND—Used to account for all revenues and activities financed therefrom which are not required by law to be accounted by any other fund. Most state expenditures are financed from the General Fund. Normally, the only difference between the General Fund and the other governmental cost funds is the restriction placed on the use of revenues of the other governmental cost funds.

General Fund Special Accounts—Legislatively created accounts or dedicated revenues within the General Fund. Moneys credited to such accounts may be used only for the purposes specified in the legislation. Revenues and expenditures are included in the General Fund totals in Schedules 3 and 7, but are shown separately in total in Schedule 1 and in detail in Schedule 4. These special accounts are excluded from the General Fund Unrestricted revenues, expenditures, reserves and surplus.

SPECIAL FUNDS—Consists of governmental cost funds used to account for taxes and revenues which are restricted by law for particular functions or activities of government. The funds included in these classifications are primarily for the regulation of businesses, professions and vocations; transportation; law enforcement and capital outlay.

OTHER FUNDS—See Schedule 5 for a list of funds which do not represent a cost of government. Expenditures from these funds are not included in the budget totals. They consist of moneys which were derived from sources other than general or special taxes, licenses, fees or other state revenues. Included are receipts from the Federal Government, funds created for accounting purposes, receipts from sale of lands, or moneys held in trust. These funds are segregated into the following classifications:

Working Capital and Revolving Funds—Funds created to finance internal service activities rendered by a state agency to other state agencies or to local governments for which charges are made at cost. The charges are reflected as expenditures in the budget of the agency receiving the commodity or service.

Public Service Enterprise Funds—Self-supporting activities operated by the State for the benefit of the public. Funds are derived from charges to those who use the service and no support is derived from taxes, licenses or other state revenues.

Bond Funds—Used to account for the receipt and disbursement of proceeds from the sale of bonds and to finance projects for which the bonds were authorized. Expenditures are considered a cost of government at the time interest payments are made and as the bonds are redeemed.

Retirement Funds—Moneys held in trust by the State for retirement benefit payments.

Trust and Agency Funds—Funds holding moneys in trust pending disbursements to trustors, moneys received from the Federal Government to be expended for specific purposes, and other funds which do not derive their sources from taxes or other state revenues, or are in the nature of transitory funds created for the convenience of accounting receipts or disbursements which are not necessarily revenues or expenditures.

SELECTED BOND FUNDS—Included in the overall expenditure totals of Schedules 1, 3 and 7 for budget purposes are expenditures from the following funds:

California Water Resources Development Bond Fund.

Central Valley Water Project Construction Fund.

Community College Construction Program Fund of 1976.

Health Science Facilities Construction Program Fund.

Recreation and Fish and Wildlife Enhancement Fund.

State Beach, Park, Recreational and Historical Facilities Fund (of 1964).

State Beach, Park, Recreational and Historical Facilities Fund (of 1974).

State Clean Water (Bond) Fund.

State Construction Program Fund.

Totals, Veterans Farm and Home Building Bonds			\$2,425,000,000	\$175,000,000	\$942,050,000	\$1,307,950,000
Totals, Self-Liquidating Bonds			\$4,264,303,000	\$375,000,000	\$996,587,000	\$2,892,716,000
TOTALS, ALL GENERAL OBLIGATION BONDS			\$9,275,203,000	\$1,295,900,000	\$2,450,287,000	\$5,529,016,000

^a The state school building issues debt service payments are partially refinanced with funds of the borrowing school districts over a 30- to 40-year repayment period as prescribed by statutes.

^b The California Water Resource Development Bond Act, the San Francisco Harbor Improvement Acts, and the Veterans Bond Acts are public service enterprises which have their own revenues to finance their respective debt service expenditures.

^c Callable on and after July 1, 1951, by lot.

^d Callable on and after July 2, 1955, by lot.

^e Callable on and after January 1, 1941, by lot.

^f Chapter 70, Statutes of 1972, authorizes a reduction in the amount of bonds from \$1,000,000 to \$853,000, and also authorizes a reduction of the San Francisco Harbor Improvement Act of 1913 bonds from \$10,000,000 to \$9,450,000 to eliminate the unsold, unissued bonds and thereby report unsold bonds as zero accountability.

^g The Harbor Development Bond Law of 1958 includes an authorization of \$50,000,000 for San Francisco harbor development and \$10,000,000 for the development of small craft harbors as provided by Chapter 103, Statutes of 1958, First Extraordinary Session.
